1821.

INTRODUCTION (TO VOL. II.),

CONTAINING EXPLANATIONS OF THE CHAIN RULE, WITH SUNDRY ILLUSTRATIONS
RELATING TO EXCHANGE AND BULLION OPERATIONS.

EXCHANGE, which forms the leading subject of this volume, is a science of the first importance both in Commerce and Political Economy. By its direct and common application, foreign debts, loans, and subsidies are paid, and the wealth of nations circulated without the trouble or expense of remitting specie; and, by its more complex operations, (called Arbitrations of Exchange,) great profits are frequently made; and not only private fortunes are thus realized, but even public credit has been sometimes sustained by skilful Cambists and Negotiators.

A science, therefore, so highly interesting to nations, governments, and individuals, ought to be studied by Statesmen and Travellers, as well as by Merchants and all other persons concerned in foreign trade.

The Introduction to the First Volume of this work contains an Exposition of the Theory of Monies, Coins, Weights and Measures; and the Principles and Laws of Exchange are stated in the leading pages of the second volume; but, with a view to render the science still more easy and accessible, the chief methods of calculation are explained and illustrated in the present Introduction.

In order to study Exchanges with advantage, the following Rules should be well understood, namely—The Rule of Three, direct and inverse, single and compound; Fractions, vulgar and decimal; and the Chain Rule. The last mentioned only seems to require elucidation in this place, as all the rest are sufficiently well explained in books of common arithmetic.*

* THE CHAIN RULE (also called the *Rule of Exchange*, *Conjoint Proportion*, and the *Rule of Reduction*,) is indispensably necessary in the higher operations of Exchange, as well as in arbitrations of bullion, specie, and merchandise; and yet it does not appear to have been explained by English Authors with that attention which its great utility merits. Foreign Merchants are generally very expert in their application of this rule to commercial computations: and it is, in a great measure, to this that their acknowledged superiority in the science of Exchange may be attributed.

The CHAIN RULE consists of a series of terms which bear a certain proportion to each other, and which are accordingly arranged in two adjoining columns; the first to the left called *Antecedents*, and the second to the right called *Consequents*.

The Terms are arranged in the way of equations, and connected, as it were, like the links of a chain: and, however numerous they may be, the same result is obtained by one operation as by several statings in the Rule of Three.

This Rule, being chiefly useful in exchanges, is generally explained by examples of foreign monies, weights, or measures, but as such are seldom well understood by learners, they tend rather to obscure than to elucidate the subject. The following common articles are therefore first chosen as better adapted for illustration.

EXAMPLE I.—If 3 lb. of tea be worth 4 lb. of coffee, and 6 lb. of coffee worth 20 lb. of sugar, how many pounds of sugar may be had for 9 lb. of tea?

First, by the Double Rule of Three.

lb. Tea.	lb. Coffee.		lb. Tea.	lb. Coffee.
As 3	: 4	: :	9	: 12

and

lb. Coffee.	lb. Sugar.		lb. Coffee.	lb. Sugar.
As 6	: 20	: :	12	: 40

Hence, 9lb. of tea are worth 40lb. of sugar.

SOLUTION BY THE CHAIN RULE.

Distinguish the several Terms into Antecedents and Consequents, in the following manner:—

1. Enter on the right the given sum or Term on which the operation is to be performed, (which in the foregoing question is 9lb. of tea,) and call this the *Term of Demand*.

2. On the left of this term, and a step lower, enter the first Antecedent, which must be of the same kind or name as the *Term of Demand*, and of the same value as the annexed Consequent; thus, (according to the question,) 3lb. of tea = 4lb. of coffee.

3. In the same manner, let the second Antecedent be of the same name as

the second Consequent, and of the same value as the third Consequent; and so on for any given number of Terms: thus, 6 lb. of coffee = 20 lb. of sugar.

4. The Terms being thus arranged, divide the product of the Consequents by the Product of the Antecedents, and the quotient will be the answer in the denomination of the *last Consequent*. Thus

$$\begin{array}{rcl} & & 9 \text{ lb. tea.} \\ 3 \text{ lb. tea} & = & 4 \text{ lb. coffee.} \\ 6 \text{ lb. coffee} & = & 20 \text{ lb. sugar.} \end{array}$$

Hence $\frac{20 \times 4 \times 9}{6 \times 3} = \frac{720}{18} = 40 \text{ lb. of sugar,—the answer.}$

By the above example it will be seen, that, in the arrangement of Antecedents and Consequents, each article is twice entered, except that sort in which the answer is required, and which is called the *Odd Term*. Here sugar is the Odd Term, and the answer must be in this denomination.

It should be also observed that no two entries of one denomination are in the same column; and, as they are placed in the way of equations, it is manifest that the quantities on both sides, which are equal to one another, are cancelled in the operation; and, therefore, the quotient or answer will be evidently in the denomination of the Odd Term, or last Consequent.

Proof of the Chain Rule.

This Rule may be proved by reversing the operation, that is, by what is called the *Doctrine of Contraries*, beginning with the Answer as the Term of Demand, and making the last Consequent correspond with the first Antecedent. Thus—

$$\begin{array}{rcl} & & 40 \text{ lb. sugar.} \\ 20 \text{ lb. sugar} & \swarrow & 6 \text{ lb. coffee.} \\ 4 \text{ lb. coffee} & \nwarrow & 3 \text{ lb. tea.} \\ & * & \end{array}$$

Then $\frac{40 \times 6 \times 3}{20 \times 4} = \frac{3 \times 3}{1 \times 1} = 9 \text{ lb. of tea.}$

The operation of reducing a statement in this Rule may be abridged by striking out the same numbers when they occur in both columns, or by re-

* The above zigzag line is introduced to exemplify a method sometimes used for connecting the terms of a statement, and is therefore called the *Chain*. Its utility is obvious.

ducing them to a lower denomination where they admit of a common measure or divisor, as in reducing a vulgar fraction to its lowest terms.*

The Chain Rule exemplified by an Operation in Reduction, and also in the Single Rule of Three.

EXAMPLE II.—Let it be required to reduce £2 into farthings, supposing the pound = 20 shillings, the shilling = 12 pence, and the penny = 4 farthings.

$$\begin{array}{rcl}
 & & 2 \text{ Pounds,—Term of Demand.} \\
 1 \text{ Pound} & = & 20 \text{ Shillings.} \\
 1 \text{ Shilling} & = & 12 \text{ Pence.} \\
 1 \text{ Penny} & = & 4 \text{ Farthings,—Odd Term.} \\
 \text{Hence, } \frac{2 \times 20 \times 12 \times 4}{1 \times 1 \times 1} & = & 1920 \text{ Farthings.}
 \end{array}$$

These farthings may be reduced to pounds by reversing the operation as before ; that is, by making 1920 the Term of Demand, and £2 the Odd Term.

EXAMPLE III.—Let it be required to find the value of 7 yards of cloth, if 3 yards of the same be worth 45 shillings.

$$\begin{array}{rcl}
 & & 7 \text{ Yards,—Term of demand.} \\
 3 \text{ Yards} & = & 45 \text{ Shillings,—Odd term.} \\
 \text{Hence, } \frac{45 \times 7}{3} & = & 105s.
 \end{array}$$

From the above examples the principle of the Chain Rule is obvious, and it may be further demonstrated by an algebraic equation.

Thus, suppose x = the number of Shillings sought,

then x = the value of 7 Yards.

and 3 Yards = 45 Shillings.

$$\text{Hence, } 3x = 45 \times 7 = 315$$

$$x = \frac{315}{3} = 105s.$$

Or thus,

$$\text{As } 3 : 45 :: 7 : x$$

$$\text{Hence, } 3x = 315 \text{ and } x = 105s.$$

* In finding a common measure it may be useful to observe the following properties of numbers:—

A number is divisible by 2, if the last figure be even ; it is divisible by 4, if the two last figures be divisible by 4 ; and it is divisible by 8, if the three last figures be divisible by 8.

A number is divisible by 3, if the sum of the digits be divisible by 3 ; it is divisible by 6, if the last figure of such sum be even ; and it is divisible by 9, if the sum of the digits be divisible by 9.

Every number is divisible by 5, if the last figure be a 5 or a cipher ; and all ciphers may be equally suppressed at once from the Antecedents and Consequents.

The following investigation of the Chain Rule may be considered more comprehensive than the foregoing:

Suppose A, B, C, D, &c. to be several sorts of goods; and m, n, p, q , &c. given numbers; and the value of these goods are,

Antecedents.		Consequents.
m A	=	n B
p B	=	q C
r C	=	s D
t D	=	v E

To find what quantity of the last sort is equal to a given quantity of the first; and the reverse.

Let z times the last = y times the first; that is, let $zE = yA$.

Multiply all these equations together; the first side by the first, and the second by the second. Then we have $mA \times pB \times rC \times tD \times zE = nB \times qC \times sD \times vE \times yA$. Whence $mprt z = nqsvy$. Then if the quantity of the last sort be required, $z = \frac{nqsvy}{mprt}$. But if the quantity of the first sort be sought, $y = \frac{mprt z}{nqsv}$.

Whence the following general Rule, which is, in substance, that already given.

General Rule.

Place the Terms in two columns, so that there may not be two of a sort in either column. Divide the product of the numbers in the column which has the Odd Term, and the Term of Demand, by the product of the numbers in the other column. The quotient is the quantity of that sort which stands single.

It should be noticed that in the above demonstration there is no Term of Demand, as in the preceding examples; for here that Term is understood to be unity, and it may be placed over either column, according to the conditions of the question; observing that the product of the Terms of such column must be always the dividend.

It may be also remarked that the Term of Demand is, by some Authors, placed under the Consequents, instead of making it the first link of the chain, as in the present work. In both cases the results are the same; but there is this advantage in placing it above, that it serves as a direction to the first Antecedent, which must be of the same denomination.

By the Chain Rule the Proportions or Ratios between the Weights and Measures of different places may be thus determined :

EXAMPLE IV.—Suppose 10 lb. of London = 11 lb. of Rome, and 26 Marks of Spain = 16 lb. of London, what is the Ratio between the Roman Pound and the Spanish Mark ?

$$\begin{aligned} & 1 \text{ lb. Rome.} \\ 11 \text{ lb. Rome} &= 10 \text{ lb. London.} \\ 16 \text{ lb. London} &= 26 \text{ Marks Spain.} \end{aligned}$$

$$\text{Hence } \frac{1 \times 10 \times 26}{11 \times 16} = \frac{65}{44}. \text{ Therefore 44 lb. of Rome} = 65 \text{ Marks of Spain.}$$

Or thus, let R = Rome, L = London, and S = Spain; then per question,

$$11 \text{ R} = 10 \text{ L, and } 26 \text{ S} = 16 \text{ L.}$$

$$\text{Hence } L = \frac{26 \text{ S}}{16} \text{ and } L = \frac{11 \text{ R}}{10} \therefore \frac{11 \text{ R}}{10} = \frac{26 \text{ S}}{16} \text{ and } 176 \text{ R} = 260 \text{ S, or } 44 \text{ R} = 65 \text{ S.}$$

EXAMPLE V.—Required the Proportion between the Metre of France and the Foot of Cremona, supposing that 48 of the latter = 56 English Feet, and that the Metre = 39,371 English Inches?

$$\begin{aligned} & 1 \text{ Foot of Cremona.} \\ 48 \text{ Feet Cremona} &= 56 \text{ Feet English.} \\ 1 \text{ Foot English} &= 12 \text{ Inches.} \\ 39,371 \text{ Inches} &= 1 \text{ Metre.} \end{aligned}$$

$$\text{Result, } \frac{14}{39,371}. \text{ Hence 14 Metres} = 39,371 \text{ Feet, or } 1 \text{ Metre} = 2,812 \text{ Feet.}$$

In determining Ratios of this kind, it is indifferent which of the Numbers to be compared is made the Leading Term; but when a given quantity or sum of money is to be reduced to another, it should be made the first consequent.

EXAMPLE VI.—Required the sterling value of a Kilogramme of Gold; $\frac{9}{10}$ fine, at £4 per Ounce Troy, $\frac{11}{12}$ fine?

$$\begin{aligned} & 1 \text{ Kilogramme.} \\ 1 \text{ Kilogramme} &= 15434 \text{ Troy Grains.} \\ 480 \text{ Grains} &= 1 \text{ Ounce.} \\ 10 \text{ Ounces Fr. stand.} &= 9 \text{ Ounces fine.} \\ 11 \text{ Ounces fine} &= 12 \text{ English standard.} \\ 1 \text{ Ounce Eng. stand.} &= 4 \text{ Pounds.} \end{aligned}$$

$$\text{Result, } £126:5:6$$

The Chain Rule exemplified by Foreign Monies.

Suppose £1000 sterling is to be remitted to Cadiz, and the direct Exchange is 40d. sterling per Piastre or Dollar of Exchange, but the Remitter wishes to send it through Holland and France; it is required to know which is the most advantageous, the direct or indirect Remittance; the Quotation of the Course of Exchange being as follows?—

London on Amsterdam, 10 Florins 10 Stivers per Pound sterling.

Amsterdam on Paris, 60 Pence Flemish for the Ecu of 3 Francs.

Paris on Cadiz, 15 Francs for 1 Doubloon of 4 Dollars of Exchange.

STATEMENT.

	£1000 Sterling.
1 Pound Sterling	= 10½ Florins.
1 Florin	= 40 Pence Flemish.
60 Pence Flemish	= 3 Francs.
15 Francs	= 1 Doubloon.
1 Doubloon	= 4 Dollars.
Hence $\frac{1000 \times 10,5 \times 40 \times 3 \times 4}{60 \times 15}$	= $\frac{50400}{9}$ = 5600 Dollars.

PROOF.

	5600 Dollars.
4 Dollars	= 1 Doubloon.
1 Doubloon	= 15 Francs.
3 Francs	= 60 Pence Flemish.
40 Pence Flemish	= 1 Florin.
10½ Florins	= 1 Pound Sterling.
Hence $\frac{5600 \times 15 \times 60}{4 \times 3 \times 40 \times 10,5}$	= $\frac{5040000}{5040}$ = 1000 Pounds Sterling.

From this operation it appears that, by the indirect exchange, £1000 sterling will produce 5600 Dollars, which gives the Dollar at 42½d. sterling.

Thus, the direct exchange is more profitable than the indirect to the *Remitter*, because he would obtain 6000 Dollars at 40d. each; whereas, by the circular remittance, he could receive only 5600: while, on the contrary, the indirect exchange would be most advantageous to the *Drawer* in the same proportion. But these different interests will be more fully exemplified under the article *Arbitration of Exchange*.

*New Arrangement of the Chain Rule.**

From the foregoing Examples it is obvious that the terms of the Chain Rule may be arranged horizontally, in the way of Fractions, making the Consequents the numerators and the Antecedents their denominators respectively; and the result may then be determined by multiplication; that is, by the common operation of reducing a compound fraction to an equivalent simple one.

Thus, let the Term of Demand be the numerator of the first fraction, observing that its denominator be of the same kind, and equal in value to the second numerator: the denominator of the second, of the same kind as its numerator, and of the same value as the third numerator; and so on until you arrive at the numerator of the kind sought, which is the Odd Term, and which is, of course, without a denominator.

This may be exemplified by the foregoing problem, p. xi.

Thus, let x = the number sought,

$$\text{Then } x = \frac{\text{£ sterl. } 1000}{1} \times \frac{\text{S.Flem. } 35}{1} \times \frac{\text{D.Flem. } 12}{60} \times \frac{\text{Fr. } 3}{15} \times \frac{\text{Doub. } 1}{1} \times \frac{\text{Doll. } 4}{1} = 5600.$$

Reverse operation.

$$x = \frac{\text{Doll. } 5600}{4} \times \frac{\text{Doub. } 1}{1} \times \frac{\text{Fr. } 15}{3} \times \frac{\text{D.Flem. } 60}{12} \times \frac{\text{S.Flem. } 1}{35} \times \frac{\text{£ st. } 1}{1} = 1000.$$

* This method of arranging the Chain Rule has been recently published at Paris, in *M. Soulet's Exchanges*, edited by *M. Garnier*. The following is his *Formula*:

$$x = \frac{a}{a'} // \frac{b}{b'} // \frac{c}{c'} // \frac{d}{d'} \&c.$$

By this Formula it is understood that a is the Term of Demand. Also, that a' is of the same kind as a , and in equation with b ; that b' is of the same kind as b , and in equation with c ; that c' is of the same kind as c , and in equation with d , and so on.

The signs of equality diagonally placed denote the equality between each denominator and the following numerator. The signs, however, of multiplication in the preceding examples seem to be equally proper.

This new method of arrangement is obviously more concise than the old; but what it gains in brevity it perhaps loses in perspicuity. It may, however, be sometimes used with advantage especially by persons who understand the old method.

Another kind of fractional arrangement is given in *Lacroix's Arithmetic*, where the denominators are removed each one place to the right. The following is his method (adopting *Garnier's* symbols)—

$$x = \frac{a}{a'} \times \frac{b}{b'} \times \frac{c}{c'} \times \frac{d}{d'} \&c.$$

THE USE OF LOGARITHMS AND FIXED NUMBERS IN BULLION AND EXCHANGE OPERATIONS.

Although the application of Logarithms and Fixed Numbers in Exchange Calculations is explained in the present volume, p. 129, yet some additional illustrations and examples may be useful in this part of the work.

The use of Logarithms in all sciences is to diminish labour, as they perform by addition and subtraction what is obtained by the multiplication and division of common numbers. Hence, in the reduction of a statement of the Chain Rule, *if the Logarithms of the Consequents be added together, and from this sum the amount of the Logarithms of the Antecedents be subtracted, the difference will be the Logarithm of the answer.*

Or, *the same result may be obtained by adding to the said sum of the Consequents the arithmetical complement of the said sum of the Antecedents, rejecting ten in the Index.*

Tables of Logarithms are inserted in some books of exchange adapted to the subject; that is, there are negative Logarithms for fractional quantities, as well as positive for whole and mixed numbers; but all such may be deduced from the common tables, by the rules generally given. Thus, the Logarithm of a vulgar fraction is found by *reducing it to a decimal*; or by *subtracting the Logarithm of the Denominator from that of the Numerator*.* (*See Dr. Hutton's Mathematical Tables, p. 132.*)

When fractions occur in the Chain Rule, the most convenient method is to convert them into whole numbers, by *multiplying the fractional quantity by the denominator, and also any term in the other column by the same figure*. Thus, an antecedent of $\frac{7}{12}$, and a consequent of 9 may stand 7 and 108, without altering the ratio. Or, 5 and $11\frac{3}{4}$ may be converted to 20 and 47. This method of clearing a statement of fractions greatly simplifies the operation; and when Logarithms are used there is no advantage in bringing terms to low denominations, unless such may be reduced to unity or expunged altogether; as it is as easy to find the Logarithm of a large number as of a small one.

* Tables of Logarithms, adapted to Exchanges and other commercial purposes, have been published by Gerhardt, of Berlin; Reishammer of Paris; and by Bonhote, Dubost, and Preston, of London.

Fixed Numbers are of great utility in exchanges, whether they are used as Logarithms or not. They are peculiarly convenient in bullion operations where the same kind of questions daily occur, as will be exemplified in the remaining part of this Introduction. But before the following Examples are studied, the Rules of Arbitration (p. 107) should be well understood.

In every long statement by the Chain Rule there are several constant or invariable proportions, as the number of shillings in a Pound, or of Penny-weights in an Ounce; and these may, by the rule of Reduction, be converted into one number only, which is called *Fixed*. Thus, in the foregoing example, p. xi., the figures 12, 3, and 4, are constant, and the Fixed Number thence obtained is 144, which, reduced with the other numbers, will give the solution $16 \times 50 \times 7 = 5600$.

In Example VI. page x. there is but one variable number; viz. £4, the price of an ounce of gold; and if the product of the other consequents be divided by that of the antecedents, the result will be 31,569, which will serve as a Fixed Number for all such questions; and this, multiplied by the price per ounce, will give the answer; thus, $31,569 \times £4 = £126,276$.

Now if the same Kilogramme had been bought at Paris for 3156 Francs 90 Centimes, the ratio between those two prices would give the *Course of Exchange*: for as $126,276 : 3156,90 :: £1 : 25 \text{ Fr.}$ Thus the rate would be 25 Francs for 1 Pound sterling; but it should be observed that although the price of Bullion and the Course of Exchange generally regulate each other, yet extraordinary demands cause variations in their computed proportions, which variations, however, have a general tendency to correct themselves.

In Bullion operations the following proportions will be found useful:

	Eng. Oz. Troy.		Oz. Eng. Stand. fineness.
60 Marks of Hamburgh or Cologne	= 451	1000 Spanish Dollars	= 866 oz. Troy = 835
80 Marks of Amsterdam	= 633	1000 Doubloons	= 868 oz. Troy = 853
61 Oz. Paris, Poids de Marc	= 60	1000 Joanese, or Ports,	= 460
1 Kilogramme	= 32,154	55 English ounces French Gold	= 54
31,1 Grammes	= 1	37 Ditto French Silver	= 36
5 Marks of Spain, or 250 Castellanos	= 37	19 Marks fine Silver, Amsterdam	= 164
8 Marks of Portugal	= 59	34 Marks of Hamburgh Ducats	= 273
144 Oz. of Leghorn, or Florence	= 131	6 Marks fine Silver of Hamburgh	= 65
100 Oz. of Naples	= 86	111 Oz. of Dollars	= 107
11 Oz. of Rome	= 10	48 Oz. of do. = 43 oz. of fine Silver.	

GOLD IN BARS.

*To calculate the Course of Exchange from the Price of Bullion, and the contrary.
Also to find Fixed Numbers for the Solution of such Questions.*

EXAMPLE I.—When Gold is sold at Hamburgh at 104 Sols banco per Ducat of $23\frac{1}{2}$ Carats fine, and at London at 78s. 2d. per standard Ounce, what should be the Course of Exchange, supposing that 67 Ducats make 1 Cologne Mark fine, and that 60 Marks weigh 451 Ounces Troy?

		1 Pound sterling.
1 Pound sterling	=	20 Shillings.
$78\frac{1}{2}$ Shillings sterling	=	1 Ounce standard.
451 Ounces standard	=	60 Marks standard.
47 Marks $\frac{4}{8}$	=	44 Marks $\frac{4}{8}$.
1 Mark	=	67 Ducats.
1 Ducat	=	104 Shillings Lubs Banco.
6 Shillings Lubs B ^o .	=	1 Shilling Flemish.

As the prices of gold are the only variable numbers in the above statement, the Fixed Number may be thus determined :

$$\frac{20 \times 60 \times 44 \times 67}{451 \times 47} = 27,815, \text{ the Fixed Number.}$$

Hence, $27,815 \times 104 \div 78\frac{1}{2} = 37$ Shillings, Flemish (the Course of Exchange) for £1 sterling.

By the above Fixed Number, with the course of exchange and the price of bullion in one place, it is plain that its price may be found in the other place.

EXAMPLE II.—When Gold is sold at Amsterdam at an advance of 17 per cent. on the Tarif price of 355 Florins per Mark fine, and in London at 78s. per standard Ounce, what is the Course of Exchange, supposing that 80 Marks of Amsterdam weigh 633 Ounces English Troy?

		1 Pound sterling.
1 Pound sterling	=	20 Shillings.
78 Shillings	=	1 Ounce standard.
12 Ounces stand.	=	11 Ounces fine.
633 Ounces fine	=	80 Marks of Amsterdam.
1 Mark	=	355 Florins.
100 Florins	=	117 with the Premium.

The invariable numbers in the above statement are

$$\frac{20 \times 11 \times 80 \times 355}{12 \times 633 \times 100} = 8,225 \text{ the Fixed Number, which } \times 117 \div 78 = 12 \text{ Fl. } 6\frac{3}{4} \text{ St. or } 41\text{s. } 1\text{d. Flemish}$$

per Pound sterling, the Course of Exchange.

EXAMPLE III.—What is the Course of Exchange between Paris and London resulting from the price of Gold; viz. 8 per Mille premium on the Tarif-price, (see vol. i. p. 142,) and 78s. per Ounce English standard?

			1	Pound sterling.
1	Pound sterling	=	20	Shillings.
78	Shillings	=	1	Ounce standard.
12	Ounces standard	=	11	Ounces fine.
32,154	Ounces fine	=	1	Kilogramme fine.
1	Kilogramme fine	=	3434 f. 44 c.	Tarif price.
100	Francs	=	100,8	with the Premium.

The invariable numbers in the above statement are $\frac{20 \times 11 \times 3434 \text{ f. } 44}{12 \times 32,154 \times 100} = 19,5823$, the Fixed Number.

Hence $19,582 \times 100,8 \div 78 = 25 \text{ fr. } 30 \text{ c.}$ per Pound Sterling, the Course of Exchange.

EXAMPLE IV.—If the price of Gold at Cadiz be 30 Reals per Castellano of $\frac{22\frac{1}{2}}{24}$ fine; and in London 934½d. per ounce standard, (the Mint price,) what is the Course of Exchange, &c.?

			1	Piastre.
1	Piastre	=	8	Reals.
30	Reals	=	1	Castellano.
44	Castellanos $\frac{45}{48}$	=	45	Castellanos $\frac{44}{48}$.
250	Castellanos	=	37	Ounces Troy.
1	Ounce	=	934½	Pence.

Reduced, gives the Course of Exchange = $37\frac{1}{2}$ d. per Piastre.

The invariable Numbers are $\frac{8 \times 45 \times 37}{44 \times 250} = 14,531$, the Fixed Number.

EXAMPLE V.—If Gold be sold at Lisbon for 1700 Rees per Outava of $\frac{22}{24}$ fine, and in London at the Mint price, what is the Course of Exchange?

			1	Milree.
1	Milree	=	1000	Rees.
1700	Rees	=	1	Outava.
64	Outavas	=	1	Mark.
8	Marks	=	59	Ounces Troy.
1	Ounce	=	934½	Pence.

Reduced, gives $63\frac{1}{2}$ d. per Milree, the Course of Exchange.

The invariable Numbers are $\frac{1000 \times 59}{64 \times 8} = 115,234$, the Fixed Number.

EXAMPLE VI.—If the price of Gold at Leghorn be 108 Lire per Ounce fine, and in London the Mint price, what is the Course of Exchange, &c.?

			1 Pezza.
4 ×	1 Pezza	=	5 $\frac{3}{4}$ Lire × 4 = 23.
	108 Lire	=	1 Ounce fine of Leghorn.
	144 Oz. of Leghorn	=	131 Ounce of London.
	11 Oz. fine	=	12 Ounces standard.
	1 Oz. standard	=	934 $\frac{1}{2}$ Pence.

Reduced, gives 49,37d. per Pezza, the Course of Exchange.

The invariable Numbers are $\frac{23 \times 131 \times 12}{4 \times 144 \times 11} = 5,706$, the Fixed Numbers.

The foregoing Examples solved by Logarithms.

<i>Hamburgh,</i>	Fixed Number,	27,815	Log.	1,44423
	Hamburgh Price, ..	104	Log.	2,01703
	London Price,	78 $\frac{1}{6}$	Ar. Com.*	8,10798
	Course of Exchange	37,091	Log.	1,56929

<i>Amsterdam,</i>	Fixed Number,	8,225	Log.	0,91514
	Amsterdam Price, ..	117	Log.	2,06819
	London Price,	78	Ar. Com.	8,10790
	Course of Exchange,	12,338	Log.	1,09123

<i>Paris,</i>	Fixed Number,	19,582	Log.	9,29186
	Paris Price,	100,8	Log.	3,00346
	London Price,	78	Ar. Com.	8,10790
	Course of Exchange,	25,30	Log.	1,40322

<i>Cadiz,</i>	Fixed Number,	1,201	Log.	0,08310
	London Price,	934,5	Log.	2,97057
	Cadiz Price,	30	Ar. Com.	8,52287
	Course of Exchange,	87,72	Log.	1,57654

* The Arithmetical Complement is found by subtracting the Logarithm of the given Number from 10, and thus the operation is performed by addition only, and with four rows of figures instead of five. See p. 130.

SILVER IN BARS.

To find the Course of Exchange between London and the foregoing Places, resulting from the following Prices of Silver, viz.

Hamburgh,	27 Marks Banco, per Cologne Mark fine.
Amsterdam,	26 Florins, per Mark fine.
Paris,	3 per Cent. Premium on the Tarif price of 218 Fr. 89 c. per Kilogramme fine.
Cadiz,	108 Reals of Plate, per Mark fine.
Lisbon,	990 Rees, per Ounce fine.
Leghorn,	84 Lire, per Libra of 12 Ounces fine.
London,	58 Pence, per Ounce $\frac{37}{40}$ fine.

STATEMENTS AND RESULTS, (see p. xii. and xiv. also p. 19, Vol. II.)

	£ ster.	Pence.	Oz. stan.	Oz. fine.	Mks.	Mks Bo.	S.Flem.	Course of Ex.	Fixed Num.
<i>Hamburgh, . .</i>	$\frac{1}{1}$	$\times \frac{240}{58}$	$\times \frac{1}{40}$	$\times \frac{37}{451}$	$\times \frac{60}{1}$	$\times \frac{27}{3}$	$\times \frac{8}{1}$	$= 36,66$	78,758
<i>Amsterdam, . .</i>	$\frac{1}{1}$	$\times \frac{240}{58}$	$\times \frac{1}{40}$	$\times \frac{37}{633}$	$\times \frac{80}{1}$	$\times \frac{26}{1}$	Flor.	$= 12,57$	28,057
<i>Paris,</i>	$\frac{1}{1}$	$\times \frac{240}{58}$	$\times \frac{1}{40}$	$\times \frac{37}{32,154}$	$\times \frac{218,89}{100}$	$\times \frac{103}{100}$		$= 26,83$	15,113
<i>Cadiz,</i>	Piastre.	Reals.	Mks.	Mks fine.	Oz. st.	Pence.			
	$\frac{1}{1}$	$\times \frac{8}{104}$	$\times \frac{1}{5}$	$\times \frac{37}{37}$	$\times \frac{40}{1}$	$\times \frac{58}{1}$		$= 37,72$	64,000
<i>Lisbon,</i>	Milree.	Rees.	Oz.	Oz. fine.	Oz. st.	Pence.			
	$\frac{1}{1}$	$\times \frac{1000}{990}$	$\times \frac{1}{64}$	$\times \frac{59}{37}$	$\times \frac{40}{1}$	$\times \frac{58}{1}$		$= 58,38$	996,621
<i>Leghorn,</i>	Pezza.	Lire.	Oz. Leg.	Oz. Tr.	Oz. st.	Pence.			
	$\frac{1}{1}$	$\times \frac{53}{84}$	$\times \frac{12}{144}$	$\times \frac{131}{37}$	$\times \frac{40}{1}$	$\times \frac{58}{1}$		$= 46,85$	67,860

There are three variable numbers in each of the foregoing statements; viz. the price of Foreign Bullion, the London Price, and the Course of Exchange. Now, it is obvious that if any two of these prices be given, the third may thence be found by the help of the Fixed Number. Suppose, for example, in the last statement respecting Paris, that F = the Fixed Number, p = the Paris price, l = the London price, and c = the Course of Exchange, then c , l , or p , may be found, the rest being known. Thus

$$c = \frac{Fp}{l} = \frac{15,113 \times 103}{58} = 26,83 \text{ Francs for the } \text{£} 1 \text{ sterling.}$$

$$l = \frac{Fp}{c} = \frac{15,113 \times 103}{26,83} = 58 \text{ Pence per Ounce sterling.}$$

$$p = \frac{cl}{F} = \frac{26,83 \times 58}{15,113} = 103 \text{ Francs per Kilogramme fine.}$$

The above Equations will answer for all other places to which London gives the certain, (see p. 13, vol. ii.) but where it gives the uncertain, as to Cadiz, the following will be the Formulæ, supposing s to represent the Spanish or Cadiz price.

$$c = \frac{Fl}{s} = \frac{64 \times 58}{104} = 37,72 \text{ Pence per Piastre.}$$

$$s = \frac{Fl}{c} = \frac{64 \times 58}{37,72} = 104 \text{ Reals per Mark.}$$

$$l = \frac{sc}{F} = \frac{104 \times 37,72}{64} = 58 \text{ Pence per Ounce.}$$

These Formulæ will apply to operations in Gold as well as Silver, always reckoning the prices in the denominations here laid down; and where the calculations are laborious Logarithms may be introduced with advantage, but, in ordinary cases, common numbers seem more convenient and intelligible.

When speculations are made in Coins, the readiest method is to find their pure contents from the Table of Assays in the present Volume, p. 157.

TABLE OF CONTENTS

VOLUME II

ERRATA.—(Vol. II.)

Page xii. lines 17 and 20, for 35s. Flemish, read $10\frac{1}{2}$ Florins, and for
12d. Flemish, read 40d. Flemish.
47, line 5, for 3 Pfenings, read 18.
49, Francfort Exchange, for 75, &c. read 3 per cent. which is
an agio or discount in comparing 23 Florins with 60
Livres.
75, column 1, line 10, after 34, insert $\times 2,512$.
95, line 9, for 30,467, read 20,467.

Page 142, line 25, for 62 Pence, read 9344.
142, line 26, for 40 Ounces standard, read 12; and for 37
Ounces fine Silver, read 11 Ounces fine Gold.
143, line 12, for 73 Centimes, read 75.
222, Florence, for 339,542, read 339,510.
226, Milan, for 594,530, read 59,453; and for 665,874, read
66,587.
232, Salonica Killow, for 1184 Cubic Inches, read 11840.

N.B. It is recommended that the above Errors be corrected with the Pen before the Work is consulted on any
Question of Business.

EXCHANGE.

EXCHANGE is the act of paying or receiving the money of one country for Exchange. its equivalent in the money of another country, by means of Bills of Exchange. This operation, therefore, comprehends both the réduction of monies and the negotiation of bills; it determines the comparative value of the currencies of all nations; and shows how foreign debts are discharged, loans and subsidies paid, and other remittances made from one country to another, without the risk, trouble, or expense of transporting specie or bullion.

The subject is here considered under the four following heads:—

1.—*Bills of Exchange*; with customs, laws, and regulations relating to the same.

2.—*Principles of Exchange*; comprehending the *Par of Exchange*, with various views of the subject; and the *Course of Exchange*, with the common causes of its fluctuation.

3.—*Monies of Exchange*; with the quotations explained, and rules and examples of calculation.

4.—*Arbitration of Exchange*; with rules and examples for negotiating bills to the greatest advantage: also operations in specie, bullion, and merchandize.

1.—BILLS OF EXCHANGE.

A **BILL** of Exchange is a written order for the payment of a certain sum of Bills of Exchange. money at an appointed time. It is a mercantile contract, in which four persons are mostly concerned, *viz.*

1.—The *Drawer*, who receives the value, and is also called the *Maker* and *Seller* of the Bill.

Bills of Ex-
change.

2.—His debtor in a distant place, upon whom the Bill is drawn, (and who is called the *Drawee*. He also is called the *Acceptor*, when he accepts the Bill, which is an engagement to pay it when due.

3.—The person who gives value for the Bill, who is called the *Buyer*, *Taker*, and *Remitter*.

4.—The person to whom it is ordered to be paid, who is called the *Payee*, and who may, by indorsement, pass it to any other person.

Most mercantile payments are made in Bills of Exchange, which generally pass from hand to hand, until due, like any other circulating medium; and the person who at any time has a Bill in his possession, is called the *Holder*.

When the *Holder* of a Bill disposes of it, he writes his name on the back, which is called *Indorsing*; and the *Payee* should be the first *Indorser*. If the Bill be indorsed in favour of any particular person, it is called a *Special Indorsement*, and the person to whom it is thus made payable is called the *Indorsee*, who must also indorse the Bill if he negotiates it. Any person may indorse a Bill, and every *Indorser* (as well as the *Acceptor* or *Payee*) is a security for the Bill, and may therefore be sued for payment.

The *Term* of a Bill varies, according to the agreement between the parties, or the custom of countries. Some Bills are drawn at sight; others at a certain number of days or months after sight or after date; and some at *Usance*, which is the customary or usual term between different places.

Days of Grace are a certain number of days granted to the *Acceptor* after the term of a Bill is expired. In the British Dominions, three days are allowed.

In reckoning when a Bill, payable after *date*, becomes due, the day on which it is dated is not included; and if it be a Bill payable after *sight*, the day of presentment is not included. When the term is expressed in months, calendar months are understood; and when a month is longer than the succeeding, it is a rule not to go, in the computation, into a third month. Thus, if a Bill be dated the 28th, 29th, 30th, or 31st of January, and payable one month after date, the term equally expires on the last day of February, to which the days of grace must, of course, be added; and, therefore, the Bill becomes due on the 3d of March.

No Bill of Exchange drawn in Great Britain or Ireland can be negotiated, presented for payment, or in any way admitted as good in these countries, that is not written on a proper stamp; and any person drawing, accepting, or paying such a Bill, is liable to a penalty.

LAWS OF EXCHANGE.

The following Laws have been selected from the first legal authorities, and likewise examined and approved by several experienced Merchants, Bankers, and Notaries; and though these Laws apply chiefly to the British Dominions, yet they do not differ essentially from the regulations of other commercial Countries, with respect to ACCEPTING, INDORSING, PAYING, PROTESTING, and RECOVERING BILLS.

ACCEPTING BILLS.

WHEN a Bill is presented for acceptance, it is generally left until the next day; and the common way of accepting is for the Drawee to write his name at the bottom or across the body of the Bill, with the word *accepted*. An acceptance, however, in a slighter way, has been heretofore deemed binding; thus had the Drawee written his name upon any part of the Bill, or the initials of his name, or the day of the month, or merely the word *accepted*, he was considered liable; but by an Act of Parliament passed in 1819, it was declared, "that no person shall be bound or charged as Acceptor of an Inland or Foreign Bill of Exchange, otherwise than by an acceptance of such Bill of Exchange written thereon or on some one part of such Bill, if the same shall consist of more than one part." Accepting Bills.

When two or more persons are in partnership, the acceptance of one binds all the others, if the Bill concerns their joint trade; but if it should be made known to the person who receives the Bill that it concerns the Acceptor only in a distinct interest, he alone, as Acceptor, can be sued.

A clerk, or servant, may accept a Bill for his master, when he has authority for that purpose, or if he usually transacts business of this nature for him; and his acceptance binds the master.

But if the Bill be drawn nominally on the servant, directing him to place it to the account of his master, and if the servant should accept it generally, without specifying that he does it for his master's account, the acceptance binds the servant only, and not his employer.

Accepting
Bills.

When a Bill is drawn for the account of a third person, and is accepted as such, and he fails without making provision for its payment, the Acceptor must discharge the Bill, and can have no recourse against the Drawer.

A Bill may be accepted to be paid at a longer period than is mentioned in the Bill, or to pay a part of the sum only: such an acceptance is binding on him who makes it; but the Holder is at liberty to take it as it is offered, or to act as if acceptance had been entirely refused.

The acceptance may direct payment to be made at a place different from that mentioned in the Bill, as at the house of a banker; in which case, if the Holder should neglect to demand payment within a reasonable time, and the banker should afterwards fail, the Holder must sustain the loss.

When a Bill has been once accepted, the acceptance cannot be revoked, though the Drawer should be found to have failed before the date of the acceptance.

INDORSING BILLS.

Indorsing
Bills.

BILLS payable to bearer are transferred by simple delivery, and without any indorsement; but, in order to transfer a Bill payable to order, the Holder must express his order of paying to another person, which is always done by an indorsement.

An indorsement may be blank or special. A *blank indorsement* consists only of the Indorser's name, and the Bill then becomes transferable by simple delivery; a *special indorsement* orders the money to be paid to some particular person, or to his order: a blank indorsement may always be filled up with any person's name, so as to make it special.

An indorsement may take place at any time after the Bill is issued, even after the day of payment is elapsed.

A person who receives a Bill with a blank indorsement may take it as Indorsee, negotiate it again, or demand payment on his own account, or he may receive the money as agent, or for the account of the Indorser; and the latter, notwithstanding his indorsement, may still appear as Holder in an action against the Drawer or Acceptor.

A special indorsement needs not contain the words, *to order*, and the Bill is negotiable; it may also be restrictive, giving authority to the Indorsee to receive the money for the Indorser, but not transfer the Bill again to another.

An indorsement for part of the money only is not valid, except with regard ^{Indorsing Bills.} to him who makes it: the Drawer and Acceptor are not bound by it.

When the Holder of a Bill dies, his Executors may indorse it; but, by so doing, they become answerable to their Indorsee personally, and not as Executors.

PAYING BILLS.

BILLS should be presented for payment, as well as for acceptance, during the ^{Paying Bills.} usual hours of business, which are generally considered to be from nine o'clock in the morning till six in the evening. The common mode of payment among merchants is by a draft on a banker for the exact amount of the Bill, and signed by the Drawee; but any paper whatever may be refused, except Bank of England notes; and the Bank receives no other.

PROTESTING BILLS.

WHEN acceptance or payment has been refused, the Holder of the Bill should ^{Protesting Bills.} give regular and immediate notice to all the parties, to whom he intends to resort for payment; and if, on account of unnecessary delay, a loss should be incurred by the failure of any of the parties, the Holder must bear the loss.

With respect to the manner in which notices of non-acceptance or non-payment are to be given, a difference exists between Inland and Foreign Bills.

For Foreign Bills, a Protest is indispensably necessary: thus a Public Notary is to appear with the Bill, and to demand either acceptance or payment; and on being refused, he is to draw up an instrument, called a Protest, expressing that acceptance or payment has been demanded and refused, and that the Holder of the Bill intends to recover any damages which he may sustain in consequence. This instrument is admitted, in foreign countries, as a legal proof of the fact.

The Protest on a Foreign Bill should be made in time to be sent off on the next post-day to the place where it was drawn or negotiated; and if it be for non-payment, the Bill must be sent with the Protest.

As to Inland Bills, a Protest is not absolutely necessary to entitle the Holder to recover the amount of the Bill from the Drawer or Indorsee: it is sufficient that he give notice, by letter or otherwise, that acceptance or payment has been refused, and that he does not mean to give credit to the Drawee.

Protesting
Bills.

According to the practice of the London merchants, a Protest is hardly ever made for non-acceptance of an Inland Bill; it is only noted, and, if not paid when it becomes due, it is then protested for non-payment. Notice, however, must be given of the non-acceptance and noting, otherwise the Holder takes the risk upon himself: and if the Protest for non-payment should be omitted, the Holder cannot recover either damages or interest, but merely the amount of the Bill.

If the person who is to accept has absconded, or cannot be found at the place mentioned in the Bill, Protest is to be made in the same manner as if acceptance had been refused.

When an original Bill is lost, and another cannot be had of the Drawer, a Protest may be made on a copy; but if a Bill left for acceptance be lost, the person with whom it was left must bind himself to payment, or else a Protest may be made out immediately.

It is customary, as a precaution against accident or miscarriage, to draw three copies of a Foreign Bill, and to send them by different posts. They are denominated the *First*, *Second*, and *Third of Exchange*; and when any one of them is paid, the rest become void and of no value.

When the Acceptor of a Bill becomes insolvent, or absconds before the term of payment is expired, the Holder may cause a Notary to demand better security, and, on that being refused, to Protest the Bill for want of it. In such cases, however, the most general practice is to wait the regular time till the Bill becomes due.

The damages incurred by non-acceptance and non-payment, besides interest, consist usually of the exchange, re-exchange, commission, and postage, together with the expenses of protest and interest. The exchange is reckoned according to the course at sight, from the place where the Protest is made to the place where the Bill is to be paid by the Drawer; and if it be not paid there, the re-exchange is then reckoned from the same place to that where the Bill is paid, and also double commission. The interest commences from the day when the demand was made.

After a Bill has been protested, it is sometimes accepted by a third person, to save the reputation of the Drawer, or of an Indorser; such an acceptance is called an acceptance *Supra Protest*. The Acceptor then must appear in person, with witnesses, before a Notary, and declare that he accepts it for the honour of such a person, and subscribe the Bill thus—Accepted, *Supra Protest*, in honour of, &c.

The same may happen when the person on whom a Bill is drawn having doubts about the Drawer, protests it, but afterwards accepts it for the honour of one of the Indorsers; in this case the Protest must be sent to the said Indorser without delay.

Protesting
Bills.

The person for whose honour a Bill was accepted, must reimburse the Acceptor the amount of the Bill, commission, and other charges; even though the acceptance should have taken place without his knowledge. If such a person approves of the acceptance, the Bill may be paid without any further Protest; but if he should return no answer, or express his disapprobation of the acceptance, the Bill must be formally protested for non-payment against him to whom the Bill was directed; and, on his persisting to refuse payment, the Acceptor may safely pay it for his account, as he can recover the amount.

RECOVERING BILLS.

THE Drawer, Acceptor, and every Indorser of a Bill, are equally liable to the payment of it; and though the Holder can have but one satisfaction, yet, until such satisfaction is actually had, he may sue any of them, or all of them, either at the same time or in succession, and obtain judgment against them all, till satisfaction be made. Proceedings cannot be staid in any action, but on payment of the debt and of the costs, not only in that action, but in all the others in which judgment has not been obtained; and though the principal sum should be paid by one of the parties, still costs may be recovered in the several actions against the others.

Recovering
Bills.

When acceptance is refused, and the Bill is returned by protest, an action may be commenced immediately against the Drawer, though the regular time of payment be not arrived. His debt, in such a case, is considered as contracted the moment the Bill is drawn: thus, if before the Bill is returned, the Drawer should become a bankrupt, the debt was contracted before the commission of bankruptcy took place.

Nothing will discharge an Indorser from his engagement but the absolute payment of the money; not even a judgment recovered against the Drawer or any previous Indorser, or an execution against any of them, unless the money be paid in consequence.

The Holder of a Bill, in order to entitle himself to recover against an Indorser,

Recovering
Bills.

needs not show that he has made a previous attempt to recover from the Drawer; and this holds good with regard to Inland as well as Foreign Bills.

If any Bill happens to be lost within the time limited for payment, the Drawer is to give another of the same tenor with the first; the person, however, to whom this new Bill is delivered, must give security to indemnify the Drawer against all persons whatsoever, in case the lost Bill should be found.

When a person has indorsed a Bill, and it is re-indorsed to him, he cannot maintain an action against the person to whom he indorsed it.

He that has accepted and duly paid a Bill, without having in his hands any effects of the Drawer, may recover in an action for money paid and laid out for the use of the Drawer.

In an action against the Acceptor of a Bill, it is a general rule that the Drawer's hand-writing is admitted, because the Acceptor is always supposed to be acquainted with the hand-writing of the person whose Bill he accepts. But if the same Bill has been indorsed, the hand-writing of the Indorser or Indorsers must be proved; in case of a blank indorsement, however, the hand-writing of the first Indorser is sufficient. The same takes place in an action by an Indorser against the Drawer.

Proof of the signature of a servant is sufficient to bind the master, when it is proved that the servant has authority to draw, accept, or indorse Bills in his master's name; and a subsequent assent is considered as evidence of such authority. A general custom of the servant's signature and the payment of the master is likewise a sufficient proof of a general authority; and this will continue to bind the master until his determination to the contrary can be generally known.

PROMISSORY NOTES.

Promissory
Notes.

PROMISSORY Notes are, in general, considered in the same light as Inland Bills of Exchange: the resemblance between them is greatest when a Promissory Note is indorsed; for such an indorsement is an order to the maker of the Note to pay the sum mentioned in it to a third person. Thus the first Indorser of the Note corresponds to the Drawer of the Bill, and the Maker to the Acceptor; and in that sense all the laws relating to Bills of Exchange may be applied to Promissory Notes; and they have the same allowance of three days' grace for payment.

When the form of a Bill or Promissory Note is incontestably good, the law is the same for both; yet a Note may be valid in some cases, when a Bill of Exchange is not so: thus a Promissory Note can be made payable out of a particular fund then within the power of the Drawer; neither is it necessary that the time of payment of a Note should be absolutely fixed: thus, Notes have been held to be good which were payable at a certain person's death, or after such a ship should be paid off; in short, at the period of an event physically or morally certain; but should the payment depend on a contingency which may never happen, as if it were payable when such a person should marry, the Note cannot be accounted good.

Promissory
Notes.

BONDS.

A BOND for money is a higher security than a Bill of Exchange or a Promissory Note, as it binds the giver, his heirs and lands, in the first instance; whereas Bills and Notes attach only on personals; and, in case of death, a Bond, as a specialty under seal, is paid before simple contract debts, which Bills and Notes are considered to be.

Bonds.

A Bond may be transferred by a deed of assignment, but not by indorsement, and therefore it is not deemed a negotiable security, like a Bill of Exchange or a Promissory Note. In foreign countries, however, Bills of Exchange only are binding, as before noticed.

BILLS, BONDS, AND NOTES, HOW VOID.

It should be observed that the foregoing laws apply only to debts legally contracted. For no Bill, Note, or Bond, made by a bankrupt, or by an insane person, can be valid; neither by a minor, nor a married woman, except in a few particular cases. Neither is any Bill, Note, or Bond binding when the whole or any part of the consideration shall be for money, or other valuable thing, won by gaming or betting, or lent knowingly for such purposes; or for money lent on usury; that is, at more than the legal interest, which is 5 per cent. per annum.

Bills &c.
how void.

DRAFTS ON BANKERS.

Drafts on
Bankers.

DRAFTS or Checks on Bankers are generally received by merchants as ready cash; and if the party receiving them should not, within a reasonable time, demand payment, he must bear the loss in case the Banker or Drawer should fail in the interim: but what shall be deemed a reasonable time has not been precisely fixed, as it must depend on situation; and, therefore, whenever it becomes a question of law, it is left to the jury, or court, to decide according to the circumstances of the case. The general practice is, to present Checks for payment on the day they are received or dated, and during the hours of banking business, which are from nine o'clock in the morning to five in the afternoon.

If a Check on a Banker be refused payment, he who gave it is bound to make it good; and if it be lost, he must also make it good, on receiving a satisfactory security that the lost Draft will not appear against him.

As a precaution against loss, it is customary to write across a Draft, as soon as received, the Firm of the House into which it is to be paid; by which may be understood that it will not be paid to any other house or person without proper inquiry. This practice is also useful in Clearing.

Clearing.

CLEARING is a method adopted by London Bankers for exchanging Drafts and Bills on each other's houses as they become due and settling the differences. This important operation is performed daily at an office, called the Clearing-House, with great correctness and despatch, and with such method that Bills and Drafts to the amount of £5,000,000 on an average are cancelled at each Clearing, with less than one-twentieth part of that sum in Bank of England Notes.

Clearing, though of modern adoption in England, has been long practised in other countries, particularly in settling Bills of Exchange and other Documents of Credit, at the great Fairs on the Continent. The invention of this method is ascribed to the Florentines, but the practice has been greatly improved by the London Bankers.

II.—PRINCIPLES OF EXCHANGE.

INLAND EXCHANGE.

Inland
Exchange.

By Inland Exchange is understood the act of remitting Bills to places in the same country; by which means debts are discharged more conveniently than by cash remittances.

Suppose, for example, *A.* of London is creditor to *B.* of Edinburgh £100, and *C.* of London debtor to *D.* of Edinburgh £100, both these debts may be discharged by means of one Bill. Thus *A.* draws for this sum on *B.*, and sells his Bill to *C.*, who remits it to *D.*, and the latter receives the amount when due from *B.*—Here, by a transfer of claims, the London debtor pays the London creditor, and the Edinburgh debtor the Edinburgh creditor, and no money is sent from one place to the other. The same would take place if *D.* of Edinburgh drew on *C.* of London, and sold his Bill to *B.* of Edinburgh, who should send it to *A.* of London; the effect, in either case, being merely a transfer of debtors and creditors.*

By the foregoing example, it appears that reciprocal and equal debts, due between two places, may be discharged without remitting specie; and it may be supposed that such an operation is of equal convenience to all parties concerned; but when the debts are unequal, the advantage must be different, as the obligation of remittance is no longer mutual, because the debtor place must pay its balance either by sending Cash or Bills; and as the latter mode is generally preferred, an increased demand for Bills must be the consequence, which enhances their price, as it would that of any other article of sale or purchase.

This is the plain principle of Exchange, and is constantly exemplified in the premium paid for Inland Bills on London, which is the grand emporium of

* In this operation, *A.* is the *Drawer* and *Seller*, *B.* the *Drawee* and *Acceptor*, *C.* the *Buyer* and *Remitter*, and *D.* the *Payee*, if his name be mentioned in the Bill, and he is the Holder when he receives the Bill from *A.*—When *D.*, or any other Holder, presents the Bill for acceptance or payment, he is called the *Presentar*.

Inland
Exchange.

commerce that furnishes most other places in the kingdom with foreign merchandize; and being also the seat of Government, to which the revenue is transmitted, and the residence of numerous landlords, whose rents must be remitted to them from the country, it has generally a large balance of debt in its favour; and as this Balance is usually paid in Bills, a demand for them is created, and therefore a premium is the consequence.

The premium on Inland Bills is mostly commuted for time; that is, for a certain number of days after date or after sight, which varies according to circumstances. Thus, the general term for Bills from Edinburgh on London is 40 days' date, which is valued at about $\frac{1}{2}$ per cent., and is called the *Par Date*. A similar premium or date is allowed for Bills on London drawn in all other distant parts of Great Britain; but Bills, at sight, on any of those places, may be generally had in London without any premium. Thus, the Inland Exchange is constantly in favour of the capital; and the date or term varies according to the greater or less demand for Bills.

FOREIGN EXCHANGE.

Foreign
Exchange.

THE principle of Foreign Exchange is the same as that of Inland, with respect to settling accounts by a transfer of claims, and also by the premium or price of Bills being regulated by the proportion which exists between the demand and supply; but the manner of paying the premium for Foreign Bills differs, and the operation is more complex, owing to the denominations of money not being the same: for, in this case, the value of Bills is estimated by the comparative rate of monies; and the date is, besides, taken into consideration.

In Foreign Exchange, one place always gives another a fixed sum or piece of money for a variable price; the former is called the *certain price*, and the latter the *uncertain price*. Thus, London is said to give to Paris the *certain* for the *uncertain*, that is, the Pound sterling for a variable number of Francs; and to Spain the *uncertain* for the *certain*, that is a variable number of Pence sterling for the Dollar of Exchange. The uncertain price, as quoted at any time, is called the *Rate, or Course of Exchange*.

When the demand in London for Bills on Paris is great, a smaller number of

Francs is given for the Pound sterling, and the contrary; and when there is a demand for Bills on Spain, a greater number of Pence sterling must be given for the Dollar, and the contrary.

Foreign
Exchange.

Again, if the Course of Exchange between London and Paris be 24 Francs for the Pound sterling, and if this number of Francs contains the same quantity of pure silver as 20 Shillings sterling, then the Exchange is considered *at par*; but if Paris should give a higher price, the Exchange is said to be against France, and in favour of England. This is the general mode of judging whether the Exchange is favourable or unfavourable, though it is not always that on which Merchants act or speculate. But before any further explanation is given of the *Course of Exchange*, or the causes of its fluctuations, it may be necessary to state more fully what is to be understood by the *Par of Exchange*, a subject on which there has been much difference of opinion.

PAR OF EXCHANGE.

THE Par of Exchange may be considered under two general heads, viz. the *Intrinsic Par* and the *Commercial Par*, each of which admits of subordinate divisions and distinctions.

Par of
Exchange.

The *Intrinsic Par* is the value of the money of one country compared with that of another, with respect both to weight and fineness.

The *Commercial Par* is the comparative value of the monies of different countries, according to the weight, fineness, and market prices of the metals.

Thus two sums of different countries are *intrinsically* at par, when they contain an equal quantity of the same kind of pure metal; and two sums of different countries are *commercially* at par, when they can purchase an equal quantity of the same kind of pure metal.

This latter equivalence is variously denominated. It has been called by different authors the *Current*, the *Momentary*, the *Rational*, and the *Eventual Par*; and though each of these terms seems to convey a correct idea of its fluctuating and ephemeral nature, yet the word *Commercial* is here adopted as being equally appropriate, and, perhaps, more generally understood.

Par of
Exchange.

There are other *Pars* occasionally noticed by Merchants, such as the *Nominal* or *Estimate Par*, which, though not accurate, is commonly referred to; the *Monetary Par*, in which the current value fixed by authority is considered; the *Proportional Par*, which is the equality of two sums of different countries, compared with the rate of Exchange of a third place, and which is also called the *Arbitrated Price* and the *Political Par*. There is, besides, a *Medium Par* sometimes reckoned: that is, a mean taken between the *Pars* of Gold and Silver Coins.

The intrinsic *Par* of Exchange is, in effect, the *Par* of Coins or the *Metallic Par*; for though the *Monies* of Exchange are, for the most part, imaginary, their value is ascertained by that of the Coins which they represent, or to which they have a known relation or established proportion.

An approximate or average *Par*, may, however, be computed from the relative proportions between Gold and Silver, as taken from the Mint regulations of the places in question; and it may be further observed, that the Mint proportions are considered the best constituted when deduced from the market prices of the precious metals, taken from an average of several years.

Here the important question comes to be considered, "Whether the *Par* of Exchange should be computed from gold or from silver coins?" Messrs. Locke, Harris, and other Authors of the last century, agree, that "the equality of Silver expressed by different denominations of coins should constitute the *Par* of Exchange between any two countries;" but Lord Liverpool, in his "*Treatise on the Coins of the Realm*," maintains, that the proper measure of value should be of that metal in which the principal payments are made, and, therefore that in some countries the *Par* should be computed from Gold, and in others from Silver, according to the kind of Money in which Bills of Exchange are paid. In England, however, Gold has been made the standard of value, by a law of 1816, which enacts that no payment in Silver above two pounds is a legal tender.

A difference of opinion has also existed as to the correctness of establishing a *Par* between Gold Coins and Silver Coins, as these two metals are liable to continual fluctuation in their relative prices. It is, however, obvious, that the intrinsic *Par* of Exchange can be determined only between places which pay their Bills in the same kind of metal. It should be even remarked, that the value of

the same metal differs considerably in different countries, which must be always the case between two places, where one possesses mines, and supplies the other with materials of coinage, as between Spain and France, or between Portugal and England. The difference in such cases is estimated, in ordinary times, according to the expenses of transporting the precious metals; and, thus, from the intrinsic Par and the various charges and prices, the commercial equivalence is computed.

Par of
Exchange.

In determining the Intrinsic Par of Exchange, another question occurs; namely, Whether the computation should be made from *Mint regulations* or from *Assays*? The objection to the first is, that all Mints do not keep strictly to their own laws; and to the second, that there can be no assurance that the Coins to be assayed are proper average specimens. The latter is, perhaps, the least objectionable, and therefore a calculation from accredited Assays is generally preferred. In the present work, the computations are made according to both methods.

COURSE OF EXCHANGE.

THE Course of Exchange is the variable price of the money of one country, which is given for a fixed sum of the money of another country; the latter is called the *certain*, and the former the *uncertain* price, as before stated.

Course of
Exchange.

When London Merchants want to draw or remit Foreign Bills, they meet upon the Royal Exchange, where this kind of business must be transacted. They are distinguished into two classes, called *Drawers* and *Remitters*; the former are also called *Sellers* of Bills and the latter *Buyers* or *Takers*, and like buyers and sellers of all other articles, their interests are opposite. The market is constantly attended by Exchange-Brokers, who generally bring the parties together and settle the price of Exchange for the day, when they have learnt how the market stands with respect to the wants or offers of Buyers and Sellers. It should be observed that the prices of Bullion and Exchange reciprocally determine or at least influence each other.

When the market price of foreign bills is above par, the Exchange is said to

Course of
Exchange.

be favourable to the place that gives the certain for the uncertain, and the contrary; thus, if the par between London and Hamburgh be computed at 35 Shillings Flemish, for 1 Pound Sterling, and the Course of Exchange is at 36 Shillings, the Exchange is said to be in favour of London, and against Hamburgh; and the contrary, of course, takes place if the price be under par.

It should, however, be recollected, that when the Exchange is favourable to a place, it is only so to the Buyers and Remitters of Bills, but it is unfavourable to the Drawers and Sellers.

Thus the interest of the Remitter is identified with that of the place where he purchases the bill, and the interest of the Drawer with that of the place where his funds are established and on which he draws.

It is natural to inquire why such prices are considered favourable or unfavourable, if the Drawers and Remitters, whose interests are opposite, are natives of the same country? The usual answer is, that when the Exchange is against a place, it becomes the interest of Remitters to pay their foreign debts in specie or bullion instead of bills, and the exportation of the precious metals is often considered a national disadvantage.

The fluctuations of Exchange are occasioned by various circumstances, both political and commercial. The principal cause is generally stated to be the Balance of Trade: that is, the difference between the commercial exports and imports of any one country with respect to another. Experience, however, shows that the Exchange may be unfavourable to a country when the Balance of Trade is greatly in its favour; for the demand for Bills must chiefly depend on the Balance of such debts as come into immediate liquidation: that is to say, on the *Balance of Payments*.

Besides, it does not follow that large exports are always successful, or quick in their returns; and even should it be the case, the Balance of Payments may be still unfavourable from political causes: such as foreign Loans, Subsidies, Expeditions, or Colonial Establishments. Rich countries are often liable to have the Exchange turned against them, by the sums which they may have to remit to less opulent states on account of their importations of luxuries.

When any alteration takes place in the Coin or Currency of a Country, the Exchange will of course vary, so as to keep pace or correspond with such alteration. This, however, cannot be considered a change in the price of Bills, but in the Money in which they are bought or sold.

Course of
Exchange.

In times of peace, the Course of Exchange seldom remains long unfavourable to any country, at least beyond the expenses that might be incurred by the transportation of the precious metals; for Bullion is considered the universal currency of Merchants, and Exchange gives it circulation, and thus tends to maintain the level of Money throughout the commercial world.

Although an unfavourable Course of Exchange is generally considered a disadvantage to the place where it prevails, yet the opinion is not always well founded, as much depends on the quantity of Bullion or specie which the country may have to spare: and there is another consideration that renders the question sometimes doubtful, which is, that an unfavourable rate of Exchange operates as an encouragement to the exportation of goods, and as a check against the importation; for the exporter can afford to sell the goods cheaper in proportion to the premium which he receives for his bill; while, on the contrary, the discount on bills from abroad operates as a tax or duty on importation. Thus, Exchange has a natural tendency to correct itself, and may be considered, in ordinary times, as vibrating to restore an equilibrium.

An unfavourable Course of Exchange may therefore be corrected either by the exportation of Bullion or the shipment of Goods—and another method sometimes offers by negotiating Bills through several places, but the latter remedy must fail, if the Exchange be universally unfavourable.

From what has been said of the causes, both commercial and political, which produce the fluctuations of Exchange, and which sometimes counteract or balance each other, the following simple conclusion may be drawn:—that Bills rise or fall in their prices like any other saleable articles, according to the proportion that exists between the demand and the supply.

III.—MONIES OF EXCHANGE.

Monies of
Exchange.

THE Denominations of Money used in the business of Exchange are for the most part Imaginary Monies of Account, varying in some places from those used in domestic trade, and almost universally differing from the Coins from which they originated; for it may be remarked, that coins, as local or national currencies, are subject to frequent alterations, which are easily effected;—while Monies of Exchange, being more widely established, cannot be altered without great inconvenience to the commercial world, and are therefore mostly continued as originally adopted.

This may be exemplified by the Spanish Piastre or Dollar of Exchange, an Imaginary Money of Account, which was at first a Coin (the *Peso Duro*) of 8 Reals of Old Plate; but in the course of time it was altered to 10, and afterwards to $10\frac{5}{8}$ of the same Reals, while in Foreign Exchanges it has been continued at the original value; and hence it is, that 8 Hard Dollars are worth $10\frac{5}{8}$ Dollars of Exchange.

Most other imaginary monies may be accounted for or traced in a similar way; and as their proportions to real coins are known, their intrinsic value may be thence accurately determined.

The Quotations of Exchange are the Lists of Prices transmitted from one country to another for the advice and government of merchants. In these Lists the figures of the uncertain monies only are given, without stating their denominations, or the certain monies which they purchase: all these omissions are however here supplied. The Places in the Quotations are arranged alphabetically, and the explanations followed by numerous examples of calculation.*

* The Calculations of Exchange are performed either by the RULE OF THREE or by the CHAIN RULE. By the former method the sum given to be reduced must be the Third Term of the statement, and the Money into which it is to be reduced, the Second. The First Term must, therefore, be of the same denomination as the Third. Thus, if it be required to reduce 100 Francs into English Money, at 25 Francs per Pound Sterling, say,

• As 25 Fr. : 1 £ Ster. :: 100 Fr. : £4

In solving such questions by the CHAIN RULE, the Sum to be reduced must be the first consequent, and the money into which it is to be reduced, the last consequent. The antecedent must, of course, be of the same denomination as the first consequent. Thus, to reduce 100 Francs at the above price.

100 Francs.

25 Fr. = £1

Then $\frac{100 \times 1}{25} = £4$

LONDON.

MONIES OF EXCHANGE.

Exchanges are computed in Pounds, Shillings, and Pence sterling; and Farthings are also sometimes reckoned.

4 Farthings = 1 Penny; 12 Pence = 1 Shilling; 20 Shillings = 1 Pound sterling.

COURSE OF EXCHANGE,
arranged from Lloyd's List.
January 1, 1820.

EXPLANATION.

AMSTERDAM ..	11 16 ..	LONDON receives 11 Florins 16 Stivers.....	for 1 Pound sterling.
DITTO	38 6 ..	receives 38 Shill. 6 Pence Flemish Banco	for 1 Pound sterling.
FRANCE	25 15 ..	receives 25 Francs 15 Centimes	for 1 Pound sterling.
FRANCFORT....	149 ..	receives 149 Batzen	for 1 Pound sterling.
GENOA.....	44 ..	gives 44 Pence sterling	for 1 Pezza Fuori Banco.
GIBRALTAR....	30 ..	gives 30 Pence sterling	for 1 Current Dollar.
HAMBURGH....	36 2 ..	receives 36 Shillings 2 Pence Flemish ..	for 1 Pound sterling.
LEGHORN.....	51½ ..	gives 51½ Pence sterling	for 1 Pezza of 8 Reals.
LISBON	52 ..	gives 52 Pence sterling.....	for 1 Milree, legal money.
MALTA.....	46 ..	gives 46 Pence sterling	for 1 Dollar of Exchange.
NAPLES	39 ..	gives 39 Pence sterling	for 1 Ducato di Regno.
PALERMO.....	116 ..	gives 116 Pence sterling	for 1 Ounce.
RIO JANEIRO ..	56 ..	gives 56 Pence sterling.....	for 1 Milree, effective.
SPAIN	35 ..	gives 35 Pence sterling	for 1 Dollar of Exchange.
VENICE.....	27 ..	receives 27 Italian Livres.....	for 1 Pound sterling.
VIENNA&TRIESTE	10 15..	receives 10 Florins 15 Creutzers.....	for 1 Pound sterling.
DUBLIN	10½ ..	receives 110½ Pounds Irish.....	for 100 Pounds British.

[For the usances, days of grace, &c. see LONDON, vol. i.]

LONDON ON AMSTERDAM.

Reduce 2401 Florins 17 Stivers 8 Pennings into English money; exchange at 12 Florins 4 Stivers per £ sterling.

The Exchanges between Bremen and other places are similar to the above, as may be seen by the Quotation.

CONSTANTINOPLE.

MONIES OF EXCHANGE.

Exchanges are computed in Piastres, Paras, and Aspers; or in Piastres and Aspers; sometimes in Piastres and half Paras, or in Piastres and Minas.

3 Aspers=1 Para; 40 Paras, or 120 Aspers=1 Piastre, or Turkish Dollar.

80 half Paras, or 100 Minas, also called Aspers=1 Piastre.

COURSE OF EXCHANGE,
From the Constantinople Quotation.
January, 1820.

EXPLANATION.

AMSTERDAM .. 115	..	CONSTANTINOPLE	gives 115 Paras		for 1 Florin.
FRANCE 14½	..	—————	receives 14½ Sols		for 1 Piastre.
GENOA 44	..	—————	gives 44 Paras		for 1 Lira fuori banco.
HAMBURGH.... 20	..	—————	receives 20 Grotes Flemish		for 1 Piastre.
LEGHORN 283	..	—————	gives 283 Paras		for 1 Pezza of 8 Reals.
LONDON 35	..	—————	gives 35 Piastres		for £1 sterling.
MALTA 124	..	—————	gives 124 Paras		for 1 Scudo.
RUSSIA..... 73	..	—————	receives 73 Copecs		for 1 Piastre.
SMYRNA 100½	..	—————	receives 100½ Piastres	...	for 100 Piastres.
TRIESTE 140	..	—————	gives 140 Paras		for 1 Florin current.
VENICE 80	..	—————	receives 80 Centimes		for 1 Piastre.
VIENNA 140	..	—————	gives 140 Paras		for 1 Florin current.

[For usances and other customs relating to Bills of Exchange, see CONSTANTINOPLE, vol. i.]

CONSTANTINOPLE ON AMSTERDAM.

Reduce 2904 Florins 12 Stivers 2 Pennings into Turkish money; exchange at 61 Paras per Florin.

Result as above.

COPENHAGEN.

MONIES OF EXCHANGE.

Exchanges are computed here in Rixdollars, Marks, and Skillings Danish; but sometimes in Rixdollars, Marks, and Schillings Lubs. Pfenings are also occasionally reckoned.

12 Pfenings = 1 Skilling.

16 Skillings = 1 Mark.

6 Marks Danish, or 3 Marks Lubs = 1 Ryksdaler, or Rixdollar.

Thus 2 Pfenings, Skillings, or Marks Danish = 1 Pfening, Schilling, or Mark Lubs.

COURSE OF EXCHANGE,
From the Copenhagen Quotation.

EXPLANATION.

AMSTERDAM.. 143	 COPENHAGEN	gives	143 Rixdollars Danish currency..	for 100 Rdrs.
FRANCE 25	 —————	gives	25 Skillings Danish.....	for 1 Franc.

N.B. The Exchanges of Dantzic with London and Paris are deemed too simple to require illustration.

See Quotation.

FRANCE.

MONIES OF EXCHANGE.

Exchanges are computed here in Francs and Centimes ; or in Livres, Sous, and Deniers.

10 Centimes = 1 Decime ; 10 Decimes, or 100 Centimes = 1 Franc ; 12 Deniers = 1 Sou or Sol ;
20 Sous = 1 Livre Tournois ; 80 Francs = 81 Livres ; 3 Livres, or 3 Francs = 1 Ecu of exchange.

COURSE OF EXCHANGE,
From the Paris Quotation.
January, 1820.

EXPLANATION.

AMSTERDAM..	53 $\frac{3}{4}$	..	PARIS receives	53 $\frac{3}{4}$ Grotes Flemish	for 1 Ecu of 3 Francs.
AUGSBURG ..	249	..	— gives	249 Centimes	for 1 Florin current.
BASIL	1 perte	..	— gives	101 Livres	for 100 Livres.
BERLIN.....	3 80	..	— gives	3 Francs 80 Centimes .	for 1 Rixdollar.
FRANCFORT ..	75	..	— receives	75 Rixdollars current ..	for 100 Ecus.
GENEVA	162	..	— gives	162 Francs	for 100 Livres current.
GENOA	465	..	— gives	465 Centimes	for 1 Pezza of 5 $\frac{1}{4}$ Lire.
HAMBURGH ..	185	..	— gives	185 Francs	for 100 Marks banco.
LEGHORN	503	..	— gives	503 Centimes	for 1 Pezza of 3 Reals.
LISBON	520	..	— receives	520 Rees	for 1 Ecu of 3 Francs.
LONDON	24	..	— gives	24 Francs	for £1 sterling.
MILAN	8 6	..	— receives	8 Lire 6 Soldi	for 6 Francs.
NAPLES	4 20	..	— gives	4 Francs 20 Centimes..	for 1 Ducato di regno.
SPAIN	15 40	..	— gives	15 Francs 40 Centimes..	for 1 Doubloon of exchange.
VIENNA	257	..	— gives	257 Francs	for 100 Florins effective.

FRANCE ON LEGHORN.

Reduce 760 Pezze, 7 Soldi 6 Denari into French money; exchange at 5 Francs 20 Centimes per Pezza of 8 Reals.

Pezza	Francs	•	Pezze	Sol.	Den.	Francs	Cent.
As 1	: 5,20	::	760	7	6	: 3953	95
			5,20				
			15200				
			3800				
5 Soldi	= $\frac{1}{4}$	...	130				
2 Soldi 6 Denari	= $\frac{1}{2}$	.	65				
			3953,95				

Or thus decimally.

760 Pezze 7 Soldi 6 Denari is $760\frac{3}{8} = 760,375$

As 1	: 5,20	::	760,375	: 3953,95
			5,20	
			3953,95000	

LEGHORN ON FRANCE.

Reduce 3953 Francs 95 Centimes into money of Leghorn; exchange at 5 Francs 20 Centimes per Pezza of 8 Reals.

Francs	Pezza	Francs	Pezza	Sol.	Den.
As 5,20	: 1	::	3953,95	: 760	7 6
			52,0	39539,5	(760 7 6
			364		
			313		
			312		
			19 × 20 and 12 &c.		

Or thus decimally.

As 5,20	: 1	::	3953,95	: 760,375
				20
				7,500
				12
				6,000

FRANCE ON LISBON.

Reduce 617 Mil. 334 Rees into French money; exchange at 465 Rees per Ecu of 3 Francs.

Rees	Francs	Milrees	Francs	Cents.
As 465	: 3	::	617,334	: 3982 80
			3	
			465	1852002(3982,80
				1395 &c.

But if the sum were given in Crusades, they are reduced to Milrees by multiplying by 4, cutting off the last figure, and to this figure adding the first of the Rees, as in the following example.

Reduce 1543 Crusades 134 Rees into Milrees, &c.

4
617,2
134
334

Ans. 617 Mil. 334 Rees.

LISBON ON FRANCE.

Reduce 3982 Francs 80 Centimes into money of Portugal; exchange at 465 Rees per Ecu of 3 Francs.

Francs.	Rees	Francs	Cents.	Milrees	Rees
As 3	: 465	:	3982 80	:	617 334
			465		
			3)1852002,00		
			617,334		

But if the answer were required in Crusades, the last two figures should be cut off, and the others divided by 4: thus,

4)6173,34

1543 Crusades 134 Rees.

GENOA.

MONIES OF EXCHANGE.

Exchanges are computed in Lire, Soldi, and Denari di Lira; or in Pezze, Soldi, and Denari di Pezza; all in money fuori banco.

12 Denari = 1 Soldo; 20 Soldi = 1 Lira fuori banco; 5 Lire 15 Soldi fuori banco = 1 Pezza. The Pezza is also divided into 20 Soldi, or 240 Denari di Pezza: thus, 4 Pezze = 23 Lire; 4 Soldi di Pezza = 23 Soldi di Lira; 4 Denari di Pezza = 23 Denari di Lira.

Also, 4 Lire 12 Soldi fuori banco = 1 Scudo di cambio, or Crown of exchange; 10 Lire 16½ Soldi fuori banco = 1 Scudo d'oro, or gold Crown; 10 Lire 14 Soldi fuori banco = 1 Scudo d'oro marche.

COURSE OF EXCHANGE,
from the Genoa Quotation.
March, 1820.

EXPLANATION.

AMSTERDAM	 89 ..	GENOA receives 89 Grotes Flemish:....	for 1 Pezza of 5½ Lire.
AUGSBURG	 61½ ..	— gives 61½ Soldi fuori banco:....	for 1 Florin current.

HAMBURGH.

MONIES OF EXCHANGE.

Exchanges are computed in Marks, Schillings, and Pfenings, banco or current; or in Pounds, Shillings, and Pence, Flemish banco.

Banco bears an agio on currency, which is generally from 20 to 25 per cent.

12 Pfenings = 1 Schilling, or Sol Lubs; 16 Schillings Lubs = 1 Mark; 3 Marks = 1 Rixdollar;
6 Pfenings = 1 Grote Flemish; 12 Grotes Flemish, or 6 Schillings Lubs = 1 Shilling Flemish;
20 Shillings Flemish, or $7\frac{1}{2}$ Marks = 1 Pound Flemish.

COURSE OF EXCHANGE,
From the Hamburg Quotation.
January, 1820.

EXPLANATION.

AMSTERDAM.. 106	HAMBURGH	receives 106 Rixdollars Dutch currency.	for 100 Rixdollars.
AUGSBURG .. $148\frac{1}{2}$	—	receives $148\frac{1}{2}$ Rixdollars effective	for 100 Rixds. banco.
BASIL $25\frac{1}{8}$	—	gives $25\frac{1}{8}$ Schillings banco	for 1 Ecu of 3 Francs.
BRESLAU 41	—	receives 41 Rixdollars Prussian currency	for 100 Rixds. banco.
COPENHAGEN. 149	—	receives 149 Rixdollars Danish	for 100 Rixds. banco.
FRANCE..... $25\frac{7}{8}$	—	gives $25\frac{7}{8}$ Schillings banco	for 1 Ecu of 3 Francs.
FRANCFORT.. $148\frac{1}{2}$	—	receives $148\frac{1}{2}$ Rixdollars effective	for 100 Rixds. banco.
GENOA 80	—	gives 80 Grotes Flemish banco	for 1 Pezza of $5\frac{1}{4}$ Liref. b.

LISBON.

MONIES OF EXCHANGE.

Exchanges are computed here in Milrees and Rees ; and also in old Crusados.

1000 Rees = 1 Milree ; 400 Rees = 1 old Crusado, or Crusado of exchange ; 480 Rees = 1 new Crusado.

Three sorts of money are at present used in Portugal ; namely,—*Effective Money*, that is, specie ; *Paper Money*, which is at a discount ; and *Legal Money*, consisting of half specie and half paper. The discount in Feb. 1820, was 22 per cent.

COURSE OF EXCHANGE,
From the Lisbon Quotation.
February, 1820.

EXPLANATION.

AMSTERDAM...	42	..	LISBON	receives 42 Grotes Flemish	..	for 1 old Crusado.
FRANCE.....	540	..	—	gives 540 Rees		for 3 Francs.
GENOA	746	..	—	gives 746 Rees		for 1 Rez. of 5½ Lire fuori banco.
HAMBURGH ..	38	..	—	receives 38 Grotes Flemish bco.		for 1 old Crusado.
LEGHORN	810	..	—	gives 810 Rees		for 1 Pezza of 8 Reals.
LONDON.....	53	..	—	receives 53 Pence sterling....		for 1 Milree.
SPAIN	2700	..	—	gives 2700 Rees		for 1 Doubl. of plate or Pistole of ex.
TRIESTE	450	..	—	gives 450 Rees		for 1 Florin current.
VENICE.....	66	..	—	gives 66 Rees		for 1 Lira Piccola.
VIENNA.....	450	..	—	gives 450 Rees		for 1 Florin current.

[For the usances and other particulars relating to Bills of Exchange, see LISBON, vol. i.]

PAPER MONEY REDUCED TO EFFECTIVE.

Paper money is reduced to effective by saying: as 100 is to 100 less the discount, so is the sum in paper to the sum effective.

Reduce 277 Mil. 240 Rees in paper to effective; the discount being $12\frac{1}{2}$ per cent.

R. Paper	R. Effective	R. Paper	R. Effective
As 100	: 87 $\frac{1}{2}$	: : 277,240	: 242,585

EFFECTIVE MONEY REDUCED TO PAPER.

Effective money is reduced to paper by reversing the foregoing operation: that is, as 100 less the discount is to 100, so is the sum effective to the sum in paper.

Reduce 242 Mil. 585 Rees effective into paper; discount at $12\frac{1}{2}$ per cent.

R. Effective	R. Paper	R. Effective	R. Paper
As 87 $\frac{1}{2}$	: 100	: : 242,585	: 277,240

LEGAL MONEY REDUCED TO EFFECTIVE.

As legal money consists of half paper and half effective, it is reduced to effective by saying: as 100 is to 100 less half the discount, so is the sum in legal money to the sum in effective.

Reduce 28 Mil. 640 Rees legal money to effective; the discount on paper against effective money being 15 per cent.

	R. Legal	R. Effective
As 100	: 92 $\frac{1}{2}$	: : 28,640 : 26,492

EFFECTIVE MONEY REDUCED TO LEGAL.

Effective money is reduced to legal by reversing the foregoing operation: that is, as 100 less half the discount is to 100, so is the sum in effective to the sum in legal money.

Reduce 26 Mil. 492 Rees effective to legal money; the discount on paper against effective money being 15 per cent.

	R. Effective	R. Legal
As 92 $\frac{1}{2}$	: 100	: : 26,492 : 28,640

PAPER MONEY REDUCED TO LEGAL.

In order to reduce paper money to legal, it should be first reduced to effective, as above. Then, as 100 less half the discount is to 100, so is the sum in effective to the sum in legal money.

Reduce 232 Mil. 650 Rees paper money to legal; discount on paper being 20 per cent.

	Paper	Effective
As 100	: 80	: : 232,650 : 186,120

	Effective	Legal
And as 90	: 100	: : 186,120 : 206,800

Or the above question may be performed by a single statement: thus, as 90 is to 80, so is paper to legal money; that is, as 100 less half the discount is to 100 less the whole discount, so is paper to legal money.

LEGAL MONEY REDUCED TO PAPER.

Legal money is reduced to paper by reversing the foregoing statement: that is, as 100 is to 100 less half the discount, so is the sum in legal money to the sum in effective; and this is reduced to paper as above.

Reduce 206 Mil. 800 Rees legal money to paper; the discount on paper being 20 per cent.

	Legal	Effective
As 100	: 90	: : 206,800 : 186,120

	Effective	Paper
And as 80	: 100	: : 186,120 : 232,650

Or the above question may be performed by a single statement: thus, as 100 less the whole discount is to 100 less half the discount, so is the given sum in legal money to the sum in paper.

SPAIN.

MONIES OF EXCHANGE.

Exchanges are generally computed here in denominations of Plate, which is always understood to be Old Plate, if New Plate be not mentioned.

There are three principal denominations of these imaginary monies in which exchanges are generally transacted; viz. Dollars, Doubloons, and Ducats, and they are divided into Reals and Maravedis of Plate, and sometimes converted into Vellon and other denominations.

The Dollar of Exchange, also called *Peso* or *Piastre de Cambio* or *de Plata*, is divided into 8 Reals of 34 Maravedis of Plate each, and sometimes into 16 Quartos.

The *Doubloon de Plata*, or Pistole of Exchange, is four times the Dollar, and therefore contains 32 Reals or 1088 Maravedis of Plate.

The Ducat of Plate, also called *Ducado de Cambio*, contains 11 Reals 1 Maravedi, or 375 Maravedis of Plate.

At Alicant, Valencia, and Barcelona, exchanges are transacted in Libras of 20 Sueldos, or 240 Dineros.

The Libra of Alicant and Valencia is the Dollar of Plate. This is sometimes divided into 10 Reals of New Plate, which are, of course, equal to 8 Reals of Old Plate.

The Libra of Barcelona, commonly called *Libra Catalan*, is worth $5\frac{5}{7}$ Reals of Plate; hence 7 of those Libras equal 5 Dollars of Plate; and, therefore, 28 Sueldos Catalan equal 1 Dollar.

The Hard Dollar of 20 Reals Vellon is occasionally used in exchanges, and is also divided into 12 Reals, each Real of 16 Quartos. The Current Dollar, which is an imaginary money, valued at two-thirds of the Hard Dollar, is divided into 8 Reals, and the Real into 16 Quartos. The two latter are the principal monies of exchange used at Gibraltar.

COURSE OF EXCHANGE,

From the Cadiz Quotation,
February, 1820.

EXPLANATION.

AMSTERDAM....	96	.. CADIZ	receives 96 Grotes Flemish	for 1 Ducat of plate.
FRANCE.....	14	.. ———	receives 14 Francs.....	for 1 Doubloon of plate.
GENOA	125	.. ———	gives 125 Dollars of plate	for 100 Pezze of $5\frac{3}{4}$ Lire.
HAMBURGH	88	.. ———	receives 88 Grotes Flemish banco ..	for 1 Ducat of exchange.
LEGHORN	123	.. ———	gives 123 Dollars of plate	for 100 Pezze of 8 Reals.
LISBON	2700	.. ———	receives 2700 Rees	for 1 Doubloon of plate.
LONDON	$35\frac{3}{8}$	.. ———	receives $35\frac{3}{8}$ Pence sterling.....	for 1 Dollar of plate.
NAPLES.....	290	.. ———	gives 290 Maravedis of plate	for 1 Ducato di regno.

PALERMO ON SPAIN, see page 83.

The above are the principal places with which Spain exchanges, and, therefore, any further examples would be unnecessary if Bills were always drawn in Plate, the money in which the Courses of Exchange are quoted. But as they are sometimes drawn in other denominations, such as Reals Vellon, and Libras of Alicant, Valencia, and Barcelona, it remains to show how these several currencies are converted into Plate.

It has been stated, p. 26, that Plate is reduced into Vellon by multiplying by 32 and dividing by 17, and *vice versâ*; but when Bills are drawn in Hard Dollars, Reals, and Maravedis Vellon, which is sometimes done in Bilboa and the adjacent places, the operation becomes more complex, as in the following example.

BILBOA ON LONDON.

Reduce £800 4s. 8d. into Hard Dollars, Reals, and Maravedis; exchange at $52\frac{1}{2}$ d. per Hard Dollar.

34 Maravedis = 1 Real, 20 Reals = 1 Hard Dollar.

EFFECTIVE MONEY REDUCED TO PAPER.

Bills, when they are not made payable in *effective*, are paid in a paper money, called *Vales Reales*, which bears a considerable discount.

Effective money is therefore reduced to paper by saying: as 100 *minus* the discount is to 100, so is the effective sum to the sum in paper.

Reduce 743 Reals 10 Maravedis effective to paper money; discount at 48 per cent.

	Reals	Mar.	Reals	Mar.
As 52 : 100 ::	743	10	1429	14

52)2527200(48600(1429 14				
	208	34		
	447 &c.	146		

PAPER MONEY REDUCED TO EFFECTIVE.

Paper money is reduced to effective by reversing the foregoing operation: that is, as 100 is to 100 less the discount, so is the sum in paper to the effective sum.

Reduce 1429 Reals 14 Maravedis in paper into effective; discount at 48 per cent.

	Reals	Mar.	Reals	Mar.
As 100 : 52 ::	1429	14	743	10
	34			
	48600			
	52			
	34)25272,00(743 10			
	238			
	147 &c.			

LIBRAS OF ALICANT REDUCED TO REALS OF PLATE.

The Libras of Alicante and Valencia being Dollars of plate, are reduced to Reals by multiplying by 8. The Sueldos should be multiplied by 8 and divided by 20, because 20 Sueldos equal 8 Reals.

Reduce 314 Libras 11 Sueldos 3 Dineros of Alicante into Reals of plate.

Libras	Suel.	Din.

VENICE.

MONIES OF EXCHANGE.

Exchanges have been computed here in Lire, Soldi, and Denari, Moneta piccola, and also in Ducats; but they are now generally computed in Centimes, of Italian Livres, which are similar to those of France.

12 Denari = 1 Soldo. 20 Soldi = 1 Lira. 6 Lire 4 Soldi piccoli = 1 Ducat current, or of account.

8 Lire piccoli = 1 Ducat effective.

100 Centimes = 1 Lira Italiana.

40,000 Lire piccoli = 30,467 Lire Italiane.

COURSE OF EXCHANGE,
From the Venetian Quotation.
January, 1820.

EXPLANATION.

AMSTERDAM.....	224	..	VENICE gives 224 Centimes	for 1 Florin.
ANCONA.....	540	..	— gives 540 Centimes	for 1 Scudo.
AUGSBURG.....	260	..	— gives 260 Centimes.....	for 1 Florin current.
CONSTANTINOPLE ..	83	..	— gives 83 Centimes	for 1 Piastre.
FRANCE.....	105	..	— gives 105 Centimes	for 1 Franc.
GENOA	86	..	— gives 86 Centimes	for 1 Lira fuori banco.
HAMBURGH	196	..	— gives 196 Centimes.....	for 1 Mark banco.
LEGHORN	533	..	— gives 533 Centimes	for 1 Pezza.

VIENNA.

MONIES OF EXCHANGE.

Exchanges are computed in Florins and Creutzers, or in Rixdollars and Creutzers.

4 Pfenings = 1 Creutzer.

60 Creutzers = 1 Florin or Gulden.

1½ Florin, or 90 Creutzers = 1 Rixdollar of account.

2 Florins, or 120 Creutzers = 1 Rixdollar specie.

COURSE OF EXCHANGE,
From the Vienna Quotation.
January, 1820.

EXPLANATION.

AMSTERDAM	140	.. VIENNA gives 140 Rixdollars current	for 100 Rixdollars.
AUGSBURG	100	.. ——— gives 100 Rixdollars current	for 100 Rixds. current.
CONSTANTINOPLE..	112	.. ——— gives 112 Florins	for 100 Piastres.
FRANCE	119	.. ——— receives 119 Florins	for 100 Ecus of 3 Francs.
GENOA	30½	.. ——— receives 30½ Soldi fuori banco ..	for 1 Florin current.
HAMBURGH	148½	.. ——— gives 148½ Rixdollars current....	for 100 Rixds. banco.
LEGHORN	57½	.. ——— receives 57½ Soldi moneta buona..	for 1 Florin.
LONDON	9' 52	.. ——— gives 9 Florins 52 Creutzers	for 1 £ sterling.
MILAN	67¼	.. ——— receives 67¼ Soldi correnti	for 1 Florin current.
PRAGUE	99½	.. ——— gives 99½ Florins	for 100 Florins current.
SMYRNA	112	.. ——— gives 112 Florins	for 100 Piastres.
VENICE	184	.. ——— gives 184 Florins	for 500 Lire piccole.

UNITED STATES OF AMERICA.

MONIES OF EXCHANGE.

Exchanges are computed in Dollars, Dimes, and Cents; and in some places in Pounds, Shillings, and Pence currency.

10 Cents = 1 Dime; 10 Dimes, or 100 Cents = 1 Dollar.

The Dollar is also divided into 1000 parts, called Mills.

The par of the Dollar is reckoned at 4s. 6d. sterling.

12 Pence currency = 1 Shilling; 20 Shillings = 1 Pound.

[For the different currencies and values of the Dollar, see UNITED STATES, vol. i. and *Table of Coins*, vol. ii.]

EAST INDIES.

MONIES OF EXCHANGE.

The business of Exchange in India is chiefly carried on between the three Presidencies: viz. Bengal, Madras, and Bombay, which draw on each other at various dates, and mostly in the denominations of the Money of the place where the Bill is to be paid.

London draws on Bengal in Current Rupees, at 2s. more or less ;

Or in Sicca Rupees at 16 per cent. above current Rupees.

On Madras, in Pagodas at 7s. 6d. more or less.

On Bombay, in Rupees at 2s. 2d. more or less.

Such bills are mostly at 60 or 90 days sight, but bills from those places on London are generally drawn at 6, 9, or 12 months sight, in which case the Sicca Rupee is valued at 2s. 6d.; the Bombay Rupee at 2s. 4d.; and the Pagoda of Madras at 8s. more or less.

Those Monies of Exchange are divided as follows :

BENGAL, CALCUTTA, &c.

12 Pice = 1 Anna. 16 Annas = 1 Rupee,

1 Sicca Rupee = 2s. 6d. sterling.

BOMBAY.

100 Rees = 1 Quarter. 4 Quarters = 1 Rupee.

1 Rupee = 2s. 4d. sterling.

MADRAS.

80-Cash = 1 Fanam. 45 Fanams = 1 Star Pagoda.

1 Star Pagoda = 8s. sterling.

To reduce any number of Rupees or Pagodas into sterling at a given rate of exchange, or the contrary, is an operation too simple to require illustration.

[For further particulars see EAST INDIES, vol. i.]

PROFIT AND LOSS ON EXCHANGES.

BESIDES the advantages which exchanges afford to commerce in discharging debts due in distant places, and transmitting property from one country to another, considerable profits are sometimes made by buying and selling Bills, and negotiating them through different places.—In such business the Sellers of Bills are generally the Drawers, and the Buyers of Bills the Remitters: and it may tend to simplify the subject to consider a Bill of Exchange as any other saleable article; in which the advantage of the Drawer is, of course, to sell his Bill at the highest price, and of the Remitter to buy it at the lowest price.

There are three ways of making profit or loss on Bills of Exchange, namely:

- 1.—By buying and selling Bills at the same place.
- 2.—By Remittances and Returns directly between two places.
- 3.—By negotiating Bills through more than two places; which is called *Arbitration of Exchange*, also *Indirect*, or *Circular Exchange*.

The profit or loss, either on the whole or per cent. on Bills bought and sold at the same place is ascertained in the same manner as on any other article of trade.

Example 1.—Suppose London buys a Bill on Hamburgh of 3180 Marks banco, exchange 33s. 4d. Flemish per £ sterling, and sells the same at 33s. 1½d. Flemish what is the gain?

s.	d. Flem.	£ sterling	Marks	£	s.
As 33	4	: 1	: : 3180	: 254	8
And as 33	1½	: 1	: : 3180	: 256	0
} see page 23.					
1 12 gain on the whole.					

Again, as $\frac{£}{254} \frac{s.}{8} : \frac{s.}{32} : : 100 : \frac{5}{8}$ gain per cent.

s.	d. Flemish.	d. Flemish.	Marks	Marks
Or thus, as 33	1½	: 2½	: : 3180	: 20
And as 33	1½	: 2½	: : 100	: 5
gain on the whole = £1 12s. sterling.				
5 gain per cent.				

Example 2.—Suppose London buys a Bill on Cadiz of 1000 Dollars, at 36d. sterling. per Dollar, and sells it for 37d. per Dollar, the gain on the whole is evidently 1000d. or £4 3s. 4d.; and the gain $2\frac{7}{9}$ per cent.: for

Dollar	d.	Dollars	£	s.	d.
As 1	: 1	: : 1000	: 4	3	4
And as 36d.	: 1	: : 100d.			27
gain on the whole.					
27 gain per cent.					

From the first example it will be seen, that it is the interest of the London Buyer or Remitter to pay the highest exchange for a Bill on a place which gives the uncertain price to London; and that the reverse is the interest of the Drawer or Seller. And from the second example it is obvious, that it is the interest of the London Buyer or Remitter to pay the lowest exchange for a Bill on a place to which London gives the uncertain price; and that the reverse is the interest of the Drawer or Seller. Hence the two following rules.

1.—*On a place to which London gives the CERTAIN PRICE a Bill should be drawn at the lowest course, and remitted at the highest.*

2.—*On a place to which London gives the UNCERTAIN PRICE a Bill should be drawn at the highest course, and remitted at the lowest.*

The above rules apply to any other places as well as London.

REMITTANCES AND RETURNS.

Bills of Exchange are sometimes bought and remitted directly to the place on which they are drawn, with orders to have Bills in return if the prices be favourable: and it should be observed that the reciprocal courses of exchange between two places should always differ, so as to be nearly equal to the interest of money and the expenses of remittance. Thus, the course of London on Dublin should differ about 1 per cent. from that of Dublin on London, in order to afford the Remitter from either place a regular profit on his Remittances and Returns on Bills at 21 days sight, the usual Term.

Suppose, for example, L of London purchases a Bill on Dublin, at 21 days sight, of £112 Irish for £100 English, which he remits to his agent at Dublin, desiring him to make Returns in Bills on London at 21 days sight; and suppose a Bill of £100 English is remitted back, which costs only £111 Irish, there is £1 Irish per cent. gained by the transaction: and the same would take place had the remittance been first made from Dublin on the above terms.

Now, to compute how much the difference here ought to be, the interest of 56 days must be reckoned (the usual time such Bills take in making returns); and this, with brokerage, postage, &c. will amount to 1 per cent. nearly; which is reckoned a *Fair Difference* in the exchange between London and Dublin on Bills of the above date.

It may be observed, however, that the difference is not always equivalent to the interest and expenses, but fluctuates according to circumstances, affording sometimes room for profitable operations.

The following is an example of a Bill sent from London to Hamburg, to have Returns on London.

£842 12s. 1d. sterling on Hamburg, at 3 usances, at 31s. 8d. Flemish
per £ sterling, 10,000 Mks. bco.

	Mks. bco.	Sh.
Commission, $\frac{1}{2}$ per cent.	50	0
Double brokerage, 2 per mille	20	0
Postage	3	4
Discount, 82 days, at 5 per cent.	112	4
	<u>185</u>	<u>8</u>

Net proceeds in Marks banco 9814 8

Returns made in 3 Bills, namely:

£500 0 0 sterling, at 3 us. at 30s. 10 $\frac{1}{2}$ d.....	5789	1
200 0 0 at 2 us. at 30s. 11d.	2318	12
146 16 4 at 2 us. at 31s. 0d.....	1706	11
	<u>846</u>	<u>16</u>
846 16 4 Returns.	9814	8
842 2 1 Remittance.		

£4 14 3 Gain, which is not quite equivalent to the discount and postage of the Returns; but had the course of Hamburg on London been 30s. 9d. it would have produced the regular profit. Thus, 10d. Flemish per £ sterling may be reckoned a *Fair Difference* between London and Hamburg at usance.

When the Returns are to be made directly, the remittances are discounted as above; but it may be remarked, that the interest of money on the Continent is not limited as in England, but fluctuates according to the plenty or scarcity of cash or the credit of paper. In exchange operations it is generally reckoned at $\frac{1}{2}$ per cent. per month.

ARBITRATION OF EXCHANGE.

ARBITRATION OF EXCHANGE is a comparison between the courses of exchange of several places, in order to ascertain the most advantageous method of drawing or remitting Bills. It is distinguished into Simple and Compound Arbitration: the former comprehends the exchanges of three places only, and the latter of more than three places.

SIMPLE ARBITRATION

Is a comparison between the exchanges of two places with respect to a third—that is to say, it is a method of finding such a rate of exchange between two places as shall be in proportion to the rates quoted between each of them and a third place. The exchange thus determined is called the *Arbitrated Price*.

If, for example, the course between London and Paris be 24 Francs for £1 sterling, and between Paris and Amsterdam 54d. Flemish for 3 Francs, (that is, 36s. Flemish for 24 Francs,) the arbitrated price between London and Amsterdam through Paris, is evidently 36s. Flemish for £1 sterling; for as 3 Fr. : 54d. Flem. :: 24 Fr. : 36s. Flem.

Now, when the actual or direct price (as seen by a quotation or otherwise advised) is found to differ from the arbitrated price, advantage may be made by drawing or remitting indirectly; that is, by drawing on one place through another, as on Amsterdam through Paris: which may be performed in three different ways.

1.—London may draw on Paris, and order his correspondent there to draw on Amsterdam.

2.—London may draw on Paris, and order his correspondent in Amsterdam to remit the same sum to Paris.

3.—London may order his correspondent at Paris to draw on Amsterdam, and to remit the value to London.

The operation of remitting indirectly, or of remitting to one place through another, as on Amsterdam through Paris, may be likewise performed in three different ways.

1.—London may remit to Paris, and order his correspondent there to remit the sum to Amsterdam.

2.—London may remit to Paris, and order his correspondent in Amsterdam to draw on Paris.

3.—London may take Bills on Paris, and remit them to Amsterdam, there to be negotiated.

In the foregoing questions, the profit or loss is ascertained on an operation already completed: but in arbitration it is ascertained beforehand, and the different results are compared, in order to determine the most advantageous mode of proceeding.

To exemplify this by familiar illustrations, suppose the arbitrated price between London and Amsterdam to be, as before stated, 36s. Flemish for £1 sterling; and suppose the direct course to be 37s. Flemish; then London, by drawing directly on Amsterdam, must give 37s. Flemish for £1 sterling; whereas, by drawing through Paris he will give only 36s. Flemish for £1 sterling: it is therefore the interest of London to draw indirectly on Amsterdam through Paris.

On the contrary, if London remits directly to Amsterdam he will receive 37s. Flemish for £1 sterling; whereas, by remitting through Paris, he will receive only 36s. Flemish: it is the interest of London, therefore, to remit directly to Amsterdam.

Example 2.—Suppose the exchange of London and Lisbon to be at 68d. per Milree, and that of Lisbon on Madrid 500 Rees per Dollar, the arbitrated price between London and Madrid is 34d. sterling per Dollar; for, as 1000 Rees : 68d. :: 500 Rees : 34d. But if the direct exchange of London on Madrid be 35d. sterling per Dollar, then London, by remitting directly to Madrid, must pay 35d. for every Dollar; whereas, by remitting through Lisbon, he will pay only 34d.: it is, therefore, the interest of London to remit indirectly to Madrid through Lisbon.

On the contrary, if London draws directly on Madrid, he will receive 35d. sterling per Dollar; whereas by drawing indirectly through Lisbon, he will receive only 34d.: it is, therefore, the interest of London to draw directly on Madrid.

From these examples, combined with the principles laid down in page 105, the two following rules are manifest.

RULE 1.—*Where London gives the CERTAIN PRICE, draw through that place which produces the lowest arbitrated price, and remit through that which produces the highest.*

RULE 2.—*Where London gives the UNCERTAIN PRICE, draw through that place which produces the highest arbitrated price, and remit through that which produces the lowest.*

What is here said of London will equally apply to any other place from whence the operation is made.

In order further to exemplify Simple Arbitration of Exchange, the following places are selected as having the most frequent communication with each other in business of this kind ; and London is made the centre of operations.

LONDON AND AMSTERDAM.

PROPORTIONAL EXCHANGE.

LONDON QUOTATION.

(Explained page 19.)

ON AMSTERDAM . . . 34 7

GENOA 47 86

HAMBURGH 34 2 $33\frac{1}{8}$

LEGHORN $51\frac{1}{2}$ $92\frac{3}{4}$

LISBON 68 48

MADRID 42 96

PARIS 23 8 $53\frac{1}{2}$

AMSTERDAM QUOTATION.

(Explained page 28.)

The arbitrated or proportional price of exchange between London and Amsterdam, with respect to any of the above places, is found either by the Rule of Three, or by the Chain Rule, as in the following examples ; and from such proportional prices, compared with the direct or actual prices, as stated in the quotations, rules are deduced and examples given, for drawing and remitting to the greatest advantage.

LONDON AND AMSTERDAM THROUGH
GENOA.

If the exchange of London on Genoa be 47d. sterling per Pezza of $5\frac{1}{4}$ Lire, and that of Amsterdam on Genoa 86 Grotes Flemish per Pezza, what is the proportional exchange between London and Amsterdam through Genoa? that is, how many Shillings and Grotes Flemish are equal to £1 sterling?

Because 47d. give 1 Pezza, and this Pezza in Amsterdam gives 86 Grotes Flemish, say—

d.	Grotes	£	Sh.	Gr. Flem.
As 47	: 86	:: 1	: 36	7

240

—12)

47)20640(439 $\frac{7}{47}$

188

—Ans. 36 Sh. 7 Gr. Flemish

184 &c. for £1 sterling.

By the Chain Rule.

		1 Pound sterling.
1 Pound sterling	=	240 Pence.
47 Pence	=	1 Pezza.
1 Pezza	=	86 Grotes Flemish.
12 Grotes	=	1 Shilling Flemish.

Hence, 1 Pound or 240 Pence multiplied by 86, and divided by 47 and by 12, will give the answer in Shillings Flemish, as above.

Thus, 86

240

564)20640(36,7

1692

3720

3384

336 = 7 Gr. nearly.

LONDON AND AMSTERDAM THROUGH
HAMBURGH.

If the exchange of London on Hamburg be 34 Shillings 2 Grotes Flemish banco per £ sterling, and that of Amsterdam on Hamburg $33\frac{3}{8}$ Stivers per Rixdollar of 2 Marks, required the proportional exchange between London and Amsterdam through Hamburg?

Because £1 sterling gives 34 Shillings 2 Grotes Flemish in Hamburg, and 2 Marks give $33\frac{3}{8}$ Stivers in Amsterdam, say (reducing the Marks and the Stivers into Flemish money)—

Marks	Stivers	Sh.	Gr. Fl.	Sh.	Gr. Fl.
As 2	: $33\frac{3}{8}$	:: 34	2	: 35	$7\frac{1}{2}$

16

2

12

32

 $66\frac{3}{4}$

410

2

 $66\frac{3}{4}$

64

64)27367 $\frac{1}{2}$ (427 $\frac{3}{8}$

256

—Ans. 35 Sh. $7\frac{1}{2}$ Gr. for £1

176 &c.

sterling.

By the Chain Rule.

		1 Pound sterling.
1 Pound sterl.	=	34 Shil. 2 Grotes in Hamburg.
8 Shill. Flem.	=	3 Marks.
2 Marks	=	$33\frac{3}{8}$ Stivers.
6 Stivers	=	1 Shill. Flemish in Amsterdam

Hence, 34 Shillings 2 Grotes Flemish multiplied by 3 and by $33\frac{3}{8}$, and divided by 6, by 2, and by 8; or, (expunging the common divisors,) multiplied by 267, and divided by 256, will give the answer in Shillings Flemish, as above.

LONDON AND AMSTERDAM THROUGH
LEGHORN.

If the exchange of London on Leghorn be $51\frac{1}{2}$ d. sterling per Pezza, and that of Amsterdam on Genoa $92\frac{3}{4}$ Grotes Flemish per Pezza, what is the proportional exchange between London and Amsterdam through Leghorn?

Because $51\frac{1}{2}$ d. in London give 1 Pezza, and this Pezza in Amsterdam gives $92\frac{3}{4}$ Grotes Flemish, say—

d.	Grotes	d.	Sh.	Grotes
As $51\frac{1}{2}$	: $92\frac{3}{4}$	::	240	: 36 $0\frac{1}{2}$
2			$92\frac{3}{4}$	
103			22260	
			2	
			—12)	
			103)44520(432 $\frac{24}{103}$	
			412&c. —	
			Ans. 36 Sh. $0\frac{1}{2}$ Gr. for £1	sterling.

By the Chain Rule.

£1 sterling	=	240 Pence.
$51\frac{1}{2}$ Pence	=	1 Pezza.
1 Pezza	=	$92\frac{3}{4}$ Grotes Flemish.
12 Grotes	=	1 Shilling Flemish.

Result as above.

LONDON AND AMSTERDAM THROUGH
MADRID.

If the exchange of London on Madrid be 42d. sterling per Dollar of plate, and that of Amsterdam on Madrid 96 Grotes Flemish per Ducat of plate, what is the proportional exchange between London and Amsterdam through Madrid?

Because 42d. in London give 1 Dollar or 272 Maravedis, and because 1 Ducat or 375 Maravedis give 96 Grotes in Amsterdam, say—

Maravedis	Grotes	Maravedis	Grotes
As 375	: 96	::	272 : $69\frac{2}{3}$
d.	Grotes	d.	Sh. Gr. Fl.
And as 42	: $69\frac{2}{3}$	::	240 : 33 2
			$69\frac{2}{3}$
			—12)
			42)16720(398
			126&c. —
			Ans. 33 Sh. 2 Gr. for £1

By the Chain Rule.

£1 sterling	=	240 Pence.
42 Pence	=	272 Maravedis.
375 Maravedis	=	96 Grotes Flemish.
12 Grotes	=	1 Shilling Flemish.

Result as above.

LONDON AND AMSTERDAM THROUGH
LISBON.

If the exchange of London on Lisbon be 68d. sterling per Milree, and that of Amsterdam on Lisbon 48 Grotes Flemish per old Crusado, what is the proportional exchange between London and Amsterdam through Lisbon.

Because 68d. in London give 1 Milree, and 1 old Crusado, or 400 Rees, give 48 Grotes Flemish in Amsterdam, say—

Rees	Grotes	Rees	Grotes
As 400	: 48	::	1000 : 120
d.	Grotes	d.	Sh. Gr. Fl.
And as 68	: 120	::	240 : 35 $3\frac{1}{2}$
			120
			—12)
			68)28800(423 $\frac{36}{68}$
			272&c. —
			Ans. 35 Sh. $3\frac{1}{2}$ Gr. for £1

By the Chain Rule.

£1 sterling	=	240 Pence.
68 Pence	=	1000 Rees.
400 Rees	=	48 Grotes Flemish.
12 Grotes	=	1 Shilling Flemish.

Result as above.

LONDON AND AMSTERDAM THROUGH
PARIS.

If the exchange of London on Paris be at 23 Livres 8 Sous per £ sterling, and that of Amsterdam on Paris $53\frac{1}{2}$ Grotes Flemish per Ecu of 3 Francs, what is the proportional exchange between London and Amsterdam through Paris?

Because £1 sterling gives 23 Livres 8 Sous in Paris, and because 3 Francs give $53\frac{1}{2}$ Grotes Flemish in Amsterdam, say—

Livres	Sous	Francs	Cen.
As 81	: 80	::	23 8 : 23 11
Francs	Grotes	Francs	Sh. Gr. Fl.

			Ans. 34 Sh. $4\frac{1}{8}$ Gr. for

By the Chain Rule.

£1 sterling	=	23 Livres 8 Sous.
81 Livres	=	80 Francs.
3 Francs	=	$53\frac{1}{2}$ Grotes.
12 Grotes	=	1 Shilling Flemish.

Result as above.

RECAPITULATION.

LONDON AND AMSTERDAM.

RECAPITULATION of the proportional exchanges, as calculated in the three preceding pages, with rules for drawing and remitting to the greatest advantage.

	Sh.	Grotes	
The arbitrated price through GENOA is	36	7	Flemish—see page 110
through HAMBURGH	35	7½	110
through LEGHORN	36	0¼	111
through LISBON	35	3½	111
through MADRID	33	2	111
through PARIS	34	4⅛	111
And the direct course of LONDON on AMSTERDAM	34	7	109

As London gives the certain price to Amsterdam, that is, £1 sterling for a variable number of Shillings Flemish, the most advantageous place through which to remit is that which gives the highest price; and, on the contrary, the most advantageous place through which to draw is that which gives the lowest price; according to RULE 1, page 108.

From the above statements, therefore, it appears—1st, that if London has to *remit* to Amsterdam, the indirect courses through Hamburg, Genoa, Lisbon, and Leghorn, are more advantageous than the direct course, and that Genoa is the most advantageous place through which to remit:—2dly, that if London has to *draw* on Amsterdam, the indirect courses through Madrid and Paris are more advantageous than the direct course, and that Madrid is the most advantageous place through which to draw.

The profit or loss per cent. occasioned by one mode of operation, instead of another, may be known in the following manner.

Thus, in the case of Genoa— $\text{Shill. Grotes } 34 \quad 7 : \text{Shill. Grotes } 36 \quad 7 :: 100 : 105\frac{4}{5}, \text{ or } 105\frac{1}{2} \text{ nearly.}$

Hence it appears, that 5½ per cent. will be gained by remitting to Amsterdam through Genoa, instead of remitting directly to Amsterdam; and that the same profit will accrue by drawing directly on Amsterdam, instead of drawing through Genoa; but in computations of this kind allowance should be made for the difference of charges between direct and indirect operations.

The foregoing rules respecting Amsterdam will equally apply to Hamburg, Paris, or any other place to which London gives the certain; but where London gives the uncertain, the rules must be reversed, as in the following examples of Genoa.

LONDON AND GENOA.

PROPORTIONAL EXCHANGE.

QUOTATION AT LONDON,
(Explained page 19.)

QUOTATION FROM GENOA,
(Explained page 61.)

ON GENOA.....	47		
AMSTERDAM	36	7	85
HAMBURGH.....	34	2	45 $\frac{1}{2}$
LEGHORN.....	51 $\frac{1}{2}$		123 $\frac{3}{4}$
LISBON.....	68		718
MADRID	42		617
PARIS	23	8	94 $\frac{1}{2}$

From the above quotations, it is required to find the proportional exchange between London and Genoa, with respect to each of the other places, and thence to determine through what place it may be most advantageous for London, to remit to, or draw on, Genoa, and whether direct or indirect exchange is most favourable.

LONDON AND GENOA THROUGH AMSTERDAM.

If the exchange of London on Amsterdam be 36 Shillings 7 Pence Flemish per £ sterling, and that of Genoa on Amsterdam 85 Grotes Flemish per Pezza of $5\frac{3}{4}$ Lire, what is the proportional exchange between London and Genoa through Amsterdam—that is, how many Pence sterling are equal to 1 Pezza?

Because £1 sterling gives 36 Shillings 7 Grotes Flemish in Amsterdam, and 85 Grotes Flemish in Genoa give 1 Pezza, say—

Shillings	Grotes	Pence	Grotes	Pence
As 36	7	: 240	:: 85	: $46\frac{1}{2}$
12			85	
439	439	20400	$(46\frac{200}{33})$	
		1756		

2840 &c.

Answer $46\frac{1}{2}$ Pence nearly for 1 Pezza.

By the Chain Rule.

	1 Pezza.	
1 Pezza	=	85 Grotes Flemish.
12 Grotes	=	1 Shilling Flemish.
36 Shillings 7 Grotes	=	240 Pence sterling.

Hence, 85 Grotes multiplied by 240, and divided by 12, and by 36 Shillings 7 Grotes—that is, divided by 439, will give the answer in Pence sterling, as above.

LONDON AND GENOA THROUGH LEGHORN.

If the exchange of London on Leghorn be $51\frac{1}{2}$ d. sterling per Pezza of 8 Reals, and that of Genoa on Leghorn $123\frac{3}{4}$ Soldi fuori banco per Pezza of 8 Reals, what is the proportional exchange between London and Genoa through Leghorn?

Because $51\frac{1}{2}$ d. give 1 Pezza in Leghorn, and this same Pezza in Genoa gives $123\frac{3}{4}$ Soldi, say—

Soldi	Pence	Pezza of Genoa	Soldi	Pence
As $123\frac{3}{4}$	: $51\frac{1}{2}$	:: 1 or	115	: $47\frac{5}{8}$
4	4		206	
495	206	495	23690	$(47\frac{85}{99})$

1980 &c.

Ans. $47\frac{5}{8}$ d. nearly.

By the Chain Rule.

	1 Pezza in Genoa.	
1 Pezza in Genoa	=	115 Soldi.
$123\frac{3}{4}$ Soldi	=	1 Pezza in Leghorn.
1 Pezza in Leghorn	=	$51\frac{1}{2}$ d. sterling.

Result as above.

LONDON AND GENOA THROUGH HAMBURGH.

If the exchange of London on Hamburg be 34 Shillings 2 Grotes Flemish per £ sterling, and the exchange of Genoa on Hamburg $45\frac{1}{2}$ Soldi per Mark banco, what is the proportional exchange between London and Genoa through Hamburg?

Because £1 sterling gives 34 Shillings 2 Grotes Flemish in Hamburg, and 1 Mark or 32 Grotes in Genoa give 1 Pezza, say—

Shillings	Grotes	Pence	Grotes	Pence
As 34	2	: 240	:: 32	: $18\frac{1}{2}$
12		32		
410		41,0768,0	$(18\frac{31}{4})$	
		41		
		358	&c.	

Soldi	Pence	Pezza	Soldi	Pence
And as $45\frac{1}{2}$	: $18\frac{1}{2}$	:: 1 or 115	: $47\frac{1}{2}$	nearly
3			$\times 18\frac{1}{2} \times 3$	

136

136)6468

$(47\frac{76}{136})$

544 &c.

Ans. $47\frac{1}{2}$ Pence for 1 Pezza.

By the Chain Rule.

	1 Pezza.	
1 Pezza	=	115 Soldi.
$45\frac{1}{2}$ Soldi	=	1 Mark.
1 Mark	=	32 Grotes Flemish.
410 Grotes	=	240 Pence sterling.

Result as above.

LONDON AND GENOA THROUGH LISBON.

If the exchange of London on Lisbon be 68d. per Milree, and that of Genoa on Lisbon 718 Rees per Pezza of $5\frac{3}{4}$ Lire, what is the proportional exchange between London and Genoa through Lisbon?

Because 1000 Rees give 68d. in London, and 718 Rees in Genoa give 1 Pezza, say—

Rees	Pence	Rees	Pence
As 1000	: 68	:: 718	: $48\frac{5}{8}$
		68	

1,000)48,824

Ans. $48\frac{5}{8}$ d. nearly.

By the Chain Rule.

	1 Pezza.	
1 Pezza	=	718 Rees.
1000 Rees	=	68 Pence.

Result as above.

LONDON AND GENOA THROUGH MADRID.

If the exchange of London on Madrid be 42d. sterling per Dollar of plate, and that of Genoa on Madrid 617 Maravedis of plate per Scudo d'oro, what is the proportional exchange between London and Genoa through Madrid?

Because 42d. sterling give 1 Dollar, or 272 Maravedis of plate, and because 617 Maravedis in Genoa give 1 Scudo d'oro, or 10 Lire 14 Soldi fuori banco, say—

$$\begin{array}{rclcl} \text{Maravedis} & \text{Pence} & & \text{Maravedis} & \text{Pence} \\ \text{As } 272 & : 42 & :: & 617 & : 95\frac{1}{4} \end{array}$$

$$\begin{array}{r} 272)25914(95\frac{7}{8}, \text{ or } 95\frac{1}{4} \text{ nearly.} \\ \underline{2448} \end{array}$$

Result as above.

RECAPITULATION.

LONDON AND GENOA.

RECAPITULATION of the proportional exchanges, or arbitrated prices, as calculated in the two preceding pages, with rules for drawing and remitting to the greatest advantage.

The arbitrated or indirect price through AMSTERDAM is....	46½	Pence—see page 114
through HAMBURGH	47½	114
through LEGHORN	47½	114
through LISBON	48½	114
through MADRID	51½	115
through PARIS	49	115
And the direct course of LONDON on GENOA is	47	113

As London gives the uncertain price to Genoa, that is, a variable number of Pence for 1 Pezza, the most advantageous place through which to remit is that which gives the lowest price; and, on the contrary, the most advantageous place through which to draw is that which gives the highest price; according to RULE 2, page 108.

From the above statements, therefore, it appears—1st, that if London has to *remit* to Genoa, the indirect course through Amsterdam is more advantageous than the direct course:—2dly, that if London has to *draw* on Genoa, the indirect courses through any of the above places, except Amsterdam, are more advantageous than the direct course, and that Madrid is the most advantageous place of all to draw through.

The profit or loss per cent. occasioned by one mode of operation, instead of another, may be thus found, as in the case of Madrid.

$$\text{As } 47 : 51\frac{1}{2} :: 100 : 109$$

Hence it appears, that 9 per cent. may be gained by drawing on Genoa through Madrid, instead of drawing directly on Genoa; and that the same profit will be made by remitting directly to Genoa, instead of remitting through Madrid: but in computations of this kind allowance should be made for the difference of charges between direct and indirect operations.

The foregoing rules for negotiating Bills are given after the manner of the most approved writers on Exchange, and though it is presumed they are sufficiently clear as well as correct, yet the following rules and illustrations are added, with a view of reducing the question of Arbitration to a still greater degree of simplicity.

SIMPLE ARBITRATION

Further explained; with new Rules and Illustrations.

SIMPLE ARBITRATION ought to be well understood before any higher Rule is attempted. It is not only the foundation and principle of Compound Arbitration, but is in itself a problem of more real utility and general application, as few speculations in Exchange are extended to more than three places in one operation.

It has been already shewn, that whether the arbitrated price is above or below the advised price, an advantage is equally to be made, and the greater the difference is, the greater will be the profit; but as the Courses of Exchange are liable to continual fluctuation, despatch is necessary in order to secure any favourable prices that may offer; and as an operation between three places can be performed sooner than between any greater number, it is evidently the most safe, as well as the most easy and practicable kind of Arbitration.*

* The following comparison between Simple and Compound Arbitration, made by *M. Corboux*, in his *Dictionnaire des Arbitrages*, seems here to deserve quotation.

“ It is very easy to fancy problems and theories in Compound Arbitration, where great advantages might be made by numerous combinations of Exchange, but seldom does any opportunity occur in practice of realizing such speculations. On the contrary, men of experience are satisfied with combining the Exchanges of three places only (as in Simple Arbitration,) and there are few instances of the kind that will not afford room for a reasonable profit.”

The *Dictionnaire des Arbitrages* may be considered the most elaborate work ever published on this subject. It was printed at Paris in 1802, in two large volumes quarto, and contains, among other useful matter, about 900 pages of tables, which shew the arbitrated price (*pair proportionnel*) between the principal places of exchange in Europe, taken two by two with respect to Paris, this city being made the centre of operation.

Various other tables, both of natural numbers and logarithms, have been published by different persons for the more easy solution of Arbitration, and even triangles have been constructed for this purpose (see *Postlethwayt's Dictionary of Commerce*, vol. 1, page 94); but geometrical diagrams do not seem at all to illustrate the Problem.

A graphic operation, however of a very useful and ingenious description, was published in London a few years ago, in which, scales of the monies of exchange of the principal places in Lloyd's List, are so graduated and arranged, that the arbitrated price between any two of those places with respect to a third, may be immediately found by the application of a right line. The invention is by *William Hyde Wollaston, M.D.—S. and F.R.S.*

Another kind of scale, for facilitating operations in Exchange, &c. has been lately invented by *William Blake, Esq. F.R.S.* entitled a Logometric Scale of Exchanges, Bullion, Stocks, Monies, Weights, and Measures. It is constructed on the principle of Gunter's sliding-rule, and is well adapted for the ready solution of many useful problems.

In dwelling so long on the explanations of this problem, numerous repetitions must occur, which are, however, more excusable than omissions. Indeed, in a large work, repetitions are unavoidable where perspicuity is the chief object; and it has been the Author's principal endeavour to render Arbitration of Exchange more easy and accessible than it has been hitherto considered, especially in England, where merchants are said to be inferior to their neighbours on the continent in this branch of commercial science, and perhaps in this alone.

As every branch of science is difficult, in proportion as it is complex, the best mode of simplifying a problem is to divide it, so as to distinguish its component parts, and then to consider each division separately. Now the question before us may be distinguished under the three following heads.

- 1.—To find the arbitrated price of exchange.
- 2.—To compare it with the advised price.
- 3.—To draw and remit according to the comparison.

The arbitrated price would be always obvious without any calculation, if the monies of exchange were of one denomination; for the problem is founded on the FIRST AXIOM OF EUCLID, viz. “*Things that are equal to one and the same thing are equal to one another.*”

Thus, if the exchange of London on Amsterdam be 33 Shillings Flemish, and on Hamburg 34, these two sums, according to the Axiom, are equal to one another, being both equal to the Pound sterling. Hence the arbitrated price would be 33 Shillings Flemish of Amsterdam for 34 Shillings Flemish of Hamburg, if those places exchanged with each other in Shillings; but Amsterdam gives Hamburg an uncertain number of Stivers for the Dollar of Exchange, and therefore the proportion between these different denominations of money must be found by the rule of proportion. Thus, as 33s. of Hamburg : 34s. of Amsterdam :: 1 Dollar : $31\frac{1}{17}$ Stivers. Hence the arbitrated price is $31\frac{1}{17}$ Stivers of Holland, for 2 Marks of Hamburg.

The following example contains all the variety that can occur in finding the arbitrated price.

If the exchange of London on Paris be 25, and on Cadiz 40, what is the arbitrated price between Paris and Cadiz—that is, how many Francs should equal the Doubloon of 4 Piastres?

Here the Pound sterling equals 25 Francs, and the same Pound equals 6 Piastres; for, as 40d. : 1 Piastre :: 240d. : 6 Piastres. Hence (per the Axiom,) 6 Piastres = 25 Francs; and therefore 4 Piastres (the Doubloon) = $16\frac{2}{3}$ Francs, the arbitrated price; for, as 6 Piastres : 25 Francs :: 4 Piastres : $16\frac{2}{3}$ Francs.

Or thus, by the Chain Rule.

1 Doubloon.

1 Doubloon = 4 Piastres.

1 Piastre = 40 Pence sterling.

240 Pence = 25 Francs.

Hence, $\frac{4 \times 40 \times 25}{240} = \frac{50}{3} = 16\frac{2}{3}$ Francs.

The second part of this problem, that of comparing the arbitrated and advised prices, is no more than to observe which price is cheapest or dearest to a place, the same as to an individual.

Thus, suppose the arbitrated price between Paris and Cadiz be, as above, $16\frac{2}{3}$ Francs for the Doubloon, and the advised price 16, the latter is evidently best for Paris, and the former for Cadiz; it being the interest of Paris to buy the Doubloon at the lowest price, and the interest of Cadiz to sell it at the highest price. This being understood, the following is the rule to be observed.

GENERAL RULE.

Draw upon the place where the arbitrated price is better for that place than the advised price; and remit to the place where it is worse.

Thus, in the foregoing comparison, London should draw on Cadiz, where the arbitrated price is better than the advised price; and should remit to Paris, where it is worse.

Suppose London exchanges on Amsterdam at 34 10, and on Hamburgh at 33 5; and suppose the advised course of exchange between Amsterdam and Hamburgh is 32 Stivers for the Dollar; how should London draw and remit, and what profit presents on a bill of £100?

As 33s. 5d. : 34s. 10d. :: 2 Marks : $33\frac{2}{3} + \frac{1}{3}$ Stivers, the arbitrated price, which is better for Hamburgh than the advised price; therefore, (according to the above Rule,) draw on Hamburgh, and remit to Amsterdam. Thus, your draft, which sells for £100 at 33 5, will amount to 1253 Marks 2 Sols: this sum, turned into Dutch money at 32 Stivers, will produce 1002 Guilders 10 Stivers; and a bill on Amsterdam for the amount at 34 10 will cost only £95 18s. 8d.

For, as £1 sterling : 33s. 5d. :: £100 : 1253 Marks 2 Sols.

And, as 2 Marks : 32 Stivers :: 1253 Marks 2 Sols, : 1002 Guilders 10 Stivers.

Again, as 34s. 10d. : £1 sterling, :: 1002 Guilders 10 Stivers : £95 18s. 8d.

Hence, the profit which presents in a draft of £100 sterling is £4 1s. 4d. The money you receive for your draft will pay for your remittance, with the above surplus, and your debit at Hamburgh will be paid by your credit at Amsterdam.

But if, on the contrary, the advised price of exchange had been 34½, this would be better

than the arbitrated price for Hamburg, and therefore you should draw on Amsterdam: thus—£100 at 34 10 = 1045 Guilders, which, at $34\frac{1}{4}$ Stivers = 1220 Marks 7 S. 6 F.; and this bill at 33 5 will cost only £97 7s. 10d.; the profit, therefore, is £2 12s. 2d. The money you receive for your draft will pay for your remittance, with this surplus, and your debit at Amsterdam will be paid by your credit at Hamburg.

The following example, which is taken from a real operation, contains as much variety as can occur in Problems of this kind.

In March, 1802, the exchanges were (according to Lloyd's List,) London on Amsterdam 10 16, and on Cadiz 37; and, according to the Quotation of Amsterdam, the exchange of that place on Cadiz was 107.

London purchased bills to the amount of 10,000 Piastres, and remitted them to Cadiz, desiring to have returns in bills on Amsterdam; but when the remittance reached Cadiz, the exchange with Amsterdam had fallen to 104.

London also drew on Amsterdam for the amount, and the operation stood thus—
10,000 Piastres at 37d. = £1541 13s. 4d. which sum, converted to Florins at

10 Florins 16 Stivers per £ sterling	=	Fl. Curr. Stiv.	16,650 0
10,000 Piastres reduced to Ducats of 375 Maravedis	=	Ducats	7,253 $\frac{1}{3}$
Commission, brokerage, and discount	=		217 $\frac{1}{3}$
			7,036
7,036 Ducats at 104, drawn for, deducting 3 per cent. discount			17,734 15
		Gain	1,084 15

Hence, the profit on this operation was about 7 per cent.; and had the exchange kept up, that is, had the Ducat been negotiated at 107 per Ducat, the gain would have been above 10 per cent.—which shews the necessity of despatch in such speculations.

The reason for thus drawing and remitting is founded on the General Rule, and the arbitrated price is determined in the following manner:

First, find how many Pence sterling the Ducat is worth; thus—

Maravedis	Pence sterling	Maravedis	Pence sterling.	£	Florins	Stivers	Pence sterling	Pence Flemish.
As 272	: 37	:: 375	: 51.—Then, as 1	: 10	16	:: 51	: 91 $\frac{1}{3}$	

Or thus, 1 Ducat.

1 Ducat = 375 Maravedis.

272 Maravedis = 37 Pence sterling.

240 Pence sterling = 432 Pence Flemish.

Reduced gives 91 $\frac{1}{3}$ d. nearly.

Here the arbitrated price is 91 $\frac{1}{3}$ d. Flemish for the Ducat, but the real price is 104. Thus the former is the most favourable for Amsterdam, and therefore, (according to the Rule, page 119,) London should draw on Amsterdam and remit to Cadiz.

COMPOUND ARBITRATION

Is a comparison between the exchanges of more than three places, in order to find how much a remittance passing through them all will amount to in the last place; or to find the arbitrated price between the first place and the last, in order to determine on the most advantageous mode of negotiating bills.

Compound arbitration is therefore a repetition of simple arbitration, and may be solved by a continuation of several statings in the Rule of Proportion, as in the following example:

Suppose the exchange between London and Amsterdam to be 35 Shillings Flemish for £1 sterling; between Amsterdam and Lisbon, 42 Pence Flemish for 1 Old Crusade, and between Lisbon and Paris, 480 Rees for 3 Francs, what is the arbitrated price between London and Paris?

First, As 35s. Flemish : £1 :: 42d. Flemish, or $3\frac{1}{2}$ s. Flemish : 2s. sterling = 1 Old Crusade.

Secondly, As 1 Old Crusade, or 400 Rees : 2s. sterling :: 480 Rees : 2s. $4\frac{1}{2}$ d. sterling = 3 Francs.

Thirdly, As 2s. $4\frac{1}{2}$ d. sterling : 3 Francs :: £1 sterling : 25 Francs.

Hence the arbitrated price is 25 Francs for £1 sterling.

But all such operations are best performed in the following manner by the Chain Rule:

		1 Pound sterling	
1 Pound sterling	=	35 Shillings Flemish	
$3\frac{1}{2}$ Shillings Flemish	=	1 Old Crusade	
1 Old Crusade	=	400 Rees	
480 Rees	=	3 Francs	
	Reduced	= 25 Francs as above.	

Suppose London has a sum of money to receive in Cadiz, the exchange being at 38d.; but, instead of drawing directly on this place, he draws on Amsterdam, ordering his agent there to draw on Paris; and Paris to draw on Cadiz; the exchange between London and Amsterdam being at 35 Shillings Flemish per Pound sterling; between Amsterdam and Paris $53\frac{1}{2}$ Grotes Flemish per Ecu of 3 Francs; and between Paris and Cadiz, 15 Francs 50 Centimes per Doubloon of Plate; what is the arbitrated price between London and Cadiz?

		1 Dollar of Plate
4 Dollars of Plate	=	1 Doubloon do.
1 Doubloon	=	15½ Francs
3 Francs	=	53½ Grotes Flemish
12 Grotes	=	1 Shilling Flemish
35 Shillings Flemish	=	240 Pence sterling
Reduced, gives 39½d. sterling per Dollar of Plate.		

The circular operation would, therefore, be most advantageous, as London would get 39½d. instead of 38d. for each Dollar, which he had to receive in Cadiz.

London having a sum to receive in Lisbon, when the exchange is at 64d. sterling per Milree, draws on Lisbon, but remits his bill to Hamburg to be negotiated; and directs the returns to be made to him in bills on Leghorn—the exchange between Hamburg and Lisbon being 45 Grotes Flemish per Old Crusade, between Hamburg and Leghorn 85 Grotes Flemish per Pezza, and between London and Leghorn 52d. sterling per Pezza, what is the arbitrated price between London and Lisbon?

		1000 Rees
400 Rees	=	1 Old Crusade
1 Old Crusade	=	45 Grotes Flemish
85 Grotes	=	1 Pezza
1 Pezza	=	52 Pence sterling
Reduced, gives 68¼d. sterling per Milree.		

This circular operation would, therefore, be more advantageous than the direct exchange of London on Lisbon, viz. 68¼d., instead of 64d.

London has a sum to pay in Petersburg, and another to receive in Genoa; but there being no regular exchange between these places, London draws on Hamburg, and remits his bill to Petersburg, directing Hamburg to draw on Genoa—the exchange between London and Genoa, being 46½d. sterling per Pezza; between Hamburg and Genoa, 81 Grotes Flemish per Pezza; and between Petersburg and Hamburg, 23 Schillings Lubs per Ruble; what is the exchange between London and Petersburg resulting from the operation—that is, how many Pence sterling does London pay for the Ruble?

		1 Ruble
1 Ruble	=	23 Schillings Lubs
1 Schilling Lubs	=	2 Grotes Flemish
81 Grotes	=	1 Pezza
1 Pezza	=	46½ Pence sterling
Reduced, = 26 ⅓d. sterling per Ruble.		

London has a sum to remit to Paris, the exchange being at 24 Livres 5 Sous per Pound sterling; but instead of taking a bill on Paris, London draws on Hamburg, and remits his bill to Paris to be negotiated; Hamburg is directed to draw on Venice, and Venice to draw on London; the exchange between Paris and Hamburg being 190 Francs per 100 Marks Banco, between Hamburg and Venice 4 Lire 5 Soldi Piccoli per Mark Banco, and between Venice and London 55 Lire Piccole per Pound sterling; what is the arbitrated price between London and Paris?

		1 Pound Sterling	
1 Pound Sterling	=	55 Lire Piccole	
4½ Lire Piccole	=	1 Mark	
100 Marks	=	190 Francs	
80 Francs	=	81 Livres	

Reduced, gives 24 Livres 18 Sous per Pound sterling.

The circular operation is, therefore, more advantageous than the direct exchange, as London pays 24 Livres 18 Sous, with £ 1 sterling, instead of 24 Livres 5 Sous.

Hitherto we have only examined one combination of the exchanges between several places in order to discover one result. In the following example we shall examine different combinations of the same exchanges, to find which is most favourable; and what is here performed with four places only, may be done with any greater number, in the same manner—that is, by trial and comparison.

Suppose the following to be the quotations of exchange:

London on	Amsterdam	35	Shillings Flemish per Pound sterling
	Madrid	38	Pence sterling per Dollar of Plate
	Paris	24	Livres per Pound sterling
Amsterdam on	London	34	Shillings Flemish per Pound sterling
	Paris	53	Grotes per Ecu of 3 Francs
	Madrid	92	Grotes per Ducat of Plate
Paris on	London	23½	Livres per Pound sterling
	Madrid	16	Francs per Doubloon of Plate
	Amsterdam	54	Grotes Flemish per Ecu of 3 Francs
Madrid on	London	39	Pence sterling per Dollar of Plate
	Amsterdam	94	Grotes per Ducat of Plate
	Paris	16½	Francs per Doubloon of Plate.

Now if London has a sum to receive in Madrid, what would be the most advantageous mode of operation?

By drawing directly on Madrid as above, London will receive 38d. sterling per Dollar.

First.—Let London draw on Amsterdam, directing Amsterdam to draw on Paris, and Madrid to remit to Paris; then the operation will be as follows:

		1 Dollar of Plate
4 Dollars	=	1 Doubloon of Plate
1 Doubloon	=	$16\frac{1}{2}$ Francs
3 Francs	=	54 Grotes Flemish
12 Grotes	=	1 Shilling Flemish
35 Shillings Flemish	=	240 Pence sterling
Reduced, gives the Dollar equal to $42\frac{3}{4}$ d. sterling.		

Secondly.—Let London draw on Paris, directing Paris to draw on Amsterdam, and Madrid to remit to Amsterdam; then,

		1 Dollar of Plate
1 Dollar of Plate	=	272 Maravedis
375 Maravedis	=	1 Ducat of Plate
1 Ducat	=	94 Grotes Flemish
53 Grotes	=	3 Francs
80 Francs	=	81 Livres
24 Livres	=	240 Pence sterling
Reduced, gives the Dollar = $39\frac{1}{11}$ d.		

Thirdly.—Let London draw on Madrid, and remit the bill to Paris to be negotiated, and let the returns be made in a bill on Amsterdam; then

		1 Dollar of Plate.
4 Dollars	=	1 Doubloon of Plate
1 Doubloon	=	16 Francs
3 Francs	=	54 Grotes Flemish
12 Grotes	=	1 Shilling Flemish
35 Shillings Flemish	=	240 Pence sterling.
Reduced, gives $41\frac{1}{7}$ d. sterling per Dollar.		

Fourthly.—Let London draw on Madrid, and remit to be negotiated in Amsterdam, and order the returns to be made in a bill on Paris; then

		1 Dollar of Plate
1 Dollar	=	272 Maravedis

375 Maravedis = 1 Ducat of Plate

1 Ducat = 92 Grotes Flemish

53 Grotes = 3 Francs

80 Francs = 81 Livres

24 Livres = 240 Pence sterling.

Reduced, gives $38\frac{1}{4}$ d. sterling per Dollar nearly.

Fifthly.—Let London draw on Amsterdam, Amsterdam on Paris, and Paris on Madrid ; then

1 Dollar of Plate

4 Dollars = 1 Doubloon of Plate

1 Doubloon = 16 Francs

3 Francs = 53 Grotes Flemish

12 Grotes = 1 Shilling Flemish

35 Shillings Flemish = 240 Pence sterling.

Reduced, gives $40\frac{3}{4}$ d. per Dollar.

Sixthly.—Let Madrid remit to Paris, Paris to Amsterdam, and Amsterdam to London ; then

1 Dollar of Plate

4 Dollars = 1 Doubloon of Plate

1 Doubloon = $16\frac{1}{2}$ Francs

3 Francs = 54 Grotes Flemish

12 Grotes = 1 Shilling Flemish

34 Shillings Flemish = 240 Pence sterling.

Reduced, gives 44d. per Dollar nearly.

Several other combinations might be made ; but the foregoing are sufficient for the present illustration.

In recapitulating the different combinations here proposed, we find that

The First , gives $42\frac{3}{4}$ Pence sterling per Dollar of Plate.

The Second — $39\frac{1}{4}$ — — per Ditto

The Third — $41\frac{1}{4}$ — — per Ditto

The Fourth — $38\frac{1}{4}$ — — per Ditto

The Fifth — $40\frac{3}{4}$ — — per Ditto

The Sixth — 44 — — per Ditto

Whilst the direct course gives 38 — — per Ditto

Hence, it is evident, according to the rule laid down in pages 105 and 108, that the 6th operation would be most advantageous for the London drawer, as he would receive more

Pence for the Dollar than by any other combination; but it must be observed, that in this case, he would have to wait about six months for the remittance from Madrid through Paris and Amsterdam; whereas, by drawing directly on Madrid, he would receive the money immediately—consequently, interest should be deducted from the profit, besides commission, postage, &c. The Profit is, however, so great in this case, as far to exceed the additional expenses; thus—

As 38 : 44 :: 100 : $115\frac{10}{3}$. Profit, $15\frac{5}{6}$ per cent. nearly.

It is also evident, that if London was the debtor, and had to remit to Madrid, the lowest course of exchange, which is here the direct one, should be adopted.

CHARGES ON EXCHANGE OPERATIONS.

IN the foregoing examples, no notice is taken of the expenses incident to exchange operations, such as commission, brokerage, interest, &c.; but it is necessary to make allowance for those charges, which is generally done by computing them at so much per cent.; and then adding the per-centage if the money is to be paid, or subtracting it if to be received. Suppose the charge to be 1 per cent.; if on a Draft it is 101 for 100, but if on a Remittance, 99 for 100.

Example I.—Suppose a merchant in Liverpool has 10,000 Marks to pay in Hamburg, for which purpose he orders bills to be bought in London at 34s. 8d. besides which he is charged $\frac{1}{2}$ per cent. for commission and brokerage, how much sterling will he have to pay?

	s.	d. Flem.	£ ster.	Marks.	£	s.	d. ster.
As 34	8	:	1	::	10,000	:	769 4 7 $\frac{1}{2}$
					£	s.	d. ster.
And as 100	:	100 $\frac{1}{2}$	::	769	4	7 $\frac{1}{2}$	: 773 1 6 $\frac{1}{2}$

Example II.—A merchant in London negotiates a bill on Leghorn of 6592 Pezze 10 Soldi at 49 $\frac{1}{2}$ d. sterling per Pezza; and pays as usual 1 per 1000 brokerage; how much sterling does he receive?

Pezza	£ ster.	Pezze Soldi	£	s.	d. ster.
As 1	: 49 $\frac{1}{2}$	::	6592 10	: 1359 14 0 $\frac{3}{4}$	
			£	s.	d.
And as 1000	: 999	::	1359 14 0 $\frac{3}{4}$	: 1358 6 10 $\frac{1}{2}$	

When the operation is performed by the Chain Rule, the charges per cent. must be deducted

from 100 the last consequent, if it tends to the diminution of the result, but if to its increase, the same remainder must be an antecedent.

Example III.—London, having a sum to pay in Lisbon, buys bills on Hamburg at the exchange of 35s. 4d. and remits them to Lisbon, where they are negotiated at 43 Grotes Flemish per Old Crusade. The charges in Lisbon for brokerage, commission, and postage are $\frac{3}{4}$ per cent; what is the arbitrated price between London and Lisbon, resulting from the operation—that is how many Pence sterling should be given for the Milree?

$$\begin{array}{rcl}
 & & 1000 \text{ Rees} \\
 400 \text{ Rees} & = & 43 \text{ Grotes Flemish} \\
 424 \text{ Grotes} & = & 240 \text{ Pence sterling} \\
 100 \text{ Pence} & = & 100\frac{3}{4} \text{ Pence, adding charges.} \\
 \text{Answer, } 61\frac{3}{10} \text{d. sterling per Milree.}
 \end{array}$$

In the above question the charges are added to the last consequent as they increase the price of the Milree, which must be the case, the charges being against the Payee.

Example IV.—London takes bills on Madrid at $33\frac{1}{2}$ d. per Dollar of exchange, remits them to Amsterdam with orders to negotiate at $90\frac{1}{4}$ Grotes Flemish per Ducat of exchange, and to make the returns in bills on Paris at $51\frac{3}{8}$ Grotes per Ecu of 3 Francs: these bills on Paris are negotiated in London at 25 Livres 18 Sous per Pound sterling; and all the charges (including interest) amount to $1\frac{1}{8}$ per cent.; how much per cent. is gained or lost by this operation—that is, how much will 100d. sterling produce?

$$\begin{array}{rcl}
 & & 100 \text{ Pence Sterling} \\
 33\frac{1}{2} \text{ Pence} & = & 272 \text{ Maravedis or 1 Dollar of exchange} \\
 1 \text{ Ducat of exchange, or } 375 \text{ Maravedis} & = & 90\frac{1}{4} \text{ Grotes} \\
 51\frac{3}{8} \text{ Grotes} & = & 3 \text{ Francs} \\
 80 \text{ Francs} & = & 81 \text{ Livres} \\
 1 \text{ Livre} & = & 20 \text{ Sous} \\
 518 \text{ Sous} & = & 240 \text{ Pence} \\
 100 \text{ Pence} & = & 98\frac{7}{8} \text{ Pence deducting charges.}
 \end{array}$$

The result is 105,85d. The profit is, therefore, 5,85 or nearly $5\frac{7}{8}$ per cent.

In the last example, the interest was to be deducted from the profits, but an example will now be given, in which the interest is to be added, because the drawer gains it; and, in such case, it is to be added to the antecedent instead of being subtracted.

Example V.—London draws bills on Hamburg at 34 Shillings Flemish per Pound sterling, and orders Hamburg to draw for his reimbursement on Leghorn, which is done at 86 Grotes Flemish per Pezza; Leghorn draws in the same way on Cadiz at 140 Dollars of

CHARGES ON EXCHANGE OPERATIONS.

Plate per 100 Pezze; and lastly, Cadiz draws on London at 39 Pence sterling per Dollar; what is the profit or loss on the operation, supposing that the charges in each of the above three foreign places are $\frac{3}{4}$ per cent. (in all $2\frac{1}{4}$ per cent.); but that London, by keeping the money in his hands about 8 months, gains 3 per cent. by the interest?

	100 Pence sterling	
240 Pence	=	34 Shillings Flemish
1 Shilling Flemish	=	12 Grotes
86 Grotes	=	1 Pezza
100 Pezze	=	140 Dollars of Plate
1 Dollar of Plate	=	39 Pence
$97\frac{3}{4}$ Pence deducting charges	=	100 Pence
103 Pence with interest	=	100 Pence

The Answer is 107,2d. The loss is, therefore, $7\frac{1}{2}$ per cent. nearly.

As the above example comprehends all the varieties that generally occur in questions of this kind, it is here solved by a series of statings in the Rule of Three, which serves at once to explain the nature of the operation, and to prove the correctness of the Chain Rule. Such illustrations must be highly useful in all problems of arbitration.

London, we will suppose, receives 100 Pence, or any other denomination, by drawing on Hamburg at 34s. Flemish per Pound sterling.

As $\overset{d.}{240} : \overset{s.}{34} :: \overset{d.}{100} : \overset{\text{Grotes Flem.}}{170}$

Hamburg must, therefore, draw on Leghorn for that sum,—thus

$\overset{\text{Grotes}}{\text{As } 86} : \overset{\text{Pezza}}{1} :: \overset{\text{Grotes}}{170} : \overset{\text{Pezza}}{1,977}$

Leghorn in the same way reimburses on Cadiz.

$\overset{\text{Pezze}}{\text{As } 100} : \overset{\text{Doll. Plate}}{140} :: \overset{\text{Pezza}}{1,977} : \overset{\text{Doll. Plate}}{276,78}$

For which Cadiz thus finally draws on London—

$\overset{\text{Doll.}}{\text{As } 1} : \overset{d.}{39} :: \overset{\text{Doll.}}{276,78} : \overset{d.}{107,94}$ which the drawer must pay.

Then to add the expense to the loss, say

$\overset{d.}{\text{As } 97,75} : \overset{d.}{100} :: \overset{d.}{107,94} : \overset{d.}{110,42}$

And to deduct the interest from the loss, say

$\overset{d.}{\text{As } 103} : \overset{d.}{100} :: \overset{d.}{110,42} : \overset{d.}{107,2}$

If, in the above statement, the drawer or seller had been the buyer or remitter, then the expenses and interest must have been reversed as to their places, both in the Chain Rule and in the Rule of Three.

LOGARITHMS IN EXCHANGE.

OPERATIONS in exchange may be sometimes greatly facilitated by the help of Logarithms. Thus, in a statement of arbitration—if the sum of the Logarithms of the Antecedents, be subtracted from the sum of the Logarithms of the Consequents, the remainder will be the Logarithm of the Answer.

To apply this rule to Example IV. page 127, let like numbers on both sides be struck out as before; to reduce them to a lower denomination is useless, as the Logarithm of a large number is as easily found as that of a small one: thus—

Antecedents.	Logarithms.	Consequents.	Logarithms.
33,5	1,525045	272	2,434569
125	2,096910	90,25	1,955447
51,375	1,710752	3	0,477121
518	2,714330	81	1,908484
		20	1,301030
	8,047037	98,875	1,995086
		Sum of Log. of Con.	10,071737
		Sum of Log. of Ant.	8,047037
		Answer, 105,85	= 2,024700

The reason of the above operation will be understood by considering that Multiplication and Division of common numbers are performed by Addition and Subtraction of their Logarithms. Laborious calculations, therefore, must be greatly facilitated by the help of Logarithms, and their application in Exchange seems too obvious to require any further illustration.

FIXED NUMBERS IN EXCHANGE.

IN every long statement of an exchange operation, there are both fixed numbers and variable numbers: the latter are generally the prices of exchange, and the fluctuating agios, or values of different sorts of money, with the amount of charges, &c.; and the former, that is, the fixed numbers, are the permanent proportions between certain denominations of money, as the number of Pence in a Pound sterling, &c. Now when opera-

tions between the same places are to be repeated several times, and at such intervals, as to admit of alterations in the variable numbers, the work may be considerably abridged by reducing all the invariable terms into a fixed number, which may be afterwards used as a constant factor in all such questions.

Thus, in Example III., page 127, among the Antecedents, 400 expressing the number of Rees in an Old Crusade, and 100, which is assumed, in order to find a per centage on the operation, are fixed numbers; and, among the Consequents, 1000, the number of Rees in a Milree, and 240, the number of Pence in a Pound sterling, are likewise fixed numbers. The variable numbers are the exchanges between London and Hamburgh, and between Hamburgh and Lisbon, and the amount of the charges. Then let the fixed numbers be cast up, thus—

400	1000
100	240

By expunging the cyphers, and dividing both sides by 4, the result, or *fixed number*, will be 6 in all questions of the same kind. Then multiply the constant number 6 by the course of exchange of Hamburgh on Lisbon, and by 100 more the charges, and divide by the course of exchange of London on Hamburgh expressed in Grotes Flemish: or, by Logarithms,—to the constant Logarithm of 6, add the Logarithms of the two first-mentioned variable quantities, and subtract the Logarithm of the last: thus—

Logarithm of 6	0,778151
43	1,633468
100,75	2,003245

4,414864

Logarithm of 424	... 2,627366
------------------	--------------

1,787498 Log. of 61,3 the arbitrated price,
(found page 127.)

Now let the exchange of London on Hamburgh be at 34s. 8d. (or 416 Grotes per Pound sterling, and that of Hamburgh on Lisbon at 44 Grotes per Crusade; let also the charges amount to $\frac{1}{2}$ per cent.

Fixed Logarithm	0,778151
Logarithm of 44	1,643453
100,5	2,002166

4,423770

Logarithm of 416	2,619093
------------------	---------------

1,804677 Log. of 63,78, or $63\frac{3}{4}$ nearly.

In Example IV. page 127, on one side 375 and 80; and on the other side 272, 3,81, 240 are invariable numbers (besides 100 which may be cancelled on both sides), which may be reduced as before to

$$125 \dots\dots 272 \left. \begin{array}{l} 3 \\ 81 \\ 20 \end{array} \right\} \text{give } \frac{1321920}{125} = 10575,4 \text{ Fixed Number.}$$

The fixed Logarithm is then found as follows:

Logarithm of 272.....2,434569
 3.....0,477121
 81.....1,908484
 20.....1,301030

6,121204

Logarithm of 125.....2,096910

Fixed Logarithm4,024294 = 10575,4 Fixed Number.

This may be applied to the questions, page 127, as follows:

Antecedents.	Logarithms.	Consequents.	Logarithms.
33,5	1,525045	90,25	1,955447
51,375	1,710754	98,875	1,995086
518,	2,714330	Fixed Logarithm	4,024294
	<u>5,950127</u>	Sum of Log. of Con.	<u>7,974827</u>
		Sum of Log. of An.	<u>5,950127</u>

Answer, Log. 105,852,024700 as before.

ARBITRATION OF SPECIE AND BULLION.

THE state of the exchange between two countries is sometimes such, that it is found more advantageous, instead of drawing or remitting bills, to import or export specie or bullion. The profit or loss on operations of this kind may be determined by calculations similar to those used in arbitration of exchange.

By this rule also the course of exchange is determined from the price of bullion, and *vice versa*.

Example I.—London has a sum to receive in Lisbon, the exchange being at 62; but instead of drawing on Lisbon, he orders a quantity of Johanesees to be bought there, the discount on paper money in Portugal being at the time 12 per cent.; these Johanesees are sold in London at £4 sterling per ounce; the charges, namely, commission, freight, and insurance, amount to $2\frac{1}{2}$ per cent.;—what is the exchange between London and Lisbon resulting from the operation; that is, how many Pence sterling should be given for the Milree, legal money?

		1000 Rees
100 Rees legal money	=	94 Rees effective
6400 Rees effective	=	1 Johanese
1 Johanese	=	$220\frac{1}{2}$ Grains
480 Grains in Johanese	=	4 Pounds sterling
1 Pound	=	240 Pence sterling
100 Pence	=	$97\frac{1}{2}$ Pence deducting charges.
Reduced, gives 63,15d. per Milree.		

The circular operation would therefore be most advantageous to the London Drawer.

Example II.—A quantity of Dollars is imported from Cadiz, for which bills are drawn on London at the exchange of $38\frac{3}{4}$, and the charges amount to 3 per cent.;—how much per ounce will these Dollars cost in London, supposing 1000 Dollars to weigh 866 Ounces Troy?

		1 Ounce of Dollars
866 Ounces	=	1000 Dollars
1 Dollar	=	$10\frac{5}{8}$ Reals of Plate
8 Reals of Plate	=	1 Dollar of Exchange
1 Dollar of Exchange	=	$38\frac{3}{4}$ Pence sterling
100 Pence	=	103 Pence with charges.
Reduced, gives 61,21d. or 61½d. per Ounce nearly.		

Example III.—London has a sum to pay in Hamburgh, the exchange being at 34; but instead of remitting bills, he buys a quantity of Spanish Dollars at $60\frac{1}{2}$ d. sterling per Ounce, which are sent to Hamburgh, and there sold at 28 Marks Banco per Mark fine; the charges amount to $1\frac{1}{2}$ per cent.;—what is the arbitrated price, or course of exchange, between London and Hamburgh, the Dollars being 10 oz. 15 dwts. fine, and 60 Marks in Hamburgh being equal to 451 Ounces Troy?

		1 Pound Sterling
1 Pound Sterling	=	240 Pence
60½ Pence	=	1 Ounce in Dollars
120 Ounces in Dollars	=	107 Ounces fine
451 Ounces	=	60 Marks Hamburgh weight
1 Mark fine	=	28 Marks Banco
3 Marks Banco	=	8 Shillings Flemish banco
100 Shillings Flemish	=	98½ Shillings deducting charges.

Answer, 34s. 7¼d. Flemish per Pound Sterling.

The operation would therefore be preferable to the course of exchange; for, with £1 sterling, London here pays 34s. 7¼d. Flemish, whereas, by remitting bills to Hamburgh, with £1 sterling, he would have paid only 34 Shillings Flemish.

Example IV.—Gold in bars is bought in Hamburgh at 98 Shillings Lubs per Ducat of gold (67 of which Ducats make a Cologne Mark, 23½ carats fine); this gold is conveyed to England, and Hamburgh draws on London for the value at 34s. 6d. Flemish per Pound sterling; the charges amount to 1¼ per cent.;—how much does this gold cost in London per Ounce standard?

		1 Ounce Standard
47 Ounces Standard	=	44 Ounces, 23½ carats fine
451 Ounces	=	60 Cologne Marks
1 Cologne Mark	=	67 Ducats
1 Ducat	=	98 Shillings Lubs
6 Shillings Lubs	=	1 Shilling Flemish
34½ Shillings Flemish	=	1 Pound Sterling
100 Pounds	=	101¼ Pounds with charges.

Answer, £4 sterling per Ounce, very nearly.

Example V.—Silver in bars is bought at Cadiz at 105 Reals of Plate per Spanish Mark of fine silver; this silver is sent to England, and sold at 5s. 4d. sterling per Ounce of standard silver; the charges amount to 2 per cent.;—what is the arbitrated price between London and Cadiz, reckoning that 12 Spanish Marks equal 89 Ounces Troy, or what should be the course of exchange resulting from this operation?

		1 Dollar of Plate
1 Dollar of Plate	=	3 Reals of Plate
105 Reals of Plate	=	1 Mark of fine silver.
222 Marks Fine	=	240 Marks standard silver
12 Marks	=	89 Ounces Troy
1 Ounce Standard	=	64 Pence sterling.
100 Pence	=	102 Pence with charges.

Answer, 39¾d. per Dollar of exchange, nearly.

Example VI.—Gold in bars is bought in Lisbon at 1700 Rees legal money per Outava of Gold, 22 carats fine ; this gold is sold in London at £4 per Ounce ; the charges amount to $1\frac{1}{2}$ per cent. ;—what is the arbitrated price between London and Lisbon, reckoning that 400 Ounces of Portugal equal 369 Ounces Troy ; that is, what should be the course of Exchange resulting from this operation ?

		1000 Rees
1700 Rees	=	1 Outava of Standard Gold
8 Outavas	=	1 Ounce of Portugal
400 Ounces of Portugal	=	369 Ounces Troy
1 Ounce Troy	=	4 Pounds Sterling
1 Pound Sterling	=	240 Pence
100 Pence	=	$101\frac{1}{2}$ Pence with charges
Answer, 66d. $\frac{2}{100}$ per Milree.		

ARBITRATION OF MERCHANDIZE.

ARBITRATION of merchandize consists chiefly in determining, when the price of any kind of goods in one place is known, what it would come to in another place ; and consequently, the price at which it should be sold in order to obtain a certain profit. In most cases, there are various charges and expenses to be taken into account, which are commonly reckoned at so much per cent. ; or sometimes a certain proportion is deducted from the weight or the measure. Strict accuracy is not in general required in such calculations, but only such an estimate as will enable the merchant to judge how he may, with the greatest advantage, export or import any particular kind of goods.

Example I.—Suppose a certain kind of woollen cloth to cost in London $16\frac{1}{2}$ s. per yard ; the exchange of London on Hamburgh being 34s. $2\frac{1}{2}$ d. Flemish Banco per Pound Sterling ; and the agio on the Bank $21\frac{1}{2}$ per cent. ;—what will this cloth come to in Hamburgh currency per Brabant Ell, 49 of which equal 37 English yards ?

		1 Brabant Ell
49 Brabant Ells	=	37 English yards
1 Yard	=	$16\frac{1}{2}$ Shillings Sterling
20 Shillings Sterling	=	$410\frac{1}{2}$ Grotes Flemish Banco
32 Grotes Flemish	=	1 Mark
100 Marks Banco	=	$121\frac{1}{2}$ Marks currency
Answer, 9 Marks 11 Shillings 4 Pfenings currency per Ell.		

Example II.—Suppose the cwt. of coffee in London to cost 65 Shillings on board, and the exchange on Hamburg to be 34s. 8d.; commission 2 per cent.; and insurance 1 per cent.;—what will the lb. of such coffee come to in Hamburg Banco, reckoning for freight, brokerage, and other charges $4\frac{1}{2}$ Pfenings Banco per Pound,—112lb. avoirdupois being equal to 105lb. of Hamburg?

		1 lb. of Hamburg
105 lb. of Hamburg	=	1 Hundred Weight Avoirdupois
1 Hundred Weight	=	65 Shillings Sterling
20 Shillings Sterling	=	416 Grotes Flemish Banco
2 Grotes Flemish	=	1 Schilling Lubs
100 Schillings	=	102 Schillings with Commission
100 Schillings	=	101 Schillings with Insurance
Answer, 6 Schillings	$7\frac{1}{2}$	Pfenings Banco nearly.
Add.	$4\frac{1}{2}$	Pfenings for Charges in Hamburg

Ans. 7 Schillings per lb.

Example III.—Irish butter sells at Cork for 50 Shillings Irish per cwt. the exchange of Cork on London is $9\frac{1}{4}$; and that of London on Hamburg 35;—what price will the cask of 224 lb. come to in Hamburg currency, reckoning commission and insurance together at $3\frac{1}{2}$ per cent., the charges in Hamburg at 5 Marks current per cask, and the agio on the Bank 22 per cent?

		224 lb. of Hamburg
105 lb. of Hamburg	=	1 Hundred Weight Avoirdupois
1 Hundred Weight	=	50 Shillings Irish
$109\frac{1}{4}$ Shillings Irish	=	100 Shillings Sterling
20 Shillings Sterling	=	35 Shillings Flemish Banco
8 Shillings Flemish	=	3 Marks
100 Marks Banco	=	122 Marks current
100 Marks current	=	$103\frac{1}{2}$ Marks current with Comn. and Inse.
Answer, 80 Marks	$14\frac{1}{2}$	Schillings current nearly.

Charges in Hamburg. . . . 5 Marks

85 Marks $14\frac{1}{2}$ Schillings per Cask.

Example IV.—Pepper is bought in London at $11\frac{1}{2}$ d. per lb. net weight, which, with the allowances for draft and tare, comes to $10\frac{3}{4}$ d. per lb. gross weight. This pepper is exported to Amsterdam, the exchange being at 36 Shillings Flemish Banco per Pound Sterling; $1\frac{2}{3}$ per cent. is allowed for tare in Amsterdam: freight, insurance, and other charges

amount to $6\frac{1}{2}$ per cent. and it is sold there at 28 Grotes Flemish per Pound; but 2 per cent. is allowed for Rabat on the price;—what is the profit or loss on the operation,—56 lb. of Amsterdam being equal to 61 lb. avoirdupois?

		1 lb. Avoirdupois	
61 lb. Avoirdupois	=	56 lb. of Amsterdam	
$101\frac{2}{3}$ lb. Gross Weight	=	100 lb. Net Weight in Amsterdam	
1 lb. Net Weight	=	28 Grotes Flemish	
102 Grotes	=	100 Grotes, with Rabat	
$106\frac{1}{2}$ Grotes	=	100 Grotes, with Charges	
12 Grotes	=	1 Shilling Flemish	
36 Shillings Flemish	=	240 Pence Sterling	
Reduced, gives....		^{s.} 12 ^{d.} 9 sterling per lb.	
Prime Cost		11 5	

Profit 1 4 per lb. or $12\frac{4}{3}$ per cent.

Example V.—The Last of wheat at Dantzic costs 620 Florins, and it is computed that it might be sold in London at 90 Shillings per Quarter; Dantzic may draw on Hamburg for the amount at 166 Groschen per Rixdollar Banco, and the exchange of Hamburg on London is 34s. 6d.;—what would be the profit or loss on the importation of such wheat, reckoning that the Last of Dantzic equals $10\frac{3}{4}$ English Quarters, that the charges at Dantzic will amount to $12\frac{1}{2}$ per cent., and that the freight, insurance, and all the charges to be paid in London (including commission to the Hamburg correspondent) will amount to 20 per cent.?

		1 English Quarter	
$10\frac{3}{4}$ Quarters	=	1 Last in Dantzic	
1 Last in Dantzic	=	620 Florins	
100 Florins	=	$112\frac{1}{2}$ Florins, with charges in Dantzic	
1 Florin	=	30 Groschen	
166 Groschen	=	1 Rixdollar Hamburg Banco	
1 Rixdollar	=	8 Shillings Flemish	
$34\frac{1}{2}$ Shillings Flemish	=	1 Pound Sterling	
100 Pounds,	=	120 Pounds, with Charges	
1 Pound	=	20 Shillings	

Reduced, gives $65\frac{1}{4}$ Shillings per Quarter.

If therefore the wheat can be sold at 90s. the profit will be $24\frac{3}{4}$ s. per Quarter, or about 38 per cent.

The following question will show how to determine between two or more places, in order to find which will give the most advantageous result.

Example VI.—A quantity of Spanish wool has been bought at Bilboa at 325 Reals Vellon per Arroba of 25 lb. with an intention to export it either to London or to Amsterdam; the price of such wool in London is found to be 4 Shillings per lb. allowing 6 months credit; and in Amsterdam 58 Stivers per lb. allowing 21 months rabat, *i. e.* 14 per cent. and 1 per cent. for prompt payment: the exchange of Bilboa on London is 37d. per Dollar, and on Amsterdam 87 Grotes Flemish per Ducat;—which of the two places is the most advantageous to export to?

By a reference to the first volume, it will be found that 100 lb. of Bilboa are equal to 108 lb. avoirdupois, which answer to $99\frac{1}{8}$ lb. of Amsterdam: and that the allowances on Spanish wool in London are 22 lb. per bale of 2 cwt. And suppose the allowances in Amsterdam amount to 20 per cent.

And, to simplify the question, we will suppose the charges to be the same in London as in Amsterdam, so that they need not be taken into account.

Beginning with London, say

	1 lb. Avoirdupois.
202 lb. Net Weight	= 224 lb. Gross Weight.
108 lb. Avoirdupois	= 100 lb. of Bilboa.
25 lb. of Bilboa	= 325 Reals Vellon.
32 Reals Vellon	= 17 Reals of Plate.
8 Reals of Plate	= 1 Dollar of Exchange.
1 Dollar of Exchange	= 37 Pence Sterling.
Reduced, gives 2s. $8\frac{3}{4}$ d. sterling per lb.	

This wool will therefore come to 2s. $8\frac{3}{4}$ d. per lb. in London, where it is sold at 4s. per lb. from which, however, six months discount must be deducted; then

As 100 ; $97\frac{1}{2}$:: 4s. : 3s. $10\frac{1}{4}$ d. the real price.

And as 2s. $8\frac{3}{4}$ d. : 3s. $10\frac{1}{4}$ d. :: 100 : $142\frac{9}{11}$ d.

The profit on the operation to London is therefore $42\frac{9}{11}$ d. or nearly $42\frac{2}{3}$ per cent.

Then for Amsterdam, say

	1 lb. of Amsterdam.
100 lb. Net Weight	= 120 lb. Gross Weight.
$99\frac{1}{8}$ lb. of Amsterdam	= 100 lb. of Bilboa.
25 lb. of Bilboa	= 325 Reals Vellon.
1 Real	= 34 Maravedis.

32 Maravedis Vellon = 17 Maravedis of Plate.

375 Maravedis of Plate = 1 Ducat of Exchange.

1 Ducat of Exchange = 87 Grotes Flemish.

2 Grotes Flemish = 1 Stiver.

Reduced, gives 32,96 Stivers per lb.

This wool will, therefore, come to 32,96 Stivers per lb. in Amsterdam, where it is sold at 58 Stivers per lb.; but from this 15 per cent. must be deducted for Rabat and prompt payment; then

As 100 : 85 :: 58 Stivers : 49,3 Stivers, the real price.

And as 32,96 : 49,30 :: 100 : $149\frac{237}{412}$.

The profit on the operation to Amsterdam is $49\frac{237}{412}$, which is 7 per cent. more than in London; and, therefore, supposing, as we have done, that the freight, insurance, duty on importation, and other charges would amount to the same sum in both places, Amsterdam must be a more advantageous place to export to than London.

By the foregoing examples may be seen the great advantages which merchants may derive from a knowledge of arbitration, whether of merchandize, bullion, or exchanges; and the following article will likewise show the utility and importance of this science when judiciously applied, on a large scale, to national or political purposes.

EXCHANGE CIRCULATIONS.

EXCHANGE CIRCULATIONS are a kind of arbitration, in which a merchant negotiates his bills on his correspondent in a foreign place, directing him to draw on a third person for his reimbursement; and further ordering the operation to be continued on the same plan from one place to another, until the last correspondent reimburses himself by drawing on the original negotiator or drawer.

Thus, circular exchange is carried on among several persons on the same principle as drawing and redrawing between two correspondents; that is, when one draws upon the other directing the correspondent to draw on him again for his reimbursement, and each sells his draft for ready money.

Operations in circular exchange afford not only immediate resources, but also con-

siderable profits when judiciously managed. In order, however, to carry on this kind of business with proper effect, it is necessary for the original drawer to establish a proper credit in every place where the bills are to be negotiated; and to be provided likewise with funds to make good, in the end, all his engagements.

Exchange Circulations may be distinguished under two heads :

1st. Operations by which individuals or houses possessed of limited capitals may undertake large negotiations, and thus make their credit supply both immediate funds and future profit.

2dly. Operations to which governments and public establishments have occasional recourse, either to remit subsidies, or to effect a rise or fall in exchanges.

The first kind of circulation has been already explained in compound arbitration; and it is particularly illustrated in Example V. page 127.

The second kind of circulation is carried on precisely on the same principle as the first; but as this is a subject of considerable importance in political economy, as well as commercial speculation, we shall here further illustrate it by a real example.

In 1804 Spain was bound to pay to France a large Subsidy; and, in order to do this, three direct methods presented themselves:—

1. To send Dollars to Paris by land.
2. To remit Bills of Exchange directly to Paris.
3. To authorise Paris to draw directly on Spain.

The first of these methods was tried, but it was found too slow and expensive; and the second and third plans were considered as likely to turn the exchange against Spain. The following method by circular exchange was, therefore, adopted:—

A Merchant, or Banquier, at Paris, was appointed to manage the operation, which he thus conducted: he chose London, Amsterdam, Hamburgh, Cadiz, Madrid, and Paris, as the principal hinges on which the operation was to turn, and he engaged correspondents in each of those cities to support the circulation. Madrid and Cadiz were the places in Spain from whence remittances were to be made, and Dollars were, of course, to be sent where they bore the highest price, for which Bills were to be procured on Paris, or on any other places that might be deemed more advantageous.

The principle having been thus established, it only remained to regulate the extent of the operation so as not to issue too much paper on Spain, and to give the circulation as much support as possible from real business. With this view, London was chosen as a place to which the operation might be chiefly directed, as the price of Dollars was then high in England, a circumstance which rendered the proportional exchange advantageous to Spain. The business was commenced at Paris, where the negotiation of drafts issued on Hamburgh and Amsterdam served to answer the immediate demands of the State; and orders

were transmitted to those places to draw for their reimbursements on London, Madrid, or Cadiz, according as the courses of exchange were most favourable. The proceedings were all conducted with judgment and attended with considerable success.

At the commencement of the operation the course of exchange of Cadiz on London was 36d. but by the plan adopted, Spain obtained $39\frac{1}{4}$ d. as may be seen by the following computation:—

The several charges of the consignments of Dollars from Cadiz to London amounted to 11 per cent. and they were sold at 5s. 7d. per oz.—Hence,

		1 Dollar of Exchange.
85 Dollars of Exchange	=	64 Hard Dollars.
1000 Hard Dollars	=	866 Ounces (by common estimate).
1 Ounce	=	67 Pence.
111 Pence	=	100 Pence with charges.

Reduced, gives the exchange $39\frac{1}{4}$ d.

Thus Spain, instead of getting 36d. for the Dollar of Exchange, received $39\frac{1}{4}$ d. and, therefore, gained above 8 per cent. by the remittance of Dollars to London, and considerable advantages were likewise made by the circulation of Bills through the several places on the Continent. Time was also gained for the payment of the subsidy; and the course of Exchange, instead of being turned against Spain, as it must have been by direct remittances, was rather turned in her favour by this circular method of operation.

PAR OF EXCHANGE.

As the Par of Exchange has been already explained under various views, (p. 13,) it remains here to show how the intrinsic Par is computed; which is exemplified between London and the principal trading places of Europe by comparing gold with gold, and silver with silver, which may be done either from the Mint Regulations of each place, or from Assays such as are contained in the Tables of Gold and Silver Coins in this Volume.

In computing the Par of Exchange by the Chain Rule the *certain money* should be the leading term, or first consequent, and the *uncertain money* the term of demand, or last consequent, as in the following examples.

LONDON AND AMSTERDAM.

Required the Par of Exchange between London and Amsterdam resulting from the new 10 Florin Piece, weighing 6,729 Grammes $\frac{9}{10}$ fine, and the British Sovereign, or 20 Shilling Piece? Here the latter is the *certain* and the former the *uncertain* money.

		1 Pound Sterling.
1 Pound Sterling	=	240 Pence.
934½ Pence	=	1 Ounce Standard.
12 Ounces Standard	=	11 Ounces fine Gold.
1 Ounce	=	480 Grains.
15434 Grains	=	1000 Grammes.
6,729 Grammes $\times \frac{9}{10}$	=	10 Florins.

Result, 12 Florins 9 Cents. for £1 Sterling, or 40 Shillings 3 Pence Flemish.

The Par of Exchange may be found with less labour than by the above method from Tables of Coins. Thus, in the following Table of Gold Coins it will be seen that the 10 Florin Piece contains 93,46 Grains, and the Sovereign 113 Grains of fine Gold:—then say,

Gr.	Fl.	Gr.	Fr.	Cent.
As 93,46	: 1	: : 113	: 12	09 as above.

LONDON AND AMSTERDAM.—SILVER.

Required the Par of Exchange between London and Amsterdam, resulting from a comparison of the new Silver Florin and the Pound Sterling?

By a reference to the Table of Coins it will be seen that the Florin contains 148,38 Grains of fine Silver, and the Pound 1718,7 Grains;—hence,

Gr.	Fl.	Gr.	Fl.
As 148,38	: 1	: : 1718,7	: 11,58

Thus the Par in silver is 11 Florins 58 Cents. for the Pound Sterling, which differs about $4\frac{1}{2}$ per cent. from the gold Par:—they might, however, be made to agree by valuing the English silver at 5s. $3\frac{1}{2}$ d. per ounce, instead of 5s. 2d.

LONDON AND HAMBURGH.—GOLD.

Required the Par of Exchange resulting from a comparison of the Hamburgh Ducat containing 53 English Grains of pure Gold, and the Sovereign containing 113 Grains, supposing that the Ducat equals 6 Marks Banco, or 16 Shillings Flemish.

Gr.	Sh.	Gr.	Sh.	d.
As 53	: 16	: : 113	: 34	1,35

Thus the gold Par is 34 Shillings 1,35 Pence Flemish per £1 Sterling; but, from the fluctuating value of the Ducat, the Par cannot be considered permanent: by taking the average price of the Ducat for the last four years, which is $6\frac{1}{4}$ Marks, the Par would be 35 Shillings 6 Pence Flemish per Pound Sterling.

LONDON AND HAMBURGH.—SILVER.

The Cologne Mark of fine Silver is generally worth $27\frac{5}{8}$ Marks Banco, and 60 Marks Cologne weight are equal to 451 ounces Troy;—what is the Par between London and Hamburgh Banco in Silver?

		1 Pound Sterling.
1 Pound Sterling	=	240 Pence.
62 Pence	=	1 Ounce Standard.
40 Ounces Standard	=	37 Ounces fine Silver.
451 Ounces	=	60 Cologne Marks.
1 Cologne Mark fine	=	$27\frac{5}{8}$ Marks Banco.
3 Marks Banco	=	8 Shillings Flemish Banco.

Reduced, gives 35s. 1d. Flemish Banco, per £ sterling.

But on account of the fluctuations in the prices of the Ducat and of the Mark of fine silver, no permanent Par can be determined between London and Hamburgh.

LONDON AND PARIS.—GOLD.

Required the Par of Exchange between London and Paris, resulting from the Mint Regulations, as stated under the articles France and London, vol. i.

		1 Pound Sterling.
1 Pound Sterling	=	240 Pence.
62 Pence	=	1 Ounce Standard.
40 Ounces Standard	=	37 Ounces fine Silver.
1 Ounce	=	480 Grains.
15434 Grains	=	1 Kilogramme.
1 Kilogramme	=	3444 Francs 44 Cen. 444.

Reduced, gives the Pound Sterling equal to 25 Francs 22 Centimes.

The Par deduced from the Table of Assays is 4 Centimes more than the above:—

Gr.	Fr.	Gr.	Fr.	Cen.
For as 89,5	: 20	: : 113	: 25	26

See Table of Gold Coins.

LONDON AND PARIS.—SILVER.

Required the Par of Exchange between England and France, resulting from the Mint Regulations.

		1 Pound Sterling.
1 Pound Sterling	=	240 Pence.
62 Pence	=	1 Ounce Standard.
40 Ounces Standard	=	37 Ounces fine.
1 Ounce fine	=	480 Grains.
15434 Grains	=	1 Kilogramme.
1 Kilogramme	=	222 Francs 222 Cen. 222.

Reduced, gives the Pound Sterling equal to 24 Francs 73 Centimes.

If English Silver be valued at $63\frac{1}{8}$ the Pars of both metals will be alike.

The Par in Silver from the Table of Assays is 24,91.

LONDON AND GENOA.—GOLD.

The new gold Genovina contains 357,7 English grains of fine gold, and it passes for 96 Lire fuori Banco ;—what is the Par between London and Genoa in gold ?

		1 Pezza.
1 Pezza	=	$5\frac{3}{4}$ Lire.
96 Lire	=	1 Genovina.
1 Genovina	=	357,7 Grains of fine Gold.
480 Grains	=	1 Ounce.
11 Ounces fine Gold	=	12 Ounces Standard.
1 Ounce Standard	=	934 $\frac{1}{2}$ Pence Sterling.

Reduced, gives 45 $\frac{1}{2}$ d. Sterling per Pezza.

LONDON AND GENOA.—SILVER.

The silver Scudo contains 457 $\frac{1}{2}$ English grains of fine silver, and it passes for 8 Lire fuori Banco ;—what is the Par between London and Genoa in silver ?

		1 Pezza.
1 Pezza	=	$5\frac{3}{4}$ Lire.
8 Lire	=	457 $\frac{1}{2}$ Grains of fine Silver.
480 Grains	=	1 Ounce.
37 Ounces fine Silver	=	40 Ounces Standard.
1 Ounce	=	62 Pence Sterling.

Reduced, gives 45,92d. Sterling per Pezza.

LONDON AND LEGHORN.—GOLD.

The Sequin contains 53,6 English grains of fine gold, and it passes for $13\frac{1}{2}$ Lire Moneta Buona;—what is the Par between London and Leghorn in gold?

		1 Pezza.
1 Pezza	=	$5\frac{1}{2}$ Lire Moneta Buona.
$13\frac{1}{2}$ Lire Moneta Buona	=	1 Sequin.
1 Sequin	=	53,6 Grains of fine Gold.
480 Grains	=	1 Ounce.
11 Ounces fine Gold	=	12 Ounces Standard.
1 Ounce Standard	=	$934\frac{1}{2}$ Pence Sterling.

Reduced, gives 49,09d. Sterling per Pezza.

LONDON AND LEGHORN.—SILVER.

The Silver Scudo, or Leopoldone, contains 384 English grains of fine silver, and it passes for $6\frac{1}{2}$ Lire Moneta Buona;—what is the Par between London and Leghorn in silver?

		1 Pezza.
1 Pezza	=	$5\frac{1}{2}$ Lire Moneta Buona.
$6\frac{1}{2}$ Lire Moneta Buona	=	1 Scudo.
1 Scudo	=	384 Grains of fine Silver.
480 Grains	=	1 Ounce.
37 Ounces fine Silver	=	40 Ounces Standard.
1 Ounce Standard	=	62 Pence Sterling.

Reduced, gives 46 $\frac{1}{2}$ d. Sterling per Pezza.

LONDON AND SPAIN.—GOLD.

The Quadruple of 1772 contains 372 English grains of fine gold, and it passes for 320 Reals Vellon;—what is the Par between London and Spain in gold?

		1 Dollar of Plate.
1 Dollar of Plate	=	8 Reals of Plate.
17 Reals of Plate	=	32 Reals Vellon.
320 Reals Vellon	=	1 Quadruple.
1 Quadruple	=	372 Grains of fine Gold.
480 Grains	=	1 Ounce.
11 Ounces fine Gold	=	12 Ounces Standard.
1 Ounce Standard	=	$934\frac{1}{2}$ Pence Sterling.

Reduced, gives 37,16d. sterling per Dollar of Plate.

LONDON AND SPAIN.—SILVER.

The Dollar contains 371 English grains of fine silver, and it passes for 20 Reals Vellon ;—what is the Par between London and Spain in silver ?

		1 Dollar of Plate.
1 Dollar of Plate	=	8 Reals of Plate.
17 Reals of Plate	=	32 Reals Vellon.
20 Reals Vellon	=	1 Hard Dollar.
1 Hard Dollar	=	371 Grains of fine Silver.
480 Grains	=	1 Ounce.
37 Ounces fine Silver	=	40 Ounces Standard.
1 Ounce Standard	=	62 Pence Sterling.

Reduced, gives 39d. Sterling per Dollar of Plate.

LONDON AND LISBON.—GOLD.

The piece of 6400 Rees contains 203 English grains of fine gold ;—what is the Par between London and Lisbon in gold ?

		1000 Rees.
6400 Rees	=	203 Grains of fine Gold.
480 Grains	=	1 Ounce.
11 Ounces fine Gold	=	12 Ounces Standard Gold.
1 Ounce Standard	=	934½ Pence Sterling.

Reduced, gives 67,36d. Sterling per Milree.

According to the above methods, the other Pars, which are contained in the following Table, have been computed ; but the statements and operations are left for the exercise of the learner.

It has been already shown (page 141) that when the quantity of pure metal in the monies of exchange is known, the Par is found by division ; and it may be also found, by a similar operation, from the Table of Monies of Account, (page 149,) when the monies of exchange are of the same denomination. Thus, to find the Par between France and England, the Franc is worth 9,7 Pence in Silver, and 9,52 Pence in Gold, and therefore, 240 divided by these sums respectively will give the Pars in Gold and Silver as before.

Suppose it were required to find the Par between France and Spain, that is, how many Francs should be given for the Doubloon of Exchange of 4 Piastres? The Sterling value of the Doubloon, according to Table III. is 156 Pence, and this divided by 9,7 (the Sterling value of the Franc) will give 16 Francs 19 Centimes, which is the Silver Par between those two countries. By the same method, the Par in Gold will be found to be 15 Francs 60 Centimes.

Thus, the monies of exchange may be found in the foregoing quotations, p. 19 to 103, and their values in the following Tables, by which the Pars may always be determined with sufficient accuracy by a simple operation as above.

TABLE I.

A TABLE of the PAR OF EXCHANGE between England and the principal Places in Lloyd's List; computed from the intrinsic Value of their Coins, by comparing Gold with Gold and Silver with Silver, according to their Mint Regulations, and to Assays made at the London and Paris Mints, valuing English Gold at £3 17s. 10½d. per Oz. Standard, and English Silver at 5s. 2d. per Oz. Standard.

	GOLD.		SILVER.		EXPLANATIONS.
	Mint Regulations.	Assays.	Mint Regulations.	Assays.	
Amsterdam, in Flemish..	40 3	—	38,6	—	Shillings and Pence Flem. per £1 Sterl
Ditto, in Florins	12 09	—	11,58	—	Florins and Cents. per £1 Sterling.
Hamburgh	34 3,5	34 1,5	35 1	35 1,3	Shillings and Pence Flem. per £1 Sterl.
Paris	25 22	25 26	24 75	24 91	Francs and Centimes per £1 Sterling.
Madrid	37,3	37,2	39,2	39 0	Pence Sterling per Piastre.
Lisbon.....	67,4	67,5	—	—	Pence Sterling per Milree.
Leghorn	49,1	49,0	46,46	46,5	Pence Sterling per Pezza.
Genoa.....	45,5	45,5	45,92	45,92	Pence Sterling per Pezza fuori Banco.
Naples.....	41,2	—	41,2	—	Pence Sterling per Ducat.
—otherwise.....	582	—	582	—	Grains per £1 Sterling.
Venice.....	46,3	46,0	47,5	49,0	Lire Piccole per £1 Sterling.
—otherwise.....	23,44	23	24,30	25,07	Italian Livres per £1 Sterling.

These Tables (I. and II.) were originally computed by the author of this work, in 1810, by order of the Bullion-Committee of the House of Commons, and are printed in the Appendix to their Report.

They have been likewise inserted in that of the House of Lords, in 1819, with revisions which became necessary on account of recent alterations in the monies of Holland and Naples.

A further revision is now made in the Par of Exchange between England and France, in consequence of the error lately discovered in their relative weights; as explained vol. i. pp. 135 and 140.

This correction is two Centimes per Pound sterling in favour of England.

TABLE II.

THE RELATIVE VALUE OF GOLD AND SILVER in the principal Trading Places of the World; computed from the proportional Quantity of pure Metal in their principal Coins, and the legal or current Price of those Coins respectively.

	By Mint Regulations.	By Assays.	Names of the Coins from which the Proportions are taken.
England, By Old Coinage } By New Coinage }	15,2096 to 1 14,2878 to 1	{ Proved correct by the Trials of the Pix. }	{ Per Guinea and Old Shilling. Per Sovereign and New Shilling. }
Amsterdam	15,8735 to 1	—————	{ Per 10 Guilder Piece decreed in 1816, and Silver Florin of the same Date. }
Hamburgh	15 to 1 nearly	14,83 to 1	{ Per Ducato reckoned at 6 Marks Banco and Rixdollar. }
Paris	15,5 to 1	15,5 to 1	Per 20 Franc Piece and 5 Franc Piece.
Madrid	16 to 1	{ 15,85 } to 1 { 16,46 }	Per Doubloon and Dollar of different Coinages.
Lisbon	13,56 to 1	13,33 to 1	Per Joannese and New Silver Crusado.
Leghorn	14,65 to 1	14,32 to 1	Per Ruspono and Francescone.
Genoa	15,34 to 1	15,35 to 1	Per Genovina and Scudo.
Naples	15,21 to 1	—————	Per Oncetta and Ducato. (Coinage of 1818.)
Venice	15 to 1 nearly	14,35 to 1	Per Sequin and Ducat.
Petersburgh	15 to 1 nearly	15,25 to 1	Per Ducat and Ruble.
United States	15 to 1	15,94 to 1	Per Eagle and Dollar.
Bengal	14,857 to 1	14,827 to 1	Per Gold Mohur and Sicca Rupee.
Madras	13,872 to 1	13,857 to 1	Per Star Pagoda and Current Rupee.
Bombay	15 to 1	15 to 1	Per Gold Rupee and Silver Rupee.
China	14,25 to 1	—————	{ Per Tale of Gold, and the Average Price of Spanish Dollars. }

The foregoing Table may be computed by the Chain Rule, in the following manner.

Required the relative proportion between Gold and Silver in the English Coins, according to the Mint Regulations both of the Old and New System?

The question is, to compare the value of any certain quantity, suppose an ounce of pure Gold, with an ounce of pure Silver, at the Mint Price.

<i>Old System.</i>		<i>New System.</i>	
	1 Ounce pure Gold.		1 Ounce Pure Gold.
11 Ounces pure	= 12 Ounces Standard.	11 Ounces Pure	= 12 Ounces Standard.
1 Ounce Standard	= $934\frac{1}{2}$ Pence.	1 Ounce Standard	= $934\frac{1}{2}$ Pence.
62 Pence	= 1 Ounce Standard Silver.	66 Pence	= 1 Ounce Standard Silver.
40 Ounces Standard	= 37 Ounces Pure.	40 Ounces Standard	= 37 Pure.
Reduced, gives $15\frac{9859}{13640}$. Thus Gold, decimally expressed, is to Silver as 15,2096 to 1.		Reduced, gives $14\frac{1393}{4840}$. Thus Gold, decimally expressed, is to Silver as 14,2878 to 1.	

The operation is more simple when the rate of fineness of both metals is expressed in the same manner. Thus, in the coinage of France, the 20 Franc Piece in Gold weighs 6,4516 Grammes in pure Gold, and 20 Francs in Silver weigh 100 Grammes: hence, the latter divided by the former will give 15,5, as in the Table, p. 147.

When the fineness differs in expression, the comparison may be made from the quantity of pure Gold and of pure Silver in any particular sum, found either by the Mint Regulations or by Assays. Thus, the English Sovereign contains 113 Grains of fine Gold; and 20 Shillings (new coinage) 1614,54 Grains of fine Silver: hence, the latter divided by the former will give the relative value very nearly as above.

MONIES OF ACCOUNT.

IN the following Table of Monies of Account it may be observed that some of these monies are real coins, the value of which may be computed from the Mint Regulations or from Assays; but when they are imaginary monies, which is generally the case, their value must be found by their established proportion to real coins.

TABLE OF MONIES OF ACCOUNT.

TABLE III.

Containing the Value of the Monies of Account of different Places, (expressed in Pence Sterling and Decimals of Pence,) according to the Mint Price both of Gold and Silver in England; that is, £3 17s. 10½d. per Oz. Standard for Gold, and 5s. 2d. per Oz. Standard for Silver. (See vol. i. p. 217)

The foregoing Table has been computed from the proportion which the monies of account bear to the coins of each place respectively, valued according to the Mint Regulations, as stated in the first volume of this work. Thus, the intrinsic par of exchange may be calculated both in gold and silver, where the monies of exchange are the same as those of account; but dealers in bills, coin, and bullion generally prefer computations from actual assays, such as are given in the following Tables.

TABLES OF COINS FROM ASSAYS.

The first of the following Tables was computed under the direction of Sir Isaac Newton, in 1717, when he was Master of the Mint, and it served long as a Rule or Standard for Bullion and Exchange Merchants; but, however correct this Table might have originally been, it is no longer to be depended on, as many of the Coins are out of circulation, while others have been considerably altered; and it may be further remarked, that the art of assaying Metals, and even of weighing accurately, has been much improved since the above period.

Although these Assays are now become, in a great measure, obsolete, yet it is thought proper to insert them in this Work by way of introduction to the New Tables which follow, and which may be considered as a revision of Sir Isaac Newton's Tables, and a continuation of his plan.

N.B. In the Assay Column in the following Tables, B. means better, and W. worse than the English Standard. Thus, in the Gold Table, B. 1 2 means 1 Carat 2 Grains better than English standard; that is, 23 Carats 2 Grains fine: and W. 0 1½ means 1½ Grain worse than the English standard, that is, 21 Carats 2½ Grains fine.

Again, in the Silver Table, B. 7 Dwt. means 11 Oz. 9 Dwt. fine, and W. 3 Dwt. is 10 Oz. 19 Dwt. fine. For the English Standards, see vol. i. p. 217.

TABLE IV.

Sir Isaac Newton's Assays, Weights, and Values of most Foreign Silver and Gold Coins, actually made at the London Mint, by Order of the Privy Council, before the Year 1717. First published in 1719, and re-published, by Authority, in 1740.

* Specimens of all the foreign coins brought to London for commercial purposes have been supplied for this Work from the Bullion-Office, Bank of England, by order of the Bank Directors, and have been selected by John Humble, Esq. the chief of that Office, who also examined the Tables in their progress. It may likewise be added, that the Mint Reports of these commercial Coins are chiefly from Average Assays, and that all the computations have been carefully verified by different calculators.

COMPUTATION OF COINS.

IN order to show the principles on which the foregoing Tables are calculated, it may be proper first to explain the manner by which the value of any coin may be determined when its weight and fineness are known. For this purpose, the quantity of standard gold and silver contained in it must be first found; and then its sterling value may be ascertained from the Mint-price of the standard ounce.

GOLD COINS.

What is the sterling value of a French Double Louis d'or, the Report (per table, page 158,) being as follows:—weight 9 dwt. 20 gr. Assay W. $1\frac{1}{2}$ gr. that is, 0 car. $1\frac{1}{2}$ gr. worse than English standard?

From $\begin{smallmatrix} \text{car.} & \text{gr.} \\ 22 & 0 \end{smallmatrix}$ the fineness of standard gold,
Subtract $\begin{smallmatrix} 0 & 1\frac{1}{2} \end{smallmatrix}$

Then, as $\begin{smallmatrix} \text{car.} \\ 22 \\ 4 \end{smallmatrix} : \begin{smallmatrix} \text{car.} & \text{gr.} \\ 21 & 2\frac{1}{2} \end{smallmatrix} :: \begin{smallmatrix} \text{dwt.} & \text{gr.} \\ 9 & 20 \end{smallmatrix} : \begin{smallmatrix} \text{dwt.} & \text{gr.} \\ 9 & 16 \end{smallmatrix}$ the standard gold contained in the piece.

$\begin{array}{r} 21 \ 2\frac{1}{2} \\ 24 \\ \hline 236 \\ 86,5 \\ \hline (24 \\ 88)20414,0(232 \text{ grains nearly.} \\ 176 \quad 216 \\ \hline 281 \ \&c. \ 9 \text{ dwt. } 16 \text{ gr.} \end{array}$

Again, as $\begin{smallmatrix} \text{oz.} \\ 1 \end{smallmatrix} : \begin{smallmatrix} \text{£} \ s. \ d. \\ 3 \ 17 \ 10\frac{1}{2} \end{smallmatrix} :: \begin{smallmatrix} \text{dwt.} & \text{gr.} \\ 9 & 16 \end{smallmatrix} : \begin{smallmatrix} \text{£} \ s. \ d. \\ 1 \ 17 \ 7\frac{1}{2} \end{smallmatrix}$ the value of the piece in sterling.

$\begin{array}{r} 20 \quad 20 \quad 24 \\ \hline 20 \quad 77 \quad 232 \\ 24 \quad 12 \quad 934\frac{1}{2} \\ \hline (12 \\ 480 \quad 934\frac{1}{2} \quad 48,0)21680,4(451,6 \\ 192 \\ \hline 2,0)37 \ 7\frac{1}{2} \\ 248 \ \&c. \\ 4 \quad \text{£}1 \ 17s. \ 7\frac{1}{2}d. \\ \hline \ \&c. \end{array}$

The foregoing calculations may be considerably abridged by using a constant decimal as a multiplier. The following is a general rule for gold coins.

Multiply the carat grains in the fineness by the troy grains in the weight, and again multiply this product by 92182; cut off nine decimals, which will give the answer in pounds and decimals of a pound sterling. Thus, in the foregoing question of the Louis d'or,

$$86,5 \times 236 = 20414$$

$$92182$$

$$1,881803348$$

$$20$$

$$17,636$$

$$12$$

&c.

Ans. £1 17s. 7½d.

To find the contents of pure gold in the above coin, say,

$$\begin{array}{ccccccc} \text{car.} & & \text{car.} & \text{gr.} & & \text{dwt.} & \text{gr.} \\ \text{As } 24 & : & 21 & 2\frac{1}{2} & : : & 9 & 20 : 212,6 \end{array}$$

Or, the contents in pure gold may be found by multiplying the standard weight by 11, and dividing by 12; and standard gold may be reduced to pure by reversing this operation.

SILVER COINS.

What is the value of a Spanish Dollar, the Report (per table, page 168,) being as follows:—weight, 17 dwt. 8 gr. Assay W. 8 dwt. that is, 0 oz. 8 dwt. worse than English standard?

From 11 2 the fineness of standard silver,
Subtract 0 8

$$10 \ 14$$

Then, as $\begin{array}{cc} \text{oz.} & \text{dwt.} \\ 11 & 2 \end{array} : \begin{array}{cc} \text{oz.} & \text{dwt.} \\ 10 & 14 \end{array} :: \begin{array}{cc} \text{dwt.} & \text{gr.} \\ 17 & 8 \end{array} : \begin{array}{cc} \text{dwt.} & \text{gr.} \\ 16 & 17 \end{array}$ the standard silver contained in the Dollar.

$$20$$

$$20$$

$$24$$

$$222$$

$$214$$

$$416$$

$$214$$

$$-(24$$

$$222)89024(401$$

$$888$$

$$16 \text{ dwt. } 17 \text{ gr.}$$

$$224 \text{ \&c.}$$

Again, as $\begin{array}{cc} \text{oz.} & \text{gr.} \\ 1 & 480 \end{array} : \begin{array}{cc} \text{s.} & \text{d.} \\ 5 & 2 \end{array} :: \begin{array}{cc} \text{dwt.} & \text{gr.} \\ 16 & 17 \end{array} : \begin{array}{cc} \text{s.} & \text{d.} \\ 4 & 3\frac{3}{4} \end{array}$ the value of the Dollar in sterling.

$$12$$

$$24$$

$$62$$

$$401$$

$$62$$

$$-(12$$

$$48,0)2486,2(51,8$$

$$2400$$

$$4\text{s. } 3\frac{3}{4}\text{d.}$$

$$86 \text{ \&c.}$$

The foregoing operation may be thus abridged.

RULE FOR SILVER COINS.—*Multiply the carat grains in the fineness by the troy grains in the weight, and again multiply this product by 5818; cut off seven decimals, which will give the answer in pence and decimals of a penny sterling.*

Thus, in the foregoing question of the Spanish Dollar,

$$214 \times 416 = 89024$$

5818

51,7941632

4

3,1766528

Ans. 4s. 3 $\frac{3}{4}$ d.

To find the contents of the Spanish Dollar in pure silver, say—

	oz.	:	oz.	dwt.	:	dwt.	gr.	:	gr.
As	12	:	10	14	:	17	8	:	370,9

Or the contents in pure silver may be found by multiplying the standard weight by 37, and dividing by 40; and, on the contrary, multiplying the contents in pure silver by 40, and dividing by 37, will give the standard weight.

RULES FOR STANDARDING COINS AND BULLION.

THE precious metals in England are mostly bought and sold at so much per ounce standard. It therefore becomes necessary to determine the standard weight; and this must be calculated from the Assay Master's Report of weight and fineness.

But it may be useful first to explain the characters which are generally used in these Reports.

ASSAYERS' MARKS.

1 *	is	1 Dwt.
ij	..	2
2	..	5
€	..	10
€2	..	15
€2ij	..	18
€/€	..	19
ob $\frac{1}{2}$ (Obulus)	..	$\frac{1}{2}$

The common method of finding the value of small quantities of gold and silver is by allowing, from the Assay Master's Report, at the rate of 4s. per carat, better or worse, in every ounce weight of gold; and at the rate of 6d. per ounce, better or worse, in every ounce weight of silver. But when silver is more than 10 dwt. worse, an allowance of 2d. per ounce must be made for refining.

* This mark sometimes stands for 1 ounce as well as 1 pennyweight.

THE FOLLOWING ARE THE SCALES OF ALLOWANCE:

SCALE FOR GOLD.

1 car. (4s.
 1 gr. (1s.
 $\frac{1}{2}$ gr. (6d.
 $\frac{1}{4}$ gr. (3d.

SCALE FOR SILVER.

1 oz. (6d.
 15 dwt. ($4\frac{1}{2}$ d.
 10 dwt. (3d.
 5 dwt. ($1\frac{1}{2}$ d.
 $2\frac{1}{2}$ dwt. ($\frac{3}{4}$ d.

Thus, to find the value of 2 oz. of gold B. 1 car. 1 gr. at £4 per oz.—To £8 (for 2 oz.) add 10s. for better, which gives the value £8 10s.—And to find the value of 12 oz. of silver, W. 10 dwts. at 5s. 6d. per oz. From £3 6s. (for 12 oz.) subtract 3s. for worse, which gives the value £3 3s.

RULES FOR STANDARDING GOLD.

As 22 carats are to the Assay or Report of fineness, so is the gross weight to the quantity that is to be added or subtracted from this gross weight, according as the report is *better* or *worse*. If better, the additional quantity is called (by the trade) *Betterness*, and if worse, the subtractional quantity is called *Worseness*.

EXAMPLE—How much standard gold is there in an ingot of the following Report, B. 1 car. $3\frac{1}{2}$ grains. Weight, 67 oz. 15 dwt. 8 gr.?

				oz.	dwt.	gr.					oz.	dwt.	gr.	oz.	dwt.	gr.					
As 22	:	1	$3\frac{1}{2}$	:	:	67	15	8	Or thus, as 22	:	23	$3\frac{1}{2}$	:	:	67	15	8	:	73	10	20
4		4				20															
88		7				1355															
4		4				24															
352		30				32528															

$32528 \times 30 \div 352 = 2772 \text{ gr.} = 5 \text{ oz. } 15 \text{ dwt. } 12 \text{ gr.}$

$$32528 \times 30 \div 352 = 2772 \text{ gr.} = 5 \text{ oz. } 15 \text{ dwt. } 12 \text{ gr.}$$

To oz. dwt. gr.
 67 15 8 Gross Weight.
 Add 5 15 12 Betterness.

73 10 20 Standard.

The following method for standarding gold may be generally used with advantage:—

				oz.	dwt.	gr.				
				67	15	8	Gross Weight B. or W.	1 car.	$3\frac{1}{2}$ gr.	
2 gr.	=	$\frac{1}{3}$		33	17	16				
1	=	$\frac{2}{3}$		16	18	20				
$\frac{1}{2}$	=	$\frac{1}{3}$		8	9	10				
2)127		1	6				} Divided by 22.			
11)63		10	15							
				5	15	12	Betterness or Worseness, as above.			

RULES FOR STANDARDING SILVER.

As 11 oz. 2 dwt. to the assay, so is the gross weight to the quantity which is to be added or subtracted, according as the Report is B. or W.

EXAMPLE—In 287 oz. of silver, W. $12\frac{1}{2}$ dwt. how much standard?

oz.	dwt.	dwt.	oz.	oz.	dwt.	oz.	dwt.	gr.
As 11	2	:	$12\frac{1}{2}$	:	:	287	:	$10\ 9\frac{1}{2}$
20			20			287	:	270 16 20
222			2840					
			$12\frac{1}{2}$					

222)71750(323 dwt. 4 gr. = 16 oz. 3 dwt. 4 gr.

From 287 0 0 Gross Weight.
Subtract 16 3 4 Worseness.

270 16 20 Standard.

From the last example, the reason of the following rule for standarding silver is obvious.

Multiply half the weight in ounces by the assay in pennyweights, and divide the product by 111, the quotient will be the betterness or worseness in ounces.

EXAMPLE—How much standard silver in 160 ounces of B. $18\frac{1}{2}$ dwt.?

Half weight 80
 $18\frac{1}{2}$

	oz.	dwt.	gr.
111)1480(13	6	16	
111			
370 &c.			

	oz.	dwt.	gr.
To 160	0	0	Gross.
Add 13	6	16	Betterness.
173	6	16	Standard.

It should be observed that there are tables constructed, and sometimes used, for standarding gold and silver, as may be seen in *Postlethwayt's Dictionary of Commerce*, vol. 1, page 388 to 398; but from the simplicity and conciseness of the foregoing examples, it is manifest that such tables cannot much shorten the operation, though they may serve to check or prove the calculation.

RULES FOR CONVERTING THE FOREGOING TABLES OF COINS INTO FRENCH DENOMINATIONS.

To reduce English gold coin into Francs, and the contrary.

RULE—*Multiply the number of Pence by ,105 : and, the number of Francs by 9,525.*

EXAMPLE—How many Francs in a Sovereign?

Here 240d. $\times ,105 = 25$ Francs 20 Centimes.

And again, 25 Francs 20 Centimes $\times 9,525 = 240$ Pence.

To reduce English sterling silver into Francs, and the contrary.

RULE—*Multiply the number of Pence by ,103 : and, the number of Francs by 9,709.*

EXAMPLE—How many Francs in 240 Pence, silver value?

$$240 \times .103 = 24 \text{ Francs } 72 \text{ Centimes};$$

$$\text{And this number } \times 9,709 = 240 \text{ Pence.}$$

The foregoing results are the Pars, very nearly, in gold and silver value, *see page 146.*

To bring English grains into Grammes, and the contrary.

RULE—Multiply the number of Grains by ,064792: and, the number of Grammes by 15,434.

EXAMPLE—How many Grammes in a Sovereign, weighing 113,1 English grains of pure gold?

Answer, 7 Grammes 328 Decigrammes, nearly; and this number multiplied by 15,434 equals 113,1 grains.

By the application of the above rules, all the foregoing Tables of Coins may be converted into French Denominations, except the first column, which contains the Assay, and which is thus reduced.

FOR GOLD COINS.

RULE—Make the Assay Report the numerator, and 24 the denominator, and this vulgar fraction reduced to three places of decimals will give the Milliemes, according to the French expression.

EXAMPLE—To convert English standard gold into Milliemes.

Thus, $\frac{32}{24} = 916$ Milliemes. If the gold be 1 carat 2 grains worse than standard.

car.	gr.
22	0

1	2
---	---

20	2
----	---

4	
---	--

—	
---	--

Carat grains 82

24	
----	--

4	
---	--

—	
---	--

then $\frac{32}{96} = 354$ Milliemes.

96	
----	--

Milliemes are reduced to carats by multiplying by 24 and cutting off three decimals.

FOR SILVER COINS.

To reduce English Assay Reports of silver into French Reports, or Milliemes.

RULE—Make the number of pennyweights in the Assay Report the numerator, and 240 the denominator, and this reduced to a decimal fraction of three places gives the Milliemes.

EXAMPLE—To reduce English standard silver into Milliemes.

dwt.	gr.
11	2

20	
----	--

222	
-----	--

— = $\frac{31}{40} = 925$ Milliemes.

240	
-----	--

To reduce Milliemes into English Assay Reports of silver.

RULE—Multiply by 240, and cut off three decimals. Thus, 891 Milliemes $\times 240 = 214 = 10$ dwt. 14 gr. and this subtracted from 11 dwt. $\frac{2}{2}$ gr. gives 8 dwt. worse than English standard.

EXPLICATION OF MODERN COINS;

*Containing a Description of the Devices and other Impressions of the principal Coins in the foregoing Tables, with Translations of their Inscriptions and Legends.**

AIX LA CHAPELLE.

SILVER COINS.

THE RATHSPRÆSENTGER bears on the obverse an eagle within a circle, marked 16 on his breast, (32 on the double piece,) and within another circle the legend

REGVM CVRIA PRINCIPALIS PRIMA,
First and principal court of Kings,

and next the edge,

VRBS AQVENSIS. VRBS REGALIS. REGNI SEDES,
City of Aix; royal city; seat of government.

On the reverse, an altar, with two swords and a crown over it on the double piece, but on the single, a crown and the date within a circle; the legend on each is

LOCVS CORONATIONIS CÆSAREÆ,
The place of Cæsar's coronation:

Cæsar being a general title for the Emperors.

AUGSBURG.

GOLD COIN.

The DUCAT—Head of the reigning Prince, with name and title: thus,

FRANCISCVS I. D.G. ROM. IMP. S.A.

Francis I. by the grace of God, Emperor of Rome, ever august.

Reverse, arms of the city; legend,

AVGVSTA VINDELICORVM,

(the ancient name of the place and people.)

AUSTRIAN DOMINIONS.

GOLD COINS.

The SOUVERAIN—Head of the reigning Emperor, with the name and title; thus,

FRANCISC. II. D. G. R. IMP. S. A. GE. HIE. HV. BO. REX.

that is, Franciscus secundus, Dei gratia, Romanus Imperator, semper augustus, Germaniæ, Hierosolymæ, Hungariæ, Bohemiæ, Rex,

Francis II. by the grace of God, Roman Emperor, ever august, King of Germany, Jerusalem, Hungary, and Bohemia.

Reverse, the arms of Austria on a St. Andrew's cross, with the date, and the legend,

ARCH. AVS. DVX BVRG. LOTH. BRAB. COM. FLAN.

that is, Archidux Austriæ, Dux Burgundiæ, Lotharingiæ, Brabantia, Comes Flandriæ,

* The words, or initials, on coins are generally thus distinguished. When they occupy the field and are written across the coin, they are called an *Inscription*; but when they run round the margin or on either side of the figure, they are denominated a *Legend*; and they are also thus called when they are upon the *Exergue*, which is the bottom of the piece, commonly separated from the field by a line.

It should be also observed that the side of a coin on which the portrait is delineated, is commonly termed the *Face* or *Obverse*, and the opposite side is called the *Reverse*.

As each description begins with the *Obverse*, the frequent repetition of the word seems unnecessary.

Archduke of Austria, Duke of Burgundy, Lorraine, Brabant, Count of Flanders.

The Double Souverain bears the same impression.

The DUCAT—Head of the reigning Sovereign. Reverse, arms of Austria with the two-headed eagle; the legends are the same as on the Souverain, except that among the titles, Brabant and Flanders are omitted, and the letters D. H. or D. HETR. are inserted; *that is, Dux Hetruriæ, Duke of Tuscany.* But the Hungarian Ducats, called *Kremnitz*, bear on the obverse a whole length figure of the Emperor, with the name and titles as above; and on the reverse, the Virgin and Child, with this legend,

S. MARIA MATER DEI PATRONA HVNG.

Holy Mary, mother of God, patroness of Hungary.

SILVER COINS.

The RIXDOLLAR (*Constitution*)—Head of the reigning Emperor, with name and titles; thus,

CAR. VI. D. G. R. I. S. A. G. HI. H. BOH. REX,

that is, Carolus sextus, Dei gratia, Romanus Imperator, &c. as on the Souverain. Reverse, a two-headed eagle crowned, bearing on his breast the arms of Austria, and in his talons a sword and sceptre; legend,

ARCHID. AUST. DUX. BU. M. MOR. COM. TYROL,
Archduke of Austria, Duke of Burgundy, Marquis of Moravia, Count of Tyrol,

with the date; and round the edge of the piece,

CONSTANTER CONTINET ORBEM,

He always guides the globe steadily.

The RIXDOLLAR (*Convention*)—Head of the reigning Sovereign, with name and title; thus,

M. THERESIA, D. GR. IMP. GE. HU. BO. REG.

Maria Theresa, by the grace of God, Empress of Germany, Queen of Hungary and Bohemia.

Reverse, as on the Rixdollar Constitution. The legend round the edge of the piece of Francis I. is,

PRO DEO ET IMPERIO,

For God and the Empire;

Round that of Maria Theresa,

JUSTITIA ET CLEMENTIA,

Justice and Clemency;

And round that of Joseph II.

VIRTUTE ET EXEMPLO,

By virtue and example.

The RIXDOLLAR of Hungary—Head, name, titles, and legend round the edge, as above. Reverse, the Virgin and Child, and the letters K. B.; legend, as on the Hungarian Ducat.

The FLORIN, or Half Rixdollar, bears the same impressions as the Rixdollar; as also, the Half Florin.

The COPSTUCK, or COPSTICK, (the 20 Creutzer piece,) bears the same impressions as the Rixdollar, except that there is no legend round the edge, and it is marked 20 on the reverse; the Half-Copstick is marked 10.

BADEN.

GOLD COIN.

The DUCAT—A female figure standing by an altar; legend,

OBSEQUIUM JURARE PARATA,

Ready to swear obedience,

and the date. Reverse, the arms of Baden.

SILVER COIN.

The RIXDOLLAR—Head of the reigning Prince, with name and title; thus,

CAROLUS FRID. D. G. MARCHIO BAD. ET. H.

Charles Frederick, by the grace of God, Marquis of Baden, &c.

Reverse, arms of Baden; legend,

AD NORMAM CONVENTIONIS,

According to the rule of the Convention;

and on the exergue, the date, and

X EINE F MARCK,

Ten pieces to a Mark fine.

BASIL.

GOLD COINS.

The DUCAT—A griffin supporting the arms of the Republic; legend,

DOMINE CONSERVA NOS IN PACE,

Lord preserve us in peace,

Reverse,

DUCATUS REIPUBL. BASILEENSIS,

Ducat of the Republic of Basil.

The PISTOLE—Arms of the city; legend,

RESPUBLICA BASILIENSIS.

Reverse, a tripod; with the legend as on the Ducat.

SILVER COINS.

The PATAGON or ECU—A view of the city, over which is the name

BASILEA.

Reverse, a griffin supporting the arms of the city, with legend as on the Ducat. But the Ecus of 1795, &c. bear the arms of the city, and the legend,

RESPUBLICA BASILIENSIS;

and on the reverse, a wreath of oak, surrounding the legend as on the Ducat.

The THALER or RIXDOLLAR—The griffin, arms, and legend, as on the reverse of the Patagon. Reverse, a wreath of laurel, with the legend,

MONETA REIPUB. BASILEENSIS,

Money of the Republic of Basil.

BAVARIA.

GOLD COINS.

The CAROLIN—Head of the reigning Prince; legend,

CA. D. G. V. B. ET P. S. D. C. PR. S. R. I. A. ELL.

That is, Carolus, Dei gratia, utriusque Bavariae et Palatinatus Dux, Princeps sancti Romani Imperii Archidux et Elector,

Charles, by the grace of God, Duke of both Bavarias and the Palatinate, Prince, Archduke, and Elector of the Holy Roman Empire.

Reverse, the Virgin and Child, supporting the arms of Bavaria; legend,

CLYPEVS OMNIBVS IN TE SPERANTIBVS,

A shield to all who hope in thee,

and the date. The Half and Quarter Carolins bear the same impression.

The MAX D'OR has the same impressions as the Carolin, except that the name is

MAX. JOS.

Maximilian Joseph.

The DUCAT—Head of the reigning Prince, with name and title; thus,

CAR. THEOD. D. G. C. P. R. VTR. BAV. DVX.

Reverse, the arms of Bavaria; legend,

S. R. I. ARCHID. & EL. DVX. I. CL. & M.

These initials mean,

Charles Theodore, by the grace of God, Count Palatine, Duke of both Bavarias, &c.

as on the Carolin; and the letters DVX. I. CL. and M. signify

Duke of Juliers, Cleves, and Munster.

But the Ducats coined since the year 1800, bear, with the head, all the titles as above, and the legend on the reverse is

PRO DEO ET POPULO,

For God and the people.

SILVER COINS.

The RIXDOLLAR—Head of the reigning Prince, with name and titles as on the gold coins. Reverse, arms of Bavaria and the date; and on other pieces, the Virgin and Child, with the legend,

PATRONA BAVARIAE,

Patroness of Bavaria;

but the new Rixdollar, coined in 1800, bears on the reverse the arms of Bavaria, and the legend,

PRO DEO ET POPULO.

The COPSTUCK bears the same impressions as the Rixdollar.

BERN.

GOLD COINS.

The DUCAT—Arms of the city; legend,

REIPUBLICA BERNENSIS,

Republic of Bern.

Reverse,

BENEDICTUS SIT JEHOVA DEUS,

Blessed be God Jehovah.

The PISTOLE—Arms of the Republic; legend,

RESPUBLICA BERNENSIS.

Reverse, a wreath enclosing the words

DEUS PROVIDEBIT,

God will provide.

Other Pistoles have on the reverse a man armed with a battle-axe and resting upon the fasces, with the same legend.

SILVER COINS.

The PATAGON or ECU—A man resting on his sword; legend as the Pistole. Reverse, arms of the city; legend,

RESPUBLICA BERNENSIS.

The Piece of 10 BATZEN (as well as those of 5 and 2½ Batzen)—Arms of the city, with

RESPUBLICA BERNENSIS.

Reverse, a cross formed by eight B's and four crowns; legend as on the Ecu.

BREMEN.

SILVER COIN.

The Piece of $\frac{2}{3}$, or of 48 GROTES—A two-headed eagle and a crown, with the name of the reigning Emperor; thus,

FRANCISCUS D. G. ROM. IMP. S. AUG.

Francis, by the grace of God, Emperor of Rome, ever august.

Reverse, arms of the city; with the legend,

MONETA NOVA REIPUBL. BREMENSIS,

New money of the Republic of Bremen.

BRUNSWICK.

GOLD COINS.

The CARL D'OR—Head of the reigning Prince; legend,

CAROLVS D. G. DVX. BRVNS. ET LVN.

Charles, by the grace of God, Duke of Brunswick and Luneburg.

Reverse, a horse in full speed; legend,

NVNQVAM RETRORSVM,

Never backward, or straight forward.

Such as have been coined since 1796 bear no head, but the arms of Brunswick, with

CAROLVS GVLIELMVS FERDINANDVS;

and on the reverse,

X THALER, or V THALER.

with the date; and the legend as on the Carl d'or.

The DUCAT bears the same impressions as the Carl d'or.

SILVER COINS.

The RIXDOLLAR (Old)—Head, name, and title of the reigning Prince, as on the gold coins. Reverse, the horse and legend as on the Carl d'or; but on the exergue are the words

X EINE FEINE MARCK CONVEN. M.

Ten pieces to a Mark fine, Convention money.

The RIXDOLLAR of 1795—On the obverse, the words

I SPECIES THALER,

and the date; legend,

X EINE FEINE MARCK, &c.

as above. Reverse, arms of Brunswick, with the name and title of the reigning Prince.

The Piece of $\frac{2}{3}$ (fine)—A man holding a tree, with the number 24, and the legend,

NVNQVAM RETRORSVM,

as on the Carl d'or. Reverse, a circle, containing the words

24 MARIENGROSCH. FEIN SILBER,

24 *Mariengroschen, fine silver.*

Legend, the name and title of the reigning Prince.

The Piece of $\frac{2}{3}$ (base)—Head of the reigning Prince, with name and title. Reverse, the horse and legend as before; and also the words

XX EINE FEINE MARCK, &c.

as on the Rixdollar and Piece of $\frac{2}{3}$ fine. The pieces of 1791 bear no head, but the words

XVI GVTE GROSCH. and XX EINE, &c.

Reverse, arms of Brunswick, with the Prince's name and title. The Pieces of 1795 bear the words

XXIII MARIENGROSCH.

legend,

NACH DEM LEIPZIGER FVS,

According to the Leipsic rate of coinage.

Reverse, a horse, the Prince's name and title, and the mark $\frac{2}{3}$.

COLOGNE.

GOLD COINS.

The DUCAT—Head of the reigning Sovereign, with name and title; thus,

CLEM. AUG. ARCHIEP. ET EL. COLON.;

that is, Clemens Augustus Archiepiscopus et Elector Coloniensis,

Clement Augustus, Archbishop and Elector of Cologne.

Reverse, a circle of rays enclosing the legend

NON MIHI SED POPULO,

Not for me but for the people.

The Ducats coined by the City of Cologne bear the head of the reigning Sovereign, with his name and titles; and on the reverse, the arms of the city, with

DUCAT. CIVIT. COLON.

Ducat of the City of Cologne.

SILVER COIN.

The RIXDOLLAR—Head of the reigning Sovereign, with his name and titles. Reverse, arms of the city; legend,

MONETA NOVA LIB. ET IMPER. CIVIT. COLON.;

that is, Moneta nova liberæ et imperialis civitatis Coloniensis,

New Coin of the free and imperial City of Cologne,
with the date; and on some Rixdollars,

MON. NOVA LIB. REIPUB. COLONIENSIS,

New coin of the free Republic of Cologne.

DENMARK.

GOLD COINS.

The DUCAT CURRENT—Head of the reigning King, with name and title, thus:

CHRISTIANVS VII. D. G. REX DAN. NORVEG.

Christian VII. by the grace of God, King of Denmark and Norway.

Reverse, value of the coin, surrounded by a crown; legend,

GLORIA EX AMORE PATRIÆ,

Glory from the love of our country.

The DUCAT SPECIE of 1791—A man resting on a club and bearing a shield; legend,

MONETA AUREA DANICA,

Gold money of Denmark.

Reverse,

1 SPECIES DUCAT. 23 $\frac{1}{2}$ KARAT. 67 STYKKER. 1 MARK
BRUTO,

1 Ducat specie, 23 $\frac{1}{2}$ Carats fine, 67 pieces to the Mark gross.

Ducats of anterior date bear on the obverse the head, name, and title of the reigning King; and on the reverse, the arms of Denmark, and the legend

PRUDENTIA ET CONSTANTIA,

Prudence and Perseverance.

Some bear on the reverse a ship, with the legend

DUCE PRUDENTIA CONSTANTIA COMITE,

Prudence being the guide, and Perseverance the companion.

The CHRISTIAN D'OR—Head, name, and title of the reigning Prince, as above. Reverse, a sun and three crowns, with the legend as on the Ducat Current.

SILVER COINS.

The RYKSDALER (old, coined for Norway,)—Head of the reigning King, with name and title; thus,

FRIDERICVS V. D. G. REX DAN. NOR. V. G. OF D. G.
DAN. NORV. VAND. GOTH. REX,

Frederick V. by the grace of God, King of Denmark, Norway, the Vandals, and the Goths.

Reverse, a lion and battle-axe, the value of the coin, and the following legend in the Norwegian language, in two concentric circles,

MOD TROSKAB DAPPERHED. OGHVAD DER ÆRE GIVER
DEN HEELE VERDENRAND BLANT NORSKE KLIPPER
LAERE,

Spirit, loyalty, valour, and whatever is honourable, let the whole world learn among the rocks of Norway.

On the same coin, of a later date, the legend is

TROE LOVE MOD OGHVAD DAN KONGENS GUNST KAND
VINDE, MENS NORGE KLIPPE HAR MAND
SKAL HOS NORDMAND FINDE;

True lion's heart and whatever can win a Danish Monarch's love, whilst Norway has rocks, shall be found among Norwegians.

The RYKSDALER of 1777—The King's cypher and a crown; legend,

D. G. DAN. NORV. VAND. GOTH. REX,

as before. Reverse, arms of Denmark; legend,

GLORIA EX AMORE PATRIÆ,
Glory from the love of our country,

The RYKSDALER of 1795—Head, name, and titles of the reigning King. Reverse, arms of Denmark, and value of the coin.

The 4 MARK Piece—A man on horseback, with the King's name and title, and value of the coin.

Reverse, arms of the King; legend,

DOMINUS MIHI ADJUTOR,

The Lord is my helper,

The CROWN—Head of the reigning King, with name, and

DEI GRATIA.

Reverse, a crown, and the inscription,

PRUDENTIA ET CONSTANTIA,

Prudence and Perseverance;

legend, the King's titles, as above.

The RYKSDALER of Holstein—Head, name, and title, as above. Reverse, arms of Denmark with

60 SCHILLING. SCHLESW. HOLST. COURANT,

60 Schillings Sleswig and Holstein currency.

The Piece of 24 SCHILLINGS Danish—The King's cypher, with a crown and the titles, as above. Reverse, arms of Denmark, and over them

24 SKILLING DANSKE.

ENGLAND.

OLD GOLD COINS.

The GUINEA—Head of the Sovereign; legend,

GEORGIUS III. DEI GRATIA,

George III. by the Grace of God.

Reverse, the King's arms; legend,

M. B. F. ET H. REX, F. D. B. ET L. D. S. R. I. AT. ET E.

That is, Magnæ Britanniae, Franciæ, et Hiberniæ, Rex, Fidei Defensor, Brunswickensis et Luneburgensis Dux, Sancti Romani Imperii Archithesaurarius et Elector,

King of Great Britain, France, and Ireland, Defender of the Faith, Duke of Brunswick and Luneburg, Arch-Treasurer and Elector of the Holy Roman Empire.

But the coins minted since the Union with Ireland (1801) have the legend,

BRITANNIARUM REX, FIDEI DEFENSOR,

King of the British Islands, Defender of the Faith;
and round the shield, the motto of the Garter,

HONI SOIT QUI MAL Y PENSE,
Shame be to him who thinks ill of it.

The HALF GUINEA has the same impressions as the Guinea.

The SEVEN SHILLING PIECE—Head and name of the Sovereign as above. Reverse, a crown with the legend,

MAG. BRI. FR. ET HIB. REX;

and on the pieces coined since the Union with Ireland,

BRITANNIARUM REX FIDEI DEFENSOR.

NEW GOLD COIN.

The SOVEREIGN—Head of the Sovereign, with the legend,

GEORGIUS III. D. G. BRITANNIAR. REX, F. D.

and the date. Reverse, the image of St. George armed, sitting on horseback encountering the dragon with a spear; the said device is placed within the Garter, bearing its motto as above, with a newly-invented graining on the edge of the piece.

OLD SILVER COINS.

The CROWN—Head of the Sovereign, with

GEORGIUS II. DEI GRATIA.

Reverse, four crowned shields, viz. of England, France, Scotland, and Ireland, with a star in the centre; legend,

MAG. BR. FR. ET HIB. REX,

to which (ever since the accession of the House of Hanover) the King's German titles have been added, as on the Guinea. The Crowns of Charles II. have in the angles between the shields, four double linked C's. Those of William and Mary, four interlinked W's and M's. Some of Queen Anne's Crowns have two roses in two of the angles, and the Prince of

Wales's plume of feathers in the others. The Crowns of George I. have four sceptres. It may also be observed, that the Crowns of King William have, instead of the stars in the centre, the arms of Nassau; and that round the edge of the pieces coined by King William and Queen Anne, there is the following legend:

DECUS ET TUTAMEN, ANNO REGNI, &c.

Ornament and safety, the year of the King's reign, &c.

The HALF-CROWN bears the same impressions as the Crown.

The SHILLING bears the same impressions as the Crown, but in the Shillings of George II. there are four roses in the angles, on the reverse; and in the Shillings of George III. the four crowns instead of being placed on the shields, are placed in the angles. The SIXPENCE bears the same impressions as the Shilling.

The DOLLAR (issued by the Bank in 1804), bears the King's head, with the legend,

GEORGIUS III. DEI GRATIA REX.

Reverse, an oval, with a crown of towers over it, enclosing a figure of *Britannia*.

NEW SILVER COINS.

The CROWN—Head of the Sovereign, with the legend,

GEORGIUS III. D. G. BRITANNIARUM REX, F. D.

and the date. Reverse, the same as the reverse of the SOVEREIGN. Round the edge of the piece,

DECUS ET TUTAMEN. ANNO REGNI LX.

Ornament and Safety; the 60th year of the King's reign.

The HALF-CROWN—Head of the Sovereign; legend,

GEORGIUS III. DEI GRATIA,

and the date. Reverse, the arms of the United Kingdom contained in a shield surrounded by the Garter, bearing its motto; legend,

BRITANNIARUM REX, FID. DEF.

with a newly-invented graining on the edge.

The SHILLING and SIXPENCE—Head of the Sovereign; legend,

GEOR. III. D. G. BRITT. REX, F. D.

and the date. Reverse, the same as the Half-Crown, except that the legend is omitted.

The NEW HALF-CROWN of GEORGE IV. bears the effigy of his Majesty, with the inscription

GEORGIUS IIII. D. G. BRITANNIAR. REX, F. D.

Reverse, the ensigns armorial of the United Kingdom contained in a shield, surmounted by the royal crown; the rose, thistle, and shamrock being placed round the shield, with the word ANNO and the date of the year. The edge is marked with the the newly-invented graining.

The NEW SHILLING and SIXPENCE of GEORGE IV. bear the same impressions as the new Half-Crown.

FRANCE.

GOLD COINS.

The LOUIS—Head of the reigning King, with his name and title: thus,

LUD. XVI. D. G. FR. ET NAV. REX,

that is, Ludovicus XVI. Dei Gratia, Franciæ et Navarræ Rex,

Louis XVI. by the Grace of God, King of France and Navarre.

Reverse, the arms of France and Navarre, with a crown over them. On the Pieces coined before 1786, there are two distinct shields; and on those coined since 1786, a double shield; legend,

CHRS. REGN. VINC. IMPER.

that is, Christus regnat; vincit, imperat,

Christ reigns, conquers, governs;

under the arms is a letter, by which the mint where

the piece was coined is known. The Double and Half Louis bear the same impressions.

The Pieces struck in the year 1791, have on the obverse the head of the King, with the title,

LOUIS XVI. ROI DES FRANCOIS,

Louis XVI. King of the French;

and on the reverse, the Genius of France writing the Constitution on a tablet resting on a pillar, with a cock on one side, and on the other the fasces and cap of Liberty, with the legend,

REGNE DE LA LOI,

Reign of the law;

and at the bottom,

L'AN 4 DE LA LIBERTE,

The year 4 of liberty.

The Piece of 1793 has, instead of the head, a crown of oak leaves containing the words 24 LIVRES; legend,

REPUBLIQUE FRANÇOISE L'AN II.

French Republic, the year 2.

Reverse, as on the Louis of 1791, except that the date is in figures only.

The Piece of 40 FRANCS, 1802—Head of Bonaparte; legend,

BONAPARTE PREMIER CONSUL,

Bonaparte, first Consul.

Reverse, a wreath of laurel, containing the words 40 FRANCS; legend,

REPUBLIQUE FRANÇOISE AN. XI.

and round the edge of the piece,

DIEU PROTEGE LA FRANCE,

God protect France.

In 1804, on Bonaparte's being declared Emperor, the words round the head were altered to NAPOLEON EMPEREUR. The Piece of 20 Francs bears the same impressions, except the figures that mark its value.

The Piece of 40 FRANCS, 1818—Head of the King, with name and title, thus:

LOUIS XVIII. ROI DE FRANCE.

Reverse, arms of France, and 40 F. within two branches of laurel. Round the edge of the piece,

DOMINE SALVUM FAC REGEM,
O Lord, save the King.

SILVER COINS.

The ECU of 6 LIVRES—Head of the reigning King, with name and title, as on the Louis. Reverse, the arms of France, between two laurel branches; legend,

SIT NOMEN DOMINI BENEDICTUM,
Blessed be the name of the Lord,

and a letter denoting the place where the piece was coined. Round the edge are the words

DOMINE SALVUM FAC REGEM,

as on the 40 Franc Piece. The Ecu of three Livres, the Pieces of 24, 12, and 6 Sous, all bear the same impressions, except that the three last mentioned coins have no motto round the edge.

The ECU of 1791—Head of the King; legend,

LOUIS XVI. ROI DES FRANCOIS.

Reverse, the Genius of France, &c. as on the Louis of the same period. Round the edge,

LA NATION LA LOI ET LE ROI,
The nation, the law, and the King.

The Pieces of 15 and 30 Sols, coined at the same period, bear the same impressions, except that instead of the fasces and cock, their value is marked, and that the motto round the edge is omitted.

The 6 LIVRE Piece of the Republic—The Genius of France, &c. as above. Reverse, a wreath of oak, containing the words SIX LIVRES; legend,

REPUBLIQUE FRANCOISE L'AN II.

and round the edge,

LIBERTE, EGALITE,
Liberty, equality.

The 5 FRANC Piece of the Republic—Three figures, representing Hercules and two young women joining their hands; legend,

VOL. II.

UNION ET FORCE,
Union and strength.

Reverse, a wreath of laurel and oak, containing the words 5 FRANCS L'AN 7; legend,

REPUBLIQUE FRANCOISE;

and round the edge,

GARANTIE NATIONALE,
National guarantee.

The 5 FRANC Piece of 1803.—Head of Bonaparte; legend as on the 40 Franc Piece. Reverse, a wreath of laurel, containing the value, 5 FRANCS; legend,

REPUBLIQUE FRANCOISE,

but on pieces coined in 1809,

EMPIRE FRANCOIS.

Round the edge, the words

DIEU PROTEGE LA FRANCE,

as before.

The FRANC of Louis XVIII. bears the same impressions as the 40 Franc Piece of the same period; except the mark of the value.

FRANCFORT ON THE MAINE.

GOLD COINS.

The DUCAT—An eagle, with the legend,

TURRIS FORTISSIMA NOMEN DOMINI,
The name of the Lord is the strongest tower.

Reverse, a cross with ornaments; legend,

DUCATUS REISPUBLICÆ FRANCOFURTENSIS,
Ducat of the Republic of Francfort.

The DUCAT of 1796—View of the city. Reverse, a wreath of laurel surrounding the words

AUS DEN GEFÄSSEN DER KIRCHENUND BÜRGER
DER STADT FRANCKFURT,
Out of the Plate of the Churches and of the Citizens.

SILVER COIN.

The RIXDOLLAR—The impressions of these

B B

coins have varied much; most of them bear an eagle; but the reverses and legends are very different in coins of different dates; they may be easily distinguished, by the word

FRANCKFURT OR FRANCOFURT,

which is to be found on some part of the Piece, as also the words

AD NORMAM CONVENTIONIS,

According to the rate of Convention money,

and

X E. F. MARK, OR X EINE FEINE MARK,

10 to a Mark of fine-silver.

These last words within a circle or wreath, form the reverse of the more modern pièces, and coins of 1796 bear likewise the German legend,

AUS DEN GEFÄSEN, &c.

as on the Ducat; and on the obverse, an eagle, and the legend,

DER STADT FRANCKFURT,
Of the city of Francfort.

GENEVA.

GOLD COIN.

The PISTOLE—On Pistoles of an ancient date, a two-headed eagle crowned; on those of modern date, a sun with the letters I. H. S. in the centre; legend,

POST TENEBRAS LUX,
After darkness light.

Reverse, the arms of the city, with a sun over them; legend,

RESPUBL. GENEVEN.
Republic of Geneva.

SILVER COINS.

The PATAGON OR ECU (old) bears the same impression as the Pistole.

The Piece of 21 SOUS—The inscription,

POST TENEBRAS LUX.

and under it 21, the whole surrounded with various ornaments, and surmounted by a sun: reverse, as on the Pistole.

The ECU of 1794—The head of a woman with a mural crown, legend

REPUBLIQUE GENEVOISE,
Republic of Geneva;

and under it,

EGALITE, LIBERTE, INDEPENDANCE,
Equality, liberty, independence.

Reverse, two ears of corn, and the inscription

PRIX DU TRAVAIL, L'AN III. DE L'EGALITE,
The prize of labour, the year 3 of equality;

legend,

APRES LES TENEBRES LA LUMIERE,
After darkness light.

But the Ecus coined since that period, bear on the obverse a sun with the letters I. H. S. in the centre; legend,

POST TENEBRAS LUX,

as above, with

XII FLORINS IX SOLS.

Reverse, the arms of Geneva encircled by a wreath of oak; legend,

GENEVE REPUBLIQUE L'AN V. DE L'EGALITE.

The Half Ecu bears the same impressions, except that it is marked within the sun, VI FLORIN IVS. VID.

The Piece of 15 SOLS—A sun, with 15 SOLS in the centre; legend,

EGALITE, LIBERTE, INDEPENDANCE.

Reverse, an eagle within a wreath; legend,

POST TENEBRAS LUX;

The Piece of 6 SOLS—A wreath containing the words SIX SOLS; legend,

POST TENEBRAS LUX,

Reverse, as on the new Ecu.

GENOA.

GOLD COINS.

The DOPPIA—The Virgin and Child on a cloud, with a sceptre and a crown of stars; legend,

ET REGE EOS,
And govern them;

with the initials of the Doge's name and the date. Reverse, a cross with 4 stars, or flowers, and the legend,

DVX ET GVB. REIP. GENV.

that is, Dux et Gubernator Reipublicæ Genuensis,

Doge and Governor of the Republic of Genoa.

The Pieces of 2, 4, and 5 Doppie, bear the same impressions.

The SEQUIN—A figure of St. John the Baptist; legend,

NON SVRREXIT MAJOR,
A greater has not arisen.

Reverse, the arms of Genoa with a crown; legend,

DVX ET GVB. REIP. GENV.

as before.

The GENOVINA—The Virgin and Child, as on the Doppia, and the same legend. Reverse, arms of Genoa with a crown, and the legend DVX, &c. as above. The old Genovine of 100, 50, and 25 lire, and the new ones of 96, 48, and 24 lire, bear the same impressions.

The FOUR PISTOLE PIECE of the LIGURIAN REPUBLIC—A woman holding a spear and resting on a shield; legend,

REPUEBLICA LIGURE, ANNO I, L. 96.
Ligurian Republic, year 1, 96 lire.

Reverse, a wreath of laurel, with the fasces and cap of Liberty; legend,

NELL' UNIONE LA FORZA,
Strength in union;

and round the edge of the piece

PESO GRANI 550, BONTA CAR. 22,
Weight 550 grains, fineness 22 carats.

SILVER COINS.

The SCUDO DELLA GROCE—Impressions as on the Doppia.

The SCUDO DI S. GIAMBATISTA (old) of 5 Lire—Figure of St. John the Baptist, with the legend as on the Sequin, and the initials of the Doge's name. Reverse, arms of Genoa; legend, DVX, &c. as on the Doppia.

The SCUDO of 8 LIRE bears the same impressions as the preceding, except that it is marked L. 8 on the reverse, and its divisions L. 4, L. 2, L. 1.

The MADONNINA—A whole length figure of the Virgin; legend,

SVB TVVM PRESIDIVM,
Under thy protection;

with the date; and round the figure,

NE DERELINQ. NOS,
Do not forsake us.

Reverse as on the Scudo di S. Giambatista.

The SCUDO of the LIGURIAN REPUBLIC—Two figures, representing a soldier and a woman; legend,

LIBERTA EGUAGLIANZA,
Liberty, equality;

and the date. Reverse, arms of Genoa, encircled by a palm and branch of laurel, and surmounted by the cap of Liberty; legend,

REPUBBLICA LIGURE ANNO I, L. 8.

round the edge,

PESO GRANI 726, BONTA ONCIE 10 16
Weight 726 grains, fineness 10 ounces 16 deniers.

HAMBURGH.

GOLD COINS.

The DUCAT—The inscription,

MON AVR. HAMBVRGENSIS AD LEGEM IMPERII,
*Gold coin of Hamburg, according to the law of
the Empire;*

and at the top, a city gate with three towers. Ducats of an old date have the gate in the centre, and round it the legend,

MONETA AVREA HAMBVRGENSIS.

Reverse of both, a two-headed eagle crowned, with the name of the reigning Emperor of Germany, thus:

JOSEPHVS II. D. G. ROM. IMP. SEMP. AVGVST.
*Joseph II. by the grace of God, Emperor of Rome,
ever august.*

SILVER COINS.

The RIXDOLLAR (*Specie, or Banco*)—Arms of Hamburg; legend,

MONETA NOVA HAMBVRGENSIS,
New coin of Hamburg;

and at the bottom 48 SCHILL. SPEC. Reverse as on the Ducat.

The Piece of 2 MARKS—The arms of the city; legend,

HAMBURGER CURRENTGELD,
Current money of Hamburg;

and 32 SCHILL. or the legend is,

32 SCHILLING HAMBURGER COURANT.

Reverse as on the Ducat. The Pieces of 1 Mark and under are marked 16 SCHILLING, 8 SCHILLING, &c.

HANOVER.

GOLD COINS.

The GEORGE D'OR—The King's arms; legend,

GEORG. II. D. G. M. B. F. ET H. REX. F. D.

Reverse,

V THALER,

5 Rixdollars of account;

and the date; legend,

BRUNS. ET LUN. DUX. S. R. I. A. T. H. ET ELECT.

as on the English coins, *which see.*

The DUCAT—The King's arms, with his name and all his titles, as on the Guinea. Reverse, a horse at full speed; and on the exergue,

EX AVRO HERC.

From the gold of the mines of Hartz;

and the date. Ducats of an old date have a horse running over rough ground, and the legend,

NEC ASPERA TERRENT,

Neither do rough places deter him.

Other Ducats bear the head, name, &c. of the reigning King; and on the reverse,

1 DUCAT. N. D. R. FUS,

that is, Nach dem reichs fuss,

According to the rate of the Empire,

and the legend,

BRUNS. ET LUN. DUX. &c.

The GOLD FLORIN, or GOLD GULDEN—The King's arms and title. Reverse, the inscription,

1 GOLD GULDEN 2 THALER,

and the letters N. D. R. FU. as on the Ducat; and the same legends.

SILVER COINS.

The RIXDOLLAR—Arms of the reigning King, with his name and title, as in the English coins. Reverse, a horse running over rough ground; legend,

NEC ASPERA, &c.

as above. Some Rixdollars bear on the reverse, a figure of St. Andrew on the cross; legend, the King's German titles.

The PIECE of $\frac{2}{3}$, (fine)—Some of these bear the head of the reigning King; some, a man holding a tree; others the words

24 MARIEN GROSCH.

Reverse, the King's arms; legend; the King's name and titles, as on the Guinea; and under the arms, $\frac{2}{3}$ in an oval, with,

FEIN SILBER,

Fine silver;

and sometimes also N. D. REICH S F. as on the Ducat. The divisions of this piece are marked $\frac{1}{3}$ and $\frac{1}{6}$, and bear in other respects the same impressions.

The PIECE of $\frac{2}{3}$, (base)—The King's head, name, and title. Reverse, $\frac{2}{3}$ in large figures; legend,

18 STUCK EINE MARK FEIN,
18 Pieces to a Mark fine.

HESSE CASSEL.

GOLD COINS.

The PISTOLE—Head of the reigning Prince, with his name and titles, thus :

WILHELMUS IX. D. G. HASS. LANDG. HAN. COM.
William IX. by the grace of God, Landgrave of Hesse, Count of Hanau.

Reverse, a star, and within it the legend,

VIRTUTE ET FIDELITATE,
By courage and fidelity ;

in the centre, a lion. Other Pistoles, coined in 1794, &c. bear on the reverse a lion at rest, with standards and military trophies, and over this 5 THALER.

SILVER COINS.

The RIXDOLLAR (*Convention*)—Head of the reigning Prince, with name and title as on the Pistole. Reverse, arms of Hesse Cassel; legend,

X ST. EINE FEINE MARK,
10 Pieces to a Mark fine ;

and at the bottom, the word

IUSTITIA,
Adjusted, or verified.

In Pieces of more modern date, (1796, &c.) this last word is not to be found, but under the above legend, the words

BIBERER SILBER,
Silver of the mine of Biber ;

and in some pieces of 1770, the words

EX VISCERIBUS FODINÆ BIBER,

From the bowels of the mine of Biber.

The Half and Quarter Rixdollars are marked XX ST. &c. and 40 ST. &c. and under the arms $\frac{2}{3}$ or $\frac{1}{3}$.

The THALER, or RIXDOLLAR of account—Head, name, and title, as above. Reverse, a star with a lion in the centre, and the words

VIRTUTE ET FIDELITATE,

as before, or the arms of Hesse; the legend, in both, is

EIN THALER,
1 Thaler ;

and on the Half piece,

EIN HALBER THALER.

HESSE DARMSTADT.

GOLD COINS.

The CAROLIN—Head of the reigning Prince, with name and titles, thus :

ERNEST LVD. D. G. HASS. LANDG. PR. HERSE.
Ernest Louis, by the grace of God, Landgrave of Hesse, Prince of Hirschfeld.

Reverse, a cross formed by four crowns, and the letters EL four times repeated; in the centre, an X or V, according as it is a Carolin or a Half Carolin; legend,

OCCULTA PATEBUNT,
Hidden things shall be brought to light.

The DUCAT—Head, name, and titles of the reigning Prince. Reverse, arms of Hesse Darmstadt; legend,

SINCERE ET CONSTANTER,
Sincerely and constantly.

HOLLAND.

GOLD COINS.

The RYDER—An armed horseman above the arms of the province; legend,

MO. AUR. PRO. CONFOED. BELG. ZELAND.

that is, Moneta aureæ provinciæ confoederationis Belgicæ Zelandiæ,

Gold coin of Zealand, a province of the Belgic confederacy.

Reverse, arms of the United Provinces, with

14 GL.

14 *Guilders, or Florins;*

legend,

CONCORDIA RES PARVÆ CRESCUNT,

Small things increase by concord.

The DUCAT—A foot soldier with a drawn sword, and a bundle of arrows; legend,

CONCOR. RES. PAR. CRES.

as above, and HOL. or ZEL. &c. to distinguish the Province. Reverse, the inscription,

MO. ORD. PROVIN. FŒDER. BELG. AD LEG. IMP.

that is, Moneta ordinaria provinciarum foederatarum Belgicarum ad legem Imperii,

The common coin of the confederated Belgic Provinces, according to the law of the Empire.

SILVER COINS.

The DUCATOON bears the same impressions as the Ryder, except that the legend instead of MO. AUR. begins with the words

MO. NO. ARG.

Moneta nova argentea,

New silver coin;

and that the value is omitted.

The FLORIN, or GUILDER—A woman leaning on a book which lies on an altar, and holding in the other hand a lance with the cap of Liberty; legend,

HANC TVEMVR, HAC NITIMVR,

This we support, on this we depend.

Reverse, arms of the United Provinces, with 1 G.; legend,

MO. ARG. ORD. FOE. BELG.

that is, Moneta argentea ordinum foederationis Belgicæ,

The common silver coin of the Belgic confederacy;

and the name of the particular province, marked thus: HOLL. for Holland; ZEL. for Zealand; GEL. & C. Z. for Guelders and the County of Zutphen; WEST F. for West Friesland; TRAJ. (Trajectus) for Guilder Utrecht; TRANSI, for Overysse; GRON. for Groningen.

The RIXDOLLAR—A soldier with a drawn sword; and in his left hand the arms of the Province; legend,

MO. NO. ARG. &c.

as on the Ducatoon and Ryder. Reverse, arms of the United Provinces, with the date; legend,

CONCORDIA RES, &c.

as on the Ryder.

The RIXDOLLAR of the KINGDOM of HOLLAND—Head of the reigning King, with name and title, thus:

NAP. LODEW. I KON. VAN HOLL.

that is, Napoleon Lodewig, I. Konig van Holland, Napoleon Louis I. King of Holland.

Reverse, arms of Holland, with 50 Ss. (50 *Stivers*;) legend,

KONINGRIJK HOLLAND,
Kingdom of Holland.

LIEGE.

GOLD COIN.

The DUCAT—Head of the reigning Bishop, with his name and some of his titles; and on the reverse, his arms; legend,

LEOD. EP. PR. FR. RAT.

Leodicensis episcopus princeps,
Prince Bishop of Liege, &c.

Ducats coined during an interregnum bear a mitred head, with the legend,

S. LAMBERTUS PATRO. LEOD.
St. Lambert, Patron of Liege.

Reverse, arms of Liege ; legend,

DEC. ET CAPLI. LEOD. SEDE VACANTE,

The Dean and Chapter of Liege, the See being vacant.

SILVER COINS.

The silver coins of Liege bear the same impressions as the gold coins. The legend of the Patagons coined during an interregnum is

MONETA NOVA CAPLI. LEOD. SEDE VACANTE,

as above.

The ESCALIN bears on the reverse a lion supporting a small escutcheon, with the legend,

DEC. ET CAPLI, &c.

LORRAINE.

GOLD COINS.

The LEOPOLD—Head of the reigning Prince, with name and title, thus :

LEOP. I. D. G. D. LOT. BAR. REX. IER.

that is, Leopoldus I. Dei gratia, Dux Lotharingiæ et Barri, Rex Ierosolymæ,

Leopold I. by the grace of God, Duke of Lorraine and Bar, King of Jerusalem.

Reverse, arms of Lorraine ; legend,

TE DOMINE SPES MEA,

In Thee, O Lord, is my hope.

SILVER COIN.

The LEOPOLD, or ECU—Bears the same impressions as the Gold Leopold, except the legend on the reverse, which is

IN TE DOMINE SPERAVI,

In Thee, O Lord, have I hoped.

LUBEC.

SILVER COINS.

The RIXDOLLAR or 3 MARK PIECE—A two-headed eagle crowned, with 48 on its breast ; legend,

MON. NOVA IMP. CIVITAT. LUBECÆ,

New coin of the imperial city of Lubec.

Reverse, arms of the city ; legend,

48 SCHILLING COURANT GELDT ANNO, &c.

48 Schillings currency, the year, &c.

The DOUBLE and SINGLE MARK are distinguished by the numbers 32 and 16 on the eagle ; and on the reverse, above the arms, there are two palm branches surrounding the words 32 SCHILLING or 16 SCHILLING ; legend,

COURANT GELDT.

LUCCA.

GOLD COIN.

The DOPPIA—Head of Jesus crowned ; legend,

VULTVS SANCTVS,

Holy countenance.

Reverse, arms of the Republic ; legend,

RESPUBLICA LUCENSIS,

Republic of Lucca.

SILVER COINS.

The SCUDO—An armed horseman giving his cloak to a beggar ; legend,

SANCTUS MARTINUS,

St. Martin.

Reverse, arms of Lucca ; legend,

RESPUBLICA LUCENSIS.

The divisions of the Scudo bear the same impressions ; but some pieces, instead of the figure of St. Martin, have a crucifix, with the legend

VULTVS SANCTVS,

as above.

The BARBONE—Head of Jesus crowned ; legend,

VULTVS SANCTVS.

Reverse, a cross ; legend as on the Scudo.

MALTA.

GOLD COINS.

The LOUIS—Head of the reigning Grand-Master, with his name and title, thus :

EMMANUEL DE ROHAN M. M.

*that is, Magister Magnus,
Grand-Master.*

Reverse, arms of the order and of the Grand-Master in two separate shields, with a crown over them, and

s. 10,

10 Scudi, or crowns ;

legend,

HOSPITALIS ET S. SEPUL. HIERUSA.

Of the Hospital and Holy Sepulchre of Jerusalem.

SILVER COINS.

The OUNCE—Head, name, and title of the Grand Master, as on the Louis. Reverse, arms of the order, mostly borne by an eagle, with

T. 30,

30 Tari ;

legend and date as on the gold coins. The Half Ounce is marked T. XV. But some Ounces of ancient date, bear a figure of St. John the Baptist, with the legend,

NON SVRREXIT MAJOR,

A greater has not arisen ;

and T. XXX. at the bottom. Reverse, arms of the order, with the name and title of the Grand Master.

The SCUDO bears the same impressions as the Ounce, except that there is no legend on the reverse, but the letters S. I. at the bottom, and a wreath of laurel round the arms.

MANHEIM.

GOLD COINS.

The CAROLIN—Head of the reigning Prince, with the name and title, thus :

CAR, PHILIP D. G. ELEC. PALATINUS,

Charles Philip, by the grace of God, Elector Palatine.

Reverse, arms of the Prince, with four crowns, supported by four C's, interlinked and four P's, the whole forming a cross ; legend,

MONETA NOVA AUREA PALATI.

New gold coin of the Palatinate.

The PISTOLE—Head of the reigning Prince, with name and title, thus :

CAR. THE. C. P. S. R. I. A. T. & EL.

that is, Carolus Theodorus, Comes Palatinus, Sancti Romani Imperii Archi-Thesaurarius et Elector ;

Charles Theodore, Count Palatine, Arch-Treasurer and Elector of the Holy Roman Empire.

Reverse, a crown, formed by four crowns and four cyphers of the letters C. T. ; legend,

DOMINUS REGIT ME,

God directs me.

The DUCAT—The same as the Pistole.

SILVER COINS.

The RIXDOLLAR (fine)—Head, name, and title, as on the Pistole. Reverse, arms of the Prince ; legend,

EX VISCERIBUS FODINÆ WILDBERG ;

From the bowels of the mine of Wildberg,

and

FEIN SILB.

Fine silver.

The PIECE of $\frac{2}{3}$ bears the same impressions as the Rixdollar, except that it is marked $\frac{2}{3}$ under the arms. Some pieces of an ancient date, bear no head but $\frac{2}{3}$ in large figures, and under this,

FEIN SILBER ;

legend,

DEUS SERVET METALLI FODINAS MONTENSES,

May God preserve the mines of Wildberg ;

the names and titles are on the reverse, round the arms.

The RIXDOLLAR (Convention)—Head, name,

and titles as on the Pistole. Reverse, arms of the Prince; legend,

AD NORMAM CONVENTIONIS,
According to the rule of the Convention;

or,

10 EINE FEINE MARCK,
10 to a fine Mark.

MECKLENBURG.

SILVER COIN.

The **PIECE** of $\frac{2}{3}$ —Arms of the reigning Prince, with name and title, thus:

FRIED. FRAN. ZV. G. G. HERZOG ZV. MECKLENB.
SCHWERIN,
Frederic Francis, by the grace of God, Duke of Mecklenburg Schwerin.

Reverse, $\frac{2}{3}$ in large figures; legend,

18 STUCK EINE MARCK FEIN,
18 pieces to a Mark fine.

MENTZ.

GOLD COIN.

The **DUCAT**—Head of the reigning Prince, with name and title, thus:

FRID. CAR. IOS. A. EP. ET EL. MOG. EP. W.
that is, Fredericus Carolus Josephus, Archiepiscopus et Elector Moguntiae, Episcopus Wormiae,
Frederic Charles Joseph, Archbishop and Elector of Mentz, Bishop of Worms.

Reverse, arms of the Bishop, with the date; other Ducats bear on the reverse a view of the city of Mentz, with the legend,

AVREA MOGVNTIA,
The golden Mentz.

SILVER COINS.

The **RIXDOLLAR**—Head of the reigning Prince, with name and titles, thus:

FRID. CAR. IOS. D. G. A. E. MOG. S. R. I. P. G. A. C. ET
EL. E. W.

that is, Fredericus Carolus Josephus, Dei gratia, Archiepiscopus Moguntiae, Sancti Romani Imperii pro Germania Archi Cancellarius et Elector, Episcopus Wormensis;

Frederic Charles Joseph, by the grace of God, Archbishop of Mentz, High Chancellor for Germany and Elector of the Holy Roman Empire, Bishop of Worms.

But the pieces of 1796, &c. have their legend in German, thus:

FRID. CAR. IOS. ERZB. V. KVRF. Z. MAINZ. B. Z. W.
that is, Erzbischoff und Kurfurst zu Mainz, Bischoff zu Worms,

Archbishop and Elector of Mentz, Bishop of Worms.
Reverse, arms of the Bishop; legend,

ZEHEN EINE FEINE MARK,
Ten to a Mark fine.

The **COPSTUCK** bears the same impressions as the Rixdollar, except that the legend on the reverse is

60 AUF EINE FEINE MARK,
and that it is marked 20 at the bottom.

MILAN.

GOLD COINS.

The **SEQUIN**—Head of the reigning Emperor of Germany, with name and title, thus:

IOSEP. II. D. G. R. IMP. S. AUG. G. H. ET B. REX. A. A.
Joseph II. by the grace of God, Emperor of Rome, ever august, King of Germany, Hungary, and Bohemia, Archduke of Austria.

Reverse, arms of Milan; legend,

MEDIOLANI ET MANT. DUX,
Duke of Milan and Mantua.

The **DOPPIA**, or **PISTOLE**—The same as the Sequin.

The **PIECE** of 40 LIRE of the new kingdom of Italy—Head of Bonaparte; legend,

NAPOLÉON IMPERATORE E RE,
Napoleon Emperor and King.

Reverse, arms of Milan; legend,

REGNO D'ITALIA,
Kingdom of Italy,

and 40 LIRE; round the edge of the piece,

DIO PROTEGGE L'ITALIA,
God protect Italy.

SILVER COINS.

The SCUDO—Impressions the same as the Sequin, except that round the edge of the pieces of Maria Theresa, are the words

JUSTITIA ET CLEMENTIA,
Justice and clemency;

and round those of Joseph II.

VIRTUTE ET EXEMPLO,
By virtue and example.

The LIRA bears the same impressions as the Sequin, except that it is marked UNA LIRA, under the arms: pieces of 30 Soldi of the year 1800 have likewise their values marked.

The SCUDO of the CISALPINE REPUBLIC—An armed woman sitting, and another woman standing before her; legend,

ALLA NAZ. FRAN. LA REP. CISAL. RICONOSCENTE,
To the French Nation, the grateful Cisalpine Republic.

Reverse, a wreath of oak, and within it

SCUDO DI LIRE SEI 27 PRATILE ANNO VIII.

Scudo of 6 Lire, 27th of the month Pratile, year 8;

and round the edge of the piece,

UNIONE E VIRTU,
Union and virtue.

The PIECE of 30 SOLDI of the same Republic—Head of a woman; legend,

REPVBBLICA CISALPINE, SOLDI 30.

Reverse,

PACE CELEBRATA, FORO BONAPARTE FONDATO,
ANNO IX,

Peace proclaimed; foundation of Bonaparte's forum.

SILVER COINS.

The SCUDO—Head of the reigning Prince, with name and title, thus:

HERCVLES III. D. G. MVT. REG. MIR. EC. DVX,
Hercules III. by the grace of God, Duke of Modena, Reggio, Mirandola, &c.

Reverse, arms of Modena; legend, in pieces of 1782,

PROXIMA SOLI,
Next to the Sun;

and in those of 1796,

DEXTERA DOMINI EXALTAVIT ME,
The right hand of the Lord hath exalted me.

NAPLES.

GOLD COINS.

The SIX DUCAT PIECE—Head of the reigning King, with name and titles, thus:

FERDINAN. IV. D. G. SICILIAR. ET HIER. REX,
Ferdinand IV. by the grace of God, King of the two Sicilies and of Jerusalem.

Reverse, arms of Naples; legend,

INFANS HISPANIAR.
Infant of Spain.

The FOUR and TWO DUCAT PIECES bear the same impressions.

SILVER COINS.

The PIECE of 12 CARLINI—Impressions the same as the Six Ducat Piece, and the value marked

G. 120,
120 grains.

Pieces coined since 1805, have round the head,

FERDINANDVS IV. D. G. REX;

and on the reverse,

VTR. SIC. HIER. HISP. INF.
that is, Utriusque Siciliae, &c.
Of both Sicilies, &c.

and round the edge,

PROVIDENTIA OPTIMI PRINCIPI,
The precaution of the best Prince.

The piece of 6 Carlini is marked

G. 60,
60 grains.

In 1791, two different pieces were coined bearing the profiles of the King and Queen with their names,

FERDINANDVS IV. ET MARIA CAROLINA.

One of these pieces has on the reverse the sun in the zodiac, with the globe of the earth at the bottom, and the legend,

SOLI REDVCI,
To the returning Sun.

The reverse of the other piece represents a man and a woman making a sacrifice on an altar, behind which is a view of Mount Vesuvius; legend,

PRO FAVSTO PP. REDITV,
For the happy return of our Sovereigns.

The DUCAT bears the same impressions as above, except that it is marked on the reverse

DVCATO NAP. GRA. 100;

and round the edge,

PROPUGNACULA FIRMA ADVERSUS FRAUDATORES,
A firm guard against fraudulent persons.

The Half Ducat is marked

ME. D. NAP. G. 50.

The PIECE of 12 CARLINI of the Republic of Naples—A woman with a spear and cap of Liberty in one hand, and supporting the fasces with the other; legend,

REPUBBLICA NAPOLITANA.

Reverse, a wreath containing the value,

CARLINI DODICI,
12 Carlini;

legend,

ANNO SETTIMO DELLA LIBERTA,
The seventh year of liberty.

NETHERLANDS.

GOLD COINS.

The SOUVERAIN.—See *Austrian Dominions.*

The GOLD LION of the revolted Netherlands (1790)—A lion supporting a shield, with the word
LIBERTAS;

legend,

DOMINI EST REGNUM,
The kingdom is the Lord's.

Reverse, a sun, with eleven escutcheons round it, and the legend,

ET IPSE DOMINABITUR GENTIUM,
And he himself shall reign over the nations.

The TEN FLORIN PIECE, and its divisions (1818)—Head of the King, with the legend,

WILLEM KONING DER NEDERLANDEN, GROOT HERTOG
VAN LUXEMBURG,
*William King of the Netherlands, Grand Duke of
Luxemburg.*

Reverse, the arms of the King between 10 GL.; legend,

MUNT VAN HET KONINGRYK DER NEDERLANDEN,
Coin of the kingdom of the Netherlands,

and the date. Round the edge,

GOD ZY MET ONS,
God be with us,

SILVER COINS.

The DUCATOON bears the same impressions as the Souverain.

The CROWN of Maria Theresa, and its divisions—A cross and four crowns in the angles. Reverse, a two-headed eagle crowned, bearing on its breast the arms of Austria; the legends consist of the

Empress's name and her titles as on the Souverain;
and round the edge,

JUSTITIA ET CLEMENTIA,
Justice and clemency.

The CROWN of the Emperors Joseph, Leopold, and Francis II.—Head of the reigning Emperor. Reverse, a cross and three crowns, the golden fleece supplying the place of the fourth; legends as on the Souverain. Round the edge of the pieces of Joseph II. are the words

VIRTUTE ET EXEMPLO,
By virtue and example;

round those of Leopold,

PIETATE ET CONCORDIA,
By piety and concord;

and round those of Francis II.

FIDE ET LEGE,
By faith and the law.

The SILVER LION of the revolted Netherlands (1790) bears the same impressions as the Gold Lion, except that round the edge is the legend,

QUID FORTIUS LEONE,
What is stronger than the lion?

The FLORIN of the revolted Netherlands—Obverse, a lion. Reverse, two joined hands and eleven arrows, with the mark, 1 FLOR.; legends as on the Silver Lion. Some Florins, however, have the legend,

MON. NOV. ARG. PROV. FOED. BELG.

New silver coin of the confederated Belgic Provinces;
and on the reverse,

IN VNIONE SALVS.
Safety in union.

The FLORIN of 1816 bears the same impressions as the 10 Florin Piece.

PIECES of 25, 10, and 5 CENTS, simply bear a W crowned, and on the reverse, the King's arms between 25 CT. 10 CT. &c.

NEUFCHATEL.

SILVER COINS.

The PIECE of 21 BATZEN—A cross with a sun in the centre; legend,

SUUM CUIQUE,
To every one his own.

Reverse, arms of Neufchatel; legend,

F. G. REX BOR. PR. SUP. NOVIC. & VAL.

that is, Fredericus Guglielmus, Rex Borussorum, Princeps Supremus Novicastelli et Valangini, Frederic William, King of Prussia, Supreme Prince of Neufchatel and Valangin;

and at the bottom, 21 BZ. The Half-Piece is marked 10½ BZ. The Pieces of 1799, bear the head of the reigning King of Prussia, with his name and titles. Reverse, arms of Neufchatel; legend,

SUUM CUIQUE,
and 21 BZ. as before.

NUREMBERG.

GOLD COINS.

The DUCAT of 1700—A lamb standing on the globe, and carrying a standard with the word

PAX,
Peace;

legend,

TEMPORA NOSTRA PATER DONATA PACE CORONA,
Crown our times, O Father! by giving us peace.

Reverse, three escutcheons and a dove at the top; legend,

RESP. NORIMBERGENSIS SECVLVM NOVVM CELEBRAT,
The Republic of Nuremberg celebrates the new century.

The Double and Half Ducat bear the same impressions.

SILVER COINS.

The RIXDOLLAR (*Constitution*)—Head of the reigning Emperor, with name and title, thus:

CAROLVS VI. D. G. ROM. IMP. SEMP. AUG.

*Charles VI. by the grace of God, Emperor of Rome,
ever august.*

Reverse, a view of the city, with an eagle flying over it; legend,

AVGVSTO DOMINO TVTA ET SECVRA PARENTE EST,
It is safe and secure under its august Lord and Father;
and on the exergue,

NORIMBERGA.

The RIXDOLLAR (*Convention*)—The impressions of these coins vary, some bearing the head, name, and title of the reigning Emperor; and others a view of the city, with a sun over it. Reverse, a two-headed eagle crowned, bearing the arms of the city on its breast; or a single-headed eagle with two escutcheons in its talons. The pieces are marked with the letter N, the word NURNBERG, or the legend,

MONETA NOVA REIPVBL. NORIMBERGENSIS,

New coin of the Republic of Nuremberg;

and the words

X EINE FEINE MARCK.

Ten to a Mark fine.

The COPSTUCK—Arms of the city, with 20 on a pedestal: legend,

MONETA NOVA, &c.

as above. Reverse, the two-headed eagle and arms of the city, with the Emperor's name and title.

PARMA.

GOLD COIN.

The DOPPIA—Head of the reigning Prince, with name and title, thus:

FERDINANDVS I. HISPANIAR. INFANS,

Ferdinand I. Infant of Spain,

and a star at the bottom. Reverse, arms of Parma; legend,

D. G. PARMÆ PLAC. ET VASTAL. DUX,

*By the grace of God, Duke of Parma, Placentia,
and Guastalla.*

SILVER COINS.

The DUCAT and HALF DUCAT bear the same impressions as the Doppia. The pieces of 1, 2, and 3 Lire bear on the reverse a wreath containing their value, thus:

LIRE TRÈ DI PARMA,

Three Lire of Parma.

PIEDMONT.

GOLD COINS.

The DOPPIA, or PISTOLE (coined before 1785)—Head of the reigning Prince, with name and title, thus:

VIC. AM. D. G. REX SAR. CYP. ET IER.

*that is, Victor Amadeus, Dei gratia, Rex Sardiniaë,
Cypri, et Ierosolimæ,*

*Victor Amadeus, by the grace of God, King of Sardinia,
Cyprus, and Jerusalem.*

Reverse, the arms of Piedmont, Sardinia, &c. legend,

DVX SAB. ET MONTISE. PRINC. PED.

*that is, Dux Sabandiaë et Montisferrati, Princeps
Pedemontanus,*

Duke of Savoy and Montferrat, Prince of Piedmont.

The Half Doppia bears the same impressions.

The DOPPIA and HALF DOPPIA (coined since 1785)—Head of the reigning Prince; legend,

VIC. AM. D. G. REX SARDINIAE.

Reverse, an eagle crowned, with an escutcheon on its breast, and under it a sceptre and staff with the collar of an order; legend,

PRINC. PEDEM. DVX SABAVD.

But those coined since 1797, bear, on the obverse, only the head and the name, thus:

CAROLUS EMMANUEL IV.

and on the reverse

D. G. REX SAR. CYP. ET IER.

with the crowned eagle.

The CARLINO and Half-Carlino bear the same impressions as the Doppia.

The SEQUIN—An eagle as described above; legend,

CAROLVS EMMANUEL D. G. SARDINIE REX.

Reverse, the Annunciation of the Blessed Virgin.

The MARENGO, or PIECE OF 20 FRANCS (1801)—Head of a woman with a helmet; legend,

L'ITALIE DELIVREE A MARENGO,

Italy delivered at Marengo.

Reverse, a wreath containing the words

20 FRANCS L'AN 9;

legend,

LIBERTE EGALITE,

Liberty, equality,

and ERIDANIA, the name that was then given to the country.

SILVER COINS.

The SCUDO, and its divisions, bear the same impressions as the Old Doppia. It may be observed, however, that the coins of an ancient date (before 1714) do not contain the title of King of Sardinia, but only those of Duke of Savoy, Prince of Piedmont, and King of Cyprus. On the coins of Charles Emmanuel IV. the only title retained is, King of Sardinia, Cyprus, and Jerusalem.

The MEZZO SCUDO of the Republic of Piedmont—A soldier, with the fasces and cap of Liberty; legend,

LIBERTA, VIRTU, EGUAGLIANZA,

Liberty, virtue, equality.

Reverse,

MEZZO SCUDO,

within a wreath of oak; legend,

ANNO VII. REP. 1 DELLA LIBERTA PIEMONTESE,

The 7th year of the Republic, the 1st of the Liberty of Piedmont.

The FIVE FRANC PIECE (1801)—Two female figures, one of them with a spear and the cap of Liberty; legend,

GAULE SUBALPINE.

Reverse, a wreath, containing the words

5 FRANCS L'AN 9;

legend,

LIBERTE, EGALITE, ERIDANIA,

as on the Marengo.

POLAND.

GOLD COINS.

The DUCAT (1772)—A full length figure of the King, with name and title, thus:

STANISLAUS AUG. D. G. REX POL. M. D. L.;

that is, Stanislaus Augustus, Dei Gratia, Rex Poloniæ, Magnus Dux Lithuanicæ,

Stanislaus Augustus, by the grace of God, King of Poland, Grand Duke of Lithuania.

Reverse,

MONETA AUREA POLONI. AD LEG. IMPER.

Gold coin of Poland, according to the law of the Empire.

The DUCAT (1791)—Head of the King, with name and titles as above. Reverse, a wreath, containing the words,

AUREUS NUMMUS POLONIÆ ANNO, &c.

Gold coin of Poland, in the year, &c.

SILVER COIN.

The RIXDOLLAR—Head of the reigning King, with name and title, as on the Ducat. Reverse, arms of Poland; legend,

X EX MARCA PURA COLONIEN,
Ten from the Mark fine, Cologne weight.

Round the edge,

PIGNUS FIDEI PUBLICÆ,
A pledge of the public faith.

On the Half Rixdollar is

XX EX MARCA, &c.

and on the new Rixdollar

14 $\frac{1}{2}$ EX MARCA, &c.

and at the bottom

6 ZL.

6 Zloti, or Polish Florins.

PORTUGAL.

GOLD COINS.

The DOBRAON—Arms of Portugal; with 20,000 on one side and five flowers on the other; legend,

JOANNES V. D. G. PORT. ET ALG. REX.

John V. by the grace of God, King of Portugal and Algarve.

Reverse, a cross with four M's in the angles; legend,

IN HOC SIGNO VINCES,

By this sign thou shalt conquer.

The Half-Dobraon bears the same impressions, except that it is marked 10,000.

The MOIDORE—The same as the Dobraon, but is marked 4000, and has four B's in the angles of the cross; but some of an ancient date bear on the reverse a cross, surrounded by four connected semi-circles, and a whole circle, with the legend

ET BRASILÆ DOMINVS ANNO, &c.

and Lord of Brazil, in the year, &c.

The Half and Quarter Moidores are marked 2000 and 1000.

The JOANNESE—Head of the reigning Sovereign, with name and titles, thus:

JOANNES V. D. G. PORT. ET ALG. REX;

or,

MARIA I. D. G. PORT. ET ALG. REGINA.

The pieces coined by the Prince Regent, since 1804, bear his head, with

JOANNES D. G. PORT. ET ALG. P. REGENS.

Reverse, arms of Portugal. The Dobra, or Double Joannese, and its subdivisions all bear the same impressions.

The QUARTINHO—Arms of Portugal, with 1000, and the legend

MARIA, D. G. &c.

Reverse, a cross, with four flowers, and the legend

IN HOC SIGNO VINCES,

as before.

The OLD CRUSADO—Head of the reigning King. Reverse, a crown; legend,

JOAN. V. D. G. P. REX.

as before.

The NEW CRUSADO—Name of the Sovereign, between two palm branches, surmounted by a crown, and beneath it 400. Reverse, the cross and legend as on the Quartinho.

The MILREE, coined for the African colonies,—Arms of Portugal, with 1000 on the side, and the name and title as above. Reverse, a cross, &c. as on the old Moidore; legend,

ET DOMINUS AF. OR. ANNO, &c.

that is, Dominus Africæ Orientalis,

Lord of Eastern Africa.

SILVER COINS.

The NEW CRUSADO (1795)—The arms of Portugal, on one side of which is the date, and on the other 400; legend,

MARIA I. D. G. PORT. ET ALG. REGINA,

as on the Joannese. Reverse, a cross with four flowers in the angles; legend,

IN HOC SIGNO, &c.

as above.

The **NEW CRUSADO** (1802)—Same impressions as the Crusado of 1795, except the legend on the obverse, which is

JOHANNES D. G. PORT. ALG. P. REGENS,
as on the Joannese.

The divisions of the New Crusado, that is, pieces of 240, 120, and 60 Rees, bear the same impressions, except that the Half Crusado is marked 200.

The **TESTOON**—A crown, and under it LXXX, with the reigning Sovereign's name and title; the Half Testoon is marked XXXX, and the Vintem XX. Reverse, a plain cross, with four flowers in the angles; legend,

IN HOC SIGNO VINCES,
as before.

SILVER COINS OF THE PORTUGUESE COLONIES.

The **PATACA** of **BRAZIL**—Arms of Portugal, with 640 on the side, and the date near the top; legend, the name and title of the reigning Sovereign as above, with the addition of

BRAS D.
Brasiliæ Dominus, or Domina,
Lord or Lady of Brazil.

Reverse, an armillary sphere, placed on a cross; legend,

SVBQ. SIGN. NATA STAB.
that is, Subque Signo nata Stabili,
Born under a steady sign.

There is also a Pataca of 600 Rees bearing the letter J. with a Crown over it, 600 on the side, and the date at the bottom. Reverse, an armillary sphere placed on a cross, with an R in the centre; the legend,

SVB. SIGN. &c.

The **PIECE** of 12 **MACUTAS**—Arms of Portugal; legend,

MARIA I. D. G. REGINA P. ET D. GUINEÆ,
Mary I. by the grace of God, Queen of Portugal, and
Mistress of Guinea.

Reverse, a wreath of oak, and within it, MACUTAS 12; legend,

AFRICA PORTUGUEZA,
Portuguese Africa.

PRUSSIA.

GOLD COINS.

The **FREDERICK**—Head of the reigning King, with name and title; thus,

FRIDERICVS BORVSSORVM REX,
Frederick, King of Prussia;

but the coins struck since 1795 have the German legend—

FRIED. WILHELM III. KÖNIG VON PREUSSEN,
Frederick-William, King of Prussia.

Reverse, an eagle with a crown and military trophies.

The **DUCAT** of ancient date has the same impressions as the Frederick; but those coined in 1787 bear the arms of Prussia, with the reigning King's name and title as above. Reverse, 1 **DUCAT**, surrounded by a wreath and chain, with four crowns in the angles.

SILVER COINS.

The **RIXDOLLAR** (coined before 1791)—Head of the reigning King, with name and title, as on the Frederick. Reverse, an eagle and military trophies; legend,

EIN REICHS THALER,
1 Rixdollar.

The Half Rixdollar bears the same impressions; and its value is marked thus—

2 EINEN R. THALER,
2 to a Rixdollar.

The RIXDOLLAR current (coined since 1791)—
Head of the reigning King, and the legend in Ger-
man, as above. Reverse, arms of Prussia, with
EIN THALER;

but the Rixdollar, Convention money, bears on the
reverse the legend—

ZEHN EINE FEINE MARK,
10 to a Mark fine.

The FLORIN of SILESIA—Impressions as on the
Rixdollar of 1791; but on the reverse it is marked

XXI EINE FEINE MARK.

The PIECE of $\frac{2}{3}$ —Arms of Prussia; legend,

FRIED. WILH. KOENIG. V. PR. M. ZU BRAND. D. H.
R. R. E. K. U. KURF.

*that is, Friederick Wilhelm, Koenig von Preussen
Markgraf zu Brandenburg, der Heiligen, Romis-
chen Reichs Erzkammerherr und Kurfurst,*

*Frederick William, King of Prussia, Marquis of Bran-
denburg, High Chamberlain and Elector of
the Holy Roman Empire.*

Reverse, $\frac{2}{3}$ in large figures; legend,

18 STUCK EINE MARK FEIN,
18 Pieces to a Mark fine.

The Piece of 8 GOOD GROSCHEN—Head, name,
and title of the reigning King, as on the Frederick.
Reverse, on Pieces of 1756, a military trophy, and
above it

8 GUTE GRÖSCHEN;

on Pieces of 1773, a wreath containing the words

8 EINEN REICHS THALER;

on those of 1791, &c. the arms of Prussia; legend,
DREI, or 3, EINEN R. THALER.

The Piece of 4 GOOD GROSCHEN—Head, name,
and title of the reigning King, as on the Frederick.
Reverse, on Pieces of 1766,

6 EINEN REICHS THALER;

on those of 1791, &c. the arms of Prussia, with
4 GR.

legend,

84 EX MARCA PURA COLON.

84 Pieces from the Mark fine, Cologne weight.

The RIXDOLLAR of ANSPACH and BAREUTH
—Head of the reigning Prince, with name and title,
thus:

ALEXANDER D. G. MARCH. BRAND.
*Alexander, by the grace of God, Marquis, or Margrave,
of Brandenburg.*

Reverse, arms of Anspach, &c. with

ZEHEN EINE FEINE MARK,
10 to a Mark fine.

But those of more modern date (1790, &c.) bear the
impressions of the Prussian coins, Anspach having
been at that period ceded to Prussia.

RAGUSA.

SILVER COINS.

The TALLARO, or RAGUSINA—Head of the chief
magistrate called the Rector; legend,

RECTOR REIP. RHAGVSIN,
Rector of the Republic of Ragusa.

Reverse, arms of the city; legend,

DVCAT. ET SEM. REIP. RAC.

*that is, Ducatus et semis Reipublicæ Racusinæ,
Ducat and half of the Republic of Ragusa.*

Pieces of 1794 bear the head of a woman, with

RESPUBL. RHACVS.
Republic of Ragusa.

Reverse, a shield with the word

LIBERTAS,

surrounded by two branches, over which is a crown;
legend,

DVCE DEO FIDE ET IVST.
Under the guidance of God, Faith, and Justice.

The DUCAT—A whole length figure of a Bishop;
legend,

AUSPICIIS TUIS A DEO,

From God, under thy auspices.

Reverse, arms of the city; legend,

DUCAT REIP. RHACUSINE.

RATISBON.

GOLD COIN.

The **FOUR DUCAT PIECE**—The two-headed eagle crowned; legend,

CAROLVS VI. D. G. ROM. IMP. SEMP. AVG.

Charles VI. by the grace of God, Emperor of Rome, ever august.

Reverse, two keys crossed; legend,

MONETA REIPUBLICÆ RATISBONENSIS,

Coin of the Republic of Ratisbon.

SILVER COIN.

The **RIXDOLLAR**—Head, name, and title of the reigning Emperor, as on the coins of Hamburgh and Nuremberg. Reverse, a view of the city; legend,

MONETA REIP. RATISBON.

as above; and at the bottom,

X ST. EINE F. C. M.

that is, X Stück eine feine Collnisch Marck,

10 Pieces to a Mark fine, Cologne weight.

The Half and Quarter Rixdollars are marked

XX ST. EINE F. C. M.

and,

XL ST. EINE F. C. M.

ROME.

GOLD COINS.

The **SEQUIN**—A woman representing the church, with rays of glory round her head, sitting on a rock, and holding two keys in one hand, and a temple in the other; legend,

SVPRA FIRMAM PETRAM,

Upon a firm rock.

On some,

FIAT PAX IN VIRTUTE TVA,

Peace be in thy virtue;

and on others of modern date,

AUXILIVM DE SANCTO,

Help from the sanctuary.

Reverse, arms of the reigning Pope, over which are the cross keys and the tiara. The legend is mostly the name of the reigning Pope, as

PIVS SEXTVS PON. MA.

that is, Pontifex Maximus,

Pius VI. Supreme Pontiff,

with the date of his pontificate. Sequins coined during an interregnum have the words

SEDE VACANTE,

The See being vacant.

Sequins of ancient date (as before 1759) have on the reverse a dove surrounded with rays, and their legends are various: the name of the reigning Pope is on the reverse, round the figure of the church.

The impressions on the Sequins of Bologna vary still more than on those of Rome. Such as have been coined since 1786 bear the arms of the reigning Pope, with the keys, tiara, and name, as above; and on the reverse, a bishop seated on a cloud, supported by two small escutcheons; legend,

S. PETRON. BON. PROT.

St. Petronius, Protector of Bologna.

The Double and Half Sequins bear the same impressions; and the pieces of 10 and 5 Sequins are marked

ZECCH. 10,

and

ZECCH. 5.

The **DOPPIA** or **PISTOLE**—St. Peter preaching; legend,

PRINCEPS APOSTOLORUM,

Chief of the Apostles.

Reverse, a lily; legend,

FLORET IN DOMO DOMINI,

It blooms in the house of the Lord;

but the new Pistoles (coined since 1800) bear on the reverse the Pope's arms, with the keys and tiara, and his name and the date of his pontificate.

The Pistoles of Bologna bear two escutcheons, and the legend,

BONONIA DOCET,

Bologna teaches.

Reverse, a lily, with the Pope's name, &c. as above.

The SCUDO of the ROMAN REPUBLIC—An eagle, with the legend,

REPUBLICA ROMANA;

on the exergue,

PERUGIA, A. VII.

Reverse, the word SCUDO, encircled by a wreath of oak.

SILVER COINS.

The impressions and legends of the Silver Coins of Rome are too various to be here described.

They all, however, bear the name of the reigning Pope, and the words

PONT. MAX.

as before; they are mostly distinguished by the cross keys and tiara. The pieces coined during an interregnum have the words

SEDE VACANTE,

The See being vacant;

and commonly a dove, surrounded with rays.

When Rome assumed a republican form of government, in 1798, coins were struck, called SCUDI ROMANI, bearing on the obverse a woman resting on the fasces, and holding in her left hand a lance, with the cap of Liberty; legend,

REPUBLICA ROMANA;

and on the reverse,

SCUDO ROMANO,

encircled by a wreath.

On the restoration of the Papal government, under Pius VII. in 1800, coins were struck, bearing on the obverse the emblem of the church, as on the Sequin; and on the reverse, the arms of the Pope, with his name, title, and the date of his pontificate.

The Silver Coins of Bologna have been subject to the same variations as those of Rome. The word

BONONIA

is to be found on some part of the piece, and sometimes,

BONONIA DOCET.

The pieces coined by the city of Bologna have on the obverse a view of the city, and above it the virgin and child on a cloud; legend,

PRÆSIDIVM ET DECVS,

Protection and Ornament.

Reverse, arms of Bologna; legend,

POPVLVS ET SENATVS BONON.

The People and Senate of Bologna;

and on the exergue

P. 10,

10 Paoli,

with the date.

RUSSIA.

GOLD COINS.

The DUCAT—Head of the reigning Emperor or Empress, with the name and titles in Russian characters, which are thus translated:*

Peter, by the grace of God, Emperor, or Elizabeth, by the grace of God, Empress, and Sovereign of all the Russias.

The reverse varies; some Ducats of Peter the Great and Elizabeth bear a figure of St Andrew on the cross, without any legend, or with the words

New Coin, Two Rubles;

* The inscriptions on the Russian Coins are all in the Russian language, and are here given literally in English.

these of the Empress Anne bear an eagle and military trophy; legend,

Glory of the Empire;

but most of the Ducats of Peter and Elizabeth, and also those of Catherine II. have on the reverse a two-headed eagle with an escutcheon on its breast, and the words

Sovereign of all the Russias.

The GOLD RUBLE, and also the Double and Half Ruble, bear the same impressions as above; but on the reverse the value is written,

New Coin, Two Rubles, or 1 Ruble;

and the Half Piece bears on the reverse the cypher of the Empress Elizabeth, with the word

Poltina,

which means Half a Ruble. These coins as well as the Ducats are now nearly out of circulation.

The IMPERIAL—Head of the reigning Sovereign, with name and title as above; reverse, a cross formed by five escutcheons, with the four figures of the year of coinage in the angles; legend,

Imperial Russian Coin, Value Ten Rubles;

and on the Half Imperial,

Value Five Rubles.

But the Half Imperials of Paul I. have on the obverse the inscription,

Not unto us, not unto us, but unto Thy Name.

Reverse, a cross and four crowns, with a capital I in the centre, and the figure 5 in the angles of the cross.

SILVER COINS.

The RUBLE—Head of the reigning Sovereign, with the name and title as on the gold coins. Reverse, a two-headed eagle crowned, with an escutcheon on its breast; legend,

New Coin, Value 1 Ruble,

or simply,

Coin, 1 Ruble,

and the date. Some Rubles of Peter I. and Catherine I. bear on the reverse a cross and four crowns, with four I's, or four II's in the angles, and the date within the cross.

The Ruble of Paul I. (1799, &c.) bears the same impressions as the Half Imperial of the same period, except that the legend on the reverse is

Coin, Value 1 Ruble,

and that the 5's are omitted in the angles.

The Ruble of Alexander (1802) bears on the obverse the eagle and legend as above; on the reverse,

Coin of the Russian Empire, Ruble,

encircled with a branch of laurel and oak, having a small crown at the top.

The POLTINA, or HALF RUBLE, bears the same impressions as the Ruble, according to the period at which it was coined, except that the inscription contains the word

POLTINA

instead of RUBLE; and the Quarter Ruble is marked

POLUPOLTINICK.

The 20 COPECK PIECE—Head, name, and title of the reigning Sovereign, as above. Reverse, a two-headed eagle, with the number 20 on its breast. The 15 Copeck Piece bears the same impressions, but it is marked 15.

The 10 COPECK PIECE—The two-headed eagle. Reverse,

10 COPECKS.

The 5 COPECK PIECE—A Russian P, with a crown over it, and under which is an I. Reverse,

5 COPECKS,

within two laurel branches.

ST. GALL.

GOLD COIN.

The DUCAT—Arms of the Abbot, with his name and title, thus :

BEDA D. G. S. R. I. P.

Bede, by the grace of God, Prince of the holy Roman Empire.

Reverse, a bear carrying a short beam, encircled by a palm and laurel branch ; legend,

AB. BS. G. E. S. I. A. V. E.

Abbot of St. Gall,

with the initials of particular titles.

SILVER COIN.

The RIXDOLLAR bears the same impressions as the Ducat ; and also the Half Rixdollar and the Copstuck ; but the latter coin is marked 20 on the reverse. Round the edge of the Rixdollar and its divisions, coined since 1780, are the words

FORTITER ET CONSTANTER.

SALTZBURG.

GOLD COIN.

The DUCAT—Head of the reigning Prince, with name and titles, thus :

HIERONYMVS. D. G. A. & P. S. A. S. L. N. G. PRIM.

that is, Hieronymus, Dei gratia, Archiepiscopus et Princeps Salisburgensis, Germaniæ Primas,

Jerome, by the grace of God, Archbishop and Prince of Saltzburg, Primate of Germany.

Reverse, arms of the Prince. Old Ducats bear on the obverse a full length figure of a bishop, with the legend,

S. RVPERTVS EP. SALISBURG.

St. Rupert, Bishop of Saltzburg.

Reverse, the arms, name, and title, as above.

SILVER COIN.

The RIXDOLLAR—The impressions on this coin and its divisions are the same as on the Ducat ; and

the Copstuck, or 20 Creutzer Piece, differs only in being marked 20 on the reverse.

SARDINIA.

The Coins of Sardinia, both Gold and Silver, bear the same impressions as those of Piedmont ; *which see.*

SAXONY.

GOLD COINS.

The DUCAT—Head of the reigning Prince with name and titles, thus :

FRID. AUGVST. D. G. DVX SAX. ELECTOR,

Frederick Augustus, by the grace of God, Duke and Elector of Saxony.

Reverse, arms of Saxony. In 1808, the title was altered to

FRID. AUGUST. REX. SAXONIÆ,

Frederick Augustus, King of Saxony.

The legend on the obverse of the Ducats of Augustus III. is,

AUGUSTUS III. REX POLONIARUM,

Augustus III. King of Poland ;

and on the reverse,

SAC. ROM. IMP. ARCHIM. ET ELECT.

Grand Marshal and Elector of the Holy Roman Empire.

The AUGUSTUS bears the same impressions as the Ducat, except that it has on the reverse, under the arms,

5 THALER, or 5 TH.

SILVER COINS.

The RIXDOLLAR (*Convention*)—Head, name, and titles of the reigning Prince, as on the Ducat. Reverse, arms of Saxony, with

X EINE FEINE MARCK,

10 to a Mark fine.

The FLORIN, or PIECE OF $\frac{2}{3}$, bears the same impressions as the Rixdollar; but the legend on the reverse is

XX EINE FEINE MARCK, $\frac{2}{3}$;

the Half Florin is marked

XL EINE, $\frac{1}{3}$;

and the Quarter Florin,

LXXX. OF ACHZIG EINE, $\frac{1}{6}$.

The RIXDOLLAR of SAXE-GOTHA — Head, name, and title of the reigning Prince, thus:

ERNESTVS D. G. GOTHAN. SAXONVM DVX,

Ernest, by the grace of God, Duke of Saxe-Gotha.

Reverse, arms of Saxe-Gotha, with

X EINE FEINE MARCK,

as above.

SICILY.

GOLD COIN.

The OUNCE—Head of the reigning King, with name and title, thus:

CAROLVS D. G. SIC. ET HIE. REX.

Charles, by the grace of God, King of Sicily and Jerusalem:

some pieces have the addition

HIS. IN.

that is, Hispaniarum Infans,

Infant of Spain;

others the word

VNCIA,

Ounce.

Reverse, a phoenix; legend,

RESVRGIT,

He rises again.

SILVER COINS.

The SCUDO or CROWN—Head of the reigning King, with name and title, as on the Ounce. Re-

verse, an eagle, bearing an escutcheon on its breast; legend,

HISPANIARUM INFANS,

as before. In pieces of ancient date this last title is omitted, and on the reverse are the titles as above. Pieces of the year 1785 have the legend,

ANNO FAVSTO CORONATIONIS,

In the happy year of the Coronation.

The HALF SCUDO—Head of the reigning King. Reverse, a cross; the legends as on the Scudo.

SIERRA LEONE COMPANY.

SILVER COINS.

The DOLLAR, or PIECE of TEN MACUTAS—On the obverse, two joined hands, with the figures 100 both above and under them; legend,

ONE DOLLAR PIECE.

Reverse, a lion; legend,

SIERRA LEONE COMPANY, AFRICA.

The Half Dollar is marked 50; the $\frac{1}{5}$ Dollar, 20; and the $\frac{1}{10}$ Dollar, 10; with the legends,

HALF DOLLAR PIECE;

TWENTY CENT PIECE;

and

TEN CENT PIECE;

the rest as on the Dollar.

SPAIN.

GOLD COINS.

The DOUBLOON, or PISTOLE—Head of the reigning King, with name and title, thus;

CAROL. III. D. G. HISP. ET IND. REX;

that is, Carolus III. Dei gratia, Hispaniarum et Indiarum Rex,

Charles III. by the grace of God, King of Spain and the Indies.

Reverse, arms of Spain within the collar of the golden fleece; legend, in 1740,

INITIUM SAPIENTIE TIMOR DOMINI,

The fear of the Lord is the beginning of wisdom;

in 1762,

NOMINA MAGNA SEQUOR,

I follow great names;

in 1763,

IN UTROQUE FELIX AUSPICE DEO,

Happy in both, under the divine auspices;

there is, also, at the bottom, a letter to mark the place where the piece was coined, thus; M. with a crown over it signifies Madrid, and M. with an O Mexico.

The Double, Quadruple, and Half Pistoles bear the same impressions; but, in modern coins, the Half Pistole is marked

1 s.

1 *Scudo*, or *gold Crown*;

the single Pistole,

2 s.

and the others in proportion. The pieces coined between 1700 and 1723 bear no head, but have the arms and the King's name, with

DEI GRA.

On the reverse, a cross surrounded with different ornaments; legend,

HISPANIARUM REX.

Those coined before that period are not round, but of an irregular shape, and their impressions are very imperfect; the same may be remarked of the old Dollars coined in America.

The DOUBLOON of 1809, and its divisions—Head of Joseph Bonaparte, with the legend,

JOSEPH NAP. D. GR. HISP. ET IND. R.

Reverse, arms of Spain, with a crown; legend,

IN UTROQUE FELIX DEO AUSPICE,

as before.

The CORONILLA, GOLDEN DOLLAR, or VINTEM, bears the same impressions as the Doubloon, except the legends. Those, however, of an ancient date, have on the obverse the King's head and name, with D. G. and on the reverse, the arms of Spain, with

HISPANIARUM REX;

whilst those coined in 1786, &c. have the head and titles on the same side, and the arms of Spain on the reverse.

SILVER COINS.

The DOLLAR (coined before 1772)—On the obverse the arms of Spain, with the initials of the mint, &c. as on the Doubloon, and, also,

8 R.

8 *Reals*;

legend, the name and title of the reigning King. Reverse, a crown resting on two globes, between two pillars; legend,

UTRAQUE VNVM,

Both one,

and the initials of the mint; on the pillars,

NEC PLUS ULTRA,

Nothing beyond.

The divisions of the Dollar bear the same impressions; but the Half Dollar is marked

4 R.

4 *Reals*;

the Quarter Dollar, or Peceta Mexican,

2 R.

and the Real of Mexican Plate,

1 R.

Dollars and other pieces coined before 1740 bear on the obverse the arms, with the King's name, and D. G. Reverse, a sort of irregular escutcheon, divided into four parts by a cross; legend,

HISPANIARUM REX.

The DOLLAR (coined since 1772)—Head of the reigning King, with his name and DEI GRATIA. Reverse, arms of Spain, which, on pieces coined at Mexico, stand between two pillars, on which are the words,

NEC PLUS ULTRA,

as before; legend round the piece,

HISPAN. ET IND. REX,

with an M. for Mexico;

8 R.

8 Reals;

and the initials of the Moneyer's name. These are commonly called Pillar Dollars. Those coined in Europe have no pillars, and the legend is only

HISPANIARUM REX.

SWEDEN.

GOLD COIN.

The DUCAT—Head of the reigning King, with name and title, thus:

GUSTAVUS III. D. G. REX SVECIE,

Gustavus III. by the grace of God, King of Sweden;

but on Ducats coined since 1800, the name and titles are in the Swedish language, thus:

GUSTAF IV. ADOLPH. SV. G. OCH W. KONUNG,

Gustavus Adolphus IV. King of Sweden, Gothland, and Westmanland.

Reverse, arms of Sweden; legend, in 1746,

IN DEO SPES MEA,

My hope is in God;

in 1767,

SALUS PUBLICA SALUS MEA,

The public safety is my safety;

in 1774,

FADERNES LANDET,

The land of our fathers;

in 1800,

GUD OCH FOLKET,

God and the people.

SILVER COINS.

The RIXDOLLAR (1752)—Head of the reigning King, with name and title in Latin, as on the old Ducat. Reverse, arms of Sweden; legend,

SALUS PUBLICA SALUS MEA,

as before; and round the edge,

MANIBUS NE LÆDAR AVARIS,

That I may not be hurt by rapacious hands.

The RIXDOLLAR (1779)—Head, name, and title, as before. Reverse, arms of Sweden, with 1 RD. legend,

FADERNES LANDET,

as before. The divisions of the Rixdollar bear the same impressions, but have their value marked. The Rixdollar and other pieces coined since 1795 have the legends on both sides in the Swedish language, as on the new Ducat. Round the edge is

MANIBUS, &c.

as on the old Rixdollar.

SWITZERLAND.

GOLD COINS.

The DUCAT of LUËRNE—Arms of the canton. Reverse,

DUCATUS REIPUBLICÆ LUCERNENSIS,

Ducat of the Republic of Lucerne.

The pieces of 2 and 5 Ducats bear the same impressions.

The DUCAT of SCHWITZ—Arms of the canton, supported by a lion. Reverse,

DUCATUS REIPUBLICÆ SUITENSIS,

Ducat of the Republic of Schwitz.

The DUCAT of URI—A horseman giving his cloak to a beggar; legend,

SANCTVS MARTINVS,

St. Martin.

Reverse, arms of the Canton; legend,

DVCATVS REIPVBLICÆ VRANIÆ,
Ducat of the Republic of Uri.

The PISTOLE of LUCERNE—Arms of the canton, with the legend,

RESPVBLICA LVCERNENSIS.

Reverse, a wreath of laurel, containing

12 MZ. GL.

The PISTOLE of SOLEURE—A warrior bearing a standard; legend,

S. URSUS MARTYR.

Reverse, arms of the city; legend,

RESPVBLICA SOLODORENSIS,
Republic of Soleure.

The Double and Half Pistoles bear the same impressions.

The PISTOLE of the HELVETIC REPUBLIC (1800)—A soldier bearing a standard; legend,

HELVETISCHE REPUBLIK,
Helvetic Republic.

Reverse, a crown of oak, containing

16 FRANKEN.

SILVER COINS.

The ECU of LUCERNE (1715)—A figure of a bishop resting on the arms of the canton; legend,

SANCTVS LEODEGARIVS.

Reverse,

MONETA REIPVB. LVCERNENSIS,
Coin of the Republic of Lucerne;

the whole encircled by a wreath and other ornaments. The Half and Quarter Ecu bear the same impressions, and are marked $\frac{1}{2}$ and $\frac{1}{4}$ on the obverse.

The ECU of LUCERNE (1796)—The arms of the Canton; legend,

VOL. II.

RESPVBLICA LVCERNENSIS,

and

40 BAZ.

Reverse, a cross formed by eight L's, and a small wreath in the centre; legend,

DOMINUS SPES POPULI SUI,
The Lord is the hope of his people.

The Half Ecu is marked

20 BAZ.

The GULDEN, or FLORIN of LUCERNE—Arms of the canton; legend,

MONETA NOVA REIP. LVCERNENSIS.

Reverse,

AVXILIO DEI PROSPERE,
Prosperously by the help of God.

The Florin (1793, &c.) and its divisions bear the arms of the canton, with the legend

MON. NOV. &c.

Reverse as on the new Ecu, except that, in the centre of the cross, the Florin is marked

40,

40 Schillings;

the Half and Quarter Florins in proportion.

The RIXDOLLAR of FRIBURG—Arms of the canton; legend,

RESPVBLICA FRIBURGENS.

Reverse, a cross formed by eight F's, and four crowns; legend,

AUXILIUM NOSTR. DEUS,
God is our help.

The Quarter Rixdollar has, on a square in the centre of the cross, the number 36, and the inferior divisions are marked 28, 14, and 7.

The Piece of 20 BATZEN of SOLEURE—A cross with an S over it, and sometimes also a large O; legend,

E E

CUNCTA PER DEUM,
All things through God.

Reverse, arms of the canton; legend,

MONETA REIP. SOLODORENSIS, or RESPUBLICA SOLO-
DORENSIS, 20 BAZ.

The ECU of the HELVETIC REPUBLIC (1798)
—A soldier bearing a standard; legend,

HELVET. REPUB. or HELVETISCHE REPUBLIK.

Reverse, a wreath of oak, containing the words

40 BATZEN.

But the Ecus of 1799 and 1801 are marked

4 FRANKEN

on the reverse. The pieces of 20, 10, and 5 Batzen have their value expressed on the reverse, and bear in other respects the same impressions as the Ecu.

For the Gold and Silver Coins of BASIL, BERN, GENEVA, NEUFCHATEL, ST. GALL, and ZURICH, see those articles respectively.

TREVES.

GOLD COIN.

The DUCAT—Head of the reigning Prince, with name and titles; thus,

CLEM. WENC. D. G. A. EP. TREV. S. R. I. A. C. ET EL.

that is, Clemens Wenceslaus, Dei Gratia, Archi Episcopus Trevirensis, Sancti Romani Imperii Archi Cancellarius et Elector,

Clement Wenceslaus, by the grace of God, Archbishop of Treves, Arch-Chancellor and Elector of the Holy Roman Empire.

Reverse, arms of the Prince; legend, on Ducats of 1773,

EPISC. AUG. APP. COAD. ELEC.

Bishop of Augsburg, &c.

SILVER COIN.

The RIXDOLLAR bears the same impressions and legends as the Ducat, besides which there are, on the reverse, the words,

X EINE MARC F. or 10 EINE FEINE MARK,

Ten to a Mark fine.

TURKEY.

GOLD COINS.

As the representation of men and animals is forbidden by the Mahometan law, the Turkish coins have no other impressions than inscriptions stating the names, titles, descent, &c. of the Sultans, with the date of the Hegira, or Mahometan æra.* They are in the Arabic language, and the following translations from the principal coins of Sultan Selim (1789) may serve as a specimen, as there is but little variety in the form or style of these compositions.

The SEQUIN MAHBUB—On the obverse,

Sultan Selim, son of Mustapha Khan, may he be victorious, and his valour be blest, struck at Slambul (Constantinople), in the year 1203;

and on the reverse,

Sultan of the two lands, and Sovereign of the two seas, Sultan by inheritance, son of a Sultan.

The words, *May he be victorious, and his valour be*

* The Hegira began July 16 in the year 622 of the Christian æra; it is reckoned in lunar years, which are nearly 11 days shorter than the solar, making a difference of about one year in 33. The year 1225, therefore, of the Hegira commenced February 5, 1810, of the Christian æra, and on the

27 September 1821 the year 1237 commences

17 1822 1238

6 1823 1239

For a full and accurate calculation of these epochs, with tables, see the article *Hegira* in *Rees's Cyclopædia*.

blest, are occasionally used by the Turks at the end of their prayers. By the *two lands* are meant Europe and Asia, and by the *two seas*, the Black Sea and the Archipelago.

The SEQUIN FONDUCLI—On the obverse,
Sultan Selim, son of Mustapha Khan,
 and on the reverse,
Struck at Slambul, in the year 1203.

The impressions on Sequins of different periods mostly answer to either of the foregoing descriptions; but the Sequins coined at Cairo, under Sultan Abdulhamid, in 1773, have their inscriptions as follow:

*Sultan Abdulhamid, son of Ahmed Khan, may his valour
 be blest, struck in Egypt, in the year 1187;*
 and on the reverse, the titles as on the Sequin Mahhub of the Sultan Selim.

The SEQUINS of the BARBARY STATES are coined in the name of the Grand Seigneur, and are distinguished by the words

Struck at Tunis, Tripoli, &c.

They bear on the reverse the titles as on the Sequin Mahhub of Selim.

SILVER COINS.

The PIASTRE and other silver coins bear the same inscriptions as the gold coins, and the same differences exist in them. The inscriptions on the Single, Double, and Half Piastras of Selim of 1789 are similar to those on the Sequin Fonducli of this Prince.

The PIASTRE OF TUNIS bears on the obverse the words

*Sultan of the two lands, and Sovereign of the two seas,
 Sultan Selim Khan, blest with victory;*

and on the reverse,

Struck at Tunis, in the year, &c.

TUSCANY.

GOLD COINS.

The RUSPONE—A lily, with the name and title of the reigning Prince, thus:

FERDINANDVS III. D. G. A. A. M. D. ETR.

*that is, Dei Gratia, Archidux Austriae, Magnus
 Dux Etruriae,*

*Ferdinand III. by the grace of God, Archduke of
 Austria, Grand Duke of Tuscany.*

Reverse, a figure of St. John the Baptist; legend,

S. JOANNES BAPTISTA.

Some pieces, coined about the year 1738, bear the head of the reigning Prince; legend,

FRANC. III. D. G. LOTH. BAR. ET M. ETR. D. REX HIER.

*Francis III. by the grace of God, Duke of Lorraine and
 Bar, Grand Duke of Tuscany, King of Jerusalem.*

Reverse, arms of the Prince; legend,

IN TE DOMINE SPERAVI,

In thee, O Lord, have I hoped.

The NEW RUSPONE of the Kingdom of Etruria bears the same impressions as above; legend on those coined in 1803,

LUDOVICUS I. D. G. HISP. INF. REX ETRVRIÆ,

*Louis I. by the grace of God, Infant of Spain, King of
 Etruria;*

and on those struck in 1804,

CAROLVS I. D. G. REX ET M. ALOYSIA R. RECTRIX,

*Charles I. by the grace of God, King of Etruria, and
 Maria Louisa, Queen Regent.*

The SEQUIN of TUSCANY bears the same impressions as the Ruspone.

SILVER COINS.

The DUCATONE—Head of the reigning Prince, with name and title, thus:

COSMOS III. D. G. MA. DVX ETRVRI VI.

*Cosmos III. by the grace of God, Grand Duke of Tus-
 cany, the 6th year of his reign.*

Reverse, St. John baptizing our Saviour; legend,

FILIVS MEVS DILECTVS,

This is my beloved Son.

The LIVORNINA—Head of the reigning Prince, with name and title, thus:

JOAN. GASTO I. D. G. MAG. DVX ETRVRIÆ VII.

John Gaston, &c.

as above. Reverse, the city gate, over which is a crown, and under it,

FIDES,

Faith;

legend,

ET PATET ET FAVET,

It opens and favours.

In pieces of ancient date there is a view of the port of Leghorn with the same legend.

The PEZZA DELLA ROSA—Arms of Tuscany, with the reigning Prince's name and title, as on the Livornina. Reverse, a rose-tree; legend,

VLTIQ VQESITA GRATIA OBVIA,

Revenge must be sought after, but forgiveness meets.

On the exergue is

LIBVRNE.

The FRANCESCONE—Impressions as on the Ruspone of 1738, to which, in pieces coined since 1740, are added the initials

R. I. S. A.

that is, Romanus Imperator, semper augustus,

Emperor of Rome, ever august.

Reverse, arms of Tuscany on the breast of a two-headed eagle; legend,

IN TE DOMINE SPERAVI,

as on the Ruspone. Pieces struck at Pisa are marked

PISIS.

The LEOPOLDONE—Head, name, title, &c. as

on the Ruspone of 1738, with the addition of the initials

P. R. H. ET B.

Prince Royal of Hungary and Bohemia.

Reverse, arms of Tuscany, with the cross of Malta and order of the golden fleece; legend,

DIRIGE DOMINE GRESSVS MEOS,

O Lord, direct my steps.

The SCUDO of the KINGDOM of ETRURIA (1801)—Head of the reigning King, with name and title, thus:

LVDOVICVS I. D. G. HISP. INF. REX ETRVRIÆ PAR.

PLAC. ET. PRIN.

Louis I. by the grace of God, Infant of Spain, King of Etruria, Prince of Parma and Placentia.

Reverse, arms of Tuscany, &c. legend,

VIDEANT PAUPERES ET LÆTENTUR,

Let the poor see and rejoice.

The Scudo of 1803 bears the heads of the Infant King and Queen Mother, with their names and titles, thus:

CAROLVS LVD. D. G. REX ETR. ET M. ALOYSIA R.

RECTRIX I. I. H. H.

Charles Louis, by the grace of God, King of Etruria, and Maria Louisa, Queen Regent, Infant of Spain.

Reverse, arms of Tuscany, &c. legend,

DOMINE SPES MEA A JUVENTUTE MEA,

O Lord, my hope from my youth,

with

FLORENTIÆ;

round the edge are the words

DIECI LIRE,

10 Lire.

The LIRA of 1803—Arms of Tuscany, &c. legend, the King and Queen's names and titles, as on the Scudo. Reverse,

UNA LIRA,

1 Lira, or Livre,

encircled by a wreath.

UNITED STATES OF AMERICA.

GOLD COIN:

The EAGLE—Head of a woman with the cap of Liberty; legend,

LIBERTY,

with 13 stars. Reverse, an eagle, bearing the arms of the United States on its breast, and a bundle of arrows and an olive-branch in its talons; over its head, are 13 stars and a cloud, and across the neck a scroll, with this legend,

E PLURIBUS UNUM,
One from many;

legend,

UNITED STATES OF AMERICA.

On pieces coined since 1795, the reverse bears an eagle, with a palm-branch in its talons, and a wreath of laurel in its beak.

SILVER COIN.

The DOLLAR and its divisions bear the same impressions as the Eagle, except that the head is without a cap. Round the edge are the words

ONE DOLLAR OR UNIT HUNDRED CENTS;

but the inferior coins have no letters on the edge. On the reverse of pieces of 1795, &c. the Eagle is entirely surrounded with branches of palm and laurel.

VENICE.

GOLD COINS.

The SEQUIN—A man holding a cross and another kneeling before him, with the Doge's name, thus:

LVDO MANIN.

and the letters

S. M. V. M. N. M. T.

one above the other, near the edge of the piece;

that is, Sanctus Marcus Venetus;

St. Mark of Venice;

also, the letters

D. V. X.

Dux,

Duke, or Doge,

placed in the same manner above the kneeling figure. Reverse, a whole length figure of St. Mark, with a book, and surrounded with stars; legend,

SIT T. XPE. DAT. Q. TV. REGIS ISTE DVCA.

This inscription of the Venetian Sequin is the same as that of the Venetian Ducat of 1280, which is thus explained by *Muratori*, in his *Antiquitates Italicae Medii Aevi*, vol. ii. p. 649.

Sit tibi Christe datum, quod (vel quia) tu regis.
Iste ducatum.

To thee, O Christ, be it (this coin) given, because thou governest (universally). He (St. Mark) governs the Duchy.

This interpretation is doubted even by *Muratori* himself, who supposes that *iste* might have been originally *ipse*. The legend is however curious, as being both an hexameter verse and a monkish rhyme.

The HALF and QUARTER SEQUINS bear the same impression, but the legend on the reverse is

EGO SVM LVX MVN.

I am the light of the world.

The DOPPIA or PISTOLE—A winged lion, holding a book, with

S. 2;

and the legend,

SANCTVS MARCVS VENETVS,

as on the Sequin. Reverse, a cross, and the Doge's name, thus:

FRANC. CONTARENO DVX VENET,
Francis Contareno, Doge of Venice.

The SCUDO D'ORO, or GOLD CROWN bears the same impressions as the Doppia, except that it is marked 140, and the Half Scudo d'oro, 70.

The OSELLA D'ORO—A woman sitting ; legend,

PIETAS OPTIMI PRINCIPIS,
The piety of the best Prince,

but the impression varies. Reverse, a wreath, and within it the Doge's name, thus :

PAULI RAINERI PRINC. MUNUS ANNO V.
The gift of Paul Rainier, Prince, the year V. of his government.

The GOLD DUCAT—A man sitting and holding a standard, and another kneeling ; legend,

S. M. VEN. LEON. DONAT.
St. Mark of Venice gives a Lion.

Reverse, a winged lion with a book ; legend,

DVCATVS REIPUB.
Ducat of the Republic.

SILVER COINS.

The SCUDO DELLA CROCE bears the same impressions as the Scudo d'oro, and the Doppia.

The GIUSTINA—A winged lion, holding a book, and before it a figure with a standard ; legend, the name and title of the reigning Doge. Reverse, a woman holding a palm-branch, with a circle over her head, and a sword on her shoulder ; background, a view of the sea with ships ; legend,

MEMOR ERO TVI JUSTINA VIRG.
I shall remember thee, Virgin Justina,

and

124,
124 Soldi.

The DUCAT—A winged lion as before, with a book ; legend,

DVCATVS VENETVS,
Venetian Ducat.

Reverse, a figure sitting, and another kneeling and receiving a standard from him ; legend,

S. M. V.
St. Mark of Venice,

and the Doge's name, as

PAVL RAINERIVS D.

The Half and Quarter Ducat bear the same impressions ; but their legends are

MEDI. DVCAT. VENET.

and

QVAR. DVCAT. VENET.

The LIRAZZA, or Piece of 30 SOLDI—The same as the obverse of the Sequin. Reverse, a woman holding a sword and a pair of scales, with a lion by her side ; legend,

JUSTITIAM DILIGITE,
Love justice.

The TALLARO and its divisions—Head of a woman ; legend,

RESPUBLICA VENETA,
Republic of Venice.

Reverse, a winged lion and a book ; legend, the reigning Doge's name, thus :

PAULO RAINERIO DUCE.

The OSELLA—The impressions on this piece are frequently changed, and are, therefore, too numerous to be here described : the reverse is most commonly the Doge's name, with the date of his government, and also of the Christian era, thus :

LUDOVICI MANIN PRINCIPIS MUNUS. AN. VIII. 1796,
as on the Osella d'oro.

The Piece of 16 LIRE of 1797 — A woman, holding in one hand the cap of Liberty on a lance, and the other resting on the fasces ; legend,

LIBERTA, EGUALIANZA,
Liberty, equality ;

and at the bottom,

Z. V. or ZECCA V.

Reverse, the words

LIRE DIECI VENETE.
Ten Lire of Venice.

encircled by a wreath; legend,

ANNO I. DELLA LIBERTA ITALIANA,
The first year of Italian liberty.

The NEW COINS introduced by the Austrians, viz. Pieces of 2 Lire or 24 Creutzers of 1800 have, on the obverse, a two-headed eagle, crowned, bearing on its breast the arms of Austria; legend,

FRANZ. II. ROM. KAI. KON. ZU. HU. U. BO. ERZH
ZU OEST,

that is, Franz. II. Römische Kaiser, König zu Hungarn und Böhmen, Erzherzog zu Oesterreich, Francis II. Emperor of Rome, King of Hungary and Bohemia, Archduke of Austria.

Reverse, above a palm and laurel branch,

24 KREUTZER ERBLAENDISCH,
24 Creutzers of the Hereditary States.

The pieces of 1 Lira and $\frac{1}{2}$ Lira, or 12 and 6 Creutzers, bear the same impressions, except that the legend round the eagle is

KAI. KON. ERBLANDISCHE. SCHEID. MUNZ.
Small coins of the Emperor and King's hereditary States,

and that the value is marked on the reverse. The pieces called *Provincial money*, issued in 1801, bear on the obverse the two-headed eagle, with the letters

F. II.
Francis II.

in an oval, on its breast: legend,

MONETA PROVINCIALE IMP. VENETA,
Imperial provincial coin of Venice.

Reverse, the value of the piece, viz.

DUE LIRE VENETE, UNA LIRA VENETA, or MEZZA
LIRA VENETA,
2; 1, or $\frac{1}{2}$ Lira of Venice;

the whole encircled by palm and laurel branches. The coins of 1802 bear, on the obverse, the eagle and arms of Austria, and the name of the Emperor Francis II. and his titles in Latin, as on the Austrian coins, with the addition

D. VENET.

Duke of Venice.

Reverse, the value of the piece.

WIRTEMBERG.

GOLD COINS.

The CAROLIN—Head of the reigning Prince, with name and title, thus:

CAROL. ALEX. D. G. DUX WUR. & T.
Charles Alexander, by the grace of God, Duke of Wirtemberg, &c.

Reverse, arms of Wirtemberg; legend,

CUM DEO ET DIE,
With God and Time;

and in some,

PER ARDUA VIRTUS,
Valour through difficulty.

The DUCAT—Impressions as on the Carolin, except that the legend on the reverse is

PROVIDE ET CONSTANTER,
Providently and constantly.

SILVER COIN.

The RIXDOLLAR—The impressions are the same as on the Ducat; but the reverse bears, besides the legend, the words

10 EINE FEINE MARCK,
Ten to a Mark fine.

The COPSTUCK—Impressions as on the Ducat, except that the head and the arms are each enclosed in a square, and that under the head there is the number 20.

WURTZBURG.

GOLD COIN.

The DUCAT—Head of the reigning Prince, with

name and titles, thus :

FRANC. LUD. D. G. EP. BAM. ET WIR. S. R. I. P. F.

O. DUX ;

that is, Franciscus Ludovicus, Dei Gratia, Episcopus Bambergii et Wirtsburgii, Sancti Romani Imperii Princeps, Francorum Orientalium Dux,

Francis Louis, by the grace of God, Bishop of Bamberg and Wurtzburg, Prince of the Holy Roman Empire, Duke of East Franconia.

Reverse, arms of the Bishop ; legend,

DUCATUS DUCIS FRANCORUM,
Ducat of the Duke of Franconia.

SILVER COINS.

The RIXDOLLAR (coined before 1795) bears the same impressions as the Ducat, except the legend on the reverse,

10 EINE FEINE MARCK,
Ten to a Mark fine ;

but the Rixdollar of 1795, &c. bears on the obverse the head of the Bishop, with name and titles as on the Ducat : and on the reverse only the inscription

10 EINE FEINE MARCK,
encircled by 2 branches of laurel, and above it the legend,

PRO PATRIA,
For the country.

The COPSTUCK—The same as the Rixdollar, according to the period at which it was coined, except that the words on the obverse are

LX. EINE FEINE MARCK,
and that it is marked 20.

ZURICH.

GOLD COIN.

The DUCAT—A lion with a sword, supporting the arms of the city ; legend,

DUCATUS REIPUBLICÆ TIGURINÆ,
Ducat of the Republic of Zurich.

Reverse,

DOMINE CONSERVA NOS IN PACE,
O Lord, preserve us in peace.

On the Ducat of 1775 the legend on the obverse is

DUCATUS REIPUBLICA TURICENSIS.

Reverse,

JUSTITIA ET CONCORDIA,
Justice and Concord.

On Double Ducats, the arms are supported by two lions, and on some Half Ducats, the words on the reverse are only

ANNO DOMINI.

SILVER COINS.

The ECU or RIXDOLLAR of 1753—A view of the city ; legend,

DOMINE CONSERVA NOS IN PACE,

as on the Ducat. Reverse, a lion supporting the arms of the Canton ; legend,

MONETA REIPUBLICÆ TIGVRINÆ.

The Half Ecu has no legend over the city, but only the word

TIGURUM.

Zurich ;

and it is marked $\frac{1}{2}$ on the reverse.

The ECU of 1761—On the obverse, the legend

DOMINE, &c.

and the date, surrounded by various ornaments. Reverse, a lion, &c. as above.

The ECU of 1773—The inscription

JUSTITIA ET CONCORDIA,

and the date ; the whole surrounded by various ornaments. Reverse, as before.

I want that Paper
you put in your hat
yesterday evening -

The ECU of 1790—A view of the city, with the legend—

DOMINE, &c.

Reverse, arms of the Canton; legend,

MONETA, &c.

as before.

The ECU of 1794—Arms of the Canton; with the legend—

MONETA, &c.

Reverse, the inscription

XI. AVF. I. FEINE MARK,
11 to a Mark fine,

encircled by a wreath. On the Half Ecu, or Florin, the words are

XXII. AVF. I. FEINE MARK;

and on the Half Florin

XX. SCHILLING.

EAST INDIES.

GOLD COINS.

The East India Coins, like those of Turkey, have in general no other impressions than inscriptions, setting forth the names and titles of the Sovereigns, with dates and other particulars, which are all in the Persian language.

The following are translations from the principal Indian coins both of gold and silver.

The MOHUR, or GOLD RUPEE (coined under the reign of the Emperor Shah Allum, which began in 1770) has on one side,

He who is the shadow of God's favour, the protector of the religion of Mahomet, the Emperor Shah Allum, coins money for the seven climates,

with the date of the Hegira. On the other side, *Struck at — the year — from the happy accession.*

Some Mohurs have only, on one side,

Coin of the Emperor Shah Allum,

VOL. II.

with the date of the Hegira; and on the other the year of the reign. The coins struck by the East India Company bear the name of the Mogul Emperor, and those minted of late years (as mentioned in the article *East Indies*, vol. i.) are dated the 19th year of the Emperor's reign, and the number 19 is visible on some part of the piece.

The MOHUR OF TIPPPOO—On one side,

The faith of Mahomet, the most excellent in this world, is supported by the splendour of the victories of Hyder.

Hyder! exalted in equity; struck at Seringapatam, the year pre-eminent in prosperity;

with the date of the Hegira. On the other side,

He alone is the equitable Sultan; the epoch of the accession was a year of happy omen,

with the date of the reign. Some of Tippoo's coins are dated according to an Indian era which is divided into cycles of 60 years each, of which cycles 81 are supposed to be now elapsed.

The FARUKI, or QUARTER MOHUR of Tippoo has on one side,

Mahomet! He is the only and right Sultan,

with the date; and on the other side,

Faruki, struck at Pattan, (Seringapatam,)

with the date of Tippoo's reign, and a Persian H. the initial of Hyder.

The PAGODA—These Pieces differ in shape from all European coins: they have a convex side, with prominent dots; and a flat side, which generally bears a figure, and in some three figures, of Indian idols.

The Star Pagoda is marked on the convex side with a star; other Pagodas are marked with a crescent, or with an initial letter; the Pagodas of Masulipatam and Pondicherry have nothing on the convex side but the dots. Tippoo's Pagodas have no figures on the flat side, but a legend, which is translated thus: . . .

Mahomed! He is the power of equity.

F F

with the date of the Hegira; on the convex side, the name of the place where it was coined, and generally the initial of Hyder.

The MOHUR of the DUTCH EAST INDIA COMPANY—On one side,

Coin of the Company of Holland;

above which is a cock, and under the legend the date of the Christian era; on the other side, the words,

In the great Island of Java.

The JAPAN COPANG is a flat oblong piece, one side of which is marked with transverse lines, and some characters; on the other side, there is in the centre a small circle in which is a mark of the inspector-general of the mint, and in other parts various marks, made by persons who have assayed the piece.

The ZODIACAL RUPEES are pieces of twelve different impressions, representing the twelve signs of the Zodiac. They were coined between the years 1616 and 1624 of the Christian era, by *Jehangeer*, and have been long out of circulation. They are, however, much sought after, and highly valued as objects of curiosity. Each sign, or figure, is surrounded by rays representing the sun; and on the reverse is the following inscription:

*This ornamented Coin in Agra, found its face, (received its impression) in the year — from the Sovereign
Jehangeer, son of King Akber.*

The Zodiacal Rupees are exceptions to the Mahometan law which forbids the representation or embossment of figures, but it is said that *Jehangeer* had little respect for his religion; and it is further stated by some writers that his favourite queen *Nour-Mahal* had obtained permission to reign for one day, (others say for one year,) and that she caused these coins to be struck to perpetuate the memory of her short reign. This account, however, cannot be quite correct, as the dates of these Rupees are different.

SILVER COINS.

The SICCA RUPEE—The legends on this coin are nearly the same as on the Mohur, and may be thus translated:—

*Struck in the seven climates, (date of the Hegira,) by
the shadow of God's favour, Shah Allum, King,
disciple in the faith of Mahomet;*

and on the other side,

*Struck at — in the 19th year of the august and
glorious reign of the Emperor, &c.*

Some Rupees do not bear the date of the Hegira, but only that of the Emperor's reign; and all the Rupees struck in Bengal of late years, at the Company's mint, have been dated the 19th year of his reign, as above noticed.

The ARCOT RUPEE—On one side,

Blessed coin of the conquering King (the name);

on the other side,

Struck at Arcot in the year — of the reign,
and the date of the Hegira. But it may be observed that in these and many other Rupees, (except such as are coined by the East India Company,) the legends are often illegible, owing to the edge being clipped or worn, or to the piece having been originally too small to receive the impression.

The RUPEE of the DUTCH EAST INDIA COMPANY—On the obverse,

Coin of the Company of Holland,

and the date of the Christian era. Reverse,

In the great Island of Java.

The GULDEN of the DUTCH EAST INDIA COMPANY—The impressions correspond with those of the Gulden of the Netherlands (of 1818), except that the Piece of Java has the letters

N. O.

next to the Statute on one side; and on the other,

MO. ARG. REG. TOT. BELG. JAV.

that is, Moneta argentea Regni totius Belgicæ Javæ,

'Silver Coin of the whole Kingdom of Belgium and Java.

The SULTANEE RUPEE of TIPPPOO bears the same impressions and legends nearly as Tippoo's Mohur.

The RUPEE of PERSIA, or Piece of 10 MAMOODIS—The legends on these coins vary. Some bear the Sovereign's name, as

Sultan Shahrokh;

and on the other side,

May God prolong his reign, coined at —,

the name of the place and date of the Hegira. On other Rupees, the King of Persia styles himself

The servant of the Monarch of the Empire,

that is of the *Iman Riza*, the head of their religion,

whom the Persians consider as the real Sovereign of their Empire, and the coins are often struck in the name of the *Iman Riza*, with this legend,

By the divine decree, the coin of happy omen has been struck in the name of Ally Riza, son of Musa;

and on the other side,

There is no God but God, Mahomet is the Apostle of God, Ally is the favourite of God, struck at —;

with the date of the Hegira.

The SILVER FANAM of PONDICHERRY bears on one side several fleurs de lys, and an inscription on the other.

The LARIN—This is a Silver wire, about an inch in length, doubled up, and flattened on the inner side to receive the impressions of some characters. It was first made in Arabia; and has become scarce, but is still used as a money of account.

The foregoing translations of the Persian and Indian inscriptions and legends are chiefly taken from M. BONNEVILLE'S Treatise on Coins, who states his authorities to be *Messrs. De Sacy*, and *Langles*; and *Mr. Alexander Hamilton* of Calcutta. The translations from the Turkish Coins have been supplied for this Work by *Mr. Duc*, formerly Secretary to the Turkish Ambassador in London; and the several translations from the Russian, Norwegian, and Swedish Coins have been likewise supplied by good authorities.

TABLES,

CONTAINING A

COMPARISON OF THE WEIGHTS AND MEASURES

OF ALL TRADING COUNTRIES,

Chiefly from actual Experiments made at the London Mint on Foreign Standards, transmitted to England in 1818 by the British Consuls abroad, and previously verified by the proper Authorities in each Country.

THE following Tables are, for the most part, a recapitulation of what has been given in the first Volume of this work ; but the places here are more numerous ; and these Tables also afford a more convenient and ready reference to any subject for which they may be consulted.

Table I.—Contains the Troy Weight of different nations, that is, the Weight chiefly used for the precious Metals. It shews the Weight of each Mark, &c. in English Troy Grains and in French Grammes ; also the proportion which each Mark, &c. bears to 100 lb. English Troy.

Table II.—Contains the Commercial Weights of different countries compared with English Avoirdupois ; also the Weight of each foreign Pound, Ounce, &c. in English Troy Grains and in French Grammes.

Table III.—Contains the Corn Measures of different countries. It shews the contents of each measure in English Cubic Inches, in English Bushels, and in French Litres ; also the number of measures of each place that correspond to 1 English Quarter.

Table IV.—Contains the Liquid Measures of different nations. It shews the contents of a single measure of each sort in English Cubic Inches, in English Wine Gallons, and in French Litres ; also how many Gallons, &c. of each place are equal to 100 English Gallons.

Table V.—Is a comparison of the Cloth Measures of different nations. It shews the length of each measure in English Inches and in French Decimetres ; also the number of Ells, Aunes, &c. of each place that correspond with 100 English Yards.

Table VI.—Contains the Long Measures of different Countries. It shews the length of each measure in English Inches and in French Decimetres ; also the number of Feet, &c. of each place that correspond with 100 English Feet.

Table VII.—Shews the contents of the Square Foot of different countries in English Square Inches and in French Square Decimetres.

Table VIII.—Shews the contents of the Cubic Foot of different countries in English Cubic Inches and in French Decilitres.

Table IX.—Contains the Land Measures of different nations. It gives the area of each measure in English Square Yards and in French Ares ; also the number of Acres, &c. of each place that equal 10 English Acres Statute Measure.

Table X.—Gives the length of the itinerary measures of different countries in English Yards and in French Metres ; also the proportion of the foreign League, &c. to 100 English Miles.

Table XI.—Contains the new Weights and Measures of France, with their proportion to those of England.

Table XII.—Contains an account of Ancient Weights and Measures, with their proportion to the Weights and Measures of England.

RULES and Examples are also given for finding the proportion between the Weights or Measures of any two or more places contained in the Tables.

TROY WEIGHT.

TABLE I.

Containing a Comparison of the Troy, or Gold and Silver Weights of different Countries; and shewing the Weight of a single Pound, Mark, Ounce, &c. in English Troy Grains and in French Grammes; also, the number of Pounds, Marks, Ounces, &c. of each place, that are equal to 100lbs. English Troy.

		Weight of a single lb. Mark, &c.		Number equal to 100 lbs. English Troy.

COMPARISON OF FRENCH AND ENGLISH METROLOGY.

TABLE XI.

Containing the New Weights and Measures of France, with their Proportion to those of England, both according to the Decimal System, and the Systeme Usuel.

DECIMAL SYSTEM.

LONG MEASURES.

French.	English.
Millimetre	0,03937 Inches.
Centimetre	0,39371 Inches.
Decimetre	3,93710 Inches.
<i>Metre</i>	39,37100 Inches.
Decametre	32,80916 Feet.
Hectometre	328,09167 Feet.
Kilometre	1093,6389 Yards.
Myriametre	10936,38900 Yards, or 6 Miles 1 Furlong 28 Poles.

SUPERFICIAL MEASURES.

Centiare	1,1960 Square Yard
<i>Are</i> (a Square Decametre)	119,6046 Square Yards
Decare	1196,0460 Square Yards
Hectare	11960,4604 Square Yards or 2 Acres, 1 Rood, 35 Perches.

MEASURES OF CAPACITY.

Millitre	0,06103 Cubic Inches.
Centilitre	0,61028 Cubic Inches.
Decilitre	6,10280 Cubic Inches.
<i>Litre</i> (a Cubic Decimetre)	61,02802 Cubic Inches, or 2,1135 Wine Pints.
Decalitre	610,28028 Cubic Inches, or 2,642 Wine Gallons.

French.	English.
Hectolitre	3,5317 Cubic Feet, or 2,838 Winchester Bushels.
Kilolitre	35,3171 Cubic Feet, or 1 Tun & 12 Wine Gal.
Myrialitre	353,17146 Cubic Feet.

SOLID MEASURES.

Decistere	3,5317 Cubic Feet.
<i>Stere</i> (a Cubic Metre) ..	35,3171 Cubic Feet.
Decastere	353,1714 Cubic Feet.

WEIGHTS.

Milligramme	0,0153 Grains.
Centigramme	0,1543 Grains.
Decigramme	1,5434 Grains.
<i>Gramme</i>	15,4340 Grains.
Decagramme	154,3402 Grains, or 5,64 Drams Avoirdupois.
Hectogramme	3,2154 oz. Troy, or 3,527 oz. Avoirdupois.
Kilogramme	21b. 3 oz. 3 dwt. 2 gr. Troy, or 21b. 3 oz. 4,428 Drams Avoirdupois.
Myriagramme	26,795 Pounds Troy, or 22,0485 Pounds Avoir- dupois.
Quintal	1 cwt. 3 qrs. 25 lb. nearly.
Millier, or Bar	9 tons 16 cwt. 3 qrs. 12 lb.

SYSTEME USUEL.

LONG MEASURES.

Usuel.		Metrical.		English.
Ligne	=	2,31 Millimetres	=	0,091 Inches.
Pouce	=	2,77 Centimetres	=	1,090 Inches.
Pied	=	3,33 Decimetres	=	13,110 Inches.
Aune	=	12 Decimetres	=	3 Feet 11,24 Inches.
Toise	=	2 Metres	=	6 Feet 6,74 Inches.

MEASURE OF CAPACITY.

Boisseau	=	12,5 Litres	=	2,837 Gallons.
----------------	---	-------------------	---	----------------

WEIGHTS.

Grain	=	5,425 Centigrammes	=	0,837 Grains.
Gros	=	3,906 Grammes	=	60,285 Grains.
Once	=	31,25 Grammes	=	482,312 Grains, or 1 oz. 1,628 Dram Avoirdupois.
Livre	=	500 Grammes	=	1 lb. 4 oz. 1 dwt. 13 gr. Troy, or 1 lb. 1 oz. 10½ dr. Avoirdupois.

For the Proportions between the subordinate Weights and Measures of England and the Metrology of France, see Vol. i. p. 225.

For the New Astronomical and Geographical Measures of France, see Vol. i. p. 138.

For the Ancient Weights and Measures of France, see Vol. i. p. 133.

EXAMPLES OF THE USE OF THE FOREGOING TABLES.

THE proportion between the Weights and Measures of any two Places in the foregoing Tables may be found by the Rule of Three, or in the following manner by the Chain Rule:

EXAMPLE I.—How many Marks, gold and silver weight of Berlin, are equal to 1120 Marks of Amsterdam or Holland? *See Table I.*

1120 Marks of Amsterdam.
 1 Mark of Amsterdam = 3798 English Grains.
 3608 English Grains = 1 Mark of Berlin.
 Result, 1178,9 Marks of Berlin.

Or, as 3608 : 1 :: 3798 × 1120 : 1178,9

EXAMPLE II.—How many Pounds, commercial weight of Amsterdam, are equal to 276 Pounds of Leghorn? *See Table II.*

276 Pounds of Leghorn.
 1 Pound of Leghorn = 5240 English Grains.
 7625 English Grains = 1 Pound of Amsterdam.
 Result, 189,67 Pounds of Amsterdam.

EXAMPLE III.—How many Spanish Fanegas are equal to 523 Scheffels of Dantzic? *See Table III.*

523 Scheffels of Dantzic.
 1 Scheffel of Dantzic = 3337 English Cubic Inches.
 3439 English Cubic Inches = 1 Fanega of Spain.
 Result, 507,48 Fanegas of Spain.

EXAMPLE IV.—How many Barriques of Bourdeaux are equal to 50 Eimers of Leipsic? *See Table IV.*

50 Eimers of Leipsic.
 1 Eimer of Leipsic = 4644 English Cubic Inches.
 14033 English Cubic Inches = 1 Barrique of Bourdeaux.
 Result, 16,546 Barriques of Bourdeaux.

EXAMPLE V.—How many Varas of Spain are equal to $359\frac{1}{2}$ Ells of Hamburg? See Table V.

$$\begin{array}{rcl}
 & 359\frac{1}{2} \text{ Ells of Hamburg.} & \\
 1 \text{ Ell of Hamburg} & = & 22,58 \text{ English Inches.} \\
 33,38 \text{ English Inches} & = & 1 \text{ Vara of Spain.} \\
 \text{Result, } 243,18 & \text{Varas of Spain.} &
 \end{array}$$

EXAMPLE VI.—How many Feet of Turin are equal to 160 Rhineland Feet? See Table VI.

$$\begin{array}{rcl}
 & 160 \text{ Rhineland Feet.} & \\
 1 \text{ Rhineland Foot} & = & 12,35 \text{ English Inches.} \\
 12,72 \text{ English Inches} & = & 1 \text{ Foot of Turin.} \\
 \text{Result, } 155,34 & \text{Feet of Turin.} &
 \end{array}$$

EXAMPLE VII.—How many Square Feet of Rome are equal to 90 of Lisbon? See Table VII.

$$\begin{array}{rcl}
 & 90 \text{ Square Feet of Lisbon.} & \\
 1 \text{ Square Foot of Lisbon} & = & 167,547 \text{ English Square Inches.} \\
 137,358 \text{ English Square Inches} & = & 1 \text{ Square Foot of Rome.} \\
 \text{Result, } 121,97 & \text{Square Feet of Rome.} &
 \end{array}$$

EXAMPLE VIII.—How many Cubic Feet of Cologne are equal to 45 Cubic Feet of Sweden? See Table VIII.

$$\begin{array}{rcl}
 & 45 \text{ Cubic Feet of Sweden.} & \\
 1 \text{ Cubic Foot of Sweden} & = & 1595,041 \text{ English Cubic Inches.} \\
 1270,229 \text{ English Cubic Inches} & = & 1 \text{ Cubic Foot of Cologne.} \\
 \text{Result, } 56,507 & \text{Cubic Feet of Cologne.} &
 \end{array}$$

EXAMPLE IX.—How many Geiras of Portugal are equal to 84 Dessetinas of Russia? See Table IX.

$$\begin{array}{rcl}
 & 84 \text{ Dessetinas of Russia.} & \\
 1 \text{ Dessetina of Russia} & = & 13066,6 \text{ English Square Yards.} \\
 6970 \text{ English Square Yards} & = & 1 \text{ Geira of Portugal.} \\
 \text{Result, } 157,47 & \text{Geiras of Portugal.} &
 \end{array}$$

EXAMPLE X.—How many Miles of Denmark are equal to 33 Miles of Switzerland? See Table X.

$$\begin{array}{rcl}
 & 33 \text{ Miles of Switzerland.} & \\
 1 \text{ Swiss Mile} & = & 9153 \text{ English Yards.} \\
 8244 \text{ English Yards} & = & 1 \text{ Danish Mile.} \\
 \text{Result, } 36,638 & \text{Miles of Denmark.} &
 \end{array}$$

ANCIENT WEIGHTS AND MEASURES.

TABLE XII.

Ancient Weights and Measures explained, and compared with English; from the most approved Authorities.

ANCIENT GREEK LONG MEASURES.

Two sorts of Long Measure were used in Greece; namely, the *Olympic* and the *Pythic*.

The Olympic measure was used in Peloponnesus, Attica, Sicily, and the Greek cities in Italy.

The Pythic measure was used in Thessaly, Illyria, Phocis, and Thrace, and at Marseilles in Gaul.

The divisions were the same in both, and were as follow: 4 Dactyli = 1 Palesta; 4 Palestæ = 1 Foot; $1\frac{1}{2}$ Foot = 1 Cubit.

10 Feet = 1 Decapodon; 600 Feet, or 400 Cubits = 1 Stadium.

The length of the foot is stated as follows:

Olympic foot, properly called Greek, according to *Hutton* 12,108 English Inches.

Folkes 12,072

Cavallo 12,084

Pythic foot, also called natural foot, according to *Hutton* 9,768

Paucton 9,731

Hence, the Olympic Stadium was $201\frac{1}{2}$ English yards nearly; and the Pythic or Delphic Stadium, $162\frac{1}{2}$ yards nearly, and the other measures in proportion.

The Phyleterian foot is the Pythic cubit or $1\frac{1}{2}$ Pythic foot.

The Macedonian foot was 13,92 English inches; and the Sicilian foot of Archimedes 8,76 English inches.

ANCIENT GREEK SUPERFICIAL MEASURES.

Olympic Land Measure

36 Olympic square feet = 1 Hexapodon; 64 Hexapoda = 1 Hemihectos; 2 Hemihecti = 1 Hectos or Modius; 6 Modii = 1 Medimnus or Jugerum.

Hence, the Olympic Jugerum is computed to equal 2 Roods 23 Perches, English.

Pythic Land Measure.

1666 $\frac{2}{3}$ Square Cubits = 1 Hemihectos ; 2 Hemihecti = 1 Modius ; 6 Modii = 1 Medimnus, or Jugerum.
Hence, the Pythic Jugerum = 2 Roods 29 Perches, English.

ANCIENT GREEK LIQUID MEASURES.

1 $\frac{1}{2}$ Cyathus = 1 Oxybathon ; 6 Cyathi = 1 Cotylus ; 2 Cotyli = 1 Xestes ; 6 Xestes = 1 Chous ;
6 Choi = 1 Amphoreus ; 2 Amphorei = 1 Keramion or Metretes.

The Keramion is stated by *Paucton* to have been equal to 35 French Pints, which equal 8 $\frac{2}{3}$ English Gallons ; and the inferior measures in proportion.

ANCIENT GREEK CORN MEASURES.

2 Xestes = 1 Choenix ; 4 Choenices = 1 Hemihectos ; 1 $\frac{1}{2}$ Hemihectos = 1 Tetarlon ; 2 Hemihecti = 1 Modius ; 6 Modii = 1 Medimnus or Achana.

The Medimnus is stated by *Paucton* to equal 3 $\frac{1}{2}$ French Boisseaux = 1 $\frac{1}{4}$ English Bushel, and the inferior measures in proportion.

ANCIENT GREEK WEIGHTS.

6 Chalcoi = 1 Obolus ; 6 Oboli = 1 Drachm ; 2 Drachms = 1 Didrachm.
20 Drachms = 1 Gold Statera, or Aureus ; 100 Drachms = 1 Attic Mina.
60 Attic Mine = 1 Attic or Euboic Talent ; 10 Attic Talents = 1 Gold Talent.
There was also a smaller Mina containing 75 Drachms.

Authors vary much in their statements of the Greek weights.

• Thus, according to *Arbuthnot*, the Attic Drachm = 54,6 English Grains.

the Attic Mina = 5464

the Attic Medicinal Mina.. = 6994

According to *Christiani*, the Attic Drachm = 51,9

the Attic Mina = 5189

the Smaller Attic Mina... = 3892

According to *Paucton*, the Attic Drachm = 69

the Attic Mina = 6900

Arbuthnot mentions also a very ancient Greek Drachm, which answered to 146,5 English Grains.

ANCIENT ROMAN LONG MEASURES.

6 Scrupula = 1 Sicilicum; 8 Scrupula = 1 Duellum; $1\frac{1}{2}$ Duellum = 1 Semiuncia.

18 Scrupula = 1 Digitus; $1\frac{1}{2}$ Digitus, or 24 Scrupula = 1 Uncia, or Inch.

3 Unciæ = 1 Palma; 12 Unciæ = 1 Pes, or Foot; $1\frac{1}{2}$ Foot = 1 Cubit.

The fractions of the Foot were denominated as follows:

2 Unciæ = 1 Sextans; 3 Unciæ = 1 Quadrans, or Terruncium; 4 Unciæ = 1 Triens; 5 Unciæ = 1 Quincunx; 6 Unciæ = 1 Sexunx or Semis; 7 Unciæ = 1 Septunx; 8 Unciæ = 1 Bes, or Bessis; 9 Unciæ = 1 Dodrans; 10 Unciæ = 1 Dextans; 11 Unciæ = 1 Deunx.

ANCIENT ROMAN ITINERARY MEASURES.

$2\frac{1}{2}$ Pedes or Feet = 1 Gradus; 2 Gradus = 1 Passus; 2 Passus = 1 Decempeda. 1000 Passus = 1 Mile. The length of the Roman Foot is stated as follows, by different authors.

By *Bernard*..... 11,640 English Inches.

By *Picard* and *Hutton* 11,604

By *Folkes*..... 11,592

By *Raper*, (before Titus)..... 11,640

By *Raper*, (after Titus)..... 11,580

By *Shuckburgh*, taken from rules..... 11,6064

By the same, from buildings..... 11,6172

By the same, from a tombstone 11,6352

Hence, 11,6 English Inches seem to be a medium; and, therefore, the Roman Mile = 1611 English Yards, being 149 Yards less than the English Mile.

ANCIENT ROMAN LAND MEASURES.

100 Square Roman Feet = 1 Scrupulum of land; 4 Scrupula = 1 Sextulus.

$1\frac{1}{2}$ Sextulus = 1 Actus; 6 Sextuli, or 5 Actus = 1 Uncia of land; 6 Unciæ = 1 Square Actus.

2 Square Actus = 1 Jugerum; 2 Jugera = 1 Heredium; 100 Heredia = 1 Centuria.

The Actus was a slip of ground 4 Roman Feet broad and 120 long. The Jugerum was also divided into 12 Unciæ, and its fractions were denominated *Sextans*, *Quadrans*, &c. as the fractions of the Roman Foot.

Taking the Roman Foot as above, at 11,6 English Inches, the Roman Jugerum was 5980 English Square Yards, or 1 Acre $37\frac{1}{2}$ Perches.

ANCIENT ROMAN CORN MEASURES.

4 Ligulæ = 1 Cyathus ; $1\frac{1}{2}$ Cyathus = 1 Acetabulum ; 4 Acetabula = 1 Hemina, or Trulla.

2 Heminæ = 1 Sextarius ; $1\frac{1}{2}$ Sextarius = 1 Chænix ; 16 Sextarii = 1 Modius.

Paucton states the Sextarius to have been 0,6453 of a French Pint, which is equal to 36,94 English Cubic Inches ; hence the Modius was 591 Cubic Inches, or $\frac{8}{9}$ of an English Bushel.

ANCIENT ROMAN LIQUID MEASURES.

In liquid measures, the Sextarius and its divisions were used as above, and the larger measures were as follow :

6 Sextarii = 1 Congius ; 4 Congii = 1 Urna ; 2 Urnæ = 1 Amphora ; 20 Amphoræ = 1 Dolium.

The Sextarius being, as above, 36,94 English Cubic Inches, the Amphora = $7\frac{2}{3}$ English Gallons, and the Dolium = $153\frac{1}{3}$ English Gallons.

ANCIENT ROMAN WEIGHTS.

3 Siliquæ = 1 Simplicium ; 6 Siliquæ = 1 Scrupulum ; 3 Scrupula = 1 Denarius of Nero.

$3\frac{3}{4}$ Scrupula = 1 Denarius of Papyrius ; 4 Scrupula = 1 Sextulus ; $1\frac{1}{2}$ Sextulus = 1 Sicilicum.

2 Sextuli = 1 Duellum ; 6 Sextuli, 7 Denarii of Papyrius, or 8 Denarii of Nero = 1 Uncia, or Ounce.

12 Unciæ = 1 Libra or Pound ; 100 Libræ = 1 Centumpondium.

The fractions of the Libra were also distinguished by the names of *Sextans*, *Quadrans*, &c. as the fractions of the Foot, see p. 257.

The Weight of the Roman Denarius, Ounce, and Pound, are stated as follows, by different authors.

By *Arbuthnot*, the Denarius, (7th part of the Ounce)..... 62,4 English Grains.

the Ounce 437,2

the Pound 5246,4

By *Christiani*, the Denarius, (8th part of the Ounce)..... 51,9

the Ounce 415,1

the Pound 4981,2

By *Paucton*, the Denarius of Papyrius 61,6

the Denarius of Nero 53,9

the Ounce 431,2

the Pound 5171,4

ANCIENT JEWISH, OR SCRIPTURE LONG MEASURES.

4 Digits = 1 Palm; 3 Palms = 1 Span; 2 Spans = 1 Cubit; 4 Cubits = 1 Fathom; 2 Fathoms = 1 Arabian Pole; 10 Poles = 1 Shoenus, or measuring line.

The Shoenus = 145 Feet 11 Inches English, and the rest in proportion. Thus the Scripture Cubit was 22 inches nearly.

ANCIENT JEWISH ITINERARY MEASURES.

400 Cubits = 1 Stadium; 5 Stadia = 1 Sabbath-Day's Journey; 10 Stadia = 1 Eastern Mile; 3 Eastern Miles = 1 Parasang; 3 Parasangs = 1 Day's Journey.

1 Day's Journey = $33\frac{1}{2}$ English Miles, and the Sabbath Day's Journey = $\frac{2}{3}$ of an English Mile nearly.

ANCIENT JEWISH DRY MEASURES.

20 Grachal = 1 Cab; $1\frac{1}{2}$ Cab = 1 Gomor; $3\frac{1}{2}$ Gomor = 1 Seah; 3 Seahs = 1 Ephah; 5 Ephahs = 1 Leteeh; 2 Leteeh = 1 Comer.

The Comer = 2 Bushels 1 Pint English, and the subordinate measures in proportion.

ANCIENT JEWISH LIQUID MEASURES.

$1\frac{1}{2}$ Caph = 1 Log; 4 Logs = 1 Cab; 3 Cabs = 1 Hin; 2 Hins = 1 Seah; 3 Seahs = 1 Bath, or Ephah; 10 Ephahs = 1 Chomer, Homer, or Corus.

The Chomer = 75 Gallons 5 Pints English, and the other measures in proportion.

ANCIENT JEWISH WEIGHTS.

60 Shekels = 1 Maneh; 50 Maneh = 1 Talent.

The Talent = 113 lb. 10 oz. 1 dwt. 10 gr. Troy, and the other weights in proportion.

For a more full and particular account of Scripture Weights and Measures, see the *Prologomena to Hewlett's Bible*, from which the above Statement is chiefly extracted.

ANCIENT EGYPTIAN WEIGHTS.

The Talent was the principal weight, as well as money among many of the Eastern nations; but it was not uniform. In Egypt it was divided into 60 Minæ, and each Mina into 100 Drachms, and = 86lb. 8 oz. 16 dwt. English Troy Weight.

The Mina, sometimes called the Pound, was divided into 16 ounces; but there was another pound, called the Litra, or Ratel, which was divided into 12 ounces. This weight was used throughout Arabia and Asia Minor, and answered to 6886 Troy Grains. The ounce was divided into a certain number of Dirhems, each of 12 Carats, and each Carat contained 4 grains. *Bishop Cumberland* deduces the English Avoirdupois Pound from the Mina of Egypt, and the Troy Pound from the Ratel; but authors differ much on this subject.

ANCIENT EGYPTIAN LONG MEASURES.

2 Fingers = 1 Condyle; 2 Condyles = 1 Palm; 4 Palms = 1 Geometrical Foot; 5 Palms = 1 Cubit.

This Cubit was the distance from the elbow to the joint of the wrist, and answered to 13 English Inches nearly. In other countries the cubit was reckoned from the elbow to the end of the middle finger, and was about one-half more than that of Egypt.

The Egyptian cubit was the standard to which many of the ancient nations referred their measures, and, according to *Paucton*, was that mentioned by *Herodotus*, *Pliny*, and other ancient authors in their scientific computations. He also supposes this to be the cubit mentioned in the Book of Judges, ch. iii. v. 16.

For a more comprehensive and minute account of Ancient Weights and Measures, see *Arbuthnot's Tables*; *Paucton's Metrologie*; and *Gibbon's Miscellaneous Works*.

GENERAL INDEX
AND
COMMERCIAL DICTIONARY,

CONTAINING

General References, and also Definitions of Commercial Terms, including Monies, Coins, Weights, and Measures; which are either explained by immediate definitions, or by references.

N.B. The Roman numerals refer to the volumes; the figures to the pages.

A

AAM, a liquid measure of Amsterdam, Antwerp, &c.; i. 10, 21.

ABANDONMENT, the act of relinquishing or giving up goods to creditors or underwriters, either in lieu of a debt, or to avoid the payment of charges.

ABAS, a Persian weight for pearls; i. 278.

ABASSI, or ABASSEE, a Persian coin; i. 151, 277.

ABATEMENT, a deduction from a debt or contract.

ABUQUELP, the same as *Griscio*, an Egyptian coin; i. 4.

ACCEPTANCE of a BILL; ii. 3.

ACCOMMODATION, a term applied to the acceptance of a bill, when the drawee only lends his name; and the drawer engages to furnish him with the means of payment before the bill becomes due.

ACCOUNT CURRENT, the personal account of a merchant or trader with each of his correspondents or customers, a copy of which account is transmitted to the person whose name it bears, showing how affairs stand between the parties at the current or present time when made out.

ACCOUNT SALES, an account showing the net proceeds of the sale of any cargo or consignment of goods.

- ACETABULUM, an ancient Roman corn measure; ii. 258.
- ACHANA, an ancient Greek corn measure; ii. 256.
- ACHTEL, or ACHTELING, a measure of capacity in Germany; i. 148, 350, 369.
- ACHTERLIS, a measure of capacity in Berne; i. 39.
- ACINO, a weight for gold and silver in Naples and Sicily; i. 263, 313.
- ACQUITTANCE, a discharge, in writing, for a sum of money, acknowledging it to have been paid.
- ACRE, a land measure in England, and some parts of the Continent; i. 195, 224, 226, 309; ii. 249.
- ACT OF HONOUR, an instrument drawn by a notary when a bill is accepted for the honour of another person; ii. 6.
- ACTION, the name for shares in some foreign banks; i. 145.
- ACTUS, an ancient Roman land measure; ii. 257.
- ADARME, a weight in Spain; i. 6, 56, 266, 321, 342.
- ADJUSTMENT, the settling of the averages or losses on policies of insurance; see *Average*.
- ADMINISTRATOR, a person who is allowed to administer in the ecclesiastical court, by which he takes charge of the personal effects of one who dies intestate.
- ADOWLY, a weight in Bombay; i. 96.
- ADVICE, the information given *by letter* of any commercial transaction.
- ADULTERATION, the act of debasing by an improper mixture.
- ADY, a long measure in the Jaghire territory; i. 93.
- AEMGEN, a liquid measure in Prussia; i. 35.
- AFFIDAVIT, an oath sworn in writing before some person authorised to receive it.
- AFFREIGHTMENT, the act of loading a vessel.
- AGASTERA, a liquid measure in some of the Ionian Islands; i. 372.
- AGENT, a person duly authorised to act for another.
- AGIO; i. Introduction, xxxiv; also, pages 17, 186.
- AGIRAGUE, a weight in Guinea; i. 167.
- AGTENDEEL, a corn measure in Holland; i. 297.
- AHM, a measure for wine in Germany, Holland, &c.; i. 3, 77, 171, 206, 277, 287, 297; ii. 235.
- AKEY, an African weight; i. 167.
- ALBAAJER, see *Abassi*.
- ALBERTS DOLLAR, a Dutch silver coin. It is used also as a money of account at Libau and Riga; i. 207, 288.
- ALBERTS GROSCHEN, a money of account in Libau; i. 207.
- ALBUS, a small coin and money of account at Cassel, Cologne, and other places in Germany; i. 63, 70, 261, 285.
- ALLOTING of goods, is when several persons buy a cargo or quantity of goods jointly, which they divide into as many parcels or lots as there are buyers, and these lots are afterwards drawn.
- ALLOWANCES in sales of goods, in London; i. 228. Amsterdam, 11. Bourdeaux, 47. Cairo, 59. Genoa, 159. Gibraltar, 164. Hamburg, 173. Leghorn, 201. Rotterdam, 298.

- ALLOWANCES in standarding coins and bullion; ii. 174.
- ALLOY in coins; i. Introduction, xxviii.
- ALMUD, a liquid measure in Portugal and some parts of Turkey; i. 73, 212, 247. It is also a corn measure in Spain and Barbary, i. 23, 260, 343; ii. 235.
- ALMUT, a corn measure in Majorca; i. 248.
- ALQUEIRE, or ALQUIERE, a measure for corn in Portugal; i. 212, 247; ii. 229, &c.
- ALTIN, a silver coin in Russia; i. 299.
- ALTMICHLIC, a Turkish silver coin; ii. 168.
- AMBULANT, a name given at Amsterdam to brokers that have not been sworn before a magistrate.
- AMMA, a weight in the Sunda Isles; i. 118.
- AMMONAM, a dry measure in Ceylon; i. 105.
- AMOLA, a liquid measure at Genoa; i. 159.
- AMPHORA, an ancient Roman liquid measure; ii. 258.
- AMPHOREUS, an ancient Greek liquid measure; ii. 256.
- ANFORA, a liquid measure in Italy; i. 346.
- ANGEL, an old gold coin in England; i. Introduction, xxx; also, page 216.
- ANGSTER, a money of account in Switzerland; i. 374.
- ANGULLA, a long measure of Bengal; i. 89.
- ANKER of brandy, 10 gallons. The anker is also a liquid measure in Germany, Holland, Prussia, &c.; i. 10, 35, 77, 83, 171, 273, 287, 297, 301, 324; ii. 234, &c.
- ANNA, a money of account and weight in India; i. 87, 89, 93, 94.
- ANNUITY, a sum paid or received annually.
- ANNUITIES, annual payments; i. 240.
- ANTEDATE, a fictitious date, prior to the true date of a bond, bill, &c.
- ANTHAL, a liquid measure in Hungary; i. 192; ii. 235.
- ARBITRATION, a mode of settling a dispute by referring the question to the decision of one person or more, without any appeal to law.
- ARBITRATION OF EXCHANGE; ii. 107, &c.
- ARBITRATION OF MERCHANDISE; ii. 134.
- ARBITRATION OF SPECIE AND BULLION; ii. 131.
- ARCHIM, the name given to the Long Ell used in Turkey; i. 73; ii. 239.
- ARDEB, a measure for grain in some parts of Africa; i. 2.
- ARE, the unit for superficial measures in the new French system; i. 135, 136; ii. 251.
- ARIENSE, a division of the Mark weight in some parts of Spain; i. 23, 27.
- ARISH, a long measure in Persia; i. 278; ii. 241.
- ARN, a cloth measure in Dantzic; i. 83.

- ARPENT, a measure for land in the old French system ; i. 134 ; ii. 249.
- ARRANZADA, a land measure of Spain ; i. 323 ; ii. 249.
- ARRATEL, the Libra or Pound of Portugal ; i. 212 ; ii. 227.
- ARROBA, or ARROVE, a weight in Spain and Portugal ; i. 6, 23, 212, 322, 342 ; also a liquid measure in Spain ; i. 248, 322, 343 ; ii. 234, &c. ; and a dry measure in Morocco ; i. 260.
- ARSHEEN, or ARCHIN, a long measure in Russia ; i. 301 ; ii. 242.
- ARTABA, a corn measure in Persia ; i. 278 ; ii. 232.
- AS, *plur.* *Asen*, a small Dutch weight, used also at Hamburgh, in Switzerland, and in Sweden ; i. 9, 169, 329, 375.
- ASNÉE, an old dry and liquid measure at Lyons ; i. 246 ; ii. 231, 236.
- ASPER, a small Turkish coin and money of account ; i. 3, 4, 5, 57, 72, 276, 307, 314, 337.
- ASSAY, a process by which the fineness of bullion or coins is determined, by separating, from any small part of the metal, the alloy from the pure, and ascertaining the proportion ; ii. 171.
- ASSIGNEE, a person appointed to manage the affairs of a bankrupt.
- ASSURANCE, see *Insurance*.
- ASTAH, a measure for cloth in the Prince of Wales's Island ; ii. 241.
- ASTLER, a corn measure in Louvain ; i. 21.
- ATOMO, a long measure in Italy ; i. 256.
- ATTACHMENT, the act by which a creditor may claim and seize the goods of his debtor, in whatever hands he finds them.
- AVA, a long measure in Cadiz ; i. 57.
- AVERAGE, a contribution made for losses at sea : it is distinguished into general and particular. *General average* is a proportionable contribution, paid by all the proprietors of a ship and cargo for losses, which are made with a view to safety, such as throwing goods overboard, or cutting away masts to prevent shipwreck. *Particular average* is a contribution for such damages or losses as may happen from the common accidents of the sea ; in which case the average must be paid by the proprietors of the article that suffers the damage.
- AVERAGE TARE ; i. 228.
- AVISTA, at sight.
- AVOIRDUPOIS, the commercial weight in England ; i. Introduction, xxi. ; i. 220, 225 ; ii. 225.
- AUGUST, a gold coin of Saxony ; i. 161, 205. Assay and value ; ii. 160. Impressions ; 205.
- AUME, see *Aam*, or *Ahm* ; also the name for a tierce of wine of 42 gallons.
- AUNE, a measure for cloth in France and Switzerland ; i. 28, 134, 364 ; ii. 238, 252.
- AUREUS, an ancient Greek weight ; ii. 256.
- AWARD, the judgment of an arbitrator for terminating a difference.
- AZUMBRE, a liquid measure in Spain ; i. 56, 150, 248, 322.

B

- BACILE**, a dry measure, and also a land measure, in the Ionian Islands; i. 372, 373.
- BACINE**, a dry measure in Corsica; i. 80.
- BADDAM**, a species of almond, used as money in some parts of India; i. 103, 119.
- BACHEL**, a corn measure in the Morea; i. 276.
- BAG**, a measure and weight of various contents.
- BAGATTINO**, a copper coin of Venice; i. 345.
- BAHAR**, a weight used in some parts of India and of Arabia; i. 40, 98, 122, 257.
- BAILLE**, a measure for coals in Rochelle; i. 292.
- BAJOCELLO**, a base silver coin at Rome; i. 293.
- BAJOCCO**, a base coin at Rome, Bologna, &c.; i. 18, 42, 243, 292.
- BAJOIRE**, a silver coin in Geneva; i. 152.
- BALANCE**, the difference between the debtor and creditor side of an account.
- BALANCE OF TRADE**, the difference between the commercial exports and imports of one country, with respect to another.
- BALE**, a quantity of packed goods.
- BALLAST**, or **KENTILLAGE**, any heavy matter placed in the hold of a ship, to make her sink to a proper depth, so that she may carry sufficient sail without the danger of oversetting.
- BALLIAGE**, a small duty paid to the city of London by aliens and others on the exportation of certain commodities.
- BALLOON**, 24 Reams of a particular sort of paper manufactured at Marseilles for the Levant.
- BALLOT**, of Paper, in Sweden, 10 Reams.
- BALY**, a weight in Sumatra; i. 112, 123.
- BAMBOE**, a measure for rice in Sumatra, the Molucca Islands, &c.; i. 97, 120.
- BANCO**, the bank money of Genoa, Hamburg, Venice, &c.; i. Introduction, xxxiv. 155, 167, 344; also the paper currency of Sweden; i. 333.
- BAND**, a weight used on the Gold Coast for weighing gold dust, and equal to 2 Ounces Troy.
- BANKS**; i. Introduction, xxxvi.
- BANK of Altona**; i. 7. Amsterdam, 17. Austria, 351. Berlin and Breslau, 36. Copenhagen, 79. England, 237. France, 145. Genoa, 154. Hamburg, 186. Ireland, 186. Netherlands, 17. Russia, 302. Scotland, 310. Venice, 347. Vienna, 351. United States, 356.
- BANK BILL**, a note signed by one of the cashiers of the Bank of England, promising to pay a certain sum of money at an appointed time.
- BANK NOTE**, a promissory note issued by a bank, payable to bearer on demand; i. 237.

BANK, private; i. 239, 311.

BANKER, a proprietor of a bank or banking-house.

BANKRUPT, a person in trade who cannot make good his payments, and against whom, therefore, a commission of bankruptcy has been taken.

BANQUIER, on the Continent, means an exchange merchant, or person who deals in bills of exchange.

BAR, a French weight; i. 137; ii. 251.

BARBONE, a silver coin in Lucca; i. 243; ii. 164. Impressions; 191.

BARCELLA, a corn measure in Majorca; i. 248.

BARCHET, a term used in reckoning in Germany; i. 164.

BARCHILLA, a corn measure in Spain; i. 6, 343.

BARIL, a liquid measure in Portugal; i. 212.

BARILE, a liquid measure in Italy and Sicily; i. 18, 159, 264, 294, 314; ii. 234, &c.

BARLEY-CORN, $\frac{1}{2}$ inch; i. 223, 226.

BARRATRY, a fraud committed by the master or crew of a ship on the owners or insurers; such as sinking, deserting, or taking away the ship, or embezzling the cargo.

BARREL, an ale and beer measure; i. 223, 227. It is also used for sundry dry goods.

BARREL, of corn, in Ireland; i. 193.

BAROTTI, a weight in the Molucca Isles; i. 120.

BARRIQUE, a measure for wine or brandy, in some parts of France, as at Bourdeaux, Rochelle, &c.; i. 262, 292; ii. 234, &c. It is also used for a hogshead of sugar.

BARTER, the exchanging or trucking of one commodity for another.

BARUAY, see *Candy*.

BASSA, a liquid measure of Verona; i. 348; ii. 237.

BATH, an ancient Jewish measure of capacity; ii. 259.

BATMAN, a weight used in Persia, and at Aleppo, Constantinople, Smyrna, and other places in the Levant; i. 4, 72, 278, 315; ii. 226, 227.

BATTA, a per centage in the East Indies; i. 86, 87.

BATTEL, a measure of capacity in the Philippine Isles; i. 107.

BATZE, a base silver coin in Switzerland, and also in some parts of Germany; i. 23, 27, 38, 161, 261, 269, 305, 334.

BEAK, a weight in Mocha; i. 257.

BECHER, a measure of capacity in Switzerland and Germany; i. 28, 39, 274, 350.

BECSKA, a liquid measure in Poland; i. 280.

BEDDOOR, a weight at Malacca; i. 108.

BENDA, a weight in Guinea; i. 167.

BENDIKY, a gold coin in Morocco; i. 260.

BERKOWITZ, or BERQUET, a Russian weight; i. 301.

- BERRI**, an itinerary measure in Turkey; ii. 250.
- BES**, or **BESSIS**, an ancient Roman long measure; ii. 257.
- BESLICK**, a small Turkish silver coin; ii. 169.
- BESON**, a liquid measure at Augsburg; i. 25.
- BICE**, or **BIS**, see *Pice*.
- BICHERÉE**, an old land measure in France; i. 246.
- BICHET**, an old dry measure at Lyons; i. 246.
- BIGGAH**, a land measure in the East Indies; i. 89.
- BIGONCIA**, a liquid measure in Venice; i. 346.
- BILL**, a term generally applied to a draft, advertisement, or account.
- BILL OF ENTRY**, a note of the particulars of goods entered at the custom-house.
- BILL OF EXCHANGE**; ii. 1.
- BILLS**, **EXCHEQUER**, securities issued by government, which bear interest until paid off. They are mostly for £100, £500, or £1000 each; some of them bear interest at the rate of 3*d.* others at the rate of 3½*d.* per day for every £100.
- BILL OF HEALTH**, an account of the health of a crew, given by the captain or master of a vessel.
- BILLS**, **INDIA**, bills drawn in India on the East India Company in London, and payable at the India House.
- BILLS OF LADING**, papers signed by the master of a ship, acknowledging the receipt of certain goods on board his vessel, and promising to deliver them at the intended place. It is customary to make out three bills of lading, one to be left with the shipper, the second to be held by the captain of the ship, and the third to be sent to the person to whom the goods are consigned, by which he can claim them on their arrival.
- BILLS**, **NAVY**, bills issued by the navy board in payment of stores for the ships, dock-yards, &c. They are made payable at 90 days, with an interest of 3½*d.* per day on every £100.
- BILL OF PARCELS**, an account given by the seller to the buyer, containing the particulars of the purchase.
- BILL OF SALE**, a deed by which a right or interest in certain goods is transferred.
- BILL OF STORE**, a licence granted at the custom-house to merchants or ship-owners, allowing them to carry, custom free, all provisions and stores for their voyage.
- BILL OF SUFFERANCE**, a licence granted to a merchant at the custom-house, allowing him to trade from one port to another.
- BILLS**, **VICTUALLING**, bills issued by the victualling board, as navy bills are by the navy board.
- BILLON**, base metal, either of gold or silver, in which copper is predominant.
- BISACCIA**, a corn measure in Sicily; i. 313.
- BISMERPOND**, a weight in Norway; i. 32.
- BIT**, or **BITT**, a small coin in the West Indies; i. 360, &c.
- BLANCA**, a money of account in Malaga; i. 248.
- BLAFFERT**, a small coin at Cologne; i. 70.

- BLAMUSER**, a money of account in some parts of Germany; i. 262.
- BLANK**, a division of the English Grain Troy; i. 219.
- BLANK CREDIT**, the permission which one house gives to another to draw on it to a certain extent at any time, in the way of accommodation.
- BLANKEEL**, or **BLANQUILLO**, a small coin and money of account in Morocco; i. 260.
- BOBBIN** of undressed flax, about $\frac{3}{4}$ of a cwt.
- BOCCALE**, a wine measure in Italy; i. 18, 43, 127, 255, 294, 340, 372.
- BÖHMEN**, a money of account in Prague; i. 280.
- BOISSEAU**, a measure for corn in the old system in France, varying much in different parts of the country; i. 133, 262, 292, 306, 327; ii. 229, 252.
- BOISSON**, a liquid measure in the old system in France; i. 133.
- BOLL**, a corn measure in Scotland, and in some parts of England; i. 310.
- BOLOGNINO**, a copper coin at Bologna, &c.; i. 18, 42, 243, 258.
- BOLT**, of canvas, 28 ells.
- BOND**, a deed or obligation by which a person binds himself, or his heirs, to pay a certain sum of money at an appointed time; ii. 9.
- BONDS, INDIA**, bonds issued by the East India Company of £50 and £100 each, bearing interest of 5 per cent. per annum, which interest is paid at the India House, in London.
- BOND, POST OBIT**, a bond payable after the death of the person whose name is therein specified.
- BONDED GOODS**, see *Warehoused Goods*.
- BOOBOT**, a weight in the Sunda Isles; i. 118.
- BOOK OF CARGO, or LOADING**, a book kept by the mate of a trading vessel, containing a particular account of the goods on board.
- BOOK OF RATES**, a book showing the duty to be paid at the custom-house for goods exported or imported.
- BOOT**, a wine measure in Antwerp; i. 21.
- BORBI**, or **BURBI**, a copper coin in Egypt; i. 4.
- BORJÖKE**, glass beads used as money in Abyssinia; i. 1.
- BOTTA**, a liquid measure in Spain, Italy, Sicily, &c.; i. 57, 248, 264, 294, 314, 346.
- BOTTLE**, of wine, about 5 to a gallon; of aquafortis, 4 gallons.
- BOTTOMRY**, a contract or loan on a ship in the nature of a mortgage; but differing from other loans and mortgages, inasmuch as the interest is higher, and the security not so certain; for, if the ship be lost, neither loan nor interest can be demanded.
- BOUNTY**, a premium given for the encouragement of some branch of trade, manufacture, or agriculture.
- BOURBE**, a money of account in Tunis; i. 337.
- BOZIA**, a liquid measure in the Ionian Isles; j. 372.
- BOZZA**, a liquid measure of Venice; i. 346.

- BRAÇA**, a land measure in Portugal; i. 213.
- BOX**, of aloes, 14 lb.
- BRACCIO**, a measure for cloth in Italy; ii. 238.
- BRAS**, see *Aune*.
- BRASADA**, a land measure in Spain; i. 61.
- BRASSAGE**, charges for mint expenses.
- BRASSE**, a short Ell at Basil; i. 28; ii. 238.
- BRAZA**, a long measure of Spain; i. 322, 343.
- BRENT**, a liquid measure in Bern; i. 39.
- BRENTA**, a liquid measure at Bergamo, and some other parts of Italy; i. 31, 255, 340, 348; ii. 234, &c.
- BROKERS**, persons appointed to transact business between merchants and others; thus, there are ship brokers, insurance brokers, exchange brokers, stock brokers, &c.
- BROKERAGE**, the commission paid to brokers.
- BUCKET**, of chalk; $1\frac{1}{2}$ bushel.
- BUDDAM**, a weight for pearls at Bombay; i. 95.
- BUDGEROOK**, a money of account on the Malabar coast; i. 98, 103.
- BULLION**, gold and silver uncoined. Rules for standarding bullion; ii. 173.
- BUNCALL**, a weight used in some parts of India, as at Acheen and Malacca; i. 97, 114.
- BUNDLE**, of brown paper, 40 quires.
- BURDEN**, of steel, 180 lb.
- BUSCHE**, a money of account of Aix-la-Chapelle; i. 2.
- BUSHEL**, a measure for corn and dry commodities in England; i. 194, 221, 228; ii. 230.
- BUSSOLO**, a corn measure in Florence; i. 130.
- BUSUCK**, a weight in Borneo; i. 119.
- BUTT**, a liquid measure in England; i. 223, 227.
- BUTT**, of salmon, 84 gallons.

C

- CAB**, an ancient Jewish dry measure; ii. 259.
- CADE**, of herrings, 500. Of sprats, 1000.
- CADO**, a corn measure at Santa Maura; i. 372.

- SURETY, when one person becomes bound for another to pay a certain debt, or perform a certain act.
- SUTTLE WEIGHT ; i. 229.
- SWARE, or SCHWARE, a money of account and copper coin of Bremen and Oldenburg ; i. 48, 273.
- SYCEE, in China, pure gold or silver ; i. 67.
- SYFERT, a copper coin of Embden ; i. 125.

T

- TABLE, of glass, 5 square feet.
- TAFFEE, a weight in Turkey ; i. 72.

- TALE**, a weight for gold and silver in China, and in some parts of the East Indies. It is also a money of account ; i. 66, 67, 97, 196, 197 ; ii. 222.
- TALENT**, a weight and coin in general use among the ancients, but very different in different countries ; ii. 256, 259, 260.
- TALLARO**, a silver coin of Tuscany, Ragusa, and Venice ; i. 251, 284, 345. Assay and value ; ii. 166. Impressions ; ii. 201, 214.
- TALLARO**, is a term applied in the Levant and other places to the dollar in general ; i. 57, 130.
- TALLY**, a cleft piece of wood to score an account upon. Tallies are used by the officers of the Exchequer, who keep one of the clefts in the office, and give the other to the person who pays money.
- TAMPANG**, a weight at Malacca ; i. 108.
- TANGA**, a money of account at Goa, in the East Indies ; i. 106.
- TANK**, a weight at Bombay ; i. 94.
- TAR**, a small silver coin on the coast of Malabar ; i. 102, 120.
- TARE**, an allowance in sales of goods, generally made for the weight of chests, casks, bags, &c. ; i. 228.
- TARE OF CANTARO** ; i. 58.
- TARE OF USO** ; i. 201.
- TARIF**, an account of the rates of duties imposed on merchandise. The term is sometimes applied to a duty for coining.
- TARO**, a money of account and copper coin of Naples, Sicily, and Malta ; i. 249, 263, 313.
- TARRIE**, a corn measure at Algiers ; i. 5 ; ii. 229.
- TARXA**, a money of account of Navarre, in Spain ; i. 265.
- TAVOLA**, a land measure in Cremona ; i. 81.
- TELLERS**, officers or clerks in public offices who receive and pay money.
- TEMAN**, a corn measure at Mocha ; i. 258.
- TEMIN**, a money of account at Algiers and Smyrna ; i. 5, 314.
- TEMPE**, see *Stampe*.
- TERMINE**, a weight for gold and silver at Tunis ; i. 337.
- TERTIAN**, of wine, 2 tierces, or 84 gallons.
- TESTOON**, or **TESTONE**, a silver coin in Italy, and also in Portugal ; i. 42, 129, 199, 210, 275, 292. Assay and value ; ii. 166, &c. Impressions ; 200, &c.
- TETARLON**, an ancient Greek corn measure ; ii. 256.
- THALER**, see *Rixdollar*.
- THIRDS, PIECE OF TWO**, a silver coin in Germany, worth two-thirds of a rixdollar of account ; i. 162. Assay and value ; ii. 164, &c. Impressions ; ii. 180, 188, 201. It is called in German **ZWEYDRITTEL STUCK**. There is also the *Drittel* or piece of *One Third* ; see *Florin*.
- TIBERO**, a corn measure at Tripoli ; i. 337.

TICA, a weight in Borneo; i. 100.

TICAL, a weight for gold and silver, and also a money of account and gold and silver coin in certain parts of the East Indies, particularly at Pegu and Siam; i. 113, 115, 117; ii. 223.

TIDESMEN, or TIDEWAITERS, officers appointed to attend the loading and unloading of ships, in order to prevent contraband trade.

TIERCE, a wine measure in England; i. 222, 227. Also a weight by which Irish provisions are sold; i. 194; and a liquid measure in Hamburg; i. 171.

TIERCON, a liquid measure in Poland; i. 280.

TIMBANG, a dry measure of Batavia; i. 101.

TIMBER, of furs, 40 skins.

TIMPFE, or TYMPFE, an old silver coin of Prussia and Poland; i. 51, 279; ii. 82, 198, 279.

TIOGUE, in Sweden, 20 pieces; i. 332.

TIPREE, a dry measure in Bombay; i. 96.

TOD, a weight for wool in England; i. 220.

TOENDE, a corn and oil measure in Denmark; i. 76; ii. 229. It is used also there as a land measure; i. 78.

TOESA, a long measure in Spain; i. 322.

TOISE, a long measure in France; i. 134; ii. 252.

TOKENS, coins issued by banks, states, or individuals, under an implied engagement of redeeming them by the legal coin of the realm.

TOLA, a weight for gold and silver at Bengal, Bombay, Surat, and other places in India; i. 89, 94, 115, 119; ii. 222.

TOLFT, in Sweden, 12 pieces; i. 332.

TOMAN, a money of account in Persia and Arabia; i. 29, 151, 277; ii. 152.

TOMINE, a weight for gold and silver in Spain; i. 56, 320.

TOMMOND, a measure for rice at Betelfagui; i. 40.

TOMOLO, a corn measure at Naples and other parts of Italy; i. 264, 313; ii. 230.

TOMPONG, a money in Malacca; i. 115.

TON, a weight in England; i. 220, 224.

TONELADA, a liquid measure in Spain and Portugal; i. 6, 212. It is also a weight in Portugal; i. 212.

TONNAGE, certain duties per ton imposed on goods. The term is also applied to the burden or number of tons carried by a ship.

TONNE, a measure of capacity in most countries of Europe; i. 32, 35, 50, 171, 287, 324; ii. 230.

TONNEAU, a measure of capacity in some parts of France; i. 262, 292, 306. Also a weight of 2000lb. French, by which the burden of ships was reckoned, now replaced by the *Millier*. The Tonneau is a general term in French for a cask.

TONTINE, a loan raised on life annuities with the benefit of survivorship. Thus, an annuity after a certain rate

of interest is granted to a number of subscribers, who are divided into classes according to their ages; and annually the whole fund of each class is shared among its survivors, till at last it falls to one, and on his death it reverts to the power that first established the Tontine. The term is derived from the name of the inventor.

TOP, or **TOPF**, a wine measure at Breslau and other places in Germany; i. 52.

TORNESO, a copper coin in Naples; i. 264.

TOUCH, or **TOQUE**, the manner of expressing the fineness of gold and silver in China; i. 67. Also a method of trying their fineness in many places in India, with a stone called a Touchstone.

TOURNOIS, the name applied to French money in the old system, as sterling is to English money.

TOWYAH, a weight in Scindy; i. 116.

TOWER POUND, an old English weight for coins; i. Introduction, xxi.

TRABUC, an old French long measure; i. 269.

TRANSFER, the act whereby one party makes over his right, interest, or property to another.

TRANSIT, a custom-house warrant or pass.

TRAPESO, a weight in Malta, Sicily, and Naples; i. 250, 264, 313.

TRET, an allowance in the weight of goods of 4lb. per 104lb. after tare is deducted; i. 228.

TRONAGE, a custom or toll for weighing goods.

TRONE WEIGHT, an old weight still retained in Scotland; i. 309.

TROY WEIGHT, English; i. Introduction, xxi. 219, 225; Dutch; i. 9, 309.

TROYKEN, a weight for assaying in Holland.

TRULLA, an ancient Roman corn measure; ii. 258.

TRUSS, of hay or straw; i. 220. The term is sometimes applied to a bundle of cloth.

TUAL, a weight in Rangoon; i. 115.

TUB, of tea, about 60lb.; of camphor, from 56 to 80lb.; of vermilion, from 3 to 4 cwt.; of butter, 84lb.

TUCHE, 22 ells in Brunswick; i. 55.

TUN, a liquid measure in England, Holland, Germany, &c.; i. 10, 49, 71, 222, 227, 283.

TUNNA, a corn measure in Sweden; i. 330; ii. 232.

TUNNAGE, an impost of so much per tun on liquors imported or exported.

TUNNELAND, a land measure in Sweden; i. 331; ii. 249.

TWIER, a measure of capacity in Aurungabundar; i. 99.

TYMPFE, see *Timpfe*.

V

VAKIA, a weight and measure in Persia, Arabia, and Abyssinia; i. 30, 40, 257; ii. 223, 224.

VALES REALES, a paper money issued by the Spanish government; i. 323; ii. 90.

- VALL, or VALÉ, a weight for gold and silver at Bombay and Surat; i. 94, 119.
- VALUTA, or VALEUR, a term applied on the continent to the prices or rates at which different kinds of monies are reckoned in commercial transactions.
- VALUTA CORRENTE, a kind of money formerly used at Venice; i. 344.
- VARA, a long measure in Spain and Portugal; i. 6, 23, 213, 322, 343; ii. 238.
- VARAHUN, a weight in Madras; i. 93.
- VAT, a coal measure in England; i. 222. Also a liquid measure in Holland and Germany; i. 10, 127, 268; ii. 236.
- VEDRO, or WEDDRA, a liquid measure in Russia; i. 301; ii. 237.
- VELLON, a money in which accounts are kept in many parts of Spain; i. 5, 316; ii. 26, 89.
- VELT, or VELTE, a measure for brandy in some parts of France and Holland; i. 10, 21, 47, 259, 262, 292; ii. 234, &c.
- VENDEE, the person who buys. VENDER, the person who sells.
- VENDUE, an auction or public sale.
- VERP, a corn measure of Embden, &c.; i. 126.
- VERSHOK, a cloth measure in Russia; i. 301.
- VERST, an itinerary measure in Russia; i. 302; ii. 250.
- VERSURA, a long measure in Italy; i. 264.
- VESNO, a weight in Syria; i. 4.
- VICTUALIE WEIGHT, the common or commercial weight in Sweden; i. 329; ii. 227.
- VIERDEVAT, a corn measure in Holland; i. 10.
- VIERFASS, a corn measure at Brunswick; i. 54.
- VIERLING, a corn measure in Germany, Holland, and Switzerland; i. 25, 286, 297, 369, 375. It is also a weight for assaying in Holland.
- VIERTEL, a measure of capacity in Germany, Holland, and Switzerland; i. 21, 35, 50, 71, 83, 171, 281, 350, 375; ii. 229, 235.
- VIERTUNG, a commercial weight at Nuremberg; i. 271.
- VINTEM, a gold coin of Spain; i. 319. Assay and value; ii. 160. Impressions; ii. 207.
- VINTEM, a silver coin of Portugal; i. 210; and a copper coin in the Brazils; i. 290.
- VINTIN, a money of account at Goa; i. 106.
- VIREMENT, a method of settling the payment of bills or mutual debts, at the fairs of Lyons and other places, somewhat after the manner of clearing, as practised by the London bankers.
- VIS, or VISAY, a weight in the East Indies; i. 92.
- VISLINO, see *Ragusina*.
- VOG, a weight in Denmark; i. 76.
- VOUA, a long measure at Siam; i. 118; ii. 242.

U

- ULLAGE, what a cask of liquor wants of being quite full.
- UMPIRE, a person appointed finally to settle a dispute or difference when the arbitrators cannot agree.
- UNCIA, a division both of the weights and of the measures of the ancient Romans ; i. Introduction, xx. ; ii. 257.
- UNDERWRITER, a person who insures ships, cargoes, or other risks, which he performs by writing his name under a policy of insurance.
- UNZE, a corn measure in Wirtemberg ; i. 369.
- URDEE, a base coin and money of account in Bombay ; i. 93.
- URNA, an ancient Roman liquid measure ; ii. 258.
- USANO, see *Piso*.
- USANCE, the usual term of bills of exchange drawn from one country upon another ; ii. 2.
- USURY, a charge of interest beyond what is allowed by law.
- UTA, a money in some parts of Java ; i. 100.

W

- WAAG, a weight in Norway, Germany, and Sweden ; i. 32, 49, 205, 330.
- WAKEA, the Abyssinian ounce ; i. 1.
- WALL, or WAHL, in Germany and Sweden, 80 pieces ; i. 83, 164, 332.
- WAREHOUSE GOODS, or bonded goods, are certain articles, which, on being landed, are warehoused upon bond being given by the owner for the payment of duties, &c.
- WASTE BOOK, a book containing a regular detail of the transactions of a merchant's or trader's business, set down in the order of time in which they take place.
- WEBE, in Germany, 72 pieces.
- WEDDRA, see *Vedro*.
- WEIGHTS, defined ; i. Introduction, xvi. Troy Weight of different countries compared ; ii. 222. Avoirdupois Weight ; 224. Ancient ; 255.
- WERSCHOCK, a cloth measure in Russia, see *Vershok*.
- WERST, the Russian mile ; i. 302 ; ii. 250.
- WEY, or WEIGH, a weight for various articles, and also a measure for corn in England ; i. 220, 221, 228.
- WHARFAGE, money paid for the use of a wharf.
- WHARFINGER, the keeper or owner of a wharf.
- WHIBA, a corn measure at Tunis ; i. 338.
- WILLIAM D'OR, a gold coin of Cassel. Assay and value ; ii. 158.
- WISPEL, a corn measure in Germany and Prussia ; i. 35, 54, 171, 205, 245, 324, 373.

WISSEL, exchange money in Flanders; i. 19.

WITTEN, an old money of account of Denmark, Pernau, Stettin, &c.; i. 74, 125, 245, 276, 370.

WOOL DRIVERS, persons who buy wool in the country, and carry it to the clothiers or markets to sell again.

WURFE, in Austria, 5 pieces of money.

X

XERAPHIN, a silver coin of Goa, in the East Indies; i. 106.

XESTES, an ancient Greek measure of capacity; ii. 256.

Y

YARD, a long measure in England; i. Introduction, xx. 223, 226; ii. 239. Also 30 acres of land.

YERMEEBESHLEK, a Turkish gold coin; ii. 161.

YUGADA, a land measure in Spain; i. 343.

YUSDROME, a name for the Turkish chequee, or pound; i. 72.

Z

ZAH, a corn measure at Tunis; i. 338.

ZAPPADA, a measure for vineyards in the Ionian states; i. 373.

ZASPEL, a measure for linen and yarn at Leipsic, &c. containing 1600 ells.

ZECCHINO, see *Sequin*.

ZENZERLI, a coin and money of account in Egypt; i. 4.

ZERMAHBUB, a Turkish gold coin, see *Sequin*.

ZIMBIS, see *Cowries*.

ZIMMER, in Germany, mostly 40 pieces; i. 50, 164.

ZLOTI, the Polish Florin; i. 278. Assay and value; ii. 165. Impressions; 199.

ZUCCA, a liquid measure in Corsica; i. 80.

ZURLO, a weight at Aleppo; i. 3.

SUPPLEMENT.

ON THE WEIGHTS, MEASURES, AND MONIES, OF THE EAST INDIES.

PRELIMINARY DOCUMENTS AND EXPLANATIONS.

THIS extensive Supplement has become necessary in consequence of a general Comparison of the Weights, Measures, and Monies of India having taken place after the Article "*East Indies*" was printed in the first Volume; for although it was drawn up with the greatest care, and with the best information that could be then obtained in London, as stated in page 96, yet it is materially deficient in respect to the number of places, which are more than doubled in this Supplement.

That Article, however, is generally correct as far as it extends, particularly the Account of the Three Presidencies, Bengal, Madras, and Bombay; which Account may therefore be considered a proper Introduction to the whole, and ought to be well understood before any further study of the subject is entered upon.

It should have been premised, that the Circular Order issued by his Majesty's Government in 1818, directing all British Consuls abroad to send home verified standards (see Preface, page x), did not extend to the East Indies, and hence the deficiency above mentioned. With a view, therefore, to remedy this want, and to co-operate with government in completing the general Comparison, the Court of Directors, in 1821, issued the following Order.

*Extract of the Public Letter from the Court of Directors to Bengal,
dated London, 10th of January, 1821.*

"A commission having been lately issued by the Crown, to consider the subject of Weights and Measures, we are desirous of being enabled to assist the pending enquiry, by the fullest information which can be procured concerning Weights and Measures, in all countries with which England has commercial relations in Asia.

"For this purpose we forward a number in the packet, the draft of a Letter of Instructions, which we desire you will issue to commercial residents, collectors of customs, and such other persons under your authority, as may be thought competent to furnish the required information. You will communicate the result to us without delay, forwarding from time to time the information received in pursuance of those instructions, until the enquiry be completed."

Draft of Instructions to be issued to Commercial Residents, Collectors of Customs, and other Public Officers, referred to in the foregoing Extract.

You are to procure and forward two sets of models, being accurate counterparts of the standard Weights and Measures in use at your Station, for weighing and measuring goods and merchandize of every description.

In places where different denominations and standards of Weight or Measure are employed for particular articles, distinctly from ordinary commodities, separate counterparts of the various Weights and Measures are to be furnished.

Should Weights or Measures in use at places within your authority vary from those established at your principal station, you will likewise procure distinct sets of Weights or Measures so differing.

It will not be necessary that the sets of models should comprehend subdivisions, nor multiples of the principal Weight or Measure of each series. A model of one in a series will suffice; and a convenient one to be selected for Weights may be that which is nearest to the pound (as the seer and the catty, where maunds and peculs are in use respectively); and in like manner for Measures of length, one that is nearest to the cubit or the ell; and for Measures of capacity, one that is next to the pint or the quart.

To every model should be annexed a specification of the usual subdivisions, or smaller Weights employed as aliquot parts, as well as of the greater Weights used as multiples of that which the model represents. Thus an explanatory note should be annexed to the seer, specifying the number of chattacks contained in it, or other customary divisions; and likewise the number of seers contained in the maund, and of maunds in the candy (where such greater weight also is in use).

Brass, copper, or tutanag are considered to be fit materials of which the models may be made.

The accuracy of the models is to be carefully verified and regularly attested by competent persons.

One set of the models is designed for immediate transmission to England, the other to be retained at the Presidency for subsequent and eventual transmission, as a duplicate in case of miscarriage of the first dispatch. The two sets accordingly are to be assorted and separately packed.

If models of Measures of capacity for meting corn or liquids cannot be provided and forwarded without too great inconvenience, the desired information may be supplied by a careful ascertainment and report of the liquid contents, as corresponding either to a known standard of the like sort, or to cubic inches. Accurate models would however be more satisfactory.

In an explanatory letter accompanying the transmission of the models, you will add such information as you may possess, or can procure, upon the general object of these instructions, with any observations which may occur to you, as throwing light upon the subject. (1821.)

In obedience to the foregoing Circular, numerous packages, containing the required standards, with their specifications, and other explanatory documents, were in due time transmitted to the Court of Directors in London ; and, as they arrived, were delivered to the Author of this work for examination and comparison, as intimated by the following letter from the Secretary of the East India Company.

*East India House,
2d August, 1822.*

SIR,

It having been suggested to the Court of Directors of the East India Company, that several specimens of Weights and Measures, which have been, and are expected to be received from the different Settlements in the East Indies, may be entrusted to you for examination and comparison, I am directed, in accordance with that suggestion, to acquaint you that such of the said specimens as have been received will be delivered to you upon your making application at this house for that purpose, and upon your giving a receipt for the same, specifying that they are the property of the East India Company, and will be returned when required.

A similar communication will be made to you upon the arrival of any further articles of the same description.

I am, Sir,

Your most obedient humble Servant,

To Dr. KELLY.

JOSEPH DART, Sec.

Such were the orders and regulations of the Court of Directors, in pursuance of which all the standards received from India (amounting to more than 300 in number) have been compared with English standards by the Author of this work, or under his immediate superintendence ; and afterwards the principal weights were examined, and their contents verified at the Royal Mint, by *Robert Bingley, Esq. F. R. S.* the King's Assay-Master, whose important assistance throughout the work has so essentially promoted its accuracy. (See Pref. p. xii.)

The results of all these comparisons are comprised in the present Supplement, together with much new and useful information on commercial practice, as communicated in the various dispatches from India, which accompanied the standards.

This Supplement contains the result of another extensive operation, which was also considered a desideratum, namely, a general Assay of the Coins of India. It was executed at the Bombay Mint, in 1821, by *B. Noton*, Esq. Assay-Master to the Company.

This Table of Assays is of peculiar importance to the present undertaking, as it not only shews the Par of Exchange throughout India, but also the weight of each Rupee, which is generally considered an aliquot part of the Seer or other standard of the place to which such Coin belongs. The Report is, therefore, made a leading article here; and with a view to render it still more extensively useful, two columns are added. One is a numerical notation of the Coins, for the convenience of reference; and the other shews their sterling value, according to the Mint price in England, from which their value at any other price may be readily computed. (See Note, p. 332.)

As the Table contains no account of the divisions of the Rupee, this want is supplied in the subsequent pages, by mentioning the Presidency to which each Settlement is subject or subordinate; for it may be inferred, that the Rupee of each place is divided according to the practice of its Presidency.* It will be seen by a reference to the article *East Indies*, vol. 1, that in Bengal the Rupee is divided into 16 Annas, and each Anna into 12 Pice; and that a similar system has been of late adopted at Madras; but at Bombay and most of its subordinates, it is divided into 4 Quarters, and each Quarter into 100 Reas.

* This account of the Presidencies to which the Settlements are subordinate (now published for the first time) has been supplied for this work by *William Wright*, Esq. Chief Auditor of Indian Accounts: and here the Author would wish also to acknowledge the able assistance which he has received from many other officers of the Company, but the list of names would be too numerous. He cannot, however, omit to mention one distinguished character, from whose writings and communications he has obtained much important information. This is *General Sir John Malcolm*, G.C.B. K.L.S. whose valuable Work on *Central India* contains a very clear Specification of the Weights, Measures, and Exchanges, of nearly twenty Cities in the newly-acquired Territories of *Malwa* and its surrounding Districts.

The Dispatches from the Civil Officers in India to the Court of Directors, in answer to the Circular of 1821, have furnished matter for more than 100 new places for this Supplement, that is to say, places on the Metrology of which nothing had been previously published in the English language. This great accession of commercial knowledge is further augmented and improved by the following Table of Assays.

ASSAY REPORT;

Shewing the Mint Standards of Bombay, Calcutta, Madras, and England; and the Weight, Purity, and intrinsic Value, by Assay, of all the Coins, either current in the Honourable Company's Territories under the Presidency of Bombay, or imported as Bullion.—August 4th, 1821.

NAMES OF COINS.		ASSAY.			Value of 100 in Bombay Currency.	Sterling Value.	REMARKS.

								} Imported as bullion, and cur- rent in the Persian Gulf.

* This column is computed by dividing the number of pure grains in 100 Rupees of any place by the number in one Bombay Rupee. Thus it is found that 100 Rupees of Calcutta are worth 106.827 of Bombay (see No. 37). By a similar operation the Par of Exchange between any other two places in the Table may be determined.

ASSAY REPORT *continued.*

Bombay Assay Office,

Aug. 4, 1821.

(Errors excepted).

B. NOTON,

ASSAY MASTER.

** The above Table has been approved and acted upon by Government, and is published with the following additional Signature.

By Order of the Honourable the Governor in Council,

J. FARISH,

SEC. TO GOVERNMENT.

* The sterling value of any Coin is found by multiplying the pure grains, if gold, by 2.1238; and, if silver, by 14364. The product in either case will be in pence sterling.

EXPOSITION

Of the Weights, Measures, and Monies, of the principal trading Places in India, &c.

Note.—The places already described in this Work are referred to in the Supplement, and are enlarged or corrected where necessary.

* * In the following pages, gr. means Grains Troy, and lb. oz. dr. Pounds, Ounces, and Drams Avoirdupois. Also; throughout the work, 1lb.=7000 gr.; 1 oz.=437½ gr.; and 1 dr.=27½ gr. Troy. (See p. 220, vol. 1).

ACHEEN, in Sumatra. See vol. 1, p. 97.

AHMEDABAD,

A City in the province of Gujrat, under the Presidency of Bombay.

For the MONIES of Ahmedabad, see *Assay Report*, No. 68, 69, and 70, p. 330. *

Gold and Silver Weight.

	gr.
1 Ruttee =	2.015
3 Ruttees = 1 Val =	6.045
32 Vals = 1 Tola =	193.440

Commercial Weight.

	lb.	oz.	dr.
1 Seer =	1	0	14½
40 Seers = 1 Maund =	42	4	13

The Seer is divided into halves, quarters, eighths, &c.

Long Measure.

	Eng. Inches.
Guz for Cloth	27¼
Ditto for Velvet	34½
Ditto for Artificers ..	23½

Grain and liquids in this part of India are sold by weight, and this practice is very general throughout Asia.

AHMEDNUGGUR,

A City in the province of Aurungabad, under the Presidency of Bombay.

For the Monies of Ahmednuggur, see *Assay Report*, No. 94 to 97, p. 333.

Gold and Silver Weight.

	gr.
1 Gonje =	1.95
2 Gonjes = 1 Wall =	3.9
4 Walls = 1 Massa =	15.7
12 Massas = 1 Tola =	188.4
24 Tolas = 1 Seer =	4521.6

Commercial Weight.

	lb.	oz.	dr.
1 Chittack =	0	1	15½
16 Chittacks = 1 Seer =	1	15	8
40 Seers = 1 Maund =	78	15	12
3 Maunds = 1 Pullah =	236	15	4
20 Maunds = 1 Candy =	1577	2	4

Dry Measure.

	lb.	oz.	dr.
18 Tanks = 1 Pao =	0	10	13
4 Paos = 1 Seer =	2	11	6
2 Seers = 1 Adholee =	5	6	12
2 Adholees = 1 Pylee =	10	13	8
12 Pylees = 1 Maund =	130	2	0
2½ Maunds = 1 Pullah =	325	5	0
8 Pullahs = 1 Candy =	2602	8	0

* It should be observed, that in the foregoing Table the Silver Coins are computed at 66d. per oz. the new Mint price in England; whereas, in all other parts of this work, the old price is used, viz. 62d. per oz. (See p. 217, vol. 1). These rates may be converted reciprocally into each other, by the proportion of 31. to 33; and the value of the Indian Coins, at any other price, may be found by the following Rule: multiply the value in the column by the market price, and divide by the mint price. Thus, to find the worth of the Bombay Rupee (No. 36) at 60d. per ounce standard, $24,48d. \times 60 \div 66 = 22\frac{1}{3}d.$, the required value.

AHMEDNUGGUR, continued.

The Seer of Weight equals 80 Ankosee Rupees, in which there are $73\frac{1}{2}$ Tolas, gold weight. (See *Assay Report*, No. 42).

The Seer of Capacity is calculated on the grain called Bajree, of which the Seer weighs 110 Ankosee Rupees.

Oil, sugar, ghee, areca nuts, cocoa nuts, indigo, turmeric, and many other articles, are sold by weight; but there are measures formed for them, which assimilate with the Seer of 80 Rupees.

The Seer of saffron, silk, gold thread, and cochineal, equals 72 Tolas, Goldsmiths' weight = 13550 gr. Troy, or 1 lb. 12 oz. 11 dr. Avoirdupois weight.

Long Measure.

	Eng. Inches.
14 Tussoos = 1 Hath	= 14
$1\frac{1}{2}$ Hath = 1 Guz	= $24\frac{1}{2}$

ALLAHABAD, a City in the Province of the same name, under the Presidency of Bengal. See vol. 1, p. 122.

AMBOYNA. See vol. 1, p. 97 and 122.

AMOD, OR AHMOODE,

A Town in the Province of Gujrat, under the Presidency of Bombay.

The Monies of Amod are the same as those of Broach, which see.

Commercial Weights.

	lb.	oz.	dr.
40 Broach Rupees = 1 Market Seer	= 1	0	$3\frac{1}{2}$
40 Seers = 1 Maund	= 40	8	12
20 Maunds = 1 Candy	= 810	15	0

For Dry Goods, Kuppas, and Grains.

41 Broach Rps. = 1 Pergunnah Seer	= 1	0	10
40 Seers = 1 Maund	= 41	9	5
20 Maunds = 1 Candy	= 831	10	4

AMOD, continued.*Commercial Weights.**For Cotton.*

	lb.	oz.	dr.
41 Broach Rupees = 1 Seer	= 1	0	10
42 Seers = 1 Maund	= 43	10	10
20 Maunds = 1 Candy	= 873	4	13
Long Measure or Guz	= $27\frac{1}{8}$	English Inches.	

ANJAR,

A District under the Presidency of Bombay.

For the Monies of this District, see *Assay Report*, No. 69 and 71.

Gold and Silver Weight.

	Gr.
1 Vall	= 5.6
16 Valls = 1 Guddiana	= 89.5

Commercial Weight.

	1 Dokra	=	127.5 gr.	
			lb.	oz. dr.
36 Dokra	= 1 Seer	=	0 10	7 $\frac{3}{4}$
10 Seers	= 1 Dus Serrah	=	6 8	14
40 Seers	= 1 Maund	=	27 3	8

Cotton and iron are sold wholesale by the Maund of 48 Seers, which equals 31 lb. 7 oz. 9 dr.

Dry Measure.

	Cubic Inches.
1 Pallee	= 59.3
8 Pallees = 1 Mapp	= 474.4
4 Mapps = 1 Shye	= 1897.6
16 Shyes = 1 Culsey	= 30361.6 *

Long Measure.

The Guz of 34 Country Inches contains 26.4 English Inches.

* The contents of such Measures of Capacity as are here given in cubic inches, may be determined in gallons, by dividing by 231 for Wine Measure, and 268.8 for Corn Measure. Thus 30361.6 the cubic inches of the Culsey, will be found to equal 131.43 Wine gallons, or 112.9 Corn gallons.

ANJENGO. See vol. 1, p. 98 and 122.

ANKOLA. See *Ahmednuggur*, except for the Seer of Capacity, which is here 4 oz. lighter.

AUMMOODH,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

	lb.	oz.	dr.
The Seer for cotton	= 1	8	0
The Seer for grain and all other goods	2	0	8
For further particulars, see <i>Calpee</i> .			

AURUNGABUNDAR. See vol. 1, p. 99 and 122.

AYER BONGHYE, in the Island of Sumatra. See *Natal*.

BAGULKOTA,

A Pettah or small District in the Dooab, under the Presidency of Bombay.

For the Monies of this place, see *Assay Report*, No. 53.

Weights.

The Cutcha Seer is used for groceries, oils, &c. It weighs 20 Madras Rupees, and therefore equals 8 oz. 3½ dr.

Grain is sold by the Pueca Seer, which weighs 133 Madras Rupees, and equals 3 lb. 6 oz. 11½ dr. It measures 116½ Cubic Inches.

Long Measure.

24 Tussoos make 1 Guz. = 32½ English inches.
The Hath, for measuring cloths and turbands, answers to 19¼ English Inches.

BAIRSEEAH,

A Town in Central India, under the Presidency of Bengal.

BAIRSEEAH, continued.

Weights.

		lb.	oz.	dr.
80 Bhopal Rupees	= 1 Seer	=	1	14 13
5 Seers	= 1 Pusseree	=	9	10 3½
8 Pusserees	= 1 Maund	=	77	1 12
4 Maunds	= 1 Maunee	=	308	7 0
100 Maunees	= 1 Maniasa	=	30843	12 0

For further particulars, see *Mahwa*.

BALLASORE. See vol. 1, p. 122.

BANDA. See vol. 1, p. 99 and 122.

BANJAR MASSIN. See vol. 1, p. 99 and 122.

BANSWARRA. See *Mahwa*.

BANTAM. See vol. 1, p. 100, 122, and 124.

BARDOLER,

A District of Surat, under the Presidency of Bombay.

Commercial Weight.

The Maund of Bardoler contains 39¼ Seers and 2 Pice of Surat = 37 lb. 4 oz. 4¼ dr.

For further particulars, see *Surat*, vol. 1, p. 119 and 123, and also in this Supplement.

BARODA,

A Pergunnah in the District of Broach, under the Presidency of Bombay.

For the Monies, see *Assay Report*, No. 63 to 67.

Commercial Weight.

Pergunnah Seer.

		lb.	oz.	dr.
42 Babashey Rs.	= 1 Pergunnah Seer	=	1	1 2
42 Seers	= 1 Maund	=	44	15 4
20 Maunds	= 1 Candy	=	899	1 0

Town Seer.

41 Babashey Rupees	= 1 Town Seer	=	1	0 11¼
42 Seers	= 1 Maund	=	43	13 15
20 Maunds	= 1 Candy	=	877	7 0

BARODA, *continued.*

Seer for Sea Samum.

		lb.	oz.	dr.
42 Babashey Rupees = 1 Seer	=	1	0	15.8
40 Seers	= 1 Maund	42	7	10.8
20 Maunds	= 1 Candy	849	9	9

The Seer for oil is the Pergunnah weight.

Long Measure.

		Eng. Inches.
24 Tussoos	= 1 Guz.	= 27 $\frac{1}{8}$

BATAVIA. See vol. 1, p. 100, 122, and 124.

BAULEAH,

Under the Presidency of Bengal.

Commercial Weight.

1 Chittack	= 670 $\frac{1}{2}$ gr. Troy.
16 Chittacks	= 1 Seer = 1lb. 8oz. 10dr. Avoir.

Besides the above Seer of 60 Sicca Rupees weight, there is a Seer of 80 Sicca Rupees weight, which equals 2lb. 0 oz. 11 dr.

The Sicca Rupee weight of Bengal is reckoned at 179 $\frac{2}{3}$ English grains, but it varies two or three grains, more or less. The contents here given are those of the actual weights transmitted.

Measure of Capacity for Liquids.

The Seer of 60 Sicca weight equals 1 lb. 8 oz. 10 dr.

The Cubit is 18 English Inches.

BEEMMAR,

In the District of Calpee, under the Presidency of Bengal.

Weights.

Three different Seers have been received from this place, viz.

		lb.	oz.	dr.
1. Khaus Seer	=	1	7	2 $\frac{1}{2}$
2. Omeree Seer	=	1	11	15
3. Channee Seer	=	2	0	10

BEEMMAR, *continued.*

The Long Measure here equals 40 $\frac{3}{4}$ English Inches.

For further particulars, see *Calpee*.

BELGAM,

A Pettah in the Dooab, under the Presidency of Bombay.

For the Monies of this place, see *Assay Report*, No. 55.

Commercial Weight.

The Cutcha Seer, for weighing oils and groceries, equals 20 $\frac{1}{4}$ Madras Rupees = 8 oz. 5 dr.

The Pucca Seer for grain, salt, &c. when filled with nine different kinds of grain, equals 106 $\frac{1}{2}$ Madras Rupees = 2 lb. 11 oz. 8 dr. and measures 93.1 Cubic Inches. See note to *Darwar*.

Long Measure.

		Eng. Inches.
The Guz of 24 Tussoos, for goods	}	= 32 $\frac{1}{2}$
not sold by the piece		
The Hath, for cloths and turbands		= 19 $\frac{1}{2}$

BENARES,

A City in the Province of Allahabad, under the Presidency of Bengal.

For the Rupee of Benares, see vol. i, p. 88.

Weights.

Three different Seers have been transmitted from this city, viz.

		lb.	oz.	dr.
The Seer of 105 Sicca weight	=	2	10	0
Ditto 103 ditto	=	2	9	2
Ditto 96 ditto	=	2	6	7

The Tola weighs 215 grains.

Long Measure.

		Eng. Inches.
The Tailors' Yard	=	33
The Weavers' ditto	=	42 $\frac{1}{2}$
The Cloth Merchants' ditto	=	37 $\frac{1}{2}$
The Architects' ditto	=	25 $\frac{1}{2}$

BENCOOLEN,

In the Island of Sumatra.

For the mode of keeping Accounts here, and the Commercial Weights, see vol. 1, p. 101.

Gold and Silver Weight.

		oz.	dwt.	gr.
	1 Coondee	= 0	0	1.772
30 Coondees	= 1 Keping	= 0	2	5.166
8 Keping	= 1 Ringit	= 0	17	17.333
1½ Ringit	= 1 Tael	= 1	6	14.

Measures of Capacity.

800 Koolahs	= 1 Coyan	= 201600

BENDER ABASSI. See *Gamron*, vol. 1, p. 151.

BENGAL. For the Monies, Weights, and Measures of this Presidency, see the article *Calcutta*, vol. 1, p. 87; and for the Exchanges, see vol. 2, p. 103. See also the *Assay Report* in this Supplement, Nos. 2 and 37.

BETELFAGUI. See vol. 1, p. 40 and 122.

BHEDECK,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Weights.

Three Seers have been received from this place,
viz. . . .

	lb.	oz.	dr.
The Khaus Seer, for goods in general	= 2	1	15
The Roypore Seer for grain (wholesale)	= 2	8	8
Ditto for grain (retail)	= 2	6	0
The Long Measure	= 38½	English Inches.	

BHEDH,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Weights.

	lb.	oz.	dr.
The Seer (retail)	= 1	14	14
The Seer for grain (wholesale)	= 2	11	3
The Long Measure contains	36½	English Inches.	

BHILSA,

A City in Central India, under the Presidency of Bengal.

Coin.

The Bhilsa Rupee is computed here to weigh 167.5 grains. It contains 138.7 grains of pure metal, and is therefore worth about 20d. sterling.

Weights.

	lb.	oz.	dr.
80 Bhilsa Rupees = 1 Seer	= 1	14	10
6 Seers = 1 Pusseree	= 11	7	12
8 Pusserees = 1 Maund	= 91	14	0
30 Pusserees, or } = 1 Maunee	= 344	8	8
3¼ Maunds			
100 Maunees = 1 Maniasa	= 34453	2	0
For dry goods and other articles, the Pusseree consists of 5 Seers only.			
For other particulars, see <i>Malwa</i> .			

BHOOTSUR,

A Pergunnah near Surat, under the Presidency of Bombay.

Weights.

The Maund contains 40 Seers 8 Pice of Surat, and equals 37 lb. 12 oz. Avoirdupois.

Measures.

The only Measure of Capacity is the Pauny Seree of 5 Seers, that is, as much batty or rice in the husk as will, if delivered by weight, amount to

BHOOTSUR, continued.

that quantity, and which equals 4 lb. 11 oz. Avoirdupois.

For further particulars, see *Surat*, vol. 1, p. 119 and 123; and also in this Supplement.

BHOPAL,

A City in Malwa, under the Presidency of Bengal.

Coin.

The Rupee weighs 168.75 grains. It contains 150 grains of pure metal, and is worth $21\frac{1}{4}$ d. sterling.

Weights.

		lb.	oz.	dr.
80 Bhopal Rupees = 1 Seer	=	1	14	$13\frac{1}{4}$
$6\frac{1}{2}$ Seers	= 1 Pusseree	=	12	8 9
40 Pusserees	= 1 Maunee	=	50	1 6 8
100 Maunees	= 1 Maniasa	=	50	14 10 0

For further information, see *Malwa*.

BIRMAN EMPIRE. See *Rangoon*, vol. 1, p. 115.

BOHARE,

A Pergunnah near Surat, under the Presidency of Bombay.

Weights.

The Maund contains $41\frac{1}{2}$ Seers 4 Pice of Surat, and equals 39 lb. 1 oz. Avoirdupois.

For further particulars, see *Surat*.

BOMBAY.

An Account of the Monies, Weights, and Measures of this Presidency will be found in vol. 1, p. 93 and 122; but as the Dispatches, transmitted with the Standards to the Court of Directors, contain some additional matter, and are in par-

BOMBAY, continued.

ticulars more accurate, their contents are here inserted, with the results of several experiments.

For the Coins of Bombay, &c. see *Assay Report*, p. 331.

Gold and Silver Weight.

	gr.
1 Wall =	4.475
40 Walls = 1 Tola =	179

Pearl Weight.

	gr.
1 Tucka =	0.218
$13\frac{1}{4}$ Tuckas = 1 Ruttee =	3
24 Ruttees = 1 Tank =	72

For a full account of the Weights and Mode of valuing Pearls, &c. see vol. 1, p. 95.

Commercial Weight.

	lb.	oz.	dr.
1 Tank =	0	0	2.488
72 Tanks = 1 Seer =	0	11	3.2
40 Seers = 1 Maund =	28	0	0

These weights are used for all heavy goods, excepting Salt.

Grain Measure.

	lb.	oz.	dr.
2 Tippires = 1 Seer =	0	11	3.2
4 Seers = 1 Paily =	2	12	12.8
7 Pailies = 1 Parah =	19	9	9.6
8 Parahs = 1 Candy =	156	12	12.8

Batty is reckoned by the Morah of 25 Parahs.

Salt Measure.

	Cubic Inches.
$10\frac{1}{2}$ Adowlies = 1 Parah =	1607.61
100 Parahs = 1 Anna =	160761
16 Annas = 1 Rash =	2572176

The Anna weighs $2\frac{1}{2}$ Tons, and the Rash 40 Tons.

BOMBAY, *continued.**Liquor Measure.*

(Spirits and Country Arrack.)

The Seer weighs 60 Bombay Rupees, and equals 1 lb. 8 oz. $8\frac{1}{2}$ dr.; and 50 Seers make the Maund.

Long Measure.

Eng. Inches.

16 Tussoos = 1 Hath = 18

24 Tussoos = 1 Guz = 27

All the foregoing Standards are likewise divided into halves, quarters, &c.

The Dispatch, containing the above statements, concludes with the following remark:—

“The preceding Weights and Measures are generally used in Bombay; but it occurs in mercantile transactions, that calculations are made in Pounds, Maunds, and Surat Maunds, which two last weights are sometimes reckoned at 40, $40\frac{1}{2}$, 41, $43\frac{1}{2}$, and 44 Seers; and sometimes in Surat Candies of 20, 21, and 22 Maunds.”

BORNEO. See *Banjar Massin*, vol. 1, p. 99 and 122; and *Succadana*, p. 119.

BOURBON, ISLE OF. See *Mauritius*, vol. 1, p. 110.

BROACH,

A Town and District in the Province of Gujrat, Presidency of Bombay.

For the Monies, &c. see *Assay Report*, p. 330, Nos. 60 and 61.

Commercial Weights.

	lb.	oz.	dr.
40 Broach Rs. Wt. = 1 Kuppas T. Seer	1	0	$3\frac{1}{2}$
40 Seers = 1 Maund	40	8	12
20 Maunds = 1 Candy	810	15	0

BROACH, *continued.*

The following Standards are used by Mupparahs, or Graih-Weighers.

	lb.	oz.	dr.
$40\frac{1}{2}$ Broach Rupees Wt. = 1 Seer	1	0	$5\frac{1}{2}$
40 Seers = 1 Maund	41	1	4
20 Maunds = 1 Candy	821	9	0

Market and Pergunnah Seer for all sorts of Grain, except Sea Samum, which is sold by the Kuppas Town Seer first mentioned.

41 Broach Rupees Wt. = 1 Seer	1	0	10
40 Seers = 1 Maund	41	9	5
20 Maunds = 1 Candy	831	10	14

Market and Pergunnah Seer, used for weighing Cotton only.

41 Broach Rupees Wt. = 1 Seer	1	0	10
42 Seers = 1 Maund	43	10	10
20 Maunds = 1 Candy	873	4	3

Measures of Capacity.

The Seer for Oil and Sea Samum contains 31.87 Cubic Inches, or 0.138 of a Wine Gallon; and is the same as that used at Amod, Dehy, and Jumboosur.

For Castor Oil.

	lb.	oz.	dr.
40 Broach Rupees Wt. = 1 Seer	1	0	$3\frac{1}{2}$
42 Seers = 1 Maund	42	9	$9\frac{1}{2}$
20 Maunds = 1 Candy	852	0	0

This Seer contains 33.03 Cubic Inches, or 0.143 of a Wine Gallon.

Long Measure.

Eng. Inches.

24 Tussoos = 1 Broach Zillah Guz = $27\frac{1}{4}$

Another standard of Long Measure has been received from this district, called the Wusa, which contains 89.6 English Inches, and which is very extensively used in India in the measurement of land.

	Eng. Inches.
1 Wiswusa	4.48
20 Wiswusas = 1 Wusa	89.6
20 Square Wusas = 1 Beega	2 Roods 2 Perch.

BUGWARA,

A Pergunnah near Surat, under the Presidency of Bombay.

Weights.

The Maund contains $38\frac{1}{4}$ Seers 6 Pice of Surat, and equals 36 lb. 8 oz. 5 dr.

The Pauny Seree of 5 Seers weight of batty or rice in the husk, contains 4 lb. 11 oz. Avoirdupois.

For other particulars, see *Surat*.

BULSAR,

A Pergunnah near Surat, under the Presidency of Bombay.

Weights.

The Maund contains $40\frac{1}{2}$ Surat Seers, and equals 37 lb. 15 oz. 8 dr.

The Pauny Seree is the same as that used at Bugwara, which see, as also *Surat*.

BURGONG,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Weights.

	lb.	oz.	dr.
The Seer for goods in general	= 2	10	4
The Seer for grain	= 1	12	3
The <i>Long Measure</i> , called Guz, contains 42 English Inches.			

BUSHIRE, IN PERSIA.

The following Weights and Measures were transmitted to the Court of Directors in 1822, by the Company's Resident at Bushire. The largest weight is the Maund Tabruze, which contains 720 Miscals, and has been found to weigh 53784 Troy Grains, or 7 lb. 10 oz. 15 dr. Avoirdupois. Hence the Miscal answers to 74.7 Troy Grains.

The Miscal (in some places called the Metical) is used in several countries, both in Asia and Africa, and varies from 72 to 75 English Grains. See vol. 2, p. 222.

The Maund Tabruze is divided into halves, quarters, eighths, and sixteenths; but the divisions which have been received do not all answer to their due proportions.

The Long Measures are the Half Guz Shaw, which equals 20 English Inches; and the Half Guz Shaw Bushire, which equals 18.4 English Inches. Thus 23 of the former = 25 of the latter.

BUSSORAH, IN ARABIA,

Has been already described in vol. 1, under the head *Bassora*; but the following information has been recently received from that place by the Court of Directors, and should therefore be given, as containing some additional matter.

Commercial Weight.

	lb.	oz.
1 Vakia	= 4	$13\frac{1}{2}$
24 Vakias = 1 Bussorah Maund	= 116	0

There is a smaller or *Attary* Maund, for the sale of indigo, spices, &c. which is reckoned at 28 lb. Avoirdupois, and is thus divided:

	lb.	oz.
1 Vakia	= 1	$2\frac{1}{2}$
24 Vakias = 1 Maund Attary	= 28	0

Long Measures.

Silks and Woollens are measured by the Aleppo Yard, which equals $26\frac{1}{2}$ English Inches.

Cottons and linens are measured by the Hadeed, which contains $34\frac{1}{2}$ English Inches.

The Bagdad Yard is also used for both purposes, and measures $31\frac{2}{3}$ English Inches.

Articles usually measured by a standard of Capacity are here sold by weight.

CACHAO. See vol. 1, p. 102.

CALCUTTA. For the Monies, Weights, and Measures of this Presidency, see vol. 1, p. 87 and 122; and for the Exchanges, see vol. 2, p. 103. See also *Assay Report* in this Supplement, No. 2 and 37.

CALICUT. See vol. 1, p. 102 and 122.

CALPAR,

A Pergunnah near Surat, under the Presidency of Bombay.

Weights.

The Maund contains $39\frac{1}{4}$ Seers 2 Pice of Surat, and equals 37 lb. 5 oz. 4 dr.

The other Weights and Measures are the same as those of Surat.

CALPEE,

A Town and District in the Province of Agra, under the Presidency of Bengal.

General Division of Weights.

16 Chittacks = 1 Seer

40 Seers = 1 Maund

	lb.	oz.	dr.
The Seer for sugar, metals, and grain	= 2	1	15
for ghee	= 2	6	3
for cotton	= 2	6	12
for grain wholesale	= 2	7	5

Long Measure.

	Eng.	Inches.
4 Paveens = 1 Girrah	=	$2\frac{1}{2}$
16 Girrahs = 1 Guz	=	40

CAMBAY. See vol. 1, p. 103 and 122.

CAMBODIA. See vol. 1, p. 103.

CANANOR. See *Tellicherry*, vol. 1, p. 120.

CANCAO. See vol. 1, p. 103.

CANTON. See *China*, vol. 1, p. 66.

CARWAR. See vol. 1, p. 103 and 122.

CELEBES, ISLE OF. See *Macassar*, vol. 1, p. 107 and 123.

CEYLON, ISLE OF. See vol. 1, p. 104, 105, and 122.

CHANADORE,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

Commercial Weight.

The Seer weighs 74 Ankosee Rupees and 10 Massas, and equals 1 lb. 13 oz. 8 dr.

Measure of Capacity.

The Seer weighs 95 Ankosee Rupees, and its divisions and multiples are as follow:—

	lb.	oz.	dr.
18 Tanks = 1 Pao Seer	=	0	9 $5\frac{1}{2}$
4 Pao Seers = 1 Seer	=	2	5 7
2 Seers = 1 Adholee	=	4	10 14
2 Adholees = 1 Pylce	=	9	5 13
16 Pylees = 1 Maund	=	149	13 7
20 Maunds = 1 Candy	=	2996	12 12

For other particulars, see *Ahmednuggur*.

CHINA. See vol. 1, p. 66 and 122; and also *Fort Marlborough* in this Supplement.

COCHIN. See vol. 1, p. 104 and 122.

COCHIN CHINA. See *Faifoe*, vol. 1, p. 105.

COLOMBO. See vol. 1, p. 105 and 122.

COMMERCOLLY,

In the District of Rajishy, under the Presidency of Bengal.

Weights.

Four different Seers have been transmitted from this Presidency, viz.

	lb.	oz.	dr.
The Seer for brass, } 58 Sicca Weight	= 1	7	9
copper, &c. of ... }			
The Seer of 60 ditto	= 1	8	8
The Seer, Factory Wt. 72 11 An. 7 Pi.	= 1	13	13
The Seer of 78 ditto	= 1	15	12

The above are the actual contents of the Seers received in London, which are lighter than the estimated weight by Rupees. Thus the first is $3\frac{1}{2}$, the second 2, the third $\frac{3}{4}$, and the fourth 3 Drams lighter.

Measures of Capacity.

The Rattan Seer, Dry Measure, and the Bamboo Chungah, Liquid Measure, should each weigh 60 Sicca Weight as above, and contain about $\frac{1}{3}$ of a Wine Gallon.

The *Long Measures* contain, one 24 and another 18 English Inches.

COOLPAHAR,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

	lb.	oz.	dr.
The Seer equals	3	1	$6\frac{1}{4}$
The Grain Measure weighs }	= 5 15 $11\frac{1}{2}$		
2 Seers 15 Chittacks			

COSSIMBAZAR,

A Town in the Province of Bengal.

The following are the contents of the Weights received from this place :—

COSSIMBAZAR, *continued.*

	lb.	oz.	dr.
The Seer of 76 Sicca Weight	= 1	15	$1\frac{1}{2}$
78 ditto	= 1	15	$14\frac{1}{2}$
80 ditto	= 2	0	12
82 10 An.	= 2	1	14

The actual weight of the several Seers above stated is less than the estimated weight by Rupees. Thus the first three are each $1\frac{1}{2}$ Dram lighter, and the last Seer about $\frac{1}{4}$ of a Dram.

The *Liquid Measure* weighs 1 Seer of 80 Sicca weight, as above.

The *Long Measure*, called the Haut, = $19\frac{3}{4}$ English Inches.

DACCA, a city under the Presidency of Bengal. See vol. 1, p. 122.

DARWAR,

A Pettah in the Dooab, under the Presidency of Bombay.

The New Rupee of the Madras mint (for which see *Assay Report*, No. 38) is taken as the standard.

6 Shabee Pice on an average equal 5 Madras Rupees. Hence the Pice weighs 150 Troy Grains.

Commercial Weight.

The Cutch Seer for weighing Oil and Spices, equals 20 Madras Rupees = 8 oz. $3\frac{1}{2}$ dr. It is divided into 72 Tanks, each containing 50 Grains Troy.

Grain and Salt Measure.

The Pucka Seer (sometimes called Pao) equals 116 Madras Rupees, when filled with nine kinds of grain mixed together. It weighs 2 lb. 15 oz. $11\frac{1}{2}$ dr.; and measures 101 Cubic Inches.*

4 Pucka Seers = 1 Pylee or Chittee = 11 lb. 14 oz. 14 dr.

* The nine kinds of Grain usually mixed together in this part of India, in order to ascertain the weight of the Seer of Capacity, are Wheat, Toor, Hurburr, Roolthee, Moony, Oored, Joowaree, Paddy, and Mudkee.

DARWAR, *continued.**Liquid Measure.*

4 Dhurra = 1 Mun
20 Muns = 1 Randy.

The Dhurra generally contains 12 Seers, but varies from 10 to 14.

Long Measure.

Eng. Inches.

The Hath for Turbands and } = 19 $\frac{3}{4}$
other Cotton Cloths }
The Guz for Broad Cloth, } = 32 $\frac{1}{4}$
Chintz, &c. }.

DECKAN POONA,

A City in the Southern Mahratta Country, under the Presidency of Bombay.

For the different Rupees of this place, see *Assay Report*, Nos. 42, 46, 48, and 49.

Goldsmiths' Weight.

Gr.

2 Whats = 1 Goonj = 1.995
2 Goonjees = 1 Wall = 3.99
4 Walls = 1 Massa = 15.97
12 Massas = 1 Tolla = 191.66
24 Tollas = 1 Seer = 4600.

Commercial Weight.

The Seer contains 72 Tanks or Tollas, and equals 80 Ankosee Rupees, or 1 lb. 15 oz. 8 $\frac{1}{2}$ dr.

By this Seer articles of high price, such as silk, saffron, gold-thread, cochineal, spices, &c. are sold.

Ghee, areca-nuts, turmeric, cocoa-nuts, dates, &c. are sold by the Maund of 12 $\frac{1}{2}$ Seers = 24 lb. 10 oz. 4 $\frac{1}{2}$ dr.

Copper, brass, tin, pewter, and bell-metal are sold by the Maund of 14 Seers = 27 lb. 9 oz. 9 $\frac{3}{4}$ dr.

Iron, lead, tobacco, salt-petre, brimstone, oil, and some other articles, are sold by the Pullah of 120 Seers = 236 lb. 9 oz. 2 dr.

Vegetables and fruits are sold by the Maund of

DECKAN POONA, *continued.*

40 Seers; and choonam, charcoal, &c. by the Candy of 20 Maunds. The Dhurra is composed of 10 Seers = 19 lb. 11 oz. 6 $\frac{1}{2}$ dr.

Two other Weights are also used here, viz. the Kucha Punchseery of 2 $\frac{1}{2}$ Seers, and the Punchseery of 5 Seers.

Dry Measure.

lb. oz. dr.

2 Adpaos or } = 1 Pao Seer or } = 0 7 14
Rolhas . } Chipta }
2 Pao Seers = { 1 Adseer or } = 0 15 12
Ashwa.. }
2 Adseers = { 1 Seer or } = 1 15 8 $\frac{1}{2}$
Chathwa }
2 Seers = 1 Adholee = 3 15 1
2 Adholees = 1 Pylee = 7 14 2
12 Pylees = 1 Maund = 94 9 8
2 $\frac{1}{2}$ Maunds = 1 Pullah = 236 7 12
20 Maunds = 1 Candy = 1891 14 0

The Maund is sometimes reckoned at 16 Pylees = 126 lb. 2 oz. Avoirdupois.

There is also another Pullah of 120 Seers = 365 lb. 2 oz. 4 dr.

DEWASS,

A Town in the Province of Malwa, under the Presidency of Bengal.

For the value of the Ougein Rupee, which is current here, see *Assay Report*, No. 56.

Weights.

lb. oz. dr.

80 Ougein Rupees = 1 Seer = 1 15 10
4 $\frac{1}{2}$ Seers = 1 Dhurree = 8 2 7
16 $\frac{1}{2}$ Seers = 1 Maund = 137 8 2
12 Maunds = 1 Maunee = 1650 1 8

For further particulars, see *Malwa*.

DINDORE,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

DINDORE, *continued.**Weights.*

The Seer is divided as at Ahmednuggur, but weighs 76 Ankosee Rupees = 1 lb. 13 oz. 15 dr.

Measures of Capacity.

The Seer of Capacity weighs 100 Ankosee Rupees, and is divided as follows, the Tank being 239½ Grains.

		lb.	oz.	dr.
18 Tanks	= 1 Pao Seer	0	9	13½
4 Pao Seers	= 1 Seer	2	7	6½
2 Seers	= 1 Adholee	4	14	13
2 Adholees	= 1 Pylee	9	13	10
16 Pylees	= 1 Maund	157	10	0
20 Maunds	= 1 Candy	3152	8	0

For further particulars, see *Ahmednuggur*.

DOONGURPOOR,

The Capital of a small Principality, in the Province of Gujrat, under the Presidency of Bombay.

The Salim Shye Rupee is computed to weigh 168.75 grains, but accounts differ as to its fineness.

Weights.

		lb.	oz.	dr.
52 Salim Shye Rupees	= 1 Seer	1	4	0½
10 Seers	= 1 Dhurree	12	8	7½
40 Seers	= 1 Maund	501	2	12
12 Maunds	= 1 Maunee	6014	1	0

For further particulars, see *Mahwa*.

ESSLAMPORE,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Two Seers have been received from this place, which weigh 2 lb. 0 oz. 12 dr. and 2 lb. 3 oz. 15 dr.

ETAWAH, a town in the Province of Agra, under the Presidency of Bengal. See *Calpee*.

FAIFOE. See vol. 1, p. 105.

FORT MARLBOROUGH,

In the Island of Sumatra.

Statements of the Monies, Weights, and Measures, of different parts of Sumatra, are given in vol. 1, with references to each place, p. 119; but the following additional matter, which has been lately transmitted to the Court of Directors, will be also found useful.

Gold and Silver Weight.

		gr.
1 Coondee	=	1.7722
30 Coondees	= 1 Keping	53.166
8 Keping	= 1 Ringit	425.33
1½ Ringit	= 1 Tael	638.

The following Weights are used at Moco Moca, and occasionally at Fort Marlborough.

		gr.
1 Koopang	=	9.967
4 Koopang or Soocoo	= 1 Mas	39.875
4 Mas	= 1 Pauh	159.5
2½ Pauh	= 1 Ringit	425.33
1½ Ringit	= 1 Tael	638.
16 Taels or 24 Ringits	= 1 Catty	10208 =
1 lb. 9 oz. 5 dwt. 8 gr.	Troy, or 1 lb. 7 oz. 5 dr.	

Avoirdupois.

Black pepper is invariably weighed by English standard Weights.

Measures of Capacity.

		Cubic Inches.
1 Chupah	=	63
4 Chupahs	= 1 Koolah	252
800 Koolahs	= 1 Coyan	201600

The Koolah for measuring paddy, rice, and peas, is struck; but it is heaped when measuring white pepper, coffee, baked rice, Indian corn, &c.

The Koolah of Malay rice weighs about 7 lb; that of Bengal rice and that of oil, nearly 8 lb. The Koolah of rice is occasionally used as a

FORT MARLBOROUGH, *continued.*

weight; and in this case 17 Koolahs constitute the Pecul of $133\frac{1}{2}$ lb. Avoirdupois. The Koolah used in the interior districts is about half the size of that now under consideration.

The Coodee or Corge of tobacco consists of 40 Baskets—of every other article of 20.

Long Measures.

		Eng. Inches.
	1 Tempoh	= 4.5
2 Tempohs	= 1 Jankal	= 9
2 Jankals or Spans	= 1 Esto	= 18
2 Estos or Cubits	= 1 Hailoh	= 36
2 Hailohs	= 1 Depoh	= 72

The Fathom of 6 feet has been established as a Standard of Measure in all places here, under the immediate influence of British authority.

*Chinese Weights and Measures used at Fort Marlborough.**Gold Weight.*

The Gold Catty is the same as that before referred to, which equals about 1 lb. 7 oz. $5\frac{1}{2}$ dr.

Commercial Weight.

The Tael equals $1\frac{1}{2}$ oz. Avoirdupois, or 575.625 Grains Troy; and is divided into 10 Chehs, 100 Hoons, 1000 Lees, 10,000 Sees, or 100,000 Hoots.

	lb. Avoirdupois.
16 Taels	= 1 Catty = $1\frac{1}{2}$
100 Catties	= 1 Pecul = $133\frac{1}{2}$

See vol. 1, page 67.

Long Measure.

		Eng. Inches.
	1 Hoon	= 0.144
10 Hoons	= 1 Cho6n	= 1.44
10 Choons	= 1 Cheoh	= 14.4
5 Cheohs	= 1 Gocheoh	= 72
2 Gocheohs or Pointungs }	= 1 Tung	= 144

FURRUCKABAD,

A Town and District in the Province of Agra, under the Presidency of Bengal.

The Rupee here weighs 173 Grains, and contains 165.22 Grains of pure metal. It is therefore worth $24\frac{1}{2}$ d. sterling, at the new Mint price. See vol. 1, p. 88.

Weights.

	lb. oz. dr.
Wholesale Seer of 11 Furrd. Sicca Wt.	= 0 4 $5\frac{1}{2}$
Retail Seer of 14 ditto	= 0 5 $8\frac{1}{2}$
Spice Seer of 82 ditto	= 2 0 7

The Weight of the above Spice Seer has been found 1 Dram heavier than the estimated weight by Rupees.

GAMRON. See vol. 1, p. 122 and 151.

GHOUHOWN,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Weights.

	lb. oz. dr.
The Seer (wholesale)	= 2 2 0
The Seer (retail)	= 2 4 $12\frac{1}{2}$

GHROWLLE,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Weights.

The Seer equals 1 lb. 15 oz. $0\frac{1}{4}$ dr.
The Grain Measure contains 1 Seer 5 Chit-tacks = 2 lb. 8 oz. 12 dr.
The Guz measures $39\frac{1}{4}$ English Inches.

GOA. See vol. 1, p. 106 and 122; and also *Assay Report*, No. 75.

HANSOOT,

A Town in the District of Broach, under the Presidency of Bombay.

For the Monies, see *Assay Report*, Nos. 60 and 61.

*Weights.**Market Seer.*

		lb.	oz.	dr.
38 Broach Rupees Wt.	= 1 Seer	=	0 15	7
40 Seers	= 1 Maund	=	38 9	9
20 Maunds	= 1 Candy	=	771 15	4

Pergunnah Seer.

		lb.	oz.	dr.
38½ Broach Rupees Wt.	= 1 Seer	=	0 15	11
40 Seers	= 1 Maund	=	39 3	10
20 Maunds	= 1 Candy	=	784 8	8

The Pergunnah Seer, as above stated, is 1 Dram heavier than the estimated weight by Rupees.

Oil Measure.

		lb.	oz.	dr.
38 Broach } Rs. Wt. }	= 1 Seer	=	0 15 7	= { 31½ Cubic Inches.
42 Seers	= 1 Maund	=	40 8 6	
20 Maunds	= 1 Candy	=	810 7 8	

Sea Samum is weighed by the Market Seer.

Long Measure.

24 Tussoos = 1 Guz = 27⅞ English Inches.

HAVERY,

A Pettah in the Dooab, under the Presidency of Bombay.

Weights.

The Cutch Seer for weighing ghee, tamarinds, pepper, &c. contains,

		oz.	dr.
In buying, 23½ Madras Rupees Wt.	= 9	9	
In selling, 20½ ditto	= 8	4½	

The Dhurra for buying is 12½ Seers; and for selling, 12 Seers.

HAVERY, continued.

The Pucca Seer for grain, salt, &c. contains 82 Cubic Inches; and when filled with nine kinds of grain, mixed together, weighs 94½ Madras Rupees, or 2 lb. 6 oz. 13 dr. See the note to Darwar.

The Long Measure is the Guz of 24 Tussoos, which equals 34¼ English Inches.

HOOGHLEY. See vol. 1, p. 123.

HUMMERPORE,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Weights.

The Seer contains 2 lb. 0 oz. 7½ dr.

The Guz equals 39 English Inches.

HURRUPAUL,

Under the Presidency of Bengal.

The Bazar Seer of 60 Sicca weight has been found to weigh 1 lb. 8 oz. 8½ dr. which is nearly 2 drams lighter than the estimated weight by Rupees.

The Pao, Dry Measure, contains 31 Sicca weight 14 Annas, and equals 13 oz. nearly.

Liquids are sold by the Seer of 60 Sicca weight, which should equal 1 lb. 8 oz. 10 dr.

HUTARGAM,

A Pergunnah near Surat, under the Presidency of Bombay.

The Maund contains 40 Seers 8 Pice of Surat, and equals 37 lb. 13 oz. 10 dr.

For further particulars, see *Surat*.

INDORE,

A City in the Province of Malwa, under the Presidency of Bengal.

INDORE, *continued.*

For the Monies of Indore, see *Assay Report*, Nos. 56 and 57.

Weights.

		lb.	oz.	dr.
82 Ougien Rups.=1 Seer		= 2	0	6½
5 Seers	= { 1 Pusseree } or Dhurree	= 10	2	1½
20 Seers	= 1 Maund	= 40	8	6
12 Maunds	= 1 Maunee	= 486	4	8

The above Pusseree is called the Small or Kuranah (Dry Goods) Pusseree, by which every thing is sold in the Bazar; but the Bunniah (Retail Merchant) purchases grain by a larger or Grain Pusseree, which equals 10 lb. 4 oz. 11 dr. The Maund for Grain consists only of 20 Seers; but the Maund for Kuranah, as opium, ghee, spices, oil, and the like, is 40 Seers.

For further information, see *Malwa*.

JAMKHAIR,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

Commercial Weight.

The Seer weighs 80 Ankosee Rupees, and equals 1 lb. 15 oz. 8½ dr.

Measure of Capacity.

The Seer weighs 93½ Ankosee Rupees and 1¼ Massa. Its divisions and multiples are as follow:

		lb.	oz.	dr.
18 Tanks	= 1 Pao Seer	= 0	9	3½
4 Pao Seers	= 1 Seer	= 2	4	14½
2 Seers	= 1 Adholee	= 4	9	13
2 Adholees	= 1 Pylee	= 9	3	10
16 Pylees	= 1 Maund	= 147	10	0
20 Maunds	= 1 Candy	= 2952	8	0

For other particulars, see *Ahmednuggur*.

JAPAN. See vol. 1, p. 196.

JAVA. See *Bantam* and *Batavia*, vol. 1, p. 100, 122, and 124.

JUMBOOSUR,

A Town in the Province of Gujrat, and District of Broach, under the Presidency of Bombay.

*Commercial Weight.**Market Seer.*

		lb.	oz.	dr.
40 Broach Rupees Wt.=1 Seer		= 1	0	2½
40 Seers	= 1 Maund	= 40	6	4
20 Maunds	= 1 Candy	= 807	3	0

The above Seer has been found 1 Dram lighter than the estimated weight by Rupees; and the following Seer has been found ¼ of a Dram heavier.

Pergunnah Seer for Dry Goods.

		lb.	oz.	dr.
40¼ Broach Rupees Wt.=1 Seer		= 1	0	9
40 Seers	= 1 Maund	= 41	6	8
20 Maunds	= 1 Candy	= 828	2	0

In weighing cotton the Market Seer is used, 42 of which are reckoned to the Maund.

Long Measure.

24 Tussoos = 1 Guz = 27½ English Inches.

For Measures of Capacity, see *Broach*.

JUNGYPORE,

A Town in the Province and under the Presidency of Bengal.

The Seer, which is divided into 16 Chittacks, = 1 lb. 8 oz. 0½ dr.

The Seer, Liquid Measure, contains 50½ Cubit Inches.

The Cubit measures 18 English Inches.

JUNKCEYLON. See vol. 1, p. 106 and 123.

KAIRA,

A District under the Presidency of Bombay.
For the Rupees, see Remarks on *Assay Report*,
Nos. 62 to 67.

Two standards only have been received from
this place, viz. the Seer and the Guz. The for-
mer weighs 1 lb. 0 oz. 15½ dr.; and the latter
measures 27¼ English Inches.

KATEE,

A District within the Collectorship of Ahmed-
nuggur, under the Presidency of Bombay.

	lb.	oz.	dr.
The Seer weighs 80 Ankosee Rupees =	1	15	8½
The Seer of Capacity = 95 ditto =	2	5	8

For further particulars, see *Ahmednuggur*.

KOOMBHAREEA,

A Pergunnah near Surat, under the Presi-
dency of Bombay.

The Maund contains 40 Seers 8 Pice of Surat
= 37 lb. 13 oz. 10 dr. See *Surat*.

KOTAH,

A City in Malwa, under the Presidency of
Bengal.

The Kotah Rupee weighs 174.8 grains, and
contains 159.7 grains of pure metal. It is there-
fore worth 23d. sterling.

Weights.

		lb.	oz.	dr.
30 Kotah Rupees = 1 Seer	=	0	12	0
5 Seers	= 1 Dhurree	=	3	12 0
40 Seers	= 1 Maund	=	30	0 0
12 Maunds	= 1 Maunee	=	360	0 0

Measures.

48 Pice	= 1 Pye	=	1	14	5½
18 Pye	= 1 Seyn	=	34	2	3
20 Seyn	= 1 Maunee	=	682	11	12

KOTAH, continued.

The Kotah Pice, on which this is founded,
weighs 18 Massah, or 276.6 Grains.

For other particulars, see *Malwa*.

KOTOOL,

A District within the Collectorship of Ahmed-
nuggur, under the Presidency of Bombay.

The Seer of Capacity weighs 100 Ankosee Ru-
pees = 2 lb. 7 oz. 6½ dr.

The other Weights and Measures are the same
as at Ahmednuggur.

KURDAH,

A Town in the Province of Gujrat, under the
Presidency of Bombay.

	lb.	oz.	dr.
The Seer weighs 80 Ankosee Rupees =	1	15	8½
The Seer of Capacity 90 ditto =	2	3	7½

For the rest, see *Ahmednuggur*.

KURMULLA,

A District within the Collectorship of Ahmed-
nuggur, under the Presidency of Bombay.

The Seer of Capacity weighs 100 Ankosee Ru-
pees = 2 lb. 7 oz. 6½ dr.

For other particulars, see *Ahmednuggur*.

KUROS,

A Pergunnah near Surat, under the Presidency
of Bombay.

The Maund contains 40½ Surat Seers = 37 lb.
15 oz. 8½ dr. See *Surat*.

LUCKIPORE,

A Town in the Province of Bengal.

The following are the actual contents of 4 Seers
which have been received from this settlement:—

LUCKIPORE, *continued.*

	An. Pi.	lb. oz. dr.
Factory Seer of 72	11 7	Sicca Wt. = 1 14 2½
Seer of 80		= 2 1 1
Seer of 82		= 2 1 13
Bazar Seer of 82	10	= 2 1 14

The last of these Seers agrees very nearly with the estimated weight by Rupees. The first is 4¼ dr. heavier; the second, 3½; and the third, 2¼ dr.

Cloth Measure.

	Eng. Inches.
The Cubit for measuring brown cloth	= 19
Ditto washed cloth	= 18

LUCKNOW,

A City in the Province of Oude, under the Presidency of Bengal.

Accounts are kept in Rupees. 93 Sicca Rupees, 13 Annas, 6 Pice = 100 Lucknose. Thus the Rupee of Lucknow weighs 168.6 grains.

The Seer weighs 2 lb. 7 oz. 6¼ dr.

MACASSAR. See vol. 1, p. 107 and 123.

MADRAS. For the Monies, Weights, and Measures of this Presidency, see vol. 1, p. 90 and 123; for the Exchanges, see vol. 2, p. 103. See also *Assay Report* in this Supplement, Nos. 3 and 38.

MAGINDANAO. See vol. 1, p. 107.

MALACCA. See vol. 1, p. 108 and 123.

MALDA,

A Town in the Province, and under the Presidency of Bengal.

The Standards received from this place are,

	lb. oz. dr.
Seer of 100 Sicca Wt. used at Malda	= 2 9 0
Ditto 96	Mogulbarry = 2 7 5½
Ditto 82 10 An.	Jellalpore = 2 1 14
Ditto 80	English Bazar = 2 0 14¼

MALDA, *continued.*

The three first of the above Seers are each 1 Dram lighter than the estimated weight by Rupees, and the fourth is ½ Dram heavier. Each Seer is divided into 16 for Chittacks, and multiplied by 40 for the Maund.

The Seers of Capacity received, measure,

	Cubic Inches.
Seer of Malda	= 72
Ditto Mogulbarry	= 69.7
Ditto Jellalpore	= 57.7
Ditto English Bazar	= 60

MALDIVE ISLANDS. See vol. 1, p. 108.

MALWA,

An extensive Territory of Central India, under the Presidency of Bengal.

Accounts are kept here in Current Rupees, Annas, and Pice.

In the inferior departments of business each Pice is subdivided into 2 Adillahs, 4 Chedaums, 8 Dumries, 4 Gundas, and 96 Cowries. All these divisions are imaginary Monies, except the Cowries or Shells; for a description of which see the places referred to in the Index, vol. 2, p. 275.

The Silver Rupee varies both in its weight and fineness in the several mints of Malwa; and as the Seer is reckoned to weigh a certain number of the Rupees of the place, the Commercial Weights of Central India are various, as will be stated under different heads in this Supplement.

The only uniform weight in this territory is that for the precious metals, which is reckoned as follows:—

Gold and Silver Weight.

	Gr.
1 Chawl	= 0.247
8 Chawls	= 1 Ruttee = 1.979
8 Ruttees	= 1 Massa = 15.833
12 Massas	= 1 Tolah = 190.

MALWA, *continued.**Commercial Weight.*

		lb.	oz.	dr.
84 Salim Shye Rupees	= 1 Seer	= 2	0	6
5 Seers	= 1 Dhurree	= 10	1	14
20 Seers	= 1 Maund	= 40	7	8
12 Maunds	= 1 Maunee	= 485	10	0

The above is the *Banswarra Weight*, which is extensively known in Malwa; but many other kinds are also used there, as will be shewn in their proper places.

Long Measure.

The *Guz* is the most common measure of length: in some places it equals 28 English Inches, and in others 32 Inches.

The *Wussa* is in general use here, particularly for measuring land; and it answers to 7 Feet 5½ Inches, English.

MALWA, *continued.**Land and Road Measures.*

The *Beega*, or Indian Acre, contains 20 Square Wusas, or 60 Square Guz, and therefore varies as follows:—

	A.	R.	P.
20 Wusas squared	= 0	2	2 English
60 Guz ditto, at 28 Inches	= 0	1	29
Ditto at 32 ditto	= 0	2	17

The *Cos*, or Indian Mile, varies here from 1½ to 2 English Miles. *

MANGALORE. See vol. 1, p. 108 and 123.

MANILLA. See vol. 1, p. 109.

MASULIPATAM. See vol. 1, p. 109 and 123.

MAURITIUS. See vol. 1, p. 110.

MERGUI. See *Rangoon*, vol. 1, p. 115.

* As Malwa has but recently become subject to the East India Company, no account of its Metrology has been yet transmitted to the Court of Directors, in answer to their Circular of 1821. This want, however, has been in a great measure supplied by SIR JOHN MALCOLM, in his "*Memoir of Central India*," published in 1823; and from that important work the different articles in this Supplement, relating to Malwa, have been, by permission, extracted. (See Note, p. 330).

It may be proper here to state, that as that Circular related only to Commercial Weights and Measures, no account has been transmitted respecting the *Road Measures* of India. Much useful information on this subject will, however, be found in the "*Memoir of a Map of Hindostan*," by MAJOR RENNELL, late Surveyor General of Bengal; and in the "*Asiatic Researches*" (vol. v) by H. T. COLEBROOKE, Esq. late President of the Asiatic Society of Calcutta.

From these authorities, it appears that the *Cos* (also called the *Cros*, *Crosa*, or *Hardary*) although differing in certain provinces of India, is notwithstanding more uniform than the Mile in several countries of Europe. It is, generally, of two sorts, namely, the *Standard Cos* and the *Common Cos*. The former is deduced from some scientific archetype, such as a degree of the meridian; and the latter from popular computation. Thus the most general standard is 35 Cos to a degree, and some are 37½, 40, and 45. The Common Cos equals, on an average, nearly 2 English Miles; and 6 of these, in a direct and horizontal line, answer to about 7, according to the usual windings of the roads.

It is customary in many parts of India, as in several other countries, to estimate Itinerary Measures by time; that is, by the number of hours required, at an ordinary rate of travelling, to go any given distance. (See vol. 1, p. 11 and 117).

MIRZAPORE. See vol. 1, p. 123.

MOCHA. See vol. 1, p. 257 and 123.

MOCO MOCA. See *Sumatra*.

MOLUCCA ISLANDS. See *Amboyna*, vol. 1, p. 97 and 122; *Banda*, p. 99 and 122; and *Ternate*, p. 120 and 123.

MOTA,

A Pergunnah, near Surat, under the Presidency of Bombay.

The Maund contains $40\frac{1}{4}$ Seers 2 Pice of Surat = 38 lb. 4 oz. $4\frac{1}{2}$ dr.

For other particulars, see *Surat*.

MOWDHAW,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Weights.

	lb.	oz.	dr.
The Seer (wholesale) =	2	2	$15\frac{1}{2}$
Ditto (retail) =	1	15	$1\frac{1}{2}$

The Dry Measure contains

1 Seer 11 Chittacks = 3 4 $7\frac{1}{2}$

The Cloth Measure = $38\frac{1}{4}$ English Inches.

MUNDISSOR,

A City in the Province of Malwa, under the Presidency of Bengal.

		lb.	oz.	dr.
92 Salim Shye Rupees = 1 Seer	=	2	3	$7\frac{1}{2}$
4 Seers	= 1 Dhurree	8	13	15
15 Seers	= 1 Maund	33	4	$4\frac{1}{2}$
12 Maunds	= 1 Maunee	399	3	3

For other particulars, see *Malwa*.

MUSCAT. See vol. 1, p. 123.

MYSORE. See vol. 1, p. 111 and 123. See also *Assay Report*, Nos. 9, 76, and 87.

NASSUCK,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

Weights.

Ankos. Rs. Massas. lb. oz. dr.

The Seer weighs ---- 79 4 = 1 15 $4\frac{1}{2}$

The Seer of Capacity .. 99 2 = 2 7 $1\frac{1}{2}$

For further particulars, see *Ahmednuggur*.

NATAL,

A Town in the Island of Sumatra.

The Monies of this place have been already described in vol. 1, p. 112, where also a concise view of the Weights will be found; but the following documents are more full and authentic, which have been transmitted with Standards, in obedience to the Circular of 1821.

Gold and Silver Weight.

		Gr.
1 Rackay	=	1.52
24 Rackays = 1 Ammas	=	36.5
16 Ammas = 1 Tael	=	584

Benjamin Weight.

		lb.	oz.	Avoir.
1 Tael	=	0	$1\frac{1}{2}$	
48 Taels	= 1 Catty Ootan	=	4	0
20 Catties Ootan = 1 Tompong	=	80	0	

Camphor Weight.

		lb.	oz.	Avoir.
16 Taels	= 1 China Catty	=	1	$5\frac{1}{2}$
3 China Catties = 1 Catty Ootan	=	4	0	

NATAL, *continued.**Grain and Liquid Measure.*

		Cubic Inches.
	1 Pakha =	33.575
12 Pakhas	= 1 Sukat =	402.9
10 Sukats	= 1 Tub =	4029
80 Tubs	= 1 Coyan =	322320

NEW HOOBLY,

A Pettah in the Dooab, under the Presidency of Bombay.

Weights.

The Cutcha Seer for weighing oils and groceries equals $20\frac{3}{4}$ Madras Rupees = 8 oz. 6 dr.

The Pucka Seer (wholesale) for measuring grain, salt, &c. contains $106\frac{1}{2}$ Madras Rupees = 2 lb. 11 oz. 13 dr.

The Pucka Seer (retail) measures 90 Cubic Inches, and when filled with nine kinds of grain, equals $103\frac{1}{4}$ Madras Rupees, or 2 lb. 10 oz. 10 dr.

The Dhurra contains 13 Seers. (See Note, p. 341.)

The Guz of 24 Tussoos, for goods not sold by the Piece, measures $31\frac{1}{4}$ English Inches.

For further particulars, see *Darwar*.

NEYWASSA. See *Ahmednuggur*.

NOLYE,

A Town in the Province of Malwa.

Weights.

		lb.	oz.	dr.
80 Ougein Rupees	= 1 Seer =	1	15	10
5 Seers	= 1 Dhurree =	9	14	2
20 Seers	= 1 Maund =	39	8	8
12 Maunds	= 1 Maunee =	474	6	0

For further particulars, see *Malwa*.

NOWLGOOND,

A Pettah in the Dooab, under the Presidency of Bombay.

NOWLGOOND, *continued.**Weights.*

The Cutcha Seer for weighing oils and groceries contains $20\frac{3}{4}$ Madras Rupees = 8 oz. $8\frac{1}{2}$ dr.

The Pucka Seer for measuring grain, salt, &c. measures 96.6 Cubic Inches, and weighs $110\frac{1}{4}$ Madras Rupees, or 2 lb. 13 oz. $5\frac{1}{2}$ dr.

The Guz of 24 Tussoos = 33 English Inches

The Hath for Cloth = $18\frac{1}{4}$ ditto.

For further particulars, see *Darwar*.

OCKLESUR,

A Town in the Province of Gujrat, District of Broach, under the Presidency of Bombay.

*Weights.**Market Seer.*

		lb.	oz.	dr.
38 Broach Rupees Wt.	= 1 Seer =	0	15	$6\frac{1}{4}$
40 Seers	= 1 Maund =	38	8	13
20 Maunds	= 1 Candy =	771	0	4

Pergunnah Seer,

for weighing Kuppas and Grains.

		lb.	oz.	dr.
$39\frac{3}{4}$ Broach Rupees Wt.	= 1 Seer =	1	0	$2\frac{1}{4}$
40 Seers	= 1 Maund =	40	6	14
20 Maunds	= 1 Candy =	808	9	8

The Pergunnah Seer received from this place, as above stated, is 1 Dram heavier than the estimated weight by Rupees.

The Measures for oil and sea samum, and the Long Measure, are the same as at *Hansoot*, which see.

OMUTWARRA,

A District in the Province of Malwa, under the Presidency of Bengal.

OMUTWARRA, *continued.**Weights.*

		lb.	oz.	dr.
81 Salim Shye Rs.	= 1 Seer	=	1 15	3½
3½ Seers	= 1 Pusseree	=	6 13	5
2 Pusserees	= 1 Dhurree	=	13 10	10
4 Dhurrees	= 1 Maund	=	54 10	8
8 Maunds	= 1 Maunee	=	437 4	0
100 Maunees	= 1 Maniasa	=	43725 0	0

For further particulars, see *Malwa*.

OUGEIN,

A Town in the Province of Malwa, under the Presidency of Bengal.

For the Monies, see *Assay Report*, No. 56.

Weights.

		lb.	oz.	dr.
80 Ougein Rupees	= 1 Seer	=	1 15	10
5½ Seers	= 1 Dhurree	=	11 5	14
16½ Seers	= 1 Maund	=	33 5	13
12 Mannds	= 1 Maunee	=	400 5	12

For further particulars, see *Malwa*.

PAICHAL,

A Pergunnah near Surat, under the Presidency of Bombay.

The Maund contains 48 Seers 8 Pice of Surat = 45 lb. 4 oz. Avoirdupois. See *Surat*.

PALIMBANG, a Town in Sumatra. See vol. 1, p. 112 and 123.

PALLODA,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

The Seer weighs 78 Ankosee Rupees and 10½ Massas = 1 lb. 15 oz. 2 dr.

The Seer of Capacity weighs 103½ Ankosee Rupees, and is divided and multiplied as follows, the Tank being equal to 248 Grains.

PALLODA, *continued.*

		lb.	oz.	dr.
18 Tanks	= 1 Pao Seer	=	0 10	3½
4 Pao Seers	= 1 Seer	=	2 8	13
2 Seers	= 1 Adholee	=	5 1	10
2 Adholees	= 1 Pylee	=	10 3	4
16 Pylees	= 1 Maund	=	163 4	0
20 Maunds	= 1 Candy	=	3265 0	0

For further particulars, see *Ahmednuggur*.

PANDREE,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

The Seer = 2 lb. 11 oz. 12 dr.

The Long Measure = 40½ English Inches.

PANWARREE,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

The Seer = 2 lb. 2 oz. 2 dr.

The Measure for Grain contains 2 Seers 13 Chittacks = 6 lb. 0 oz. 2 dr.

The Long Measure = 36½ English Inches.

PARNAIR,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

All the Weights and Measures here are the same as at Ahmednuggur, except the following:

	lb.	oz.	dr.
The Seer weighs 76½ Ankosee Rupees	=	1 14	2½
The Seer of Capacity contains 95 Ankosee Rupees and 7 Massas	=	2 5	2

PARNERE,

A Pergunnah near Surat, under the Presidency of Bombay.

The Weights and Measures of this place agree

PARNERE, *continued.*

with those of Surat, except in the following particular:

The Pauny Seery Measure contains 5 Seers, that is, as much batty or rice in the husk as will, if delivered by weight, amount to that quantity. See Note to *Darwar*.

PATNA,

A City in the Province of Bahar, under the Presidency of Bengal.

100 Patna Rupees = 95 Sicca Rupees 11 Annas.

Goldsmiths' Weight.

Gr.

The Ruttee = $3\frac{1}{8}$ The Massa = $18\frac{1}{2}$

The Tolah = 209

The above Weights, and also the following, have been received without any specification of their divisions or multiples.

	lb.	oz.	dr.
The Seer of 45 Sicca Weight	= 1	2	9
48 ditto	= 1	3	12
72 ditto	= 1	13	$10\frac{1}{2}$
72 11 7	= 1	14	2
76 ditto°	= 1	15	$4\frac{1}{4}$
80 ditto	= 2	0	$14\frac{1}{2}$
81 5	= 2	1	$6\frac{1}{4}$

These Seers have been each found to weigh about 1 Dram more than the result, if computed at $179\frac{1}{2}$ Grains to the Sicca Rupee.

Oil and all liquids are sold by the above Seers of 45, 76, and 80 Sicca Weight; and also by Measures, standards of which have been transmitted to London, with the Seers, and have been found respectively to measure $32\frac{1}{2}$, 54.2, and 57.75 Cubic Inches.

Long Measure.

Eng. Inches.

The Cloth and Carpet Measure = 33

The Broad Cloth = $42\frac{1}{2}$ PATNA, *continued.*

Other Measures have been received of $36\frac{1}{2}$, 40, 41, 42, 47, and 51 Inches; but their purposes are not mentioned.

PEGU. See vol. 1, p. 113 and 123.

PERSIA. See vol. 1, p. 277. See also *Assay Report*, Nos. 8, 73, 74, and 75.

PHILLIPINE ISLANDS. See *Magindanao*, vol. 1, p. 107; and *Manilla*, p. 109.

PERTABGHUR,

A Town in Central India, under the Presidency of Bengal.

For the Rupee see *Assay Report*, No. 85.

Commercial Measures and Weights.

	lb.	oz.	dr.
80 Salim Shye Rupees = 1 Seer	= 1	14	$13\frac{1}{2}$
5 Seers = 1 Dhurree	= 9	10	$3\frac{1}{2}$
20 Seers = 1 Maund	= 38	8	14
12 Maunds = 1 Maunee	= 462	10	8

For further particulars, see *Malwa*.

PONDICHERRY. See vol. 1, p. 113 and 123.

PRINCE OF WALES' ISLAND.

The mode of keeping accounts here is stated in vol. 1, p. 114; but the description of Weights and Measures in that article is not sufficiently ample, nor is it entirely correct. The following statements are therefore extracted from a very copious Dispatch on the subject, lately transmitted to the Court of Directors with the Standard Weights and Measures.

Goldsmiths' Weight.

Gr.

12 Sagas = 1 Mayam	= 52
16 Mayams = 1 Bongkal, or 2 Span. Dol.	= 832
20 Bongkals = 1 Catty	= 16640

PRINCE OF WALES' ISLAND, *continued.*

A Catty of gold, it should be observed, is heavier than the common Catty, in the proportion of 105 to 78. At Achet, Siak, Malacca, and places on the east side of the Malay peninsula, the Bongkal and Catty Weights are about 10 per cent. less than the above. There is also a Bongkal *Measure*, which is in frequent use amongst Europeans and Native Traders to the eastward, and which is found to weigh very nearly 2 Dollars, or 832 Troy Grains.

Commercial Weight.

		lb.	oz.	dr.
	1 Tahlil	=	(nearly)	23
16 Tahils	= 1 Catty	=	1	6 13
100 Catties	= 1 Malay Pikul	=	142	10 10 $\frac{2}{3}$
3 Pikuls (Mal.)	= 1 Bhar	=	428	0 0
40 Pikuls (Chi.)	= 1 Koyan	=	5333	0 0

There are two kinds of Catties and Pikuls used in the Bazar—the Malay and the Chinese. The Malay Catty weighs 24 Spanish Dollars; the Chinese, 22 $\frac{1}{2}$. Hence 15 Catties Malay = 16 Chinese. By the Malay or large Pikul of 142 $\frac{2}{3}$ lb. Avoirdupois, merchants purchase pepper, tin, &c. from the native vessels; but sell by the Chinese, or Bazar Pikul of 133 $\frac{1}{3}$ lb.

Measures of Capacity.

		Cubic Inches.
4 Chupahs	= 1 Gantang	= 271.65
800 Gantangs	= 1 Koyan	= 217320.

The Chupah is divided into halves and quarters.

There is a Measure used here, as well as in most of the neighbouring countries, termed a Parra, which is nominally a Measure of 10 Gantangs; but sometimes consists of 5, 15, or 20 Gantangs. It is by the Parra, the contents of which being previously settled, that rice, salt, and some other articles, are in general measured; and it is always by a Measure of this description that betel-nut is purchased on the Pedir Coast.

PRINCE OF WALES' ISLAND, *continued.**Long Measure.*

The Hasta or Cubit, which is divided into halves and quarters, equals 18 English Inches; and is used by the Malays and many other natives for measuring cloths. But the Chinese shopkeepers in the Bazar make use of the English Yard.

Land Measure.

		Eng. Yards.
4 Hastas	= 1 Depa	= 2
2 Depas	= 1 Jumba	= 4
20 Jumbas	= 1 Orlong	= 80
Hence the Orlong or 80 Square Yards = 1 Acre		
1 Rood 12 Perches, English.		

RADNAGORE,

Under the Presidency of Bengal.

Weights.

The Seer of 62 Sicca Weight, used in the Bazar = 1 lb. 9 oz. 7 $\frac{1}{4}$ dr.

The Seer of 64 Sicca Weight, used for sugar and jagry = 1 lb. 10 oz. 3 $\frac{1}{4}$ dr.

The Seer of 80 Sicca Weight, used for ghee = 2 lb. 0 oz. 14 $\frac{1}{4}$ dr.

The above Seers have been found to differ from their estimated weight in Rupees, as follows:—

The first, $\frac{1}{3}$ Dram heavier; the second, $\frac{1}{4}$ Dram lighter; and the third, 1 $\frac{1}{4}$ Dram heavier.

Measures of Capacity.

The Baugee, by which paddy is sold, weighs 5 Seers of 62 Sicca Weight, which is, however, subject to variation. The Baugee for rice, weighs 6 Seers of 62 Sicca Weight, which varies according to the season.

		Cubic Inches.
The Seer for oil of 62 Sicca Weight	=	56
Ditto 80 ditto	=	60

The principal Long Measure is the Haut of 18 English Inches.

RAHORY,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

The Seer of Capacity weighs $115\frac{1}{2}$ Ankosee Rupees = 2 lb. 13 oz. $8\frac{1}{2}$ dr.; and that of Weight = 77 Ankosee Rupees = 1 lb. 14 oz. $5\frac{1}{2}$ dr.

The other Weights and Measures are the same as at Ahmednuggur.

RAJAO,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

The Monies, Weights, and Measures here agree with those of Ahmednuggur, except that the Seer of Capacity weighs 100 Ankosee Rupees = 2 lb. 7 oz. $6\frac{1}{4}$ dr.

RANDIER. See *Surat*.

RANEE BEDNORE,

A Pettah in the Dooab, under the Presidency of Bombay.

The Pucka Seer for buying grain, salt, &c. weighs $116\frac{1}{2}$ Madras Rupees = 3 lb. Avoirdupois. The Pucka Seer for selling weighs $111\frac{1}{2}$ Madras Rupees. When filled with nine kinds of grain, it equals 2 lb. 13 oz. 13 dr. See Note, p. 341.

The Hath for measuring cloth, turbands, &c. contains $18\frac{1}{4}$ English Inches.

For further particulars, see *Darwar*.

RANGOON. See vol. 1, p. 115 and 123.

RAULT,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

Three Seers have been transmitted from this place, which weigh as follow :

RAULT, *continued*.

	lb.	oz.	dr.
Khaus Seer	= 2	0	14
Avontah Seer, for grain	= 2	8	0
Ditto	= 1	9	14

The Guz contains 37 English Inches.

ROOMBHAREE,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

The Weights and Measures here are the same as at Ahmednuggur, except the following :

The Seer weighs 74 Ankosee Rupees = 1 lb. 13 oz. $2\frac{1}{4}$ dr.

The Seer of Capacity weighs 102 Ankosee Rupees ; and is divided and multiplied as follow :

	lb.	oz.	dr.
18 Tanks = 1 Pao Seer	= 0	10	$0\frac{1}{4}$
4 Pao Seers = 1 Seer	= 2	8	$3\frac{1}{2}$
2 Seers = 1 Adholee	= 5	0	$6\frac{1}{4}$
2 Adholees = 1 Pylee	= 10	0	$13\frac{1}{2}$
16 Pylees = 1 Maund	= 160	13	8
20 Maunds = 1 Candy	= 3217	9	0

ROONCH,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

	lb.	oz.	dr.
The Seer for Cotton	= 2	9	10
Grain	= 2	9	6

The Guz measures 38 English Inches.

RUNGYPORE,

A Town in the Province of Bengal.

The Standards received from this factory differ from their estimated Weight in Rupees as follows :—

RUNGYPORE, *continued.*

	Wt. by Rupees.	Real Weight.
	lb. oz. dr.	lb. oz. dr.
Seer of 60 Sicca Wt.	= 1 8 10	1 8 12
65 ditto	= 1 10 11	1 10 10.6
72 11 7	= 1 13 13.8	1 13 10.7
73 ditto	= 1 13 15.6	1 14 1.7
80 ditto	= 2 0 13.6	2 1 1
90 ditto	= 2 4 15.5	2 5 1
160 ditto	= 4 1 11.2	4 2 4

The Guz for measuring Baftae cloths=63 English Inches.

RUTLAM,

A Town in the Province of Malwa, under the Presidency of Bengal.

Weights.

	lb. oz. dr.
84 Salim Shye Rupees=1 Seer	= 2 0 6
5 Seers	= 1 Dhurree = 10 1 14
20 Seers	= 1 Maund = 40 7 8
12 Maunds	= 1 Maunee = 485 10 0

The above are the weights by which goods are bought, but they are sold by the Seer of 80 Rupees=1 lb. 14 oz. 13½ dr.

Spices, betel, &c. are sold by a Seer of 79 Rupees Weight=1 lb. 14 oz. 7½ dr.

ST. HELENA. See vol. 1, p. 306.

SALANGORE. See vol. 1, p. 115 and 123.

SALLOLPORE,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

	lb. oz. dr.
The Seer, Commercial Weight	= 2 4 8
The Seer for Cotton	= 2 8 2½
The Long Measures contain 38½ and 40½ English Inches.	

SANTIPORE,

A Town under the Presidency of Bengal.

The Standards received from this Factory differ from their estimated weight in Rupees as follows:

	Wt. by Rupees.	Real Weight.
	lb. oz. dr.	lb. oz. dr.
Seer of 60 Sicca Wt.	= 1 8 10	1 8 11.8
72 11 7	= 1 13 13.8	1 14 0.8
80 ditto	= 2 0 13.6	2 1 0.4
82 ditto	= 2 1 10.7	2 1 11.4
84 ditto	= 2 2 7.9	2 2 5.4
96 ditto	= 2 7 6.7	2 7 3

Export Warehouse.

	lb. oz. dr.
Seer, Factory Weight	= 1 13 7.8
Seer, Bazar Weight	= 2 0 14.4
Seer of 82 10	= 2 1 15

Import Warehouse.

	lb. oz. dr.
Factory Seer	= 1 13 13.7
Bazar Seer	= 2 0 13.6

Measure of Capacity.

The Seer of 80 Sicca Weight is found to contain 57.75 Cubic Inches.

Long Measure.

Two Measures of Length have been received, the one contains 18, and the other 36 Inches.

SCINDY. See vol. 1, p. 115 and 123.

SEESSOLURH,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

	lb. oz. dr.
The Retail Seer for Grain	= 1 15 1
Wholesale	= 2 2 9
The Long Measure	= 40½ English Inches.

SENNUR,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

	lb.	oz.	dr.
The Seer weighs $76\frac{1}{2}$ Ankosee Rupees	= 1	14	2
The Seer of Capacity weighs 95 Ankosee Rupees and 7 Massas	= 2	5	11

For further particulars, see *Ahmednuggur*.

SERAMPORE. See vol. 1, p. 123.

SERINGAPATAM. See vol. 1, p. 116 and 123.

SHEWGAWM,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

The Weights and Measures here are the same as at Ahmednuggur, except the Seer, which weighs 77 Ankosee Rupees = 1 lb. 14 oz. $5\frac{1}{4}$ dr.; and the Seer of Capacity which weighs $115\frac{1}{2}$ Ankosee Rupees = 2 lb. 13 oz. $8\frac{1}{2}$ dr.

SIAM. See vol. 1, p. 117 and 123.

SINKELL. See vol. 1, p. 118.

SOOLOO. See vol. 1, p. 118.

SOOMERPORE,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

	lb.	oz.	dr.
The Seer (Retail)	= 2	0	$9\frac{3}{4}$
(Wholesale)	= 2	3	$0\frac{1}{2}$

The Cloth Measure = $40\frac{1}{4}$ English Inches.

SOONAMOOKY,

A Town under the Presidency of Bengal.
Two Seers have been received from this Factory.

SOONAMOOKY, *continued*.

tory, viz. one of 58 10 Sicca Weight = 1 lb. 8 oz. $0\frac{1}{2}$ dr.; and the other of 60 Sicca Weight = 1 lb. 8 oz. 10 dr.

Poorseer Measures.

	lb.	oz.	dr.
Seer of 72 Sicca Weight	= 1	13	$9\frac{1}{2}$
73 $4\frac{1}{2}$	= 1	14	$1\frac{1}{2}$
75	= 1	14	$12\frac{1}{4}$
82 10	= 2	1	$14\frac{3}{4}$

Long Measures.

	Eng. Inches.
The Corah of the Native Merchants	= 52.4
for unbleached Linen	= 41.8
for bleached ditto	= 41.
The Long Measure used at the Factory	= 52.4
for unbleached Linen	= 43.4
for bleached ditto	= 42.6

SOOPA,

A Pergunnah near Surat, under the Presidency of Bombay.

The Maund contains $40\frac{1}{4}$ Seers of Surat = 38 lb. 3 oz. $4\frac{1}{4}$ dr.

For other Weights, Measures, &c. see *Surat*.

SOOPAH,

A Pergunnah in the District of Calpee, under the Presidency of Bengal.

	lb.	oz.	dr.
The Seer	= 2	0	$9\frac{1}{2}$
The Seer of Capacity	= 5	1	$7\frac{1}{4}$

The Long Measure = $39\frac{1}{4}$ English Inches.
For further proportions, see *Calpee*.

SUCCADANA. See vol. 1, p. 119.

SUMATRA. See *Acheen*, *Bencoolen*, *Fort Marlborough*, and *Natal*, in this Supplement.—*Palimbang*, vol. 1, p. 112 and 123. *Sinkell*, vol. 1, p. 118. *Tappanooly*, vol. 1, p. 120.

SUNDA ISLES. See *Sooloo*, vol. 1, p. 118.

SUNGANMAIR,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

The Seer of Capacity weighs 100 Ankosee Rupees=2 lb. 7 oz. 6½ dr.

The Weights are the same as those of Ahmednuggur.

SURAT,

A City in the Province of Gujrat, under the Presidency of Bombay.

In addition to the account of the Monies, Weights, and Measures of Surat, given in vol. 1, p. 119, the following particulars (which have been recently received by the Court of Directors) are of importance.

Goldsmiths' Weight.

		Gr.
1 Ruttee	=	1.95
3 Ruttees	= 1 Val	= 5.85
8 Ruttees	= 1 Massa	= 15.6
12 Massas	= 1 Tolla	= 187.5
35 Tollas	= 1 Seer	= 6563 or
		15 oz. Avoirdupois.

Weight for Pearls and Precious Stones.

		Gr.
1 Vassa	=	0.1423
20 Vassas	= 1 Ruttee	= 2.846
3 Ruttees	= 1 Val	= 8.538
8 Vals	= 1 Tank	= 67.3
32 Vals	= 1 Tolla	= 273.216

SURAT, continued.

Commercial Weight.

30 Surat Old Pice	} = 1 Seer
42 Surat New Pice	
40 Seers	= 1 Maund
7 Maunds	= 1 Small Harra
12 Maunds	= 1 Maunee
20 Maunds	= 1 Candy
21 Maunds	= 1 Large Harra
24 Maunds	= 1 Bhaur

Although the Surat Maund is said to contain only 40 Seers, or about 37½ lb. still it varies from 41 to 46 Seers; nor is the Candy uniformly confined to 20 Maunds.

	lb.	oz.	dr.
Grain of all kinds is sold by the	} = 37	8	0
Maund of 40 Seers			
Castor Oil by ditto of 40½ Seers	= 37	11	12½
Oil, cocoa-nut, ghee, cotton,	} = 39	6	0½
and spirits by ditto of 42 Seers			

Long Measure.

The Cloth Merchants' Guz, as well as that used by Carpenters and Bricklayers, is divided into 24 Tussoos. The former contains 27½, the latter 24 English Inches. The Hath or Cubit of 18 Tussoos, or 20.9 English Inches, is used in measuring bamboo mats only. The English Yard is in common use in all sales of European manufactures, and every description of cloth and piece goods.

Indian piece goods and a few other articles, are sold by the Corge of 20 pieces.

Timber Measure.

The Guz contains 20 Vussas or 200 Viswasees, and equals 27½ English Inches.

Land Measure.

		Eng. Inches.
4½ Tussoos	= 1 Viswasee	= 4.88
20 Viswasees	= 1 Vussa	= 97.6
20 Vussas squared	= 1 Beega	= { 2 Roods 17 Perches

SURBHAM,

A Pergunnah near Surat, under the Presidency of Bombay.

The Maund contains $39\frac{1}{4}$ Seers and 2 Pice of Surat = 37 lb. 4 oz. $4\frac{1}{4}$ dr.

For other particulars, see *Surat*.

TAPPANOOLY. See *Natal*.

TELLICHERRY. See vol. 1, p. 120 and 123.

TERNATE. See vol. 1, p. 120 and 123.

TOCOPA. See vol. 1, p. 121 and 123.

TONQUIN. See *Cachao*, vol. 1, p. 102.

TRANGANIA. See vol. 1, p. 121 and 123.

TRANQUEBAR. See vol. 1, p. 121 and 123.

TRINCOMALEE. See *Ceylon*, vol. 1, p. 104 and 122; and *Columbo*, p. 105 and 122.

TUMBUCK,

A District within the Collectorship of Ahmednuggur, under the Presidency of Bombay.

The Seer weighs 79 Ankosee Rupees and 4 Massas = 1 lb. 15 oz. $4\frac{1}{2}$ dr.

TUMBUCK, *continued*.

The Seer of Capacity weighs 99 Ankosee Rupees and 2 Massas = 2 lb. 7 oz. $1\frac{1}{2}$ dr.

For further particulars, see *Ahmednuggur*.

TURKESUR,

A Pergunnah near Surat, under the Presidency of Bombay.

The Maund contains 40 Seers 8 Pice of Surat = 37 lb. 12 oz. Avoirdupois.

For further particulars, see *Surat*.

UCKLESUR. See *Ocklesur*.

WALOR. See *Turkesur*.

WARUHA,

A Pergunnah near Surat, under the Presidency of Bombay.

The Weights and Measures here are the same as those of Surat, except the Maund, which contains $40\frac{1}{2}$ Seers of Surat = 37 lb. 15 oz. $8\frac{1}{2}$ dr.

WUNNU. See *Dindore*.

 As the foregoing Supplement may be considered as a COMMERCIAL GAZETTEER for Oriental Settlements, so its Index, which here follows, may serve as a DICTIONARY for explaining, by references, the Weights, Measures, and Monies of the East Indies.

INDEX TO THE SUPPLEMENT.

NOTE.—Such Terms as are contained in the Supplement, but not inserted in this Index, will be found explained in the General Index, p. 261 to 323, of this Volume.

EMAUMÉE RUPEE	331		10	KOOPANG, a Weight in Sumatra	343	
ESTO, a Long Measure in Sumatra.....	344		11	KOTAH PICE	347	
			86	KOTAH RUPEE	347	
				KUCHA PUNCHSEERY, a Weight of 2½ Seers	342	
				KUDVANAJEE PAGODA.....	329	17
F.				L.		
FUDDUCK PAGODA	329	16		LEE, a Weight in China	344	
FUNOKEE PAGODA.....	329	14		LUCKNOW RUPEE	348	
FURRUCKABAD RUPEE.....	344			M.		
G.				MADRAS MOHUR	329	3
GARAVA THAROKEE PAGODA.....	329	29		MADRAS RUPEE.....	330	38
GIRRAH, a Long Measure	340		75	MAHOMED SHAIÉ PAGODA	329	24
GOA RUPEE.....	331			MANIASA, a Weight and Measure ..	334, 336, 337	
GOCHEOH, a Long Measure in China ...	344			MANNASHIC RUPEE	331	96
GONJE, a Weight for Gold and Silver..	332, 342			MAPP, a Measure of Capacity.....	333	
GOVIND BUKSH RUPEE.....	330	58		MAS, a Weight in Sumatra.....	343	
GUDDAPUDDEE PAGODA	329	15		MAUNEE, a Weight and Measure	334, 336, 337, 358	
GUDDIANA, a Weight for Gold and Silver ..	333			MAYAM, a Weight in the Prince of Wales' Island	353	
H.				MERITCH HOOKAREE RUPEE	331	78
HADEED, a Long Measure in Arabia.....	339			MODAPUDDEE PAGODA	329	19
HAILOH, a Long Measure in Sumatra	344			MOODHOLE PERKANEE RUPEE	331	91
HALLEE SICCA RUPEE.....	330	49		MUKUNSYE RUPEE	330	66
HALLEE SICCA PAGODA	329	18		MULKAPOOR ditto	331	77
HARRA, a Weight.....	358			MULLARSHIE ditto	330	53
HASTA, a Measure of Length and a Land Measure	354			MUN, a Liquid Measure	342	
HATH, a Cloth Measure	333, 354, 358			MYSORE RUPEE.....	331	76
HERPONHILEE PAGODA	329	26		N.		
HOON, a Weight, and also a Long Measure in China	344			NAGPORE RUPEE	330	59
HOOT, a Weight in China	344			NARRAINPET ditto.....	331	79
I. AND J.				NAVAR THAROKEE PAGODA	329	28
INDORE RUPEE	330	57		NAVEE EKEE PAGODA	329	33
JANKHAL, a Long Measure in Sumatra	344			NEPANEE PERKANEE RUPEE	331	89
JEEREPUTKA RUPEE	330	45		O.		
JOONA ELAYE PAGODA	329	32		OUGEIN RUPEE	330	56
JUMKUNDEE RUPEE	331	82		P.		
JYENUGGREE ditto	331	95		PAILY, a Measure of Capacity	337	
K.				PAKHA, a Measure of Capacity in Sumatra..	351	
KEPING, a Weight in Sumatra	343			PAO, a Measure of Capacity ..	332, 340, 341, 345	
KITTOOR SHAPOOREE RUPEE	330	55		PATNA RUPEE	353

WORKS BY THE SAME AUTHOR.

AN INTRODUCTION TO SPHERICS AND NAUTICAL ASTRONOMY.

This Work is executed on a new, easy, and practical plan. The rules of Stereographic Projection are familiarly explained, and illustrated by comparing each diagram with the corresponding positions of a Globe. The figures are on a very large scale; and all the problems, both of Spheric Trigonometry and Astronomy, are solved by projection and calculation.

An orthographic projection is devised for clearing the lunar distances from parallax and refraction, in order to find the longitude at sea, with a simple method of calculating this important problem. An Appendix on Time is added, including directions for the use of Chronometers, Transit Instruments, and other Apparatus of an Observatory.

The Fifth Edition.

THE ELEMENTS OF BOOK-KEEPING,

Comprising a System of Merchants' Accounts, founded on real Business, and adapted to modern Practice; with an Appendix on Exchanges, Banking, and other commercial Subjects.

The Seventh Edition.

METROLOGY;

OR,

AN EXPOSITION OF WEIGHTS AND MEASURES;

Chiefly those of Great Britain and France, with Laws and local Customs relating to the Subject: also, Parliamentary Reports, and other important Documents.

ASTRONOMICAL COMPUTATIONS,

Relating principally to Time and the Longitude; comprising sundry Illustrations and Tables useful in practical Astronomy and Navigation.

The above Works may be had of the Publishers of the present Volumes.

OUTLINE OF THE PLAN
OF THE
FINSBURY SQUARE ACADEMY.

THIS Academy is chiefly intended for finishing the Education of Young Gentlemen in COMMERCIAL and MATHEMATICAL LEARNING. It is particularly calculated for such as have been brought up at the Public Schools, or other Classical Seminaries, and who wish to be expeditiously qualified for foreign or domestic Trade, the Public Offices, the Navy, or the Service of the East-India Company.

The Classics and modern Languages are likewise taught, and Students are prepared for the University, or instructed during their College Vacations.

The Establishment is adapted both for the Reception of Boarders and for Pupils who attend only during the Hours of Instruction. The Accommodations are liberal, and eminent Masters are employed in every Department.

There are belonging to this Institution different Schools, detached from the Dwelling-House, and appropriated to particular Branches of Learning. There is also an OBSERVATORY, with an accurate and extensive Apparatus, intended to give to Students in Astronomy and Navigation a practical Knowledge of those important Sciences.
